I asked Fell what changes he'd seen in the University.

"The University has grown," he told me. "This is a good thing. Bucknell is becoming more selective about students and faculty, which makes for a better education. One of the main places I see this is in the growth of my department, which I'm very happy about. Young blood is a good thing, and the new teachers I've met are great professors."

But he also saw areas for improvement.

"One of the things that's bothered me for a long time is the homogeneity...at Bucknell. [What] I'd like to see is an increase in cultural diversity," Fell said. "Students learn from other students, and they could learn more if there were many more different types of students here."

Fell was an influence here at the University, and his life has not slowed down since he retired. He has won many distinguished honors from the University, including the Clarke F. Ansley Award from Columbia University, Bucknell's Lindback Award for Distinguished Teaching in 1990, the Homer Price Rainey Medal in 1994, as well as many others.

Now that he's retired, Fell won't stop doing what he loves.

"I try to do philosophy every morning—both reading and some writing. One of the main things I do is that I'm chairman of a fund at Williams college in honor of John William Miller, my philosophy professor," he said.

There's more to Fell's life than philosophy, as evidenced by his involvement in other activities.

"I also play the piano some. I'm also a bit of a hi-fi nut, so I fiddle with updating my stereo, which gets more and more elaborate all the time," he said. "I walk a fair amount—I live right across from the playing fields on Route 15, so I walk out my front door and hit the playing fields out by the Art Barn. I also love to write letters—I think letter-writing is kind of a dying art, unfortunately; this is a sign of how things are changing. I have a lot of correspondence with former students. I compensate for not being a teacher by keeping up with many of my students, and I love hearing from them."

When asked what advice he would give to philosophy students now, Fell thought for a moment.

"I guess the main thing that comes to mind is to immerse yourself in the history of philosophy until you can't stand it anymore and it's coming out of your ears," he said. "There's been a kind of de-emphasis on the history everywhere, but in fact the history is essential—you can't understand contemporary philosophy without it. As Miller taught and as I tried to teach, 'There are a great many things permanently established.'"

As for the future, Fell says he will stay here. "I'll be here in Lewisburg. I'd like to get out and do some lectures. Some of my students teach all over the place, and I would like to get out there and talk to philosophy students."

Due to his hard work, dedication and love for the student body, Fell has helped influence the lives of many people here. His ideas can be appreciated by the members of the student body: "Cast the nets widely—experiment! You might just fall in love with a subject you never thought possible."

National News

Former FBI section chief pleads guilty, admits destroying Ruby Ridge report

WASHINGTON — An FBI executive pleaded guilty to obstruction of justice yesterday after admitting in federal court that he had destroyed an internal FBI report criticizing the bureau's handling of the 1992 siege at Ruby Ridge, Idaho.

As part of his plea, E. Michael Kahoe agreed to cooperate with federal prosecutors looking into the possibility that other FBI officials were involved in a cover-up of the actions that took place during the nine-day standoff outside white separatist Randy Weaver's mountain cabin.

Weaver's wife and son, and a federal marshal were shot to death during the nine-day standoff.

The lead federal prosecutor, U.S. Attorney Michael Stiles, said he has not promised Kahoe he will remain out of prison. Kahoe could be sentenced to up to 10 years in prison and a $250,000 fine. However, the judge granted the prosecutor's request that no sentencing date be set, and that Kahoe be released without posting bond.

TWA fuel probe tests shed no light on cause of explosion

WASHINGTON — Tests conducted on two fuel probes from the center fuel tank of TWA Flight 800 could not determine whether the explosion that killed 230 people was caused by a bomb, missile or mechanical failure, investigators said yesterday.

The probes were the only components on the plane whose wiring runs inside the center fuel tank, making them a possible source of ignition.

The tests ruled out the possibility that the probes had "arced," or sent a spark into the tank, said Shirly Hazle, spokeswoman for the National Transportation Safety Board.

One of the two probes found last week showed signs of "petaling," a curling pattern of metal damage that can be caused by high explosives.

However, Hazle said the tests showed the "petaling" was the result of the explosion in the center fuel tank, not high explosives.

CIA, Pentagon deny chemical weapons cover-up

WASHINGTON — The Pentagon and the CIA denied yesterday they are withholding evidence that thousands of U.S. troops were exposed to chemical weapons during the Persian Gulf War.

The charge was made by Patrick Eddington, a CIA intelligence analyst during the Gulf War who said he saw "a pattern of deception and denial, and it is continuing to this day."

The 33-year-old Eddington has since resigned from the CIA and is writing a book about chemical weapons in the Gulf War. His wife, Robin, also resigned from the agency.

"The idea that the Defense Department has engaged in any sort of conspiracy to cover up any information regarding Gulf War illness is simply not true," Pentagon spokesman Bryan Whitman said. "We have nothing to hide. As we learn new information, we provide it as rapidly as possible."

"All of the information Mr. Eddington brought forward was looked at by the CIA and provided to the presidential advisory commission," said CIA spokesman Mark Mansfield. The commission is reviewing allegations that U.S. troops were exposed to chemical agents during the 1990-1991 Gulf War.

Jenny Jones to testify in talk show murder trial

PONTIAC, Michigan — Talk show host Jenny Jones is expected to testify today in a murder trial after a judge ruled yesterday that she is a relevant witness to the defense of Jonathan Schmitz.

Schmitz, 26, is accused of first-degree murder in the shotgun death of Scott Amedure, 32, three days after Amedure revealed he had a crush on Schmitz during a taping of the "Jenny Jones" show about secret admirers.

Defense attorney James Burdick said he hoped to call Jones to the stand this afternoon.

"She's going to have to explain why they did things the way they did and why she went out of her way for the sake of ratings to yank every last bit of emotion of Jon," Burdick said.

Jones' appearance as a witness was cleared by Oakland County Circuit Judge Francis O'Brien, who granted a defense motion that her testimony is relevant to Schmitz' defense.

World News

S. African apartheid assassin jailed for life

PRETORIA, South Africa — Eugene de Kock, an assassin for South Africa's former whites-only government, was sentenced to life in prison yesterday. The former head of a secret police unit, known by his colleagues as "Prime Evil," is the highest ranking officer convicted so far for apartheid crimes.

A life sentence is the maximum possible in South Africa, where the death penalty has been abolished. There remains a chance, however, that de Kock, 47, will not have to serve any significant prison time following his 18-month trial.

He has asked for amnesty from South Africa's Truth and Reconciliation Commission. The panel, headed by Nobel Peace Prize-winner Desmond Tutu, can free perpetrators of human rights abuses who confess and prove their deeds were politically motivated.

One victim was Bheki Mlangeni, who left a widow and son, and who was a lawyer for the now ruling African National Congress (ANC), before his head was blown of by a booby-trapped cassette player mailed to him by De Kock in 1991.

Yeltsin's foes call for top aide to resign

MOSCOW — Gennady Seleznyov, the communist speaker of Russia's lower house of parliament, demanded the ousting of President Boris Yeltsin's chief of staff yesterday, accusing Anatoly Chubais of promoting a business associate to the powerful Security Council.

Chubais has been under increased fire from other Russian officials, with some saying that he is attempting to grab too much power while Yeltsin prepares for heart surgery and a lengthy recuperation.

Yeltsin's foes unleashed a fierce volley of potshots at Chubais yesterday after the president put one of Chubais' wealthy associates — auto and media mogul Boris Berezovsky — on the Security Council.

Enraged, Seleznyov decried what he called an invasion of the "holiest of holies" — the inner sanctum of national security — and demanded Chubais' resignation.

Zaire, Rwanda edge closer to war

KIGALI — Zaire and Rwanda moved closer to war yesterday after two days of trading artillery fire across their border and a Rwandan military operation into Zaire. "There is every indication that we are going in that direction," Rwandan Vice President Paul Kagame told a news conference in the capital Kigali.

French President Jacques Chirac called for an international conference on the mounting tensions between the two countries.

Kagame said Rwanda would be forced to respond if faced with what he termed Zairean aggression. "If Zaire brings the war to us we shall fight Zaire ... even though we seek no war with Zaire," said Kagame, who is also Rwanda's defense minister.

Later, Rwandan Lt. Col. Firmin Kagame told reporters in the border town of Cyangugu he sent "a good-sized" force of troops into Zaire after nightfall on Tuesday in retaliation for Zairean firing into Rwanda.

"After they hit our territory and injured and killed our people and hit civilians we were forced to retaliate," the commander said.

Settlers, extremists threaten peace process

JERUSALEM - Tensions are mounting in the West Bank town of Hebron amid fears that Jewish extremists might stage a violent effort to scuttle the peace process and the planned withdrawal of Israeli troops.

Israel wants to create a buffer zone between the 94,000 Palestinians and 450 Jewish settlers to prevent "an explosion of the whole system," chief Israeli negotiator Dan Shomron said yesterday.

A leaflet distributed in Hebron on Tuesday urged settlers to fire on Palestinian police if they were seen in Jewish areas.

"One does not need great sacrifice to destroy the agreement in Hebron," the leaflet said. "There are other ways to create friction that will harm them." The leaflet was signed by a group calling itself "Suppressing Traitors."

Meanwhile Jewish settlers are protesting Israel's planned troop redeployment, partly because they do not believe the Palestinians can be trusted. Israeli Prime Minister Benjamin Netanyahu has expressed his own misgivings.

"We insist on an ideal called reciprocity. It means that when we are asked to fulfill our sides of a contract, we expect the other side to fulfill it as well," the Prime Minister said.

SPEAKING

From page 1

who are experts in this field," said Geoffrey Schneider, visiting assistant professor of economics. In addition, engineers or science majors may argue that a public speaking requirement is not necessary for their field.

The faculty has expressed the seriousness of public speaking training at the University.

"It is so important that students learn how to convey their ideas in a cogent manner in the future. I see my students sway back and forth or stare directly at their textbooks while they speak. They don't notice it, but that does leave an impression on the audience," said Peter Kresl, professor of economics.

"I believe that course descriptions should state whether or not it stresses public speaking. While it should be optional, our faculty should continue encouraging more expert public speakers to visit certain classes throughout the year," said Kresl

The issue of a public speaking requirement is far from being settled, and as Schneider states, "It's constantly being argued at faculty meetings."

Colleen Dempster '97, said "I think that would be a good addition to the educational program already offered at Bucknell. Public speaking builds self-confidence and can only prepare students even more for life after college."

"I wouldn't be ecstatic, but I suppose it would be a good idea," Charles Burckmyer '99, said. "A large percentage of Bucknell students have a severe phobia of speaking in public."

STUDY

go abroad...This will result in the deterioration of their education."

Beard said that the University has other options besides mandating an earlier deadline, such as observing the rising trends and "overprojecting" the numbers if necessary to prevent a loss of money.

"Students may select programs on a casual or uninformed basis" because of being rushed to meet deadlines, Murphy said. "That would be the worst thing."

But Rowe said that most sophomores are already planning ahead if they want to go abroad. In her experience, the student who makes up his or her mind at the last minute is the exception.

"I know that's going to happen for a few individual students," she said, adding that every exception will be reviewed on a case by case basis. "Our policy has always been to be as flexible as we can be."

"We're not putting a cap on spring enrollment," she said.

Under the new policy, students who want to go abroad in the spring do not need to get final approval until the fall semester, allowing them more time to decide which program they wish to attend. However, the memo distributed to sophomores explaining the new procedures to apply for off-campus study stated emphatically in bold letters that no late applications will be accepted after the February deadline.

This new deadline may in fact help students looking to study off campus spring semester, Rowe said. A few programs are "very competitive" and "fill up very quickly," requiring applications for spring enrollment in May.

The new policy does not upset Lauren Schmierer '99, who is planning to go abroad in the spring.

"It doesn't bother me because I would plan that far ahead anyway," she said.

But she did recognize the trouble the early deadline would impose on other students who may not be as organized.

"A lot more students will be able to go abroad if they utilize the old policy," she said.

"A lot of students will miss out. I think there will be a decline in the number of students who will go abroad."

Cheri Kantola '99, who is also planning on studying off campus next spring, said she likes the new deadline.

"I think it's a better policy because it starts you thinking about it earlier," she said. "It gets the ball rolling."

Without the earlier deadline, Kantola said she would delay researching her options, whereas now she has an incentive to begin looking at programs and talking to her adviser.

> *"I think it's a better policy because it starts you thinking about it earlier. It gets the ball rolling."*
> *—Cheri Kantola '99*

PORTABELLA MUSHROOM VEGETABLE BURGERS

Before the image of the California tofu-munching vegetarian leaps into your mind, consider the flavors integrated in this flame-broiled substitute. Teetering at the height of the "gourmet" wild mushrooms, portabellas infuse their surroundings with an intense texture and manner, while the onions, cheeses and fresh herbs offer their own variety of pleasure. Although no combination of vegetables can simulate the smoky and sizzling memory of a backyard summer picnic, these vegetable burgers take a valiant stab at updating your palate.

Ingredients:

1 head fresh broccoli
1 large red onion
1 medium Spanish onion
2 cloves garlic
1 T olive oil
2 large carrots
1 pound portabella mushrooms
1 cup natural tomato sauce
4 oz. Monterey Jack cheese, grated
2 t salt
2 t freshly ground pepper
2 eggs, lightly beaten
2 cups Total Corn Flakes
_ cup bread crumbs
assortment of fresh herbs (basil, thyme, parsley)

1. Finely chop the broccoli (florets only), onions, and garlic cloves. Lightly sauté the onions in olive oil until slightly translucent, adding garlic and broccoli. Continue to heat for 3-5 minutes at medium heat. Remove from burner and cover tightly, setting aside and allowing the broccoli to steam.

2. Peel and shred carrots into a large bowl. Prepare portabella mushrooms by carefully peeling the outer skin (work outwards toward the center, pulling back triangular sections), snapping the stem out, and tapping out any excess dirt. Coarsely grate mushrooms into the same bowl. Add cheeses, salt and pepper.

3. Prepare herbs by washing (if necessary) and finely chopping. Add these with onion and broccoli mixture to the bowl in step 2. Toss in tomato sauce, beaten eggs, corn flakes (crushed *after* measuring) and bread crumbs, mixing until all ingredients are completely integrated.

4. Preheat oven to 375°F. Brush baking sheets with olive oil very sparingly. Form burgers carefully, working them until they hold their shape. (At this point it may be necessary to add more cereal or bread crumbs so that burgers may be formed.) Bake for approximately 15 minutes each side, flipping at the halfway point. Use your own judgement; burgers should become slightly crusty on the edges. Cool the burgers on pans, loosening after a few minutes.

Serve immediately...Alternately, store in an airtight container in the refrigerator or freeze in bags. To reheat, defrost in the microwave for 90 seconds each and bake for a few minutes at 450°F, until hot.

Popular consumption of "veggie burgers" requires finely sliced onions, sprouts, tomatoes and lettuce on a toasted bagel or crunchy wheat bread, thickly sliced. Additional cheese, probably sharp cheddar (the monterey is rather mild) melted open-face lends a thrill to those seeking to escape low fat. Otherwise, the Portabella Mushroom Vegetable Burgers retain fairly low amounts of fat (4g), assuming 16 burgers. Flavor (and fat content) may be enhanced with more cheese (maybe 8 oz.), although this is generally unnecessary, as the mushrooms and onions demand plenty of attention.

Retiree reflects on life at Bucknell

BY TED BURNES
Bucknellian Staff Writer

When they hear the word "Sesquicentennial," many students think simply of the birthday of Bucknell. However, many people fail to realize the true meaning of this word.

Have you ever thought of how many people lived and events have happened during the 150 years that the University existed? Many members of an earlier Bucknell community have enriched the University with their teachings, ideas and presence.

One such person is Joseph Fell, who taught in the University's philosophy department from 1963 to 1993. Fell was not only a teacher, he is also a distinguished philosopher, author, columnist, speaker and consultant. Why did he retire and what is he doing now? I decided to find out.

Fell and I met at the Seventh Street Cafe, where the smell of coffee provided a great atmosphere forour conversation. Fell, a very personable, amiable man, was full of stories about the University's past.

Fell smiled when he recalled how he started at the University. "I remember when I came here for a job interview years ago in the middle of winter," he told me. "It had just been snowing, very overcast; everything looked bleak. I thought, 'I could never live here; how could I survive?'"

This negative first impression did not last long.

"After being here six months, I fell in love with Lewisburg," he said. "I loved the quaintness of the town: the clean air, low crime rate, thought it was a great place to bring up kids. My love for the area was what made me stay here, and is still as strong as ever."

And indeed, rural Lewisburg must have been quite a change for Fell, who grew up in Troy, NY, an urban area.

Philosophy is one of Fell's great loves.

"My love for philosophy happened when I was in college at Williams, but it happened totally by accident. I wanted to major in Classics, Greek and Latin, but I didn't get started soon enough and I hadn't taken enough courses," Fell said.

Because of his late start, Fell didn't have enough time to take the required courses in Classics before he graduated to get a degree in that area.

"This came as a great blow to me—what was I going to do? At the same time, I had signed up for a philosophy class with a teacher named Professor Miller, and it just blew me away. When I began the course, I really felt threatened by it—but then I fell in love with it—that was the beginning."

That was the beginning of a life in philosophy for Fell. However, he did not start out with the idea of being a teacher. After college, he went to Union Theological Seminary for a year.

"I learned a lot [at Union], but I wasn't sure I was up for a career in philosophy. So, I let myself be drafted; the army shipped me off to Hawaii for almost two years; I wanted to go to Vienna, but Hawaii wasn't a bad way to go. By the time I got out of the army, I knew I wanted to go into college, so I enrolled in Columbia and did my graduate work there," he said.

Fell then went to Penn State for a year before arriving at Bucknell.

Fell admitted he loved teaching at the University and still loves being a part of the community. Retired and living in Lewisburg, he still enjoys coming back for events at the Weis Center and to talk. He recently gave a philosophical talk in Bucknell Hall.

Fell retired because his wife became ill. She passed away a year later in 1994.

His two children, both of whom grew up in the area, are "long grown and have flown the coup. For this reason, people always ask me, 'Joe, when are you going to move away and get out of the area? Your house must be haunted with the memory of your wife and your family,' and I always reply, ' I'm not moving—I love the area, and I love the proximity to the students and the events at Bucknell.'"

Fell has fond memories of teaching at the University.

"I guess the strongest memory is the greatness of teaching at a relatively small college. There's a real campus and a real kind of community. It's terribly different thing than teaching at Columbia, where your life is sort of split between the city and the school and where the students all go home to Brooklyn or Queens," Fell said.

"Bucknell is a real round-the-clock community," he added. "I also adore teaching in an undergraduate setting—I guess because I receive the opportunity to be with students so much... at a younger, more formative age then when they are in graduate school."

Fell believes that students should take advantage of their time and the experiences available at the University.

"My advice to students is to experiment, cast the nets widely. In order to find things that you like, you must take risks and don't stick with things you feel safe with. This is a four-year opportunity to do something you will never be able to do again," he said.

I asked Fell what changes he'd seen in the University.

"The University has grown," he told me. "This is a good thing. Bucknell is becoming more selective about students and faculty, which makes for a better education. One of the main places I see this is in the growth of my department, which I'm very happy about. Young blood is a good thing, and the new teachers I've met are great professors."

But he also saw areas for improvement.

"One of the things that's bothered me for a long time is the homogeneity...at Bucknell. [What] I'd like to see is an increase in cultural diversity," Fell said. "Students learn from other students, and they could learn more if there were many more different types of students here."

Fell was an influence here at the University, and his life has not slowed down since he retired. He has won many distinguished honors from the University, including the Clarke F. Ansley Award from Columbia University, Bucknell's Lindback Award for Distinguished Teaching in 1990, the Homer Price Rainey Medal in 1994, as well as many others.

Now that he's retired, Fell won't stop doing what he loves.

"I try to do philosophy every morning—both reading and some writing. One of the main things I do is that I'm chairman of a fund at Williams college in honor of John William Miller, my philosophy professor," he said.

There's more to Fell's life than philosophy, as evidenced by his involvement in other activities.

"I also play the piano some. I'm also a bit of a hi-fi nut, so I fiddle with updating my stereo, which gets more and more elaborate all the time," he said. "I walk a fair amount—I live right across from the playing fields on Route 15, so I walk out my front door and hit the playing fields out by the Art Barn. I also love to write letters—I think letter-writing is kind of a dying art, unfortunately; this is a sign of how things are changing. I have a lot of correspondence with former students. I compensate for not being a teacher by keeping up with many of my students, and I love hearing from them."

When asked what advice he would give to philosophy students now, Fell thought for a moment.

"I guess the main thing that comes to mind is to immerse yourself in the history of philosophy until you can't stand it anymore and it's coming out of your ears," he said. "There's been a kind of de-emphasis on the history everywhere, but in fact the history is essential—you can't understand contemporary philosophy without it. As Miller taught and as I tried to teach, 'There are a great many things permanently established.'"

As for the future, Fell says he will stay here. "I'll be here in Lewisburg. I'd like to get out and do some lectures. Some of my students teach all over the place, and I would like to get out there and talk to philosophy students."

Due to his hard work, dedication and love for the student body, Fell has helped influence the lives of many people here. His ideas can be appreciated by the members of the student body: "Cast the nets widely—experiment! You might just fall in love with a subject you never thought possible."

EDITORIAL

Third Party candidates offer alternative options

Next Tuesday, American women and men will decide who will lead their country into the 21st century. Among those voters will be approximately 73% of the University's students, according to a recent *Bucknellian* poll of 288 students.

The number of Bucknell students planning to vote is extremely high, surpassing national estimates that only 50 to 55 percent of the population will turn to the voting booth. The majority of our campus cares enough about the political system to go through the sometimes difficult process of obtaining an absentee ballot. This is something we should be proud of.

However, *The Bucknellian* found some disparaging information as well. While 34 percent of the students said they considered themselves Republican, GOP candidate Bob Dole would have gathered only 28 percent of the vote if the election was held around the time of the poll.

On the other hand, Clinton had the support of 38 percent of the students polled, despite the fact that only 17 percent considered themselves Democrats.

While Clinton may be a popular president, it's more likely that students don't know for whom they want to vote. The undecided portion of our student body was fairly stable in both party affiliation (33 percent) and candidate choice (29 percent).

Even loyal Democrats and Republicans are complaining about their choices. Instead of voting for the best candidate, many people say they cast their ballot in favor of the candidate they believe is the lesser of two evils.

Students should be aware that there are other options available besides the two party choices. The so-called third parties, recently popularized by but not limited to Ross Perot and the Reform party, offer alternative choices other than the traditional candidates.

Finding out about these other choices may seem to be an overwhelming task, but it's not. It's as easy as searching the World Wide Web, where most candidates have web pages detailing their party platforms.

While many believe that voting for a third party candidate is throwing their vote away, that's not the case. There may be slim to no chance that a third party candidate will win the election, but the number of votes he or she receives will alert the next president as to the mood and desires of the country. A vote is never ignored or wasted.

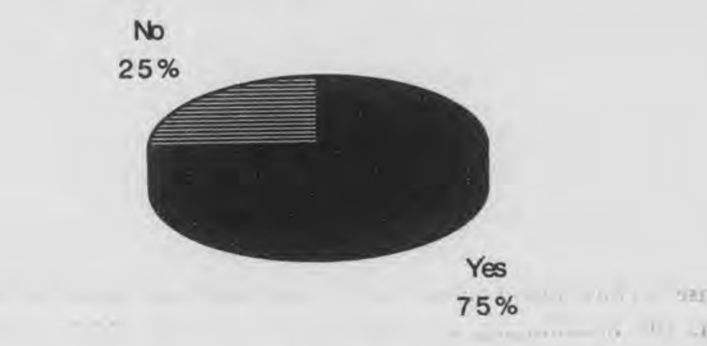
As an example, look at Perot. No one dreamed that he would garner such national attention during the last presidential election. As a result, the two traditional candidates realized that a portion of the American population was dissatisfied. They took measures to lure these voters back into the mainstream by attempting to address the issues that caused them to turn away.

Every option in the 1996 election should be weighed carefully. Only when voters seriously consider every possibility can an educated choice be made. Whether voters finally decide to support one of the traditional candidates or a third party candidate, at least they will cast their ballot in favor of the candidate they believe will do the best job, rather than the candidate they hope will present the country with the least amount of worries.

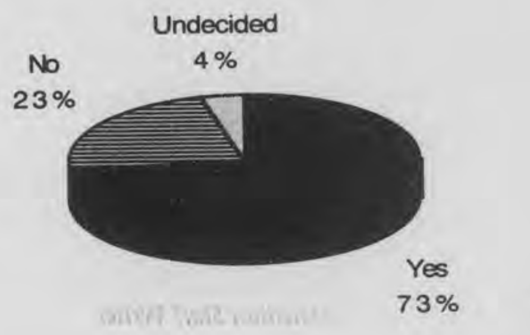
OPINIONS

Election Year '96 Student Poll Results

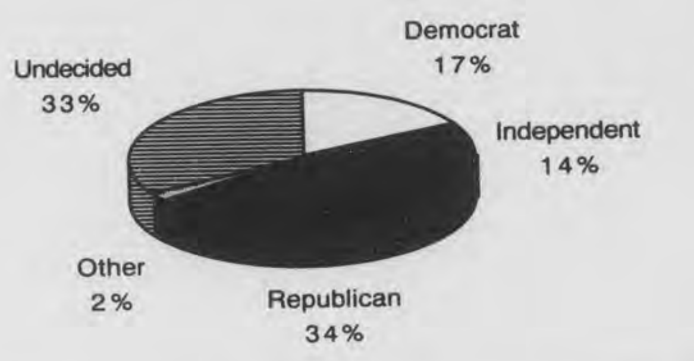
Are you registered to vote?



Do you plan to vote in the election?



With which political party do you affiliate yourself?



How the poll was conducted

These are the results of a poll of 288 students conducted October 17 to October 23. Lists off students and their telephone numbers were randomly generated and then distributed to members of *The Bucknellian* staff. The poll was conducted anonymously over the telephone by *Bucknellian* staff members, who used a script containing the following questions:

1.) Are you registered to vote?
2.) Do you consider yourself an A. Democrat, B. Republican, C. Other, or D. Undecided?
3.) Do you plan to vote in the election on November 5?
4.) If the election were today, would you vote for A. Clinton, B. Dole, C. Other, or D. Undecided?

The responses were then tallied.

**The pie chart for question #4 is found on page 1*

Say good-bye to Texas and hello to German if you don't cast your vote

By Kristin Skarie

Director of Student Activities for the League of Women Voters

Here it is again, election season. The scene is familiar. The candidates are jockeying for position. The pollsters are placing their bets. The reporters have their binoculars pointed at the track. There's only one problem. The stands are nearly half-empty.

That's the way it was in the 1992 presidential election, when only 55 percent of eligible voters showed up at the polls. Bill Clinton received 43 percent of the votes cast which means he was elected by fewer than 25 percent of eligible voters.

In the 1994 congressional elections, the turnout was 36 percent of eligible voters which means much less than half of us had a say in who would be representing us in Congress. These were important elections. In 1992, the Democrats took over the White House. In 1994, the Republicans took over Congress.

Whether you are Republican, Democrat, Independent, Libertarian, Green Party or not registered to vote at all, your life has been affected by the outcome of these elections.

We have seen changes in our government as a result of these elections—changes in the role government plays in our lives, changes that touch every aspect of our lives. Yet, a great many of us had no say in deciding who would be making those changes. Health care, taxes, Social Security, defense, crime, jobs and YOUR education are affected by these elections.

There are many reasons why some people vote and some don't. Older people vote more than younger people. People who have lived in one place longer tend to vote more. Married people vote more than single people.

The big difference between voters and nonvoters is obvious—voters think the election matters and nonvoters don't. Nonvoters don't see the connection between elections and the issues that concern them and are less likely to believe they have access to accurate information about the candidates and their positions on issues.

For many, it is lack of information about the basics of how to get registered, where to vote and how to use the voting machine; a system that could be intimidating for anyone regardless of their education level. For many nonvoters it is difficult to picture their one vote making a difference.

The following are many examples in US history where one vote made a difference:

In 1776, one vote gave the United States the English language instead of German.

In 1845, one vote brought Texas into the Union.

In 1865, one vote gave Rutherford B. Hayes the U.S. Presidency.

In 1920, one vote gave women the right to vote.

It is our right, our responsibility and our duty as citizens to participate in our democracy. With so few of us voting, is the US a legitimate democracy? Do we have a representative government? Are we aware of how elections shape our future?

When the issue of down-sizing the economy comes up, it is not someone else's job they are talking about, it's your job. When the issue of preexisting conditions comes up it's not somebody else's health care they are talking about, it's yours. When the issue of tuition tax credits comes up, it's not somebody else's education they are talking about, it's your education.

This election is about your future and the future of your family. The outcome of the 1996 election is going to determine what course our government takes on issues that affect our houses, our streets, our schools and our paychecks. Shouldn't we have a say?

As President of the League of Women Voters of the Lewisburg Area (LWV-LA), I have the opportunity to work with our members and other community leaders in educating voters about the upcoming election and general voter issues. We provide numerous programs and services to assist voters such as voter registration, the Voters Guide (available in the LC downhill lobby and the Office of Student Activities), Candidates Nights, and presentations to school groups.

The League of Women Voters is a nonpartisan, consensus-based organization of women and men dedicated to maintaining successful communities through citizen education and study and action on a wide variety of issues. Health care, education, recreation, waste management, water quality and regional planning have been our local issues with our current study on the nature of poverty in Union County. In addition, we have partnerships with many local programs and organizations including the Central Susquehanna Valley Transportation Project dealing with the redesign of Route 15, the Union County Conservation District, and the Lewisburg Community Center.

The 1996 election is expected to have only a 50 percent voter turn out. Do your part and play a role in the democracy of the United States.

One vote makes a difference—it could be yours!

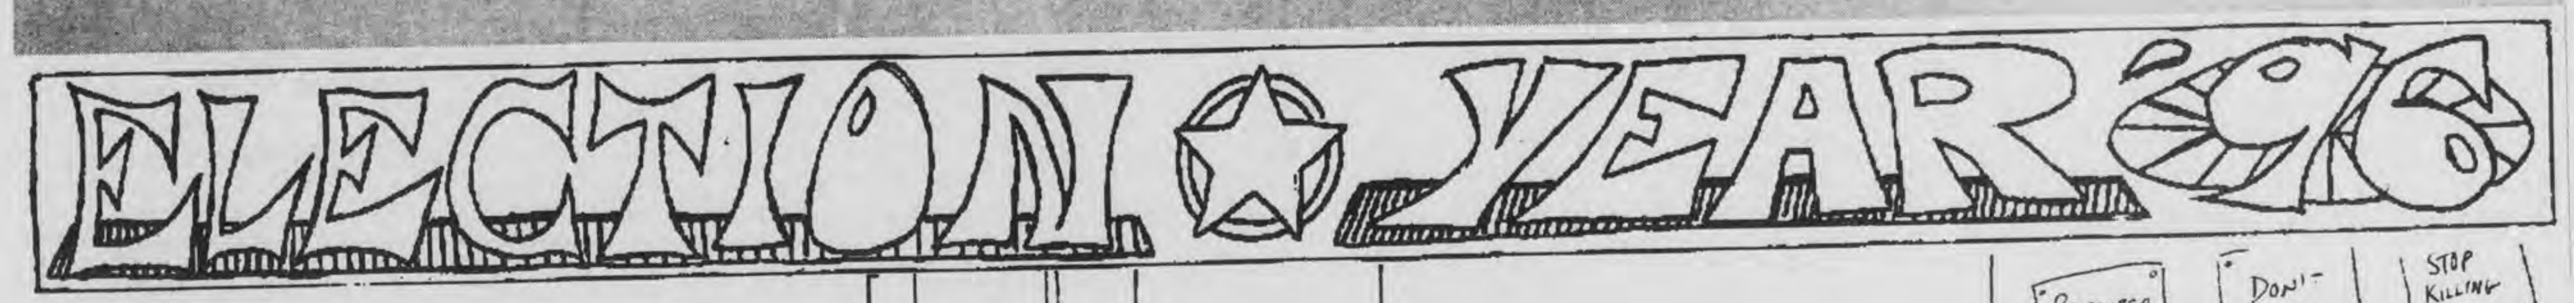
OPINIONS



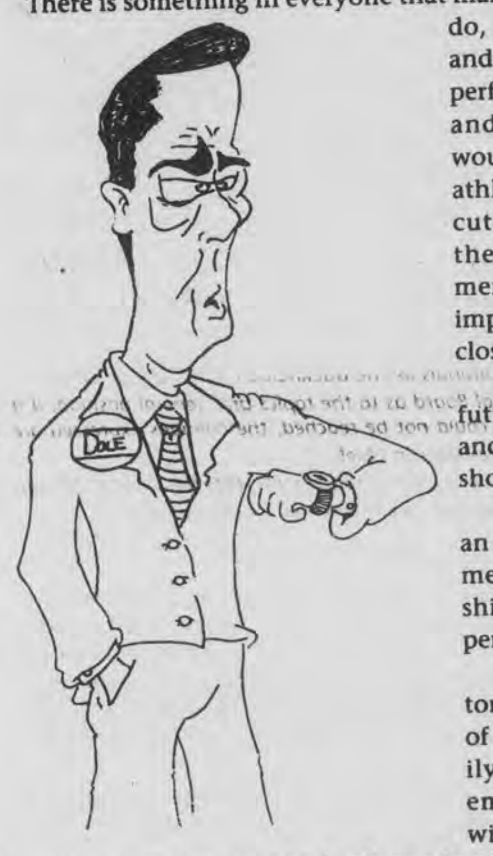
Clinton runs for ideas while Dole is running against ghosts

By Paula Zimmerman and Allison Price

On Behalf of the College Democrats

> It just stirs you up, like it wants to blow you down,
> Twisting and churning up the sand,
> Leaving all the scarecrows lying face down,
> Face down in this hard land.
>
> *—Bruce Springsteen*

This election season politicians of both parties spent a lot of time trying to convince us we are not scarecrows in the sand, that we indeed matter and that a vote is something sacred. In the case of the Republican party, they are talking out of both sides of their mouth. Vote for them, find your voice in government as part of their own rhetoric, but in the end, government cannot help anyone. This is a sell-out.



There is something in everyone that makes them good at what they do, even the very best. Each and every vocation in life has a perfect moment of realization and purpose or else society would grind to a stand-still—athletes and their perfectly executed motions, lawyers and their flawless closing statement, teachers reaching that impossible kid, businesspersons closing the perfect deal.

As politicians profess their futility, they sell themselves, and even more importantly, us short.

They deny the need to have an authentic belief in government and concept of citizenship. Even citizenship has its perfect moments.

Faults aside, President Clinton has given Americans a few of these perfect moments. Family and Medical leave allows employees to take time off, without pay, to care for sick family members or for the birth or adoption of a child and be guaranteed they will have a job to return to after the allotted time is up. The Kennedy-Kassebaum bill enables workers who are laid off to retain their health insurance through their search for another job. These are the givens in life, but Bill Clinton has made them law.

Guaranteeing student loans and grants allows all students to reach their fullest potential, regardless of their socioeconomic background. Clinton's support of Head Start is the logical first step to better futures for all of America's children.

Women's health is suddenly a primary and valid issue, with the new focus on breast cancer prevention, treatment and research as well as the tougher legislation attacking domestic violence. Americorps succeeds in spreading around the picture perfect moments. People are rewarded for the natural yet often devalued inclination to give back to their communities.

Frankly, in light of the criticism Clinton has faced, there has to be something in politics that enables you to accept your shortcomings, but never concede to them.

Not that all the criticism of Bill Clinton has been unwarranted. There have been missteps along the way. No one is pleased with what ultimately has ended up as non-scandals and allusions to vague wrong doings that have plagued the Clinton White House.

More importantly, there were the myopically weak policy decisions. The welfare reform bill defies explanation. The veto of the Gay Marriage Act—what was he thinking? Three strikes and you're out mandatory sentencing is totally contrary to the basic philosophy of the American justice system.

In reality, the biggest problems with President Clinton are that he likes to be liked too much and his belief that if you have these wonderfully noble and sound policies everyone must be able to see the light as clearly as you yourself. With a second term and the corresponding liberation of no more reelection campaigns, this tendency will dissipate.

Can you imagine President Clinton, the first-year president, standing up to the misogyny and sheer idiocy of banning dilation and extraction procedures (or as the propaganda skews it, partial-birth abortions). No matter how badly the GOP wishes it, Clinton is not a liberal. However, he still has a fighting chance to become one.

Can you imagine voting for a candidate who doesn't support these ideals, not because he doesn't believe them, but because it is politically inopportune?

That is worse than a generally misguided ideology that voters are just not choosing this time around. Clinton runs for ideas, Dole runs against ghosts. This is a good way to run a campaign, but a bad way to run a government.

Journalist William Grieder once wrote how politicians inevitably reflect the voters. Sometimes the reflection is accurate, and other times it is one of those fun house images that has your head at five times its normal size.

It is the responsibility of American citizens to perfect the image. It is this power which stops the churning and turning and replaces it with clarity and possibility.

Voting will stop history from repeating itself

By Nora Daniels

Bucknellian Staff Writer

Improving voter turnout is a focus of both political parties as Campaign '96 draws to a close. The apathy of the American public is front page news in national papers like *The New York Times*, and this apathy is evident on campus, too. Answers to the question, "why?" are the basics of years past—history once again repeats itself. Change was a byword of the 1992 elections, and promises to implement change helped Bill Clinton into the White House. Funny how life is not too different, too changed, compared to the George Bush years. Voters notice this, and despite the fact that they want change, they decide to not vote, realizing that politicians will not bring the desired changes, no matter what they promise.

The politicians themselves have not evolved much: Their verbal wars and mudslinging are just variations on the theme that has dominated bipartisan politics throughout its history. Their ideas center around lower taxes and better health care, but many remember the "read my lips, no new taxes" proclamation of the 1980s and how untrue it was. Clinton claims he can do better than Dole; Dole claims he can do better than Clinton, and the apathetic public has seen it all before.

Look at the choices: Dole and Clinton. Perot, though technically running, will not win, so he is forgotten. Hence, the two candidates are of different parties, Republican and Democrat, but they seem similar. Could they be interchangeable? If not, they still remain the uninspiring offerings of this year's election. Apathetic Americans may question the point of voting for one or the other, as they are not unique.

For many Americans, life is pretty good. The economy is steady, crime isn't affecting Middle America, and the hot spots of the world are not boiling, so people are focusing on the good and on themselves. They do not want to think about the problems of America, and the problems are what the election is all about. And so they avoid them by not voting.

American apathy may or may not be as simple as this, but it is definitely something to consider. As the election draws near, it is time for every citizen to evaluate his attitudes about politics and voting—and then, maybe, history will not repeat itself yet again.

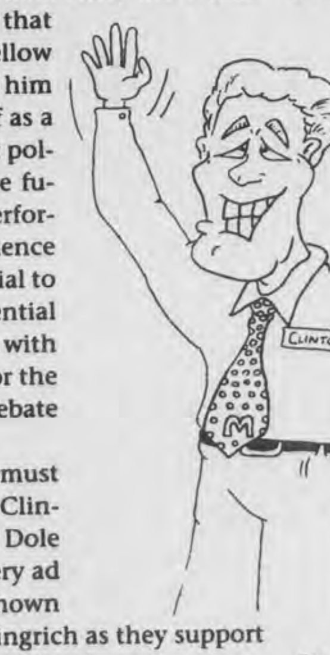
Clinton's smile is the secret to his success

By Argun Ulgen

Bucknellian Staff Writer

The election of 1996 pits two candidates that are evenly matched. Each candidate has shown that they have particular strengths and weaknesses that will have a direct effect on America's progress as this decade comes to a close. And while some say that Bob Dole's experience in Congress would give him the advantage in the upcoming election, it is Bill Clinton who will easily emerge as the victor. It also seems that people will see Clinton's policies as the lesser of the two evils in this upcoming election.

Bob Dole is most certainly the more experienced candidate. His more than 30 years in Congress has made many voters accustomed to his views and policies. As president, Bob Dole would enter the White House with connections to certain Congressmen that he has dealt with for years. Unfortunately for fellow Republicans, his experience has also presented him with a few problems. His age may turn voters off as a president who will depend on working with past policies, rather than "building a bridge towards the future," as stated by Bill Clinton. Also, Dole's performances during the debate did not use his experience to provide a solid political platform that is essential to make a serious run at the presidency. No presidential candidate has ever ended a concluding statement with a suggestion to see his web site. And hopefully for the Republican party, no candidate will ever end a debate as weakly as Dole again.



When speaking of Bob Dole's campaign, we must also put Newt Gingrich into the equation. Bill Clinton has successfully been able to connect Bob Dole with the increasingly unpopular Gingrich in every ad he has broadcasted. These advertisements have shown gloomy, black and white pictures of Dole and Gingrich as they support tax increases and go against drug policy. Meanwhile, the same advertisements have shown a colorful and caring Bill Clinton at the Oval Office. The result of these advertisements is the average voter's second guessing of Bob Dole's speeches and debates, and the shifting of this voter to Bill Clinton's side.

On the other hand, Bill Clinton has a bit of "lady luck" on his side as the election day rapidly approaches. Besides the fact that his advertisements have had tremendous success in linking Bob Dole with Mr. Gingrich, it seems that the business cycle is playing right into his hands. For most of his presidency, our economy has undergone rampant fluctuations in unemployment and inflation. There have been a few other periods of time where our economy prospered under Clinton. After each period, our economy either suffered through high inflation or unemployment. For those who regularly study economics, one would notice that this may only be a few months of economic success (right now, we have a fairly low unemployment, etc.). Fortunately for Clinton, these are the best months to have financial growth.

Furthermore, Clinton has the upper hand of being a visionary in this election. Bill Clinton, much like Jimmy Carter or even JFK (though his performance as president does no justice to JFK), has presented himself as a progressive in this campaign. He has presented himself as a president who is willing to look to the future and as a president who wants to preserve the health and success of the people. This year (coincidentally the year of elections), he has shown his progressive nature by passing the Brady Bill and floating-rate Treasury notes. Meanwhile, Bob Dole has been using his experience to gain the upper hand, even if his debates have sounded scripted and he has no political platform.

For the average television viewer, personality also comes heavily into play when deciding who to vote for. It is a shame that many voters have to rely on the personality of a politician (which doesn't say much for those who have a true understanding of a politician). Nevertheless, Clinton has presented himself as a charismatic and caring president who is willing to look to the future and care for the average American. Meanwhile, besides the few dry jokes that he has presented during the debates, Dole has tried to establish himself as a serious president whose experience and wisdom can lead us to prosperity. Both personalities are respectable, but as history shows (from JFK's youthful exuberance to Jimmy Carter's commercials on the farms), Clinton's charisma will give him an advantage come election day.

Bob Dole may deserve to be president of the United States after his 30 years of service in Congress. But the truth of the matter is that he is not capable of getting the public to follow him. Whether it is his lack of overflowing charisma or his tendency to go off on tangents, Bob Dole has not been able to get the job done as a campaigner. And in a society where the majority of our population bases its decisions about our government from the headlines of newspapers or advertisements, campaigning is the single most important factor in winning a presidency. Therefore, we should see Bill Clinton's charismatic smile in the Oval Office once again. The smile may be fake, but it sure does know how to get the votes.

EDITORIAL

Third Party candidates offer alternative options

Next Tuesday, American women and men will decide who will lead their country into the 21st century. Among those voters will be approximately 73% of the University's students, according to a recent *Bucknellian* poll of 288 students.

The number of Bucknell students planning to vote is extremely high, surpassing national estimates that only 50 to 55 percent of the population will turn to the voting booth. The majority of our campus cares enough about the political system to go through the sometimes difficult process of obtaining an absentee ballot. This is something we should be proud of.

However, *The Bucknellian* found some disparaging information as well. While 34 percent of the students said they considered themselves Republican, GOP candidate Bob Dole would have gathered only 28 percent of the vote if the election was held around the time of the poll.

On the other hand, Clinton had the support of 38 percent of the students polled, despite the fact that only 17 percent considered themselves Democrats.

While Clinton may be a popular president, it's more likely that students don't know for whom they want to vote. The undecided portion of our student body was fairly stable in both party affiliation (33 percent) and candidate choice (29 percent).

Even loyal Democrats and Republicans are complaining about their choices. Instead of voting for the best candidate, many people say they cast their ballot in favor of the candidate they believe is the lesser of two evils.

Students should be aware that there are other options available besides the two party choices. The so-called third parties, recently popularized by but not limited to Ross Perot and the Reform party, offer alternative choices other than the traditional candidates.

Finding out about these other choices may seem to be an overwhelming task, but it's not. It's as easy as searching the World Wide Web, where most candidates have web pages detailing their party platforms.

While many believe that voting for a third party candidate is throwing their vote away, that's not the case. There may be slim to no chance that a third party candidate will win the election, but the number of votes he or she receives will alert the next president as to the mood and desires of the country. A vote is never ignored or wasted.

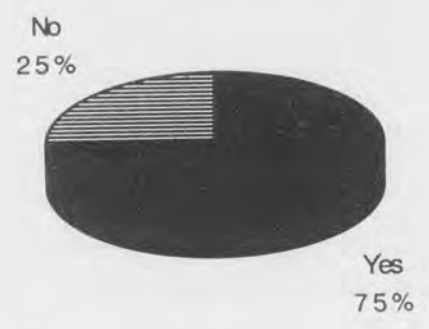
As an example, look at Perot. No one dreamed that he would garner such national attention during the last presidential election. As a result, the two traditional candidates realized that a portion of the American population was dissatisfied. They took measures to lure these voters back into the mainstream by attempting to address the issues that caused them to turn away.

Every option in the 1996 election should be weighed carefully. Only when voters seriously consider every possibility can an educated choice be made. Whether voters finally decide to support one of the traditional candidates or a third party candidate, at least they will cast their ballot in favor of the candidate they believe will do the best job, rather than the candidate they hope will present the country with the least amount of worries.

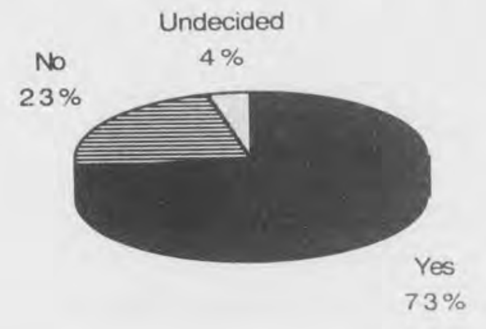
OPINIONS

Election Year '96 Student Poll Results

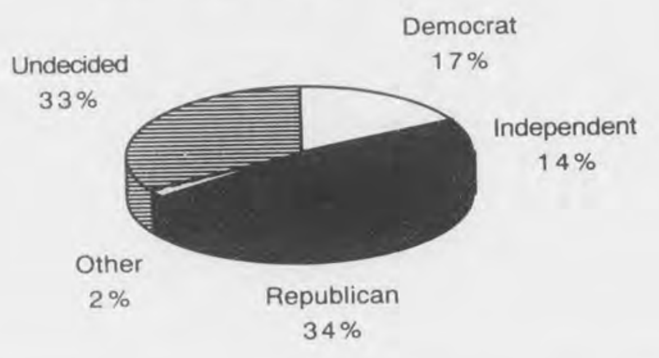
Are you registered to vote?



Do you plan to vote in the election?



With which political party do you affiliate yourself?



How the poll was conducted

These are the results of a poll of 288 students conducted October 17 to October 23. Lists off students and their telephone numbers were randomly generated and then distributed to members of *The Bucknellian* staff. The poll was conducted anonymously over the telephone by *Bucknellian* staff members, who used a script containing the following questions:

1.) Are you registered to vote?
2.) Do you consider yourself an A. Democrat, B. Republican, C. Other, or D. Undecided?
3.) Do you plan to vote in the election on November 5?
4.) If the election were today, would you vote for A. Clinton, B. Dole, C. Other, or D. Undecided?

The responses were then tallied.

**The pie chart for question #4 is found on page 1*

Say good-bye to Texas and hello to German if you don't cast your vote

BY KRISTIN SKARIE

Director of Student Activities for the League of Women Voters

Here it is again, election season. The scene is familiar. The candidates are jockeying for position. The pollsters are placing their bets. The reporters have their binoculars pointed at the track. There's only one problem. The stands are nearly half-empty.

That's the way it was in the 1992 presidential election, when only 55 percent of eligible voters showed up at the polls. Bill Clinton received 43 percent of the votes cast which means he was elected by fewer than 25 percent of eligible voters.

In the 1994 congressional elections, the turnout was 36 percent of eligible voters which means much less than half of us had a say in who would be representing us in Congress. These were important elections. In 1992, the Democrats took over the White House. In 1994, the Republicans took over Congress.

Whether you are Republican, Democrat, Independent, Libertarian, Green Party or not registered to vote at all, your life has been affected by the outcome of these elections.

We have seen changes in our government as a result of these elections—changes in the role government plays in our lives, changes that touch every aspect of our lives. Yet, a great many of us had no say in deciding who would be making those changes. Health care, taxes, Social Security, defense, crime, jobs and YOUR education are affected by these elections.

There are many reasons why some people vote and some don't. Older people vote more than younger people. People who have lived in one place longer tend to vote more. Married people vote more than single people.

The big difference between voters and nonvoters is obvious—voters think the election matters and nonvoters don't. Nonvoters don't see the connection between elections and the issues that concern them and are less likely to believe they have access to accurate information about the candidates and their positions on issues.

For many, it is lack of information about the basics of how to get registered, where to vote and how to use the voting machine; a system that could be intimidating for anyone regardless of their education level. For many nonvoters it is difficult to picture their one vote making a difference.

The following are many examples in US history where one vote made a difference:

In 1776, one vote gave the United States the English language instead of German.

In 1845, one vote brought Texas into the Union.

In 1865, one vote gave Rutherford B. Hayes the U.S. Presidency.

In 1920, one vote gave women the right to vote.

It is our right, our responsibility and our duty as citizens to participate in our democracy. With so few of us voting, is the US a legitimate democracy? Do we have a representative government? Are we aware of how elections shape our future?

When the issue of down-sizing the economy comes up, it is not someone else's job they are talking about, it's your job. When the issue of preexisting conditions comes up it's not somebody else's health care they are talking about, it's yours. When the issue of tuition tax credits comes up, it's not somebody else's education they are talking about, it's your education.

This election is about your future and the future of your family. The outcome of the 1996 election is going to determine what course our government takes on issues that affect our houses, our streets, our schools and our paychecks. Shouldn't we have a say?

As President of the League of Women Voters of the Lewisburg Area (LWV-LA), I have the opportunity to work with our members and other community leaders in educating voters about the upcoming election and general voter issues. Clinton runs for ideas while Dole is running against ghosts

BY PAULA ZIMMERMAN AND ALLISON PRICE

On Behalf of the College Democrats

> It just stirs you up, like it wants to blow you down,
> Twisting and churning up the sand,
> Leaving all the scarecrows lying face down,
> Face down in this hard land.
>
> —*Bruce Springsteen*

This election season politicians of both parties spent a lot of time trying to convince us we are not scarecrows in the sand, that we indeed matter and that a vote is something sacred. In the case of the Republican party, they are talking out of both sides of their mouth. Vote for them, find your voice in government as part of their own rhetoric, but in the end, government cannot help anyone. This is a sell-out.

There is something in everyone that makes them good at what they do, even the very best. Each and every vocation in life has a perfect moment of realization and purpose or else society would grind to a stand-still—athletes and their perfectly executed motions, lawyers and their flawless closing statement, teachers reaching that impossible kid, businesspersons closing the perfect deal.

As politicians profess their futility, they sell themselves, and even more importantly, us short.

They deny the need to have an authentic belief in government and concept of citizenship. Even citizenship has its perfect moments.

Faults aside, President Clinton has given Americans a few of these perfect moments. Family and Medical leave allows employees to take time off, without pay, to care for sick family members or for the birth or adoption of a child and be guaranteed they will have a job to return to after the allotted time is up. The Kennedy-Kassebaum bill enables workers who are laid off to retain their health insurance through their search for another job. These are the givens in life, but Bill Clinton has made them law.

Guaranteeing student loans and grants allows all students to reach their fullest potential, regardless of their socioeconomic background. Clinton's support of Head Start is the logical first step to better futures for all of America's children.

Women's health is suddenly a primary and valid issue, with the new focus on breast cancer prevention, treatment and research as well as the tougher legislation attacking domestic violence. Americorps succeeds in spreading around the picture perfect moments. People are rewarded for the natural yet often devalued inclination to give back to their communities.

Frankly, in light of the criticism Clinton has faced, there has to be something in politics that enables you to accept your shortcomings, but never concede to them.

Not that all the criticism of Bill Clinton has been unwarranted. There have been missteps along the way. No one is pleased with what ultimately has ended up as non-scandals and allusions to vague wrong doings that have plagued the Clinton White House.

More importantly, there were the myopically weak policy decisions. The welfare reform bill defies explanation. The veto of the Gay Marriage Act—what was he thinking? Three strikes and you're out mandatory sentencing is totally contrary to the basic philosophy of the American justice system.

In reality, the biggest problems with President Clinton are that he likes to be liked too much and his belief that if you have these wonderfully noble and sound policies everyone must be able to see the light as clearly as you yourself. With a second term and the corresponding liberation of no more reelection campaigns, this tendency will dissipate.

Can you imagine President Clinton, the first-year president, standing up to the misogyny and sheer idiocy of banning dilation and extraction procedures (or as the propaganda skews it, partial-birth abortions). No matter how badly the GOP wishes it, Clinton is not a liberal. However, he still has a fighting chance to become one.

Can you imagine voting for a candidate who doesn't support these ideals, not because he doesn't believe them, but because it is politically inopportune?

That is worse than a generally misguided ideology that voters are just not choosing this time around. Clinton runs for ideas, Dole runs against ghosts. This is a good way to run a campaign, but a bad way to run a government.

Journalist William Grieder once wrote how politicians inevitably reflect the voters. Sometimes the reflection is accurate, and other times it is one of those fun house images that has your head at five times its normal size.

It is the responsibility of American citizens to perfect the image. It is this power which stops the churning and turning and replaces it with clarity and possibility.

Voting will stop history from repeating itself

BY NORA DANIELS

Bucknellian Staff Writer

Improving voter turnout is a focus of both political parties as Campaign '96 draws to a close. The apathy of the American public is front page news in national papers like *The New York Times*, and this apathy is evident on campus, too. Answers to the question, "why?" are the basics of years past—history once again repeats itself. Change was a byword of the 1992 elections, and promises to implement change helped Bill Clinton into the White House. Funny how life is not too different, too changed, compared to the George Bush years. Voters notice this, and despite the fact that they want change, they decide to not vote, realizing that politicians will not bring the desired changes, no matter what they promise.

The politicians themselves have not evolved much: Their verbal wars and mudslinging are just variations on the theme that has dominated bipartisan politics throughout its history. Their ideas center around lower taxes and better health care, but many remember the "read my lips, no new taxes" proclamation of the 1980s and how untrue it was. Clinton claims he can do better than Dole; Dole claims he can do better than Clinton, and the apathetic public has seen it all before.

Look at the choices: Dole and Clinton. Perot, though technically running, will not win, so he is forgotten. Hence, the two candidates are of different parties, Republican and Democrat, but they seem similar. Could they be interchangeable? If not, they still remain the uninspiring offerings of this year's election. Apathetic Americans may question the point of voting for one or the other, as they are not unique.

For many Americans, life is pretty good. The economy is steady, crime isn't affecting Middle America, and the hot spots of the world are not boiling, so people are focusing on the good and on themselves. They do not want to think about the problems of America, and the problems are what the election is all about. And so they avoid them by not voting.

American apathy may or may not be as simple as this, but it is definitely something to consider. As the election draws near, it is time for every citizen to evaluate his attitudes about politics and voting—and then, maybe, history will not repeat itself yet again.

Clinton's smile is the secret to his success

BY ARGUN ULGEN

Bucknellian Staff Writer

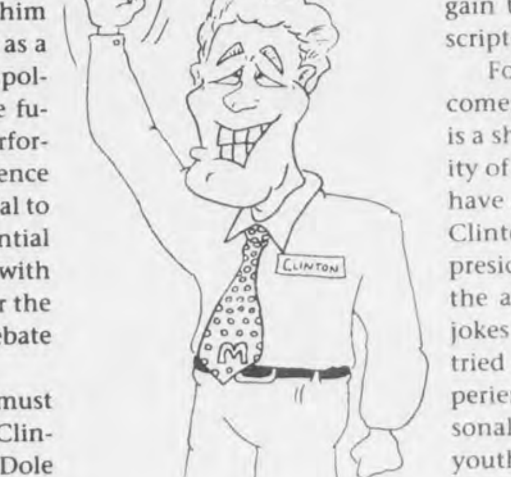
The election of 1996 pits two candidates that are evenly matched. Each candidate has shown that they have particular strengths and weaknesses that will have a direct effect on America's progress as this decade comes to a close. And while some say that Bob Dole's experience in Congress would give him the advantage in the upcoming election, it is Bill Clinton who will easily emerge as the victor. It also seems that people will see Clinton's policies as the lesser of the two evils in this upcoming election.

Bob Dole is most certainly the more experienced candidate. His more than 30 years in Congress has made many voters accustomed to his views and policies. As president, Bob Dole would enter the White House with connections to certain Congressmen that he has dealt with for years. Unfortunately for fellow Republicans, his experience has also presented him with a few problems. His age may turn voters off as a president who will depend on working with past policies, rather than "building a bridge towards the future," as stated by Bill Clinton. Also, Dole's performances during the debate did not use his experience to provide a solid political platform that is essential to make a serious run at the presidency. No presidential candidate has ever ended a concluding statement with a suggestion to see his web site. And hopefully for the Republican party, no candidate will ever end a debate as weakly as Dole again.

When speaking of Bob Dole's campaign, we must also put Newt Gingrich into the equation. Bill Clinton has successfully been able to connect Bob Dole with the increasingly unpopular Gingrich in every ad he has broadcasted. These advertisements have shown gloomy, black and white pictures of Dole and Gingrich as they support tax increases and go against drug policy. Meanwhile, the same advertisements have shown a colorful and caring Bill Clinton at the Oval Office. The result of these advertisements is the average voter's second guessing of Bob Dole's speeches and debates, and the shifting of this voter to Bill Clinton's side.

On the other hand, Bill Clinton has a bit of "lady luck" on his side as the election day rapidly approaches. Besides the fact that his advertisements have had tremendous success in linking Bob Dole with Mr. Gingrich, it seems that the business cycle is playing right into his hands. For most of his presidency, our economy has undergone rampant fluctuations in unemployment and inflation. There have been a few other periods of time where our economy prospered under Clinton. After each period, our economy either suffered through high inflation or unemployment. For those who regularly study economics, one would notice that this may only be a few months of economic success (right now, we have a fairly low unemployment, etc.). Fortunately for Clinton, these are the best months to have financial growth.

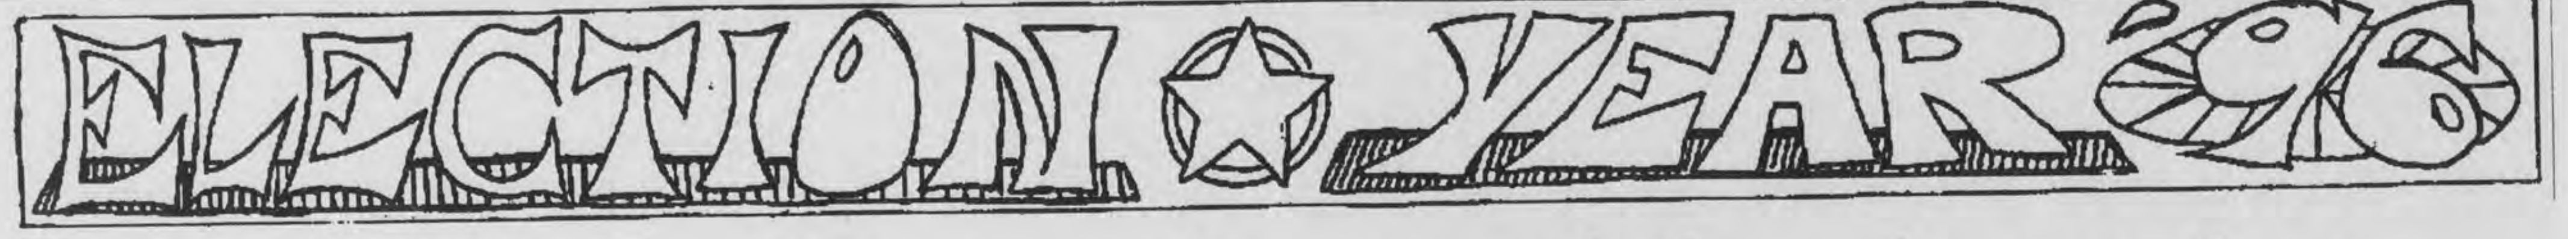
Furthermore, Clinton has the upper hand of being a visionary in this election. Bill Clinton, much like Jimmy Carter or even JFK (though his performance as president does no justice to JFK), has presented himself as a progressive in this campaign. He has presented himself as a president who is willing to look to the future and as a president who wants to preserve the health and success of the people. This year (coincidentally the year of elections), he has shown his progressive nature by passing the Brady Bill and floating-rate Treasury notes. Meanwhile, Bob Dole has been using his experience to gain the upper hand, even if his debates have sounded scripted and he has no political platform.



For the average television viewer, personality also comes heavily into play when deciding who to vote for. It is a shame that many voters have to rely on the personality of a politician (which doesn't say much for those who have a true understanding of a politician). Nevertheless, Clinton has presented himself as a charismatic and caring president who is willing to look to the future and care for the average American. Meanwhile, besides the few dry jokes that he has presented during the debates, Dole has tried to establish himself as a serious president whose experience and wisdom can lead us to prosperity. Both personalities are respectable, but as history shows (from JFK's youthful exuberance to Jimmy Carter's commercials on the farms), Clinton's charisma will give him an advantage come election day.

Bob Dole may deserve to be president of the United States after his 30 years of service in Congress. But the truth of the matter is that he is not capable of getting the public to follow him. Whether it is his lack of overflowing charisma or his tendency to go off on tangents, Bob Dole has not been able to get the job done as a campaigner. And in a society where the majority of our population bases its decisions about our government from the headlines of newspapers or advertisements, campaigning is the single most important factor in winning a presidency. Therefore, we should see Bill Clinton's charismatic smile in the Oval Office once again. The smile may be fake, but it sure does know how to get the votes.

OPINIONS



A little bit of Perot is good for America

By Chris Ellis

Bucknellian Staff Writer

This is by no means an endorsement of Ross Perot.

Believe me when I say that the principles of Mr. Perot's candidacy are not ones that I tend to agree with. In fact, I find most of Perot's viewpoints and statements to be economically impossible, hopelessly idealistic, or just flat-out loony. But that doesn't mean that he is not a powerful, influential and above all, necessary force in American politics.

With the election less than one week away, voters are once again awash in an atmosphere of confusion. Bob Dole and Bill Clinton, by force both political moderates, are once again doing what they can to muddy up the political scene once. The Republican speaks eloquently of community responsibility to the weak; the Democrat speaks forcefully of the need to trim back an oppressive federal government. The Republican lauds the benefits of a minimum-wage increase; the Democrat hails the passing of the burdensome American "welfare state."

Neither candidate can be blamed for this strategy. President Clinton, whose lead in opinion polls has fluctuated somewhat but has been consistently intimidating, has no need to rock the boat now; he simply has to ride the wave of political moderation to four more years in office. Saying anything that could be construed as too far to the left would allow him to be labeled with America's newest dirty word: "liberal."

Bob Dole is in a similar position. While moderate-to-conservative politics are America's newest zeitgeist, President Clinton has already claimed the views of most moderate Republicans for his own. To make a powerful, oppressive statement about abortion, welfare or the like would allow for too many similarities to unpopular Republicans—Pat Buchanan, Alan Keyes, Jesse Helms, etc. Therefore, Dole's only remaining strategy is to duck all mention of issues and instead concentrate on attacking Mr. Clinton's personal character and ethics, a strategy that, as of now, has backfired.

So with each candidate simply playing the role of political spin doctor, voter apathy has been understandably high. Forty percent less people watched the presidential debates of 1996 than 1992, and overall American voter turnout may be as low as it has been in any Presidential election year.

So, what spices politics up? Controversy. FDR. Richard Nixon. Ronald Reagan. What do these three Presidents have in common? Virtually nothing, except for the fact that people tend to have strong opinions about them. Did FDR's "New Deal" save America? Or did it force the country into a tax-and-spend debt cycle from which it will never recover? Was Nixon a great leader who rescued diplomacy as we know it? Or was he a self-serving political mastermind who was corrupt on all levels? These three men are, without a doubt, three of the most controversial—and influential—presidents of the twentieth century.

But aside from political controversy, these three men sparked something else—voter interest. Look at voter turnout rates for the time period when these three men were running for office. No matter what type of political climate America was in at the time, voters turned out in droves to profess their support—or contempt—for all three.

Some argue that voter turnout will be low this year because the Presidential race is all but decided. With a deficit of about 20 percentage points to overcome, it would take a near-miracle for Bob Dole to recover and win the election. But even in 1984, when the Reagan-Bush ticket was busy blowing Democratic challengers Walter Mondale and Geraldine Ferraro out of the water (Mondale carried only his home state of Minnesota in the 1984 race), voter turnout was far higher than what is expected this year. Why? Because both candidates were, if nothing else, controversial.

Reagan took political, economic, and social stands that were unequivocally conservative—stands that were met with some resistance but were adamantly held to by Reagan. Mondale, meanwhile, was considered to be nothing less than a Swedish socialist-democrat, whose views of the economy and social welfare were about as polarized from Reagan's as a rational candidate's could be. This stark contrast between the two men bred contempt, controversy, and, above all, excitement. Americans had a real choice—they had a side to choose, a philosophy to believe in, a reason to vote—if not for one candidate, then most definitely *against* the other .

In 1996, we have no such luxury. What we have is two politically-correct, middle of the road candidates, neither of whom is capable or ready to add some heat to the campaign. A similar situation existed in 1992—Bill Clinton was still Bill Clinton, and George Bush may as well have been Bob Dole. But something was different in 1992: voters *cared*. They cared about the candidates. They cared about the issues. At the very least, the cared enough to vote. Why? Because controversy and enthusiasm was injected into that campaign, injected by the presence of Ross Perot.

Americans have a wide variety of opinions of Perot. To some, he is the white knight of the American working class and the savior of American business. To others, he is an eccentric businessman with funny hair who really has no business in political affairs. But everybody has an opinion about him. Like him or hate him, you watched politics to see Ross.

In the 1992 election, he was everywhere. His 30-minute infomercials were placed on television with all the frequency of *The Price is Right*. His infamous pie charts and bar graphs were on posters, placards, and advertisements all across the nation. More importantly, though, he was allowed to appear on a level forum with the two "major" candidates.

In an age of political correctness, waffling and spin-doctoring, Perot was a breath of badly-needed fresh air to the American electorate. No matter how unpopular or reviled they may have been, Perot never compromised his stands. And, when he was allowed to participate on a par with the other candidates—most notably, during debates—he would hammer home his ideas, basically *forcing* viewers to think about his candidacy and the issues that he championed.

And think they did. Perot's supporters rallied behind him with almost cult-like fanaticism, and his opponents rallied against him with equal fervor. But even in alienating votes from him, Perot was returning them to the realm of political thought. Voters thought more about the election and turned out at the polls accordingly.

Unfortunately, 1996 has brought oppression of Perot's political party. His opinions, viewed as too inflammatory and too dangerous for the politically-correct 1996 campaign, have been pushed aside by Clinton and Dole alike. His absence from the Presidential debates was most noticeable. His overall support may be diminished from 1992, but his ability to attract an audience hasn't. The debate formula was simple: no Perot, no viewers, no pressure, no problem. With Perot absent, both Dole and Clinton were allowed, even encouraged, to stand at their podiums, give a few newsworthy sound bytes, and sit down unscathed. Very little was really accomplished in the debates, and the electorate was apathetic about what was accomplished, because there was no real reason to pay attention. There was no spice, no excitement.

But it shouldn't have been this way. Ross Perot was, and still is, the only way to generate excitement in the political campaign and, more importantly, interest in the issues. The 1996 election may serve to give Bill Clinton another four more years in office, but it has given the American people nothing: no real candidate to identify with, no real candidate to identify *against*, no real reason to stay informed and, perhaps worst of all, no real reason to vote. Disinterest in the political system and pertinent political issues, especially among America's youth, is one of the worst problems plaguing America as we enter the 21st century. Apathy and ignorance among the American electorate, apathy bred from campaigns like these, will serve to do nothing but destroy the American political process of the new era. The whole issue of political apathy and ignorance can be summed into one basic question, a question that most voting members of the American electorate need to find a way to address—If Americans are ignorant of the process of change, how can any real, positive change be accomplished?

If Ross Perot were permitted to respond to that, I wonder what he would have to say.

Republican Congress Clinton's only hope of reform

By Todd Zeranski

Bucknellian Staff Writer

I wish that the Presidential race turned out like the recent World Series—exciting and suspenseful. However, the fact is that Dole never crafted a consistent attack against Clinton. Such a distinctly ad hoc strategy—one day demeaning Clinton as a dangerous "liberal" (a label that no longer arouses any discontent among the public); the next day touting his $550 billion tax cut plan (which the public didn't buy into anyway); excoriating the "liberal media;" etc., weakened Dole immensely.

So it is no longer useful or even entertaining to speculate over the Presidential race. It's old news. However, the upcoming partisan orientation of the Congress, which is now under a powerful Democratic assault, warrants some attention.

In order to regain a majority in Congress (presumably with Vice President Gore breaking any ties that may occur in the Senate), the Democrats need to regain only 19 seats in the House and three in the Senate. Although the chances of success in the Senate is somewhat more unlikely (due, I believe, to the greater value of Senatorial incumbency and the deeper coffers of most Senators over Representatives), a victory in the House is quite possible and a bicameral sweep a possibility.

Much of this arises over Dole's utter ineptitude on the campaign trail. Says a former top advisor, "I don't think that our party [the Republicans] has come to terms with the '90s, as opposed to the '80s and '70s. We're still trying to make it an ideological contest and it doesn't work." Congressional Republicans have realized this to an extent and moved towards the center, passing such initiatives as the minimum wage increase and the Kassenbaum-Kennedy health care bill.

Although I tend to vote Democratic (I am registered non-partisan), I contend that a continued Republican majority will actually be more beneficial to the country.

As Jacob Weisburg has argued in Slate magazine, Clinton will probably have a better chance of pushing his initiatives through Congress under a Republcian majority.

Why? It is very likely that, if they lose control, Republicans will merely sit back uncooperatively and bicker about the Democrats. The polity hates Congressional gridlock more than George Bush hates broccoli, and such a scenario would only further exacerbate the current public pessimism towards Washington.

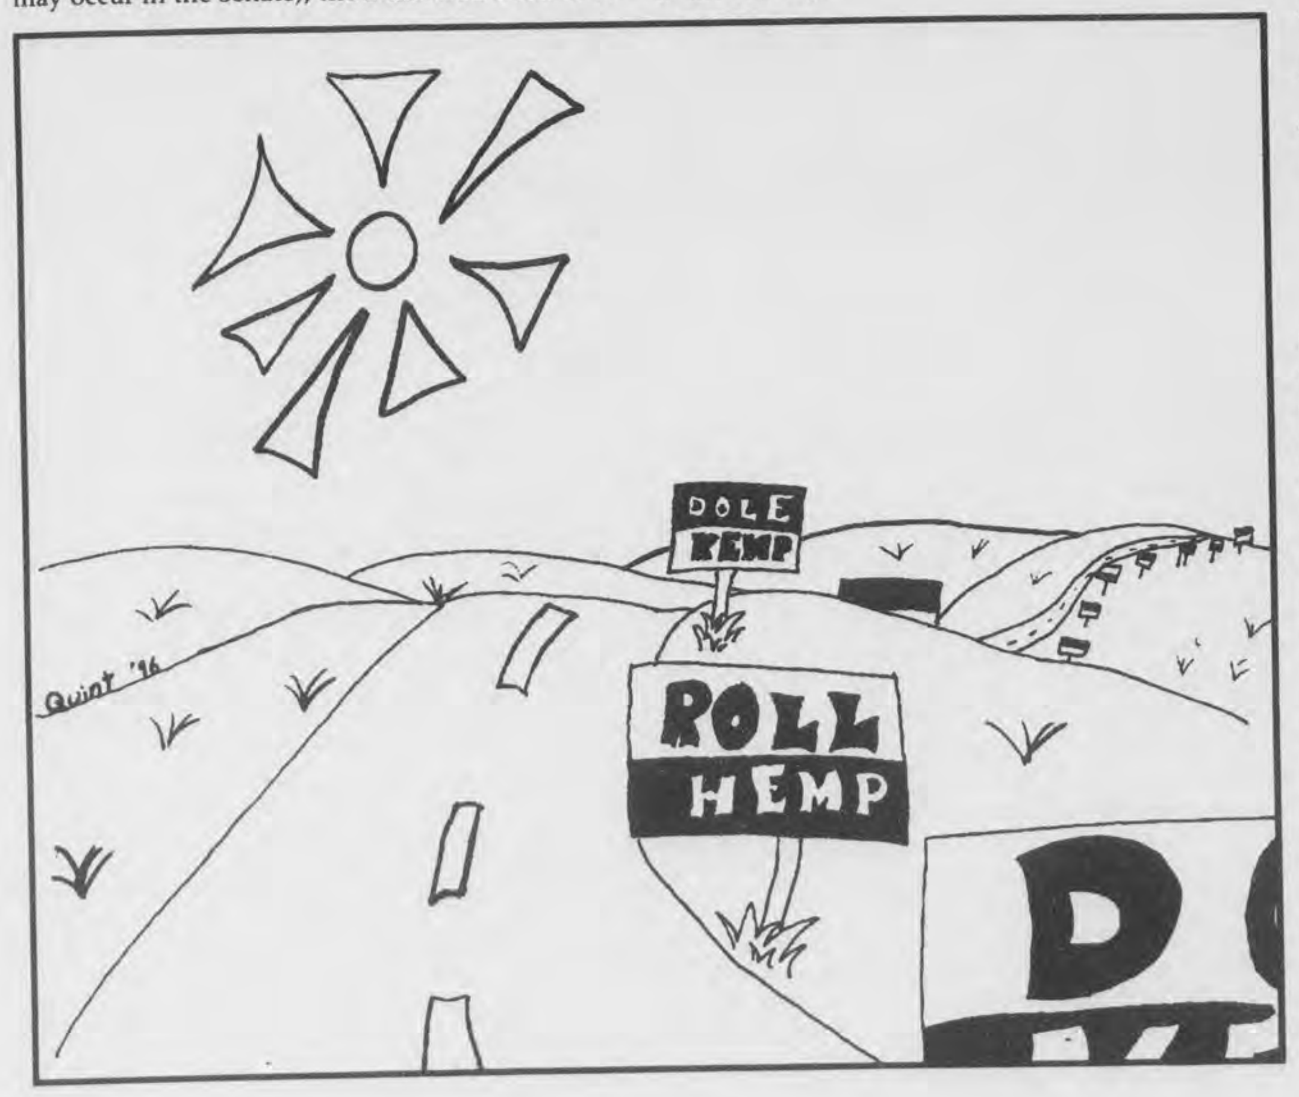
In the meantime, big questions such as entitlement reform and balancing the budget will continue without an adequate solution, since both require bipartisan support. Judging from the success of the latest Congress—besides the minimum wage increase and health care mentioned already—telecommunication and agricultural reform were passed, along with an ambitious welfare overhaul. Republicans and Democrats can work together, especially since the past Republican Congressional effort to tarnish Clinton as an effective President will at least diminish. Compromise may indeed replace confrontation for the next four years.

My thought on Congress may be a little far-fetched (you know that it will be a tight election year for the Republicans if Jesse Helms is having trouble getting reelected in the tobacco lands of North Carolina), and the cynics may believe that coexistence is not in most Congressional Representatives' vocabularies.

While it is true that the very late flurry of legislation passed by Republicans in Congress has much to do with election-year politics, it also shows the Republicans do indeed bend to the wishes of a capricious public. They had to.

If Clinton is reelected as President and the Congress does indeed stay in GOP hands, the burden will once again be upon the Republicans to objectively address the nascent issues that will only grow in importance as the next millennium approaches.

Now only if Newt will step down...



Foreign contributions lined with corruption, not silver

By Toby Anderson

Bucknellian Staff Writer

What is there to say? Not only is our current political elite up for sale, but it is up for sale to foreigners. Now mind you, I am not just any ignorant xenophobe. I am a Bucknell-educated one. However extreme my opening comments may seem, they are in fact the truth. Long ago, I don't remember which year exactly, but it was in the first years of our infant republic, there was a law passed against foreign citizens interfering in American domestic politics. Then came a policy called the Monroe Doctrine. You ask, "Now what pray tell, does the Monroe Doctrine have to do with foreigners interfering in our politics?" Exactly that. It is a policy that forbids all non-American powers from involving themselves in the domestic politics of the countries in the western hemisphere. Well, extend that line of thought to forbidding all non-American citizens from involving themselves in the domestic politics of the United States (financially or otherwise), and what do you get? Consistency. I should probably wash my mouth out with soap for speaking that sort of foul language. We could conceivably have a political elite that owes its fortunes to the American people, instead of some rich foreigners.

Now really, is what I suggest so unreasonable? Having all donations from corrupt foreigners, or maybe even all foreigners, banned? I am aware that this issue was recently brought to light by the clumsy maneuverings of a corrupt official in our current administration. However, it is a problem that is in no way a partisan issue. Both parties receive large amounts of money from foreigners. Therefore, both parties are selling their influence to foreigners when they should be working on behalf of the people who vote them into office and pay their salaries, so they can serve the CITIZENS of THIS country.

OK, maybe you sensed my sarcasm in the beginning when I was talking about xenophobia (I was quite sincere about the ignorance, though). I am not saying that we should shut off all communications to the outside world, just that we should leave our political system as the sole province of those who have a stake in it—its citizens. The practice of taking foreign money is disgustingly corrupt with lots of conflicts of interest, and it should be stopped.

These are the views of the author alone and do not reflect the U.S. Army.

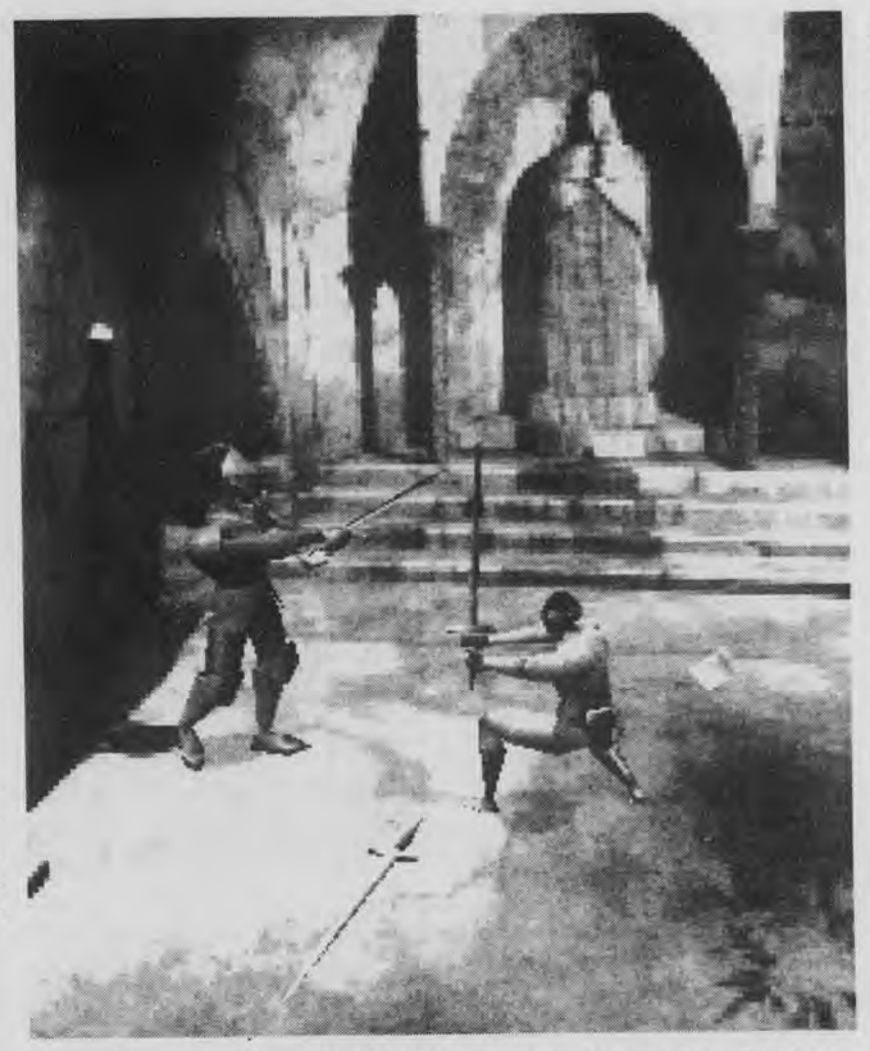
MechWarrior 2: Mercenaries by Activision

Story: You are a Mercenary, caught in a brutal war between two rival houses of the inner sphere. Honor and glory have yielded to betrayal and greed. Now a combat-hardened warrior, your quest leads you to pilot your BattleMech into darker, more desperate realms of the universe, where victory means nothing...and power, fame and the almighty c-bill mean everything.

Evaluation: If you enjoyed the original Mechwarrior 2, then you may like Mercenaries. While you still have the choice to do as others say, you can choose to lead your own mercenary team. The command mode is similar to *Privateer* by Origin, where you pick the missions you want to play, choose the people who work for you and rise to power by your skill.

Mercenaries is more system demanding than its predecessor. On a Pentium 90 in the lowest resolution, the game occasionally becomes choppy. There is plenty of depth for the hardcore Mechwarrior players; your choices range from instant action to complete customization of your BattleMech. Mercenaries has new graphics, new mechs and new missions. You can also battle it out with your friends via LAN, internet and modem.



In Time Commando you (right) fight creatures from space aliens to medeival knights using weapons such as hi-tech lasers and swords.

Pros: Multiplayer playable, choice to play missions or lead a campaign, ability to completely define controls, very detailed throughout entire game.

Cons: Requires a high performance system for smooth gameplay, detail can become overwhelming, requires time to learn.

Summary: 85% Great game for die hards.

Ace Ventura by 7th Level

Story: Well...You are Ace Ventura, Pet Detective. Your purpose is to save poor and defenseless animals from the evil clutches of various villains. Not much more to it than that.

Evaluation: If you liked either of the *Ace Ventura* movies, you may get a kick out of this game. The voice is not Jim Carrey's, but Michael Hall's. Most of the time, you can't even tell the difference. This game is oriented more for a younger audience, however, if you remove the parent lock, parts of the game contain some humorous innuendoes.

Game play is the normal third person puzzle game, but in this case, it's simplified somewhat. I found some parts of this game extremely frustrating because I am used to more sophisticated games. If you are looking to start playing third person puzzle games, this game may be a good one to start with. However, if you can't stand Ace's overacting and pointless comments, don't get any where near this program.

Pros: Full of Ace Ventura comments, sounds, and comedy, full voice with no text to read, good small kids game.

Cons: The Ace Ventura comments get tedious, simplistic puzzles (some of which don't make much sense)

Summary: 59% Decent game for a younger crowd

Time Commando by Activision

Story: Somewhere in the future, a time machine is created to help the military learn war techniques from the past. A jealous rival implants a virus to ruin the machine and ends up creating a time bubble. You are a security guard who gets sucked into the time bubble and jumps through time.

Time is against you, for the virus continues to eradicate the main computer's memory. If the computer system is completely contaminated by the virus, you will die. As you travel through time, you must collect non-infected memory circuits and send them to the main computer. This will temporarily halt the virus' growth. You must destroy the virus before it destroys you.

In each time period, you will face monsters, enemies and traps, each relating to that time period. You must defeat them to reach your goal...the virus.

Evaluation: A lot of effort went into this game, and it shows in various parts of this program. The entire background during game play is a movie that advances as you do. There is some very nice scenery. The characters of the game are extremely high-resolution, but, unfortunately do not match the background very well.

The combat offers various moves and a plethora of different weapons. The combat is neat but difficult. Secrets are extremely hard to find since the entire backdrop of game play blends together.

I beat the game in less than eight hours. I was playing it on the "extremely easy setting", but I found it near impossible to play it on the "normal" setting. Character movement is similar to that of *Relentless* by Adeline software. The game was entertaining for a little while, but replay value is extremely minimal.

Pros: Unique story line, decent fights, lots of weapons, good graphics.

Cons: Low replay value, annoying music, extremely hard to find secrets.

Summary: 71% This is a one night stand game.

Science & Technology Calendar

Nov. 1 Biology Seminar Series: 4 p.m., 116 Rooke Chemistry. Matthew Hardy of the Population Center at Rockefeller, University will speak on "Stress, Glucocorticoids and Leydig Cell Function."

Nov. 4 Women's Film Series: noon Gallery Theatre. *Evelyn Fox Keller, Science and Gender.*

Sesquicentennial Lecture: 7:30 p.m., Forum, Langone Center. Evelyn Fox Keller of the Science, Technology and Society program at Massachusetts Institute of Technology will speak on "Reconfiguring Life."

Nov. 5 Physics Coffee Talk: noon, Room 263 Olin Science. Professor Steve Becker will speak on Special and General Relativistic Effects in the Global Positioning System.

Class of 1956 Lecture: 7:30 p.m., Forum, Langone Center. Professor David Fletcher will speak on "Being and Becoming: A Biologist Learns to Fly."

Nov. 8 Biology Seminar Series: 4 p.m., 116 Rooke Chemistry. John Koprowski, professor of biology and animal behaviorist at Williamette University, will speak on "Conflict and Cooperation: Sociality in Tree Squirrels."

CCS offers various training tools

A variety of computer training tools have been made available to the University community through Computer and Communication Services (CCS). The resources are free and are designed to promote self-sufficient computer users.

CCS is offering a series of workshops relevant to either IBM or Macintosh computers. They are the only source of group training given by CCS. The workshops address a variety of software applications including Word and Excel. The CCS office can provide a complete schedule of events.

Training videos are another resource that will soon be made available in the library. These instructive videos offer direction to those interested in creating a web page. In addition to web page instruction, there are also videos pertaining to Word 6, Excel 5, and Powerpoint 4.

Instruction manuals are also available in the library. Manuals may be checked out for all Level 1 and 2 supported software.

In addition to self instruction, tutors are available for any supported application. An appointment may be arranged by calling Lisa Romano of CCS at x1788 or by emailing her at (lromano@bucknell.edu).

ROOFIES

from page 1

medical director of Student Health Services, commented that he has not personally seen Rohypnol at the University. However, he advised that the drug should be avoided at all costs.

Rohypnol is sometimes referred to as Roofies, Roaches, La Rocha, Rope, Rib Roche, Ruffies, Mexican Valium, R-2 or Roach 2.

Most frequently the white, odorless tablet is slipped into a victim's beverage without leaving a trace. The sedative effects of a 2 mg dose of Rohypnol may begin to surface within 20 to 30 minutes after ingestion. Drowsiness, impaired motor skills for up to 12 hours, impaired judgment, disinhibition, dizziness and confusion are some of the symptoms of Rohypnol.

Perhaps the most detrimental effect for victims of "roofie-rape" is amnesia.

"There...have been reports that Rohypnol has been put in women's drinks as a prelude to rape, which means that an individual taking the drug may not remember the next several hours after the drug has been ingested," according to Roche Laboratories, Inc.

A person under the influence of Rohypnol alone may appear to be intoxicated; however, the person will be able to pass a breathalizer test.

The pill, which sells for about $3 to $5 per tablet on the street, has "Roche" encoded on one side of the tablet. Also, there is either a (1) or (2) encircied on one side of the tablets and a single or cross score on the opposite side. These markings have been referred to as minuses and pluses.

There is a test to detect Rohypnol (Flunitrazepam). Law enforcement, rape crisis centers and emergency rooms have been provided with this testing capability.

The three-part test is designed to detect the presence of flunitrazepam in urine. Flunitrazepam testing is most effective within 72 hours after ingestion of Rohypnol and should be performed immediately so as to increase the likelihood that the drug with be detected.

Persons who need access to Flunitrazepam testing can call 1(800)608-6540 or 1(800)720-1076 for general information.

The medication is classified as a benzodiazepine, which is in the same family as Valium, Librium, Xanax and Halcion. Rohypnol is not manufactured or sold in the United States.

Approved in 64 other countries, experts think that the prescription drug is being smuggled into the United States from Latin America and Mexico.

It has been reported that Rohypnol is more than 10 times as potent as Valium.

The Federal Drug Enforcement Administration deems Rohypnol to be so hazardous that it wants to classify it in the same category as cocaine and heroin.

Senator D. Michael Fisher, R-Allegheny, introduced a bill concerning the dangerous uses of drugs such as Rohypnol to the Senate Judiciary Committee in Harrisburg earlier this month. Unanimously approved by the Senate Judiciary Committee, the legislation would classify slipping another person an intoxicant without their knowledge as a second-degree felony, which carries a penalty of up to ten years in prison and a $25,000 fine.

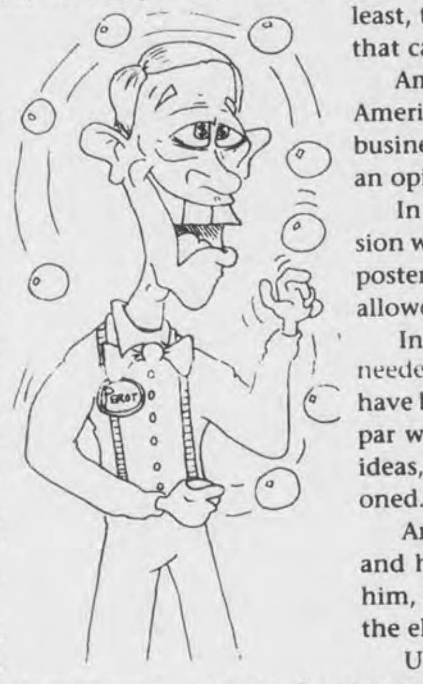
OPINIONS

ELECTION YEAR '96

A little bit of Perot is good for America

BY CHRIS ELLIS

Bucknellian Staff Writer



This is by no means an endorsement of Ross Perot.

Believe me when I say that the principles of Mr. Perot's candidacy are not ones that I tend to agree with. In fact, I find most of Perot's viewpoints and statements to be economically impossible, hopelessly idealistic, or just flat-out loony. But that doesn't mean that he is not a powerful, influential and above all, necessary force in American politics.

With the election less than one week away, voters are once again awash in an atmosphere of confusion. Bob Dole and Bill Clinton, by force both political moderates, are once again doing what they can to muddy up the political scene once. The Republican speaks eloquently of community responsibility to the weak; the Democrat speaks forcefully of the need to trim back an oppressive federal government. The Republican lauds the benefits of a minimum-wage increase; the Democrat hails the passing of the burdensome American "welfare state."

Neither candidate can be blamed for this strategy. President Clinton, whose lead in opinion polls has fluctuated somewhat but has been consistently intimidating, has no need to rock the boat now; he simply has to ride the wave of political moderation to four more years in office. Saying anything that could be construed as too far to the left would allow him to be labeled with America's newest dirty word: "liberal."

Bob Dole is in a similar position. While moderate-to-conservative politics are America's newest zeitgeist, President Clinton has already claimed the views of most moderate Republicans for his own. To make a powerful, oppressive statement about abortion, welfare or the like would allow for too many similarities to unpopular Republicans—Pat Buchanan, Alan Keyes, Jesse Helms, etc. Therefore, Dole's only remaining strategy is to duck all mention of issues and instead concentrate on attacking Mr. Clinton's personal character and ethics, a strategy that, as of now, has backfired.

So with each candidate simply playing the role of political spin doctor, voter apathy has been understandably high. Forty percent less people watched the presidential debates of 1996 than 1992, and overall American voter turnout may be as low as it has been in any Presidential election year.

So, what spices politics up? Controversy. FDR. Richard Nixon. Ronald Reagan. What do these three Presidents have in common? Virtually nothing, except for the fact that people tend to have strong opinions about them. Did FDR's "New Deal" save America? Or did it force the country into a tax-and-spend debt cycle from which it will never recover? Was Nixon a great leader who rescued diplomacy as we know it? Or was he a self-serving political mastermind who was corrupt on all levels? These three men are, without a doubt, three of the most controversial—and influential—presidents of the twentieth century.

But aside from political controversy, these three men sparked something else—voter interest. Look at voter turnout rates for the time period when these three men were running for office. No matter what type of political climate America was in at the time, voters turned out in droves to profess their support—or contempt—for all three.

Some argue that voter turnout will be low this year because the Presidential race is all but decided. With a deficit of about 20 percentage points to overcome, it would take a near-miracle for Bob Dole to recover and win the election. But even in 1984, when the Reagan-Bush ticket was busy blowing Democratic challengers Walter Mondale and Geraldine Ferraro out of the water (Mondale carried only his home state of Minnesota in the 1984 race), voter turnout was far higher than what is expected this year. Why? Because both candidates were, if nothing else, controversial.

Reagan took political, economic, and social stands that were unequivocally conservative—stands that were met with some resistance but were adamantly held to by Reagan. Mondale, meanwhile, was considered to be nothing less than a Swedish socialist-democrat, whose views of the economy and social welfare were about as polarized from Reagan's as a rational candidate's could be. This stark contrast between the two men bred contempt, controversy, and, above all, excitement. Americans had a real choice—they had a side to choose, a philosophy to believe in, a reason to vote—if not for one candidate, then most definitely *against* the other .

In 1996, we have no such luxury. What we have is two politically-correct, middle of the road candidates, neither of whom is capable or ready to add some heat to the campaign. A similar situation existed in 1992—Bill Clinton was still Bill Clinton, and George Bush may as well have been Bob Dole. But something was different in 1992: voters *cared*. They cared about the candidates. They cared about the issues. At the very least, the cared enough to vote. Why? Because controversy and enthusiasm was injected into that campaign, injected by the presence of Ross Perot.

Americans have a wide variety of opinions of Perot. To some, he is the white knight of the American working class and the savior of American business. To others, he is an eccentric businessman with funny hair who really has no business in political affairs. But everybody has an opinion about him. Like him or hate him, you watched politics to see Ross.

In the 1992 election, he was everywhere. His 30-minute infomercials were placed on television with all the frequency of *The Price is Right*. His infamous pie charts and bar graphs were on posters, placards, and advertisements all across the nation. More importantly, though, he was allowed to appear on a level forum with the two "major" candidates.

In an age of political correctness, waffling and spin-doctoring, Perot was a breath of badly-needed fresh air to the American electorate. No matter how unpopular or reviled they may have been, Perot never compromised his stands. And, when he was allowed to participate on a par with the other candidates—most notably, during debates—he would hammer home his ideas, basically *forcing* viewers to think about his candidacy and the issues that he championed.

And think they did. Perot's supporters rallied behind him with almost cult-like fanaticism, and his opponents rallied against him with equal fervor. But even in alienating votes from him, Perot was returning them to the realm of political thought. Voters thought more about the election and turned out at the polls accordingly.

Unfortunately, 1996 has brought oppression of Perot's political party. His opinions, viewed as too inflammatory and too dangerous for the politically-correct 1996 campaign, have been pushed aside by Clinton and Dole alike. His absence from the Presidential debates was most noticeable. His overall support may be diminished from 1992, but his ability to attract an audience hasn't. The debate formula was simple: no Perot, no viewers, no pressure, no problem. With Perot absent, both Dole and Clinton were allowed, even encouraged, to stand at their podiums, give a few newsworthy sound bytes, and sit down unscathed. Very little was really accomplished in the debates, and the electorate was apathetic about what was accomplished, because there was no real reason to pay attention. There was no spice, no excitement.

But it shouldn't have been this way. Ross Perot was, and still is, the only way to generate excitement in the political campaign and, more importantly, interest in the issues. The 1996 election may serve to give Bill Clinton another four more years in office, but it has given the American people nothing: no real candidate to identify with, no real candidate to identify *against*, no real reason to stay informed and, perhaps worst of all, no real reason to vote. Disinterest in the political system and pertinent political issues, especially among America's youth, is one of the worst problems plaguing America as we enter the 21st century. Apathy and ignorance among the American electorate, apathy bred from campaigns like these, will serve to do nothing but destroy the American political process of the new era. The whole issue of political apathy and ignorance can be summed into one basic question, a question that most voting members of the American electorate need to find a way to address—If Americans are ignorant of the process of change, how can any real, positive change be accomplished?

If Ross Perot were permitted to respond to that, I wonder what he would have to say.

Republican Congress Clinton's only hope of reform

BY TODD ZERANSKI

Bucknellian Staff Writer

I wish that the Presidential race turned out like the recent World Series—exciting and suspenseful. However, the fact is that Dole never crafted a consistent attack against Clinton. Such a distinctly ad hoc strategy—one day demeaning Clinton as a dangerous "liberal" (a label that no longer arouses any discontent among the public); the next day touting his $550 billion tax cut plan (which the public didn't buy into anyway); excoriating the "liberal media;" etc., weakened Dole immensely.

So it is no longer useful or even entertaining to speculate over the Presidential race. It's old news. However, the upcoming partisan orientation of the Congress, which is now under a powerful Democratic assault, warrants some attention.

In order to regain a majority in Congress (presumably with Vice President Gore breaking any ties that may occur in the Senate), the Democrats need to regain only 19 seats in the House and three in the Senate. Although the chances of success in the Senate is somewhat more unlikely (due, I believe, to the greater value of Senatorial incumbency and the deeper coffers of most Senators over Representatives), a victory in the House is quite possible and a bicameral sweep a possibility.

Much of this arises over Dole's utter ineptitude on the campaign trail. Says a former top advisor, "I don't think that our party [the Republicans] has come to terms with the '90s, as opposed to the '80s and '70s. We're still trying to make it an ideological contest and it doesn't work." Congressional Republicans have realized this to an extent and moved towards the center, passing such initiatives as the minimum wage increase and the Kassenbaum-Kennedy health care bill.

Although I tend to vote Democratic (I am registered non-partisan), I contend that a continued Republican majority will actually be more beneficial to the country.

As Jacob Weisburg has argued in Slate magazine, Clinton will probably have a better chance of pushing his initiatives through Congress under a Republican majority.

Why? It is very likely that, if they lose control, Republicans will merely sit back uncooperatively and bicker about the Democrats. The polity hates Congressional gridlock more than George Bush hates broccoli, and such a scenario would only further exacerbate the current public pessimism towards Washington.

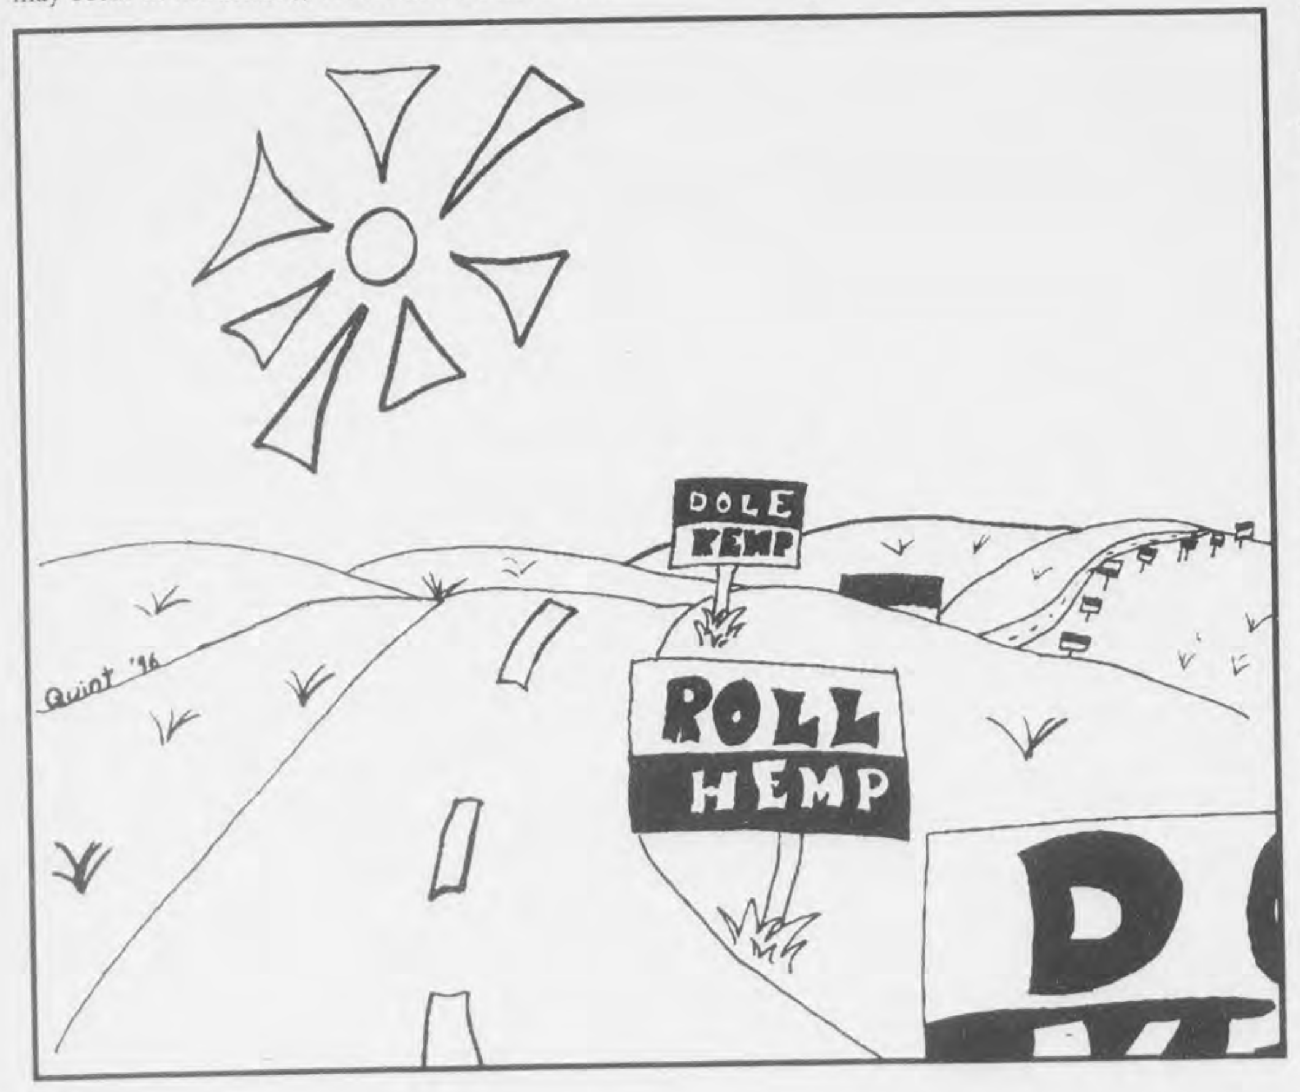
In the meantime, big questions such as entitlement reform and balancing the budget will continue without an adequate solution, since both require bipartisan support. Judging from the success of the latest Congress—besides the minimum wage increase and health care mentioned already—telecommunication and agricultural reform were passed, along with an ambitious welfare overhaul. Republicans and Democrats can work together, especially since the past Republican Congressional effort to tarnish Clinton as an effective President will at least diminish. Compromise may indeed replace confrontation for the next four years.

My thought on Congress may be a little farfetched (you know that it will be a tight election year for the Republicans if Jesse Helms is having trouble getting reelected in the tobacco lands of North Carolina), and the cynics may believe that coexistence is not in most Congressional Representatives' vocabularies.

While it is true that the very late flurry of legislation passed by Republicans in Congress has much to do with election-year politics, it also shows the Republicans do indeed bend to the wishes of a capricious public. They had to.

If Clinton is reelected as President and the Congress does indeed stay in GOP hands, the burden will once again be upon the Republicans to objectively address the nascent issues that will only grow in importance as the next millennium approaches.

Now only if Newt will step down...



Foreign contributions lined with corruption, not silver

BY TOBY ANDERSON

Bucknellian Staff Writer

What is there to say? Not only is our current political elite up for sale, but it is up for sale to foreigners. Now mind you, I am not just any ignorant xenophobe. I am a Bucknell-educated one. However extreme my opening comments may seem, they are in fact the truth. Long ago, I don't remember which year exactly, but it was in the first years of our infant republic, there was a law passed against foreign citizens interfering in American domestic politics. Then came a policy called the Monroe Doctrine. You ask, "Now what pray tell, does the Monroe Doctrine have to do with foreigners interfering in our politics?" Exactly that. It is a policy that forbids all non-American powers from involving themselves in the domestic politics of the countries in the western hemisphere. Well, extend that line of thought to forbidding all non-American citizens from involving themselves in the domestic politics of the United States (financially or otherwise), and what do you get? Consistency. I should probably wash my mouth out with soap for speaking that sort of foul language. We could conceivably have a political elite that owes its fortunes to the American people, instead of some rich foreigners.

Now really, is what i suggest so unreasonable? Having all donations from corrupt foreigners, or maybe even all foreigners, banned? I am aware that this issue was recently brought to light by the clumsy maneuverings of a corrupt official in our current administration. However, it is a problem that is in no way a partisan issue. Both parties receive large amounts of money from foreigners. Therefore, both parties are selling their influence to foreigners when they should be working on behalf of the people who vote them into office and pay their salaries, so they can serve the CITIZENS of THIS country.

OK, maybe you sensed my sarcasm in the beginning when I was talking about xenophobia (I was quite sincere about the ignorance, though). I am not saying that we should shut off all communications to the outside world, just that we should leave our political system as the sole province of those who have a stake in it—its citizens. The practice of taking foreign money is disgustingly corrupt with lots of conflicts of interest, and it should be stopped.

These are the views of the author alone and do not reflect the U.S. Army.

BY JARED BULETZA

MechWarrior 2: Mercenaries by Activision

Story: You are a Mercenary, caught in a brutal war between two rival houses of the inner sphere. Honor and glory have yielded to betrayal and greed. Now a combat-hardened warrior, your quest leads you to pilot your BattleMech into darker, more desperate realms of the universe, where victory means nothing...and power, fame and the almighty c-bill mean everything.

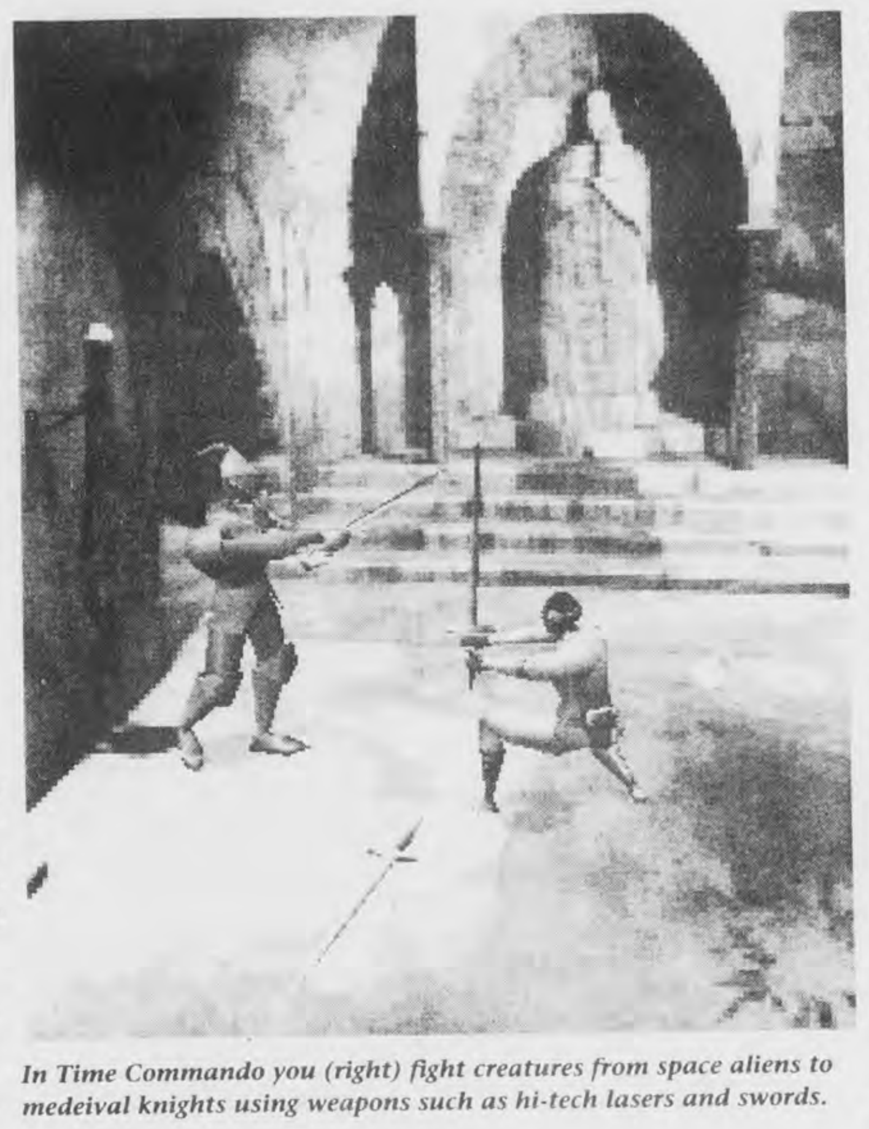
Evaluation: If you enjoyed the original Mechwarrior 2, then you may like Mercenaries. While you still have the choice to do as others say, you can choose to lead your own mercenary team. The command mode is similar to *Privateer* by Origin, where you pick the missions you want to play, choose the people who work for you and rise to power by your skill.

Mercenaries is more system demanding than its predecessor. On a Pentium 90 in the lowest resolution, the game occasionally becomes choppy. There is plenty of depth for the hardcore Mechwarrior players; your choices range from instant action to complete customization of your BattleMech. Mercenaries has new graphics, new mechs and new missions. You can also battle it out with your friends via LAN, internet and modem.

Pros: Multiplayer playable, choice to play missions or lead a campaign, ability to completely define controls, very detailed throughout entire game.

Cons: Requires a high performance system for smooth gameplay, detail can become overwhelming, requires time to learn.

Summary: 85% Great game for die hards.



In Time Commando you (right) fight creatures from space aliens to medeival knights using weapons such as hi-tech lasers and swords.

Ace Ventura by 7th Level

Story: Well...You are Ace Ventura, Pet Detective. Your purpose is to save poor and defenseless animals from the evil clutches of various villains. Not much more to it than that.

Evaluation: If you liked either of the *Ace Ventura* movies, you may get a kick out of this game. The voice is not Jim Carrey's, but Michael Hall's. Most of the time, you can't even tell the difference. This game is oriented more for a younger audience, however, if you remove the parent lock, parts of the game contain some humorous innuendoes.

Game play is the normal third person puzzle game, but in this case, it's simplified somewhat. I found some parts of this game extremely frustrating because I am used to more sophisticated games. If you are looking to start playing third person puzzle games, this game may be a good one to start with. However, if you can't stand Ace's overacting and pointless comments, don't get any where near this program.

Pros: Full of Ace Ventura comments, sounds, and comedy, full voice with no text to read, good small kids game.

Cons: The Ace Ventura comments get tedious, simplistic puzzles (some of which don't make much sense)

Summary: 59% Decent game for a younger crowd

Time Commando by Activision

Story: Somewhere in the future, a time machine is created to help the military learn war techniques from the past. A jealous rival implants a virus to ruin the machine and ends up creating a time bubble. You are a security guard who gets sucked into the time bubble and jumps through time.

Time is against you, for the virus continues to eradicate the main computer's memory. If the computer system is completely contaminated by the virus, you will die. As you travel through time, you must collect non-infected memory circuits and send them to the main computer. This will temporarily halt the virus' growth. You must destroy the virus before it destroys you.

In each time period, you will face monsters, enemies and traps, each relating to that time period. You must defeat them to reach your goal...the virus.

Evaluation: A lot of effort went into this game, and it shows in various parts of this program. The entire background during game play is a movie that advances as you do. There is some very nice scenery. The characters of the game are extremely high-resolution, but, unfortunately do not match the background very well.

The combat offers various moves and a plethora of different weapons. The combat is neat but difficult. Secrets are extremely hard to find since the entire backdrop of game play blends together.

I beat the game in less than eight hours. I was playing it on the "extremely easy setting", but I found it near impossible to play it on the "normal" setting. Character movement is similar to that of *Relentless* by Adeline software. The game was entertaining for a little while, but replay value is extremely minimal.

Pros: Unique story line, decent fights, lots of weapons, good graphics.

Cons: Low replay value, annoying music, extremely hard to find secrets.

Summary: 71% This is a one night stand game.

Science & Technology Calendar

Nov.1 Biology Seminar Series: 4 p.m., 116 Rooke Chemistry. Matthew Hardy of the Population Center at Rockefeller University will speak on "Stress, Glucocorticoids and Leydig Cell Function."

Nov. 4 Women's Film Series: noon Gallery Theatre. *Evelyn Fox Keller, Science and Gender.*

Sesquicentennial Lecture: 7:30 p.m., Forum, Langone Center. Evelyn Fox Keller of the Science, Technology and Society program at Massachusetts Institute of Technology will speak on "Reconfiguring Life."

Nov. 5 Physics Coffee Talk: noon, Room 263 Olin Science. Professor Steve Becker will speak on Special and General Relativistic Effects in the Global Positioning System.

Class of 1956 Lecture: 7:30 p.m., Forum, Langone Center. Professor David Fletcher will speak on "Being and Becoming: A Biologist Learns to Fly."

Nov. 8 Biology Seminar Series: 4 p.m., 116 Rooke Chemistry. John Koprowski, professor of biology and animal behaviorist at Williamette University, will speak on "Conflict and Cooperation: Sociality in Tree Squirrels."

CCS offers various training tools

A variety of computer training tools have been made available to the University community through Computer and Communication Services (CCS). The resources are free and are designed to promote self-sufficient computer users.

CCS is offering a series of workshops relevant to either IBM or Macintosh computers. They are the only source of group training given by CCS. The workshops address a variety of software applications including Word and Excel. The CCS office can provide a complete schedule of events.

Training videos are another resource that will soon be made available in the library. These instructive videos offer direction to those interested in creating a web page. In addition to web page instruction, there are also videos pertaining to Word 6, Excel 5, and Powerpoint 4.

Instruction manuals are also available in the library. Manuals may be checked out for all Level 1 and 2 supported software.

In addition to self instruction, tutors are available for any supported application. An appointment may be arranged by calling Lisa Romano of CCS at x1788 or by emailing her at (lromano@bucknell.edu).

ROOFIES

from page 1

medical director of Student Health Services, commented that he has not personally seen Rohypnol at the University. However, he advised that the drug should be avoided at all costs.

Rohypnol is sometimes referred to as Roofies, Roaches, La Rocha, Rope, Rib Roche, Ruffies, Mexican Valium, R-2 or Roach 2.

Most frequently the white, odorless tablet is slipped into a victim's beverage without leaving a trace. The sedative effects of a 2 mg dose of Rohypnol may begin to surface within 20 to 30 minutes after ingestion. Drowsiness, impaired motor skills for up to 12 hours, impaired judgment, disinhibition, dizziness and confusion are some of the symptoms of Rohypnol.

Perhaps the most detrimental effect for victims of "roofie-rape" is amnesia.

"There...have been reports that Rohypnol has been put in women's drinks as a prelude to rape, which means that an individual taking the drug may not remember the next several hours after the drug has been ingested," according to Roche Laboratories, Inc.

A person under the influence of Rohypnol alone may appear to be intoxicated; however, the person will be able to pass a breathalizer test.

The pill, which sells for about $3 to $5 per tablet on the street, has "Roche" encoded on one side of the tablet. Also, there is either a (1) or (2) encircled on one side of the tablets and a single or cross score on the opposite side. These markings have been referred to as minuses and pluses.

There is a test to detect Rohypnol (Flunitrazepam). Law enforcement, rape crisis centers and emergency rooms have been provided with this testing capability.

The three-part test is designed to detect the presence of flunitrazepam in urine. Flunitrazepam testing is most effective within 72 hours after ingestion of Rohypnol and should be performed immediately so as to increase the likelihood that the drug with be detected.

ARTS & ENTERTAINMENT

Center Gallery displays brilliant Peruvian and Hispanic photo exhibits

BY MARNI HARRIMAN
Bucknellian Staff Writer

The Center Gallery held an opening reception last Saturday for the first of two photography exhibits that are organized in association with the University's focus semesters on the Hispanic world and Native Americans.

The first exhibit, "Visions of Modernity: Photographs from the Peruvian Andes, 1900-1930," presents 100 black-and-white images by photographers who worked in the Southern Andes including: Crisanto Cabrera, Martin Chambi, Miguel Chani, Juan Manuel Figueroa-Aźnar, Jose Gabriel Gonzalez, Avelino Ochoa, Horacio Ochoa, Sebastian Rodriguez, and Carlos and Miguel Vargas.

This exhibit has been organized by Americans Peter Yenne and Edward Ranney with Peruvian Fernando Castro in order to present Peru's photographic heritage and artistic talents in the early part of the 20th century.

Cynthia Peltier, coordinator of the Center Gallery, describes it as "a find." When Ms. Peltier learned of the subject of the focus semester two years ago, she immediately booked the exhibit for the University. "It is a fantastic show," she said. "It gives you a real, intimate look at the Peruvian Andes."

The historical exhibit is arranged according to each artist, chronologically.

The photographs portray all levels of Peruvian society, from rural inhabitants to members of the aristocracy.

"I find the difference in social class among the pictures to be interesting," commented Amanda Frazer '98, at the opening. "The individuals' facial expressions are also amazing."

During the opening reception, the public was able to wander through the Gallery and observe the images, while listening to music of Peru's Inca heritage. One could also taste cheese and hors d'oeuvres, as well as a variety of wine for those over 21.

"The photos are striking," remarked another student, Andrea Greco, '97.

"The exhibit is exquisite and the food was pretty good too," added Owen Grace '97.

"Students don't realize that we have our own museum here at Bucknell. We should really take advantage of what we have," expressed Anne Halgren, '97.

"It is good that there is multicultural exposure at B.U. for students," added Paula Zimmerman, '97.

This exhibit can be seen in the Center Gallery until Dec. 15.

The second photography exhibit, "Amerindia Displaced," begins this Saturday with an artist's reception which includes wine and cheese from 4 to 6 p.m. in the Gallery. The photographer, John Ruebartsch, captures the culture of the indigenous tribes in Mexico, which correlates with the second subject of the focus semester.

The Center Gallery is located on the third floor of the Langone Center. It is open to the public from 11 a.m. to 5 p.m. on weekdays and 1 to 4 p.m. on weekends.

Cara Mickelsen—The Bucknellian
This Center Gallery exhibit displays the talents of many artists' impressions of Peru's heritage.

Poetry Festival to bring readings, workshops

Guest artists provide a variety of events for public to enjoy and experience

BY ERIN MCCALLISTER
Bucknellian Staff Writer

Jackets zip against the morning chill and new boots crunch the vivid carpet of the academic quad. November is here, reaping autumn crops as well as fresh talent. This first November weekend hosts the 19th Annual Bucknell Poetry Festival.

Beginning with a reading by guest poets, the festival offers a variety of events. Opportunities to hear, read, critique, discuss, and enjoy poetry present themselves through readings and workshops sponsored by the Pennsylvania Council of the Arts and the Stadler Center for Poetry.

The Bucknell Poetry Festival began in the fall of 1977 to celebrate the first edition of *West Branch*, a national magazine of poetry and fiction, founded by Karl Patten, Jr. and Robert Taylor, both professors of English.

In what Patten described as "a harvest of *West Branch* poets," the festival can benefit writers and non-writers alike. "Manifestly, it is a way of presenting poetry to Bucknell and central Pennsylvania," Patten said. The guest poets invited to the festival are those who have been published in *West Branch* in the past year.

In a very selective process, the editors choose poets' works for the twice-yearly publication. Writers from across the nation submit their pieces in hopes of being published in one of the two editions. In past years, the editors have seen submissions from places such as Saudi Arabia, Japan, Scotland, and Canada as well as from areas throughout the United States.

The chosen authors from areas within travel distance are invited to participate in the annual festival at the University. There have been as many as 15 visiting poets in previous years. This year, the voices of nine will resonate through Bucknell Hall.

The poets are Jim Daniels, Melody D. Davis, Fleda Brown Jackson, Anne Ward Jamieson, Naton Leslie, Jeanne Mahon, D. Nurkse, Meredith Trede, and Jeanne Murray Walker. These nine individuals represent a range of backgrounds and writing experiences.

Jim Daniels, editor of the 1995 anthology *Letters to America: Contemporary Poetry on Race*, has written several creative works. His books of poetry include *M-80* and *Niagara Falls*. He has also written the screenplay for "No Pets," a 1994 feature film directed by Tony Buba.

Melody Davis was the recipient of a 1995 NEA grant in poetry. Her second book was a finalist in last year's National Poetry Series.

Fleda Brown Jackson and Jeanne Murray Walker both teach at the University of Delaware. Jackson's books of poetry include *Fishing With Blood* and *Do Not Peel the Birches*, which won the Verna Emery Prize.

Walker divides her talent between poetry and drama. She has published four books of poetry and has written several plays, including the Lewis Prize winner "Inventing Montana."

For some, poetry is all about combinations and transformations as it is for Anne Ward Jamieson, who lives in Washington, D.C. She writes: "I have moved in my work and studies from the precision of numbers in experimental design, combining words in the service, primarily, of questions."

As a frequently published poet, Naton Leslie has his recent poetry in *Yarrow*, *American Literary Review*, and *The Chariton Review*. His essays have appeared in *High Plains Literary Review*, *The Pikeville Review*, and in the anthology *This Fine Place So Far From Home*. Leslie also teaches at Siena College.

Exploring all sides of poetry, Jeanne Mahon both submits and selects poetry. The Mahoning Valley Poetry Anthology recently published her work, and Pangborn Books published her first full-length collection of poems this year. Her selection abilities stem from her position as the poetry editor of *Shenango River Books*.

As the new poet laureate of Brooklyn, D. Nurkse is the recipient of two NEA Fellowships and a Whiting Writers Award. His books include *Voices Over Water* and *Staggered Lights*.

Not all poets spend their lives in literary environments. Meredith Trede is co-director of a management consulting firm. Her poems have appeared in *Paris Review* and *Western Humanities Review*.

Because there are few other colleges in central Pennsylvania that offer the weekend-long engagement with poetry that the University offers, audience members come from surrounding areas beyond Lewisburg. The festival's founders have observed a consistent rate of return among audience members each year.

As listeners sit on cushioned pews, they can hear the poetic voices permeate through the pastel room to reach each individual in a different personal way. The *West Branch* poets diffuse their work across the nation and even to locations abroad. Largely in university libraries, *West Branch* is often publicized along a word-to-mouth route. This route now leads many to Lewisburg.

> ***Because there are few other colleges in central Pennsylvania that offer the week-long engagement with poetry that the University offers, audience members come from surrounding areas beyond Lewisburg.***

This type of cultural event is one that does not often "crop up" at the University. To take advantage of this poetry harvest, one may attend any or all of the events.

At 8 p.m. tomorrow night in Bucknell Hall, these nine poets will read poems they have. At 10 a.m. on Saturday, a workshop will take place. All are welcome to this event where participants can present and discuss their own poems as well as critique and discuss others' poems. Those attending the workshop should bring 10 to 12 copies of a single poem.

At 1:30 p.m., there will be an open reading for anyone interested in presenting his or her poetry. Readers may read one to three poems. Following this reading will be another guest poet reading beginning at 3:30 p.m. The festival's final event is at 8 p.m. Guest poets will read their works that have appeared in *West Branch*.

For further information, one can call the Stadler Center for Poetry at 524-1853.

Poetry Festival Schedule

Friday	**8 p.m.** *in Bucknell Hall, reading by nine poets*
Saturday	**10 a.m.**, *workshop for all*
	1:30 p.m., *open reading for everyone*
	3:30 p.m., *guest poet reading*
	8 p.m., *final guest poet reading of works published in* West Branch

ARTS & ENTERTAINMENT

Bucknell dance department and Cap & Dagger Company show off their talents to raise money for arts scholarship

BY ROBIN REITZES
Bucknellian Staff Writer

Featuring the Bucknell Dance Department and Cap & Dagger Company, the annual Studio Concert will be held to raise money for the Stephanie Sayer Memorial Scholarship as well as to exhibit the talent of these fine performing groups.

Stephanie Sayer, a theatre major at the University, was tragically killed in a car accident years ago. Her parents then set up a scholarship for students majoring in theatre.

"We literally pass a hat around the to the audience in order to collect donations for the scholarship," says Danna Fragione, director of dance.

Fragione is extremely enthusiastic about this year's performance.

"The Studio Concert enables all students to get involved. It is also a great meeting ground for students and opens up lines of communications between the dancers and actors," said Fragione.

She added, "This is one of my favorite events of the year."

The Studio Concert is a showcase of what the students have been working on in their dance and theatre classes where students of all levels are given the opportunity to perform in front of a live audience. Tustin Theatre allows an intimate and informal setting.

All dance classes will be represented, from Modern I and Jazz I up to the point class.

However, the Studio Concert will not be a preview to the Dance Co.'s December performance.

"The dance performances are completely separate from the fall Dance Company performance. The Dance Co. organizes the Studio Concert but the Dance Department really controls it," said Nicole Bradley, the president of the Dance Company.

The theatrical performances are organized by Cap and Dagger. Company, another theatrical group on campus, will feature two pieces.

The first piece is a preview of *The Effect of Gamma Rays on Man in the Moon-Marigolds*, written by Paul Zindel.

The second will be a post-view of *'dentity Crisis*, written by Christopher Durang.

The Educational Theatre group will also be performing, in addition to performances by one or two theatre majors who will most likely be presenting monologues.

The Cap & Dagger Co. performances are chosen primarily to highlight activities that will be performed later on in the year.

> ***"The Studio Concert is also a great meeting ground for students and opens up lines of communications between the dancers and actors. This is one of my favorite events of the year."***
> *—Danna Fragione, Director of Dance*

"The scenes performed are what students are working on right now. They are works in progress. The Studio concert allows the actors to perform in front of an audience that is not judgmental," said Stacey Ayrton, a chairperson of Cap and Dagger.

In other words, it allows actors to gain more experience on the stage.

Beetna Kim—The Bucknellian
Natale Kolcun '98 is among the performers in the annual Studio Concert in Tustin Theatre at 5 p.m. next Saturday.

The Studio Concert enables both the dancers and actors to come together and perform on the same night.

One week before the performance, the two groups will sit down and schedule the order of the pieces for the evening. Each group will discuss the mood of their pieces and arrange them accordingly. The aim is for a flow between the dance numbers and the theatrical pieces.

> *The Studio Concert enables both the dancers and actors to come together and perform on the same night.*

The two groups will correlate with one another, but the groups will not be integrated.

The performance will be held at 5 p.m. next Saturday in the Tustin Studio Theatre.

There is no charge to get in but a $1 or more donation is suggested to be given towards the Stephanie Sayer Scholarship.

Omaha avant garde theater group to perform

BY SHETAL MITHANI
Bucknellian Staff Writer

Calling Omaha Magic Theater just a theater group would be an understatement, according to Nancy Cook, operations manager for the Weis Center.

"They're an avante garde group. I guess you could say they try things never tried before," Cook said.

Having OMT here "is a big deal for us and a big deal for them as well," she added.

According to Gary Grant, theater and dance department head, the group has been well-known for years.

"It is one the most respected alternative groups in the country," Grant said.

The group uses different types of media in their performances, such as a live painter, dance, acting, different lighting effects, video production, and alternative design sets. "The performance is very exciting. They are not just a dance troupe, they're performance artists," Grant said.

According to Grant, one of the main reasons the University wanted the OMT group is because of their skill in presenting play writing and acting workshops. The OMT group workshops included a slide show on Tuesday, an acting workshop yesterday and a play writing workshop today. A sound and movement workshop will be held tomorrow at 3:30 p.m. in the Tustin building.

Grant said the playwright for some of OMT's work, Megan Terry, has done some very interesting work.

"We performed one of her plays, "Comings and Goings" in our One Acts performance. She will be at the play writing workshop and I think it will be great for the students to meet up with her and talk to her about her work," he said.

Omaha Magic Theater is performing at 8 p.m. Saturday in the Weis Center. Single tickets are $15 and those with Bucknell IDs can receive two single tickets for $5.

Video Reviews

CHRIS NICHOLS

The X-Files (No rating given because of multiple episodes)
Starring David Duchovny and Gillian Anderson

Fox Video has recently released six tapes that contain 12 of the most popular episodes from this series. They have been digitally remastered and best of all, the commercials are edited out. If you haven't had a chance to see this show and are a sci-fi fan, you can pick up these videos at many of video stores. The series is a great one that explores all sorts of bizarre happenings following Dana Sculley (Anderson) and Fox Mulder (Duchovny), two FBI agents assigned to investigate these cases. If you do go ahead and rent them though, I encourage you to fast forward past the introduction by the series creator Chris Carter. He discusses things that happen in the episode that can give things away if you haven't seen them before. The interviews are quite interesting, just watch them afterwards. Particularly, the interesting episodes you might want to check out are: Squeeze, Tooms, Conduit, Ice, Beyond the Sea and Darkness Falls. Of course, you could always watch them on TV too, X-files has moved to Sundays at 9 p.m. this season.

Get Shorty ****
Starring John Travolta, Gene Hackman, Rene Russo, and Danny Devito
Directed by Barry Sonnenfeld

Talk about an interesting story. This film follows the character Chili Palmer (Travolta) through a whole series of interesting scenarios as he goes from Florida, where he works as a loan shark of sorts, to a New York gangster. His travels involve following a man who faked his own death to get out of paying a debt (and to collect $$$ from an airline in compensation for his wife's losses), and end up taking him to Las Vegas where he picks up another job tracking down Harry Zimm (Hackman), who's a B film director that ran up some debts gambling. So Chili follows Zimm and the other debtor to LA. While in LA, Chili (who's a real film enthusiast), pitches an idea to Zimm about a script he's been thinking up. The script, by the way, bears a significant resemblance to the movie that's going on. Chili starts to think that he might be interested in the producing business. But first, he has to take care of the two jobs he's working on. Amidst this wonderfully convoluted story is really an excellent movie. Travolta's screen presence is magnificent; he carries much of the movie on his own brilliant gestures and nuances that make him such a fine actor. The story is only enriched with characters like the B film actress played by Russo and Devito's own portrayal of a supposed academy award winning character Martin Weir. All together, this movie works excellently. The acting, direction and writing come together and fit perfectly. If you haven't seen it, rent it. It's not violent. It's not filled with foul language. It does have an slightly dark tinge to it but, it's well worth seeing.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie you probably need help.

Center Gallery displays brilliant Peruvian and Hispanic photo exhibits

BY MARNI HARRIMAN
Bucknellian Staff Writer

The Center Gallery held an opening reception last Saturday for the first of two photography exhibits that are organized in association with the University's focus semesters on the Hispanic world and Native Americans.

The first exhibit, "Visions of Modernity: Photographs from the Peruvian Andes, 1900-1930," presents 100 black-and-white images by photographers who worked in the Southern Andes including: Crisanto Cabrera, Martin Chambi, Miguel Chani, Juan Manuel Figueroa-Aznar, Jose Gabriel Gonzalez, Avelino Ochoa, Horacio Ochoa, Sebastian Rodriguez, and Carlos and Miguel Vargas.

This exhibit has been organized by Americans Peter Yenne and Edward Ranney with Peruvian Fernando Castro in order to present Peru's photographic heritage and artistic talents in the early part of the 20th century.

Cynthia Peltier, coordinator of the Center Gallery, describes it as "a find." When Ms. Peltier learned of the subject of the focus semester two years ago, she immediately booked the exhibit for the University. "It is a fantastic show," she said. "It gives you a real, intimate look at the Peruvian Andes."

The historical exhibit is arranged according to each artist, chronologically.

The photographs portray all levels of Peruvian society, from rural inhabitants to members of the aristocracy.

"I find the difference in social class among the pictures to be interesting," commented Amanda Frazer '98, at the opening. "The individuals' facial expressions are also amazing."

During the opening reception, the public was able to wander through the Gallery and observe the images, while listening to music of Peru's Inca heritage. One could also taste cheese and hors d'oeuvres, as well as a variety of wine for those over 21.

"The photos are striking," remarked another student, Andrea Greco, '97.

"The exhibit is exquisite and the food was pretty good too," added Owen Grace '97.

"Students don't realize that we have our own museum here at Bucknell. We should really take advantage of what we have," expressed Anne Halgren, '97.

"It is good that there is multicultural exposure at B.U. for students," added Paula Zimmerman, '97.

This exhibit can be seen in the Center Gallery until Dec. 15.

The second photography exhibit, "Amerindia Displaced," begins this Saturday with an artist's reception which includes wine and cheese from 4 to 6 p.m. in the Gallery. The photographer, John Ruebartsch, captures the culture of the indigenous tribes in Mexico, which correlates with the second subject of the focus semester.

The Center Gallery is located on the third floor of the Langone Center. It is open to the public from 11 a.m. to 5 p.m. on weekdays and 1 to 4 p.m. on weekends.

This Center Gallery exhibit displays the talents of many artists' impressions of Peru's heritage.

Poetry Festival to bring readings, workshops

Guest artists provide a variety of events for public to enjoy and experience

BY ERIN MCCALLISTER
Bucknellian Staff Writer

Jackets zip against the morning chill and new boots crunch the vivid carpet of the academic quad. November is here, reaping autumn crops as well as fresh talent. This first November weekend hosts the 19th Annual Bucknell Poetry Festival.

Beginning with a reading by guest poets, the festival offers a variety of events. Opportunities to hear, read, critique, discuss, and enjoy poetry present themselves through readings and workshops sponsored by the Pennsylvania Council of the Arts and the Stadler Center for Poetry.

The Bucknell Poetry Festival began in the fall of 1977 to celebrate the first edition of *West Branch*, a national magazine of poetry and fiction, founded by Karl Patten, Jr. and Robert Taylor, both professors of English.

In what Patten described as "a harvest of *West Branch* poets," the festival can benefit writers and non-writers alike. "Manifestly, it is a way of presenting poetry to Bucknell and central Pennsylvania," Patten said. The guest poets invited to the festival are those who have been published in *West Branch* in the past year.

In a very selective process, the editors choose poets' works for the twice-yearly publication. Writers from across the nation submit their pieces in hopes of being published in one of the two editions. In past years, the editors have seen submissions from places such as Saudi Arabia, Japan, Scotland, and Canada as well as from areas throughout the United States.

The chosen authors from areas within travel distance are invited to participate in the annual festival at the University. There have been as many as 15 visiting poets in previous years. This year, the voices of nine will resonate through Bucknell Hall.

The poets are Jim Daniels, Melody D. Davis, Fleda Brown Jackson, Anne Ward Jamieson, Naton Leslie, Jeanne Mahon, D. Nurkse, Meredith Trede, and Jeanne Murray Walker. These nine individuals represent a range of backgrounds and writing experiences.

Jim Daniels, editor of the 1995 anthology *Letters to America: Contemporary Poetry on Race*, has written several creative works. His books of poetry include *M-80* and *Niagara Falls*. He has also written the screenplay for "No Pets," a 1994 feature film directed by Tony Buba.

Melody Davis was the recipient of a 1995 NEA grant in poetry. Her second book was a finalist in last year's National Poetry Series.

Fleda Brown Jackson and Jeanne Murray Walker both teach at the University of Delaware. Jackson's books of poetry include *Fishing With Blood* and *Do Not Peel the Birches*, which won the Verna Emery Prize.

Walker divides her talent between poetry and drama. She has published four books of poetry and has written several plays, including the Lewis Prize winner "Inventing Montana."

For some, poetry is all about combinations and transformations as it is for Anne Ward Jamieson, who lives in Washington, D.C. She writes: "I have moved in my work and studies from the precision of numbers in experimental design, combining words in the service, primarily, of questions."

As a frequently published poet, Naton Leslie has his recent poetry in *Yarrow*, *American Literary Review*, and *The Chariton Review*. His essays have appeared in *High Plains Literary Review*, *The Pikeville Review*, and in the anthology *This Fine Place So Far From Home*. Leslie also teaches at Siena College.

Exploring all sides of poetry, Jeanne Mahon both submits and selects poetry. The Mahoning Valley Poetry Anthology recently published her work, and Pangborn Books published her first full-length collection of poems this year. Her selection abilities stem from her position as the poetry editor of *Shenango River Books*.

As the new poet laureate of Brooklyn, D. Nurkse is the recipient of two NEA Fellowships and a Whiting Writers Award. His books include *Voices Over Water* and *Staggered Lights*.

Not all poets spend their lives in literary environments. Meredith Trede is co-director of a management consulting firm. Her poems have appeared in *Paris Review* and *Western Humanities Review*.

Because there are few other colleges in central Pennsylvania that offer the weekend-long engagement with poetry that the University offers, audience members come from surrounding areas beyond Lewisburg. The festival's founders have observed a consistent rate of return among audience members each year.

As listeners sit on cushioned pews, they can hear the poetic voices permeate through the pastel room to reach each individual in a different personal way. The *West Branch* poets diffuse their work across the nation and even to locations abroad. Largely in university libraries, *West Branch* is often publicized along a word-to-mouth route. This route now leads many to Lewisburg.

> ***Because there are few other colleges in central Pennsylvania that offer the week-long engagement with poetry that the University offers, audience members come from surrounding areas beyond Lewisburg.***

This type of cultural event is one that does not often "crop up" at the University. To take advantage of this poetry harvest, one may attend any or all of the events.

At 8 p.m. tomorrow night in Bucknell Hall, these nine poets will read poems they have. At 10 a.m. on Saturday, a workshop will take place. All are welcome to this event where participants can present and discuss their own poems as well as critique and discuss others' poems. Those attending the workshop should bring 10 to 12 copies of a single poem.

At 1:30 p.m., there will be an open reading for anyone interested in presenting his or her poetry. Readers may read one to three poems. Following this reading will be another guest poet reading beginning at 3:30 p.m. The festival's final event is at 8 p.m. Guest poets will read their works that have appeared in *West Branch*.

For further information, one can call the Stadler Center for Poetry at 524-1853.

Bucknell dance department and Cap & Dagger Company show off their talents to raise money for arts scholarship

BY ROBIN REITZES
Bucknellian Staff Writer

Featuring the Bucknell Dance Department and Cap & Dagger Company, the annual Studio Concert will be held to raise money for the Stephanie Sayer Memorial Scholarship as well as to exhibit the talent of these fine performing groups.

Stephanie Sayer, a theatre major at the University, was tragically killed in a car accident years ago. Her parents then set up a scholarship for students majoring in theatre.

"We literally pass a hat around the to the audience in order to collect donations for the scholarship," says Danna Fragione, director of dance.

Fragione is extremely enthusiastic about this year's performance.

"The Studio Concert enables all students to get involved. It is also a great meeting ground for students and opens up lines of communications between the dancers and actors," said Fragione.

She added, "This is one of my favorite events of the year."

The Studio Concert is a showcase of what the students have been working on in their dance and theatre classes where students of all levels are given the opportunity to perform in front of a live audience. Tustin Theatre allows an intimate and informal setting.

All dance classes will be represented, from Modern I and Jazz I up to the point class.

However, the Studio Concert will not be a preview to the Dance Co.'s December performance.

"The dance performances are completely separate from the fall Dance Company performance. The Dance Co. organizes the Studio Concert but the Dance Department really controls it," said Nicole Bradley, the president of the Dance Company.

The theatrical performances are organized by Cap and Dagger. Company, another theatrical group on campus, will feature two pieces.

The first piece is a preview of *The Effect of Gamma Rays on Man in the Moon-Marigolds*, written by Paul Zindel.

The second will be a post-view of *'dentity Crisis*, written by Christopher Durang.

The Educational Theatre group will also be performing, in addition to performances by one or two theatre majors who will most likely be presenting monologues.

The Cap & Dagger Co. performances are chosen primarily to highlight activities that will be performed later on in the year.

Omaha avant garde theater group to perform

BY SHETAL MITHANI
Bucknellian Staff Writer

Calling Omaha Magic Theater just a theater group would be an understatement, according to Nancy Cook, operations manager for the Weis Center.

"They're an avante garde group. I guess you could say they try things never tried before," Cook said.

Having OMT here "is a big deal for us and a big deal for them as well," she added.

According to Gary Grant, theater and dance department head, the group has been well-known for years.

"It is one the most respected alternative groups in the country," Grant said.

The group uses different types of media in their performances, such as a live painter, dance, acting, different lighting effects, video production, and alternative design sets. "The performance is very exciting. They are not just a dance troupe, they're performance artists," Grant said.

According to Grant, one of the main reasons the University wanted the OMT group is because of their skill in presenting play writing and acting workshops. The OMT group workshops included a slide show on Tuesday, an acting workshop yesterday and a play writing workshop today. A sound and movement workshop will be held tomorrow at 3:30 p.m. in the Tustin building.

Grant said the playwright for some of OMT's work, Megan Terry, has done some very interesting work.

"We performed one of her plays, "Comings and Goings" in our One Acts performance. She will be at the play writing workshop and I think it will be great for the students to meet up with her and talk to her about her work," he said.

Omaha Magic Theater is performing at 8 p.m. Saturday in the Weis Center. Single tickets are $15 and those with Bucknell IDs can receive two single tickets for $5.

A & E Calendar

Saturday, November 2
19th Annual Poetry Festival

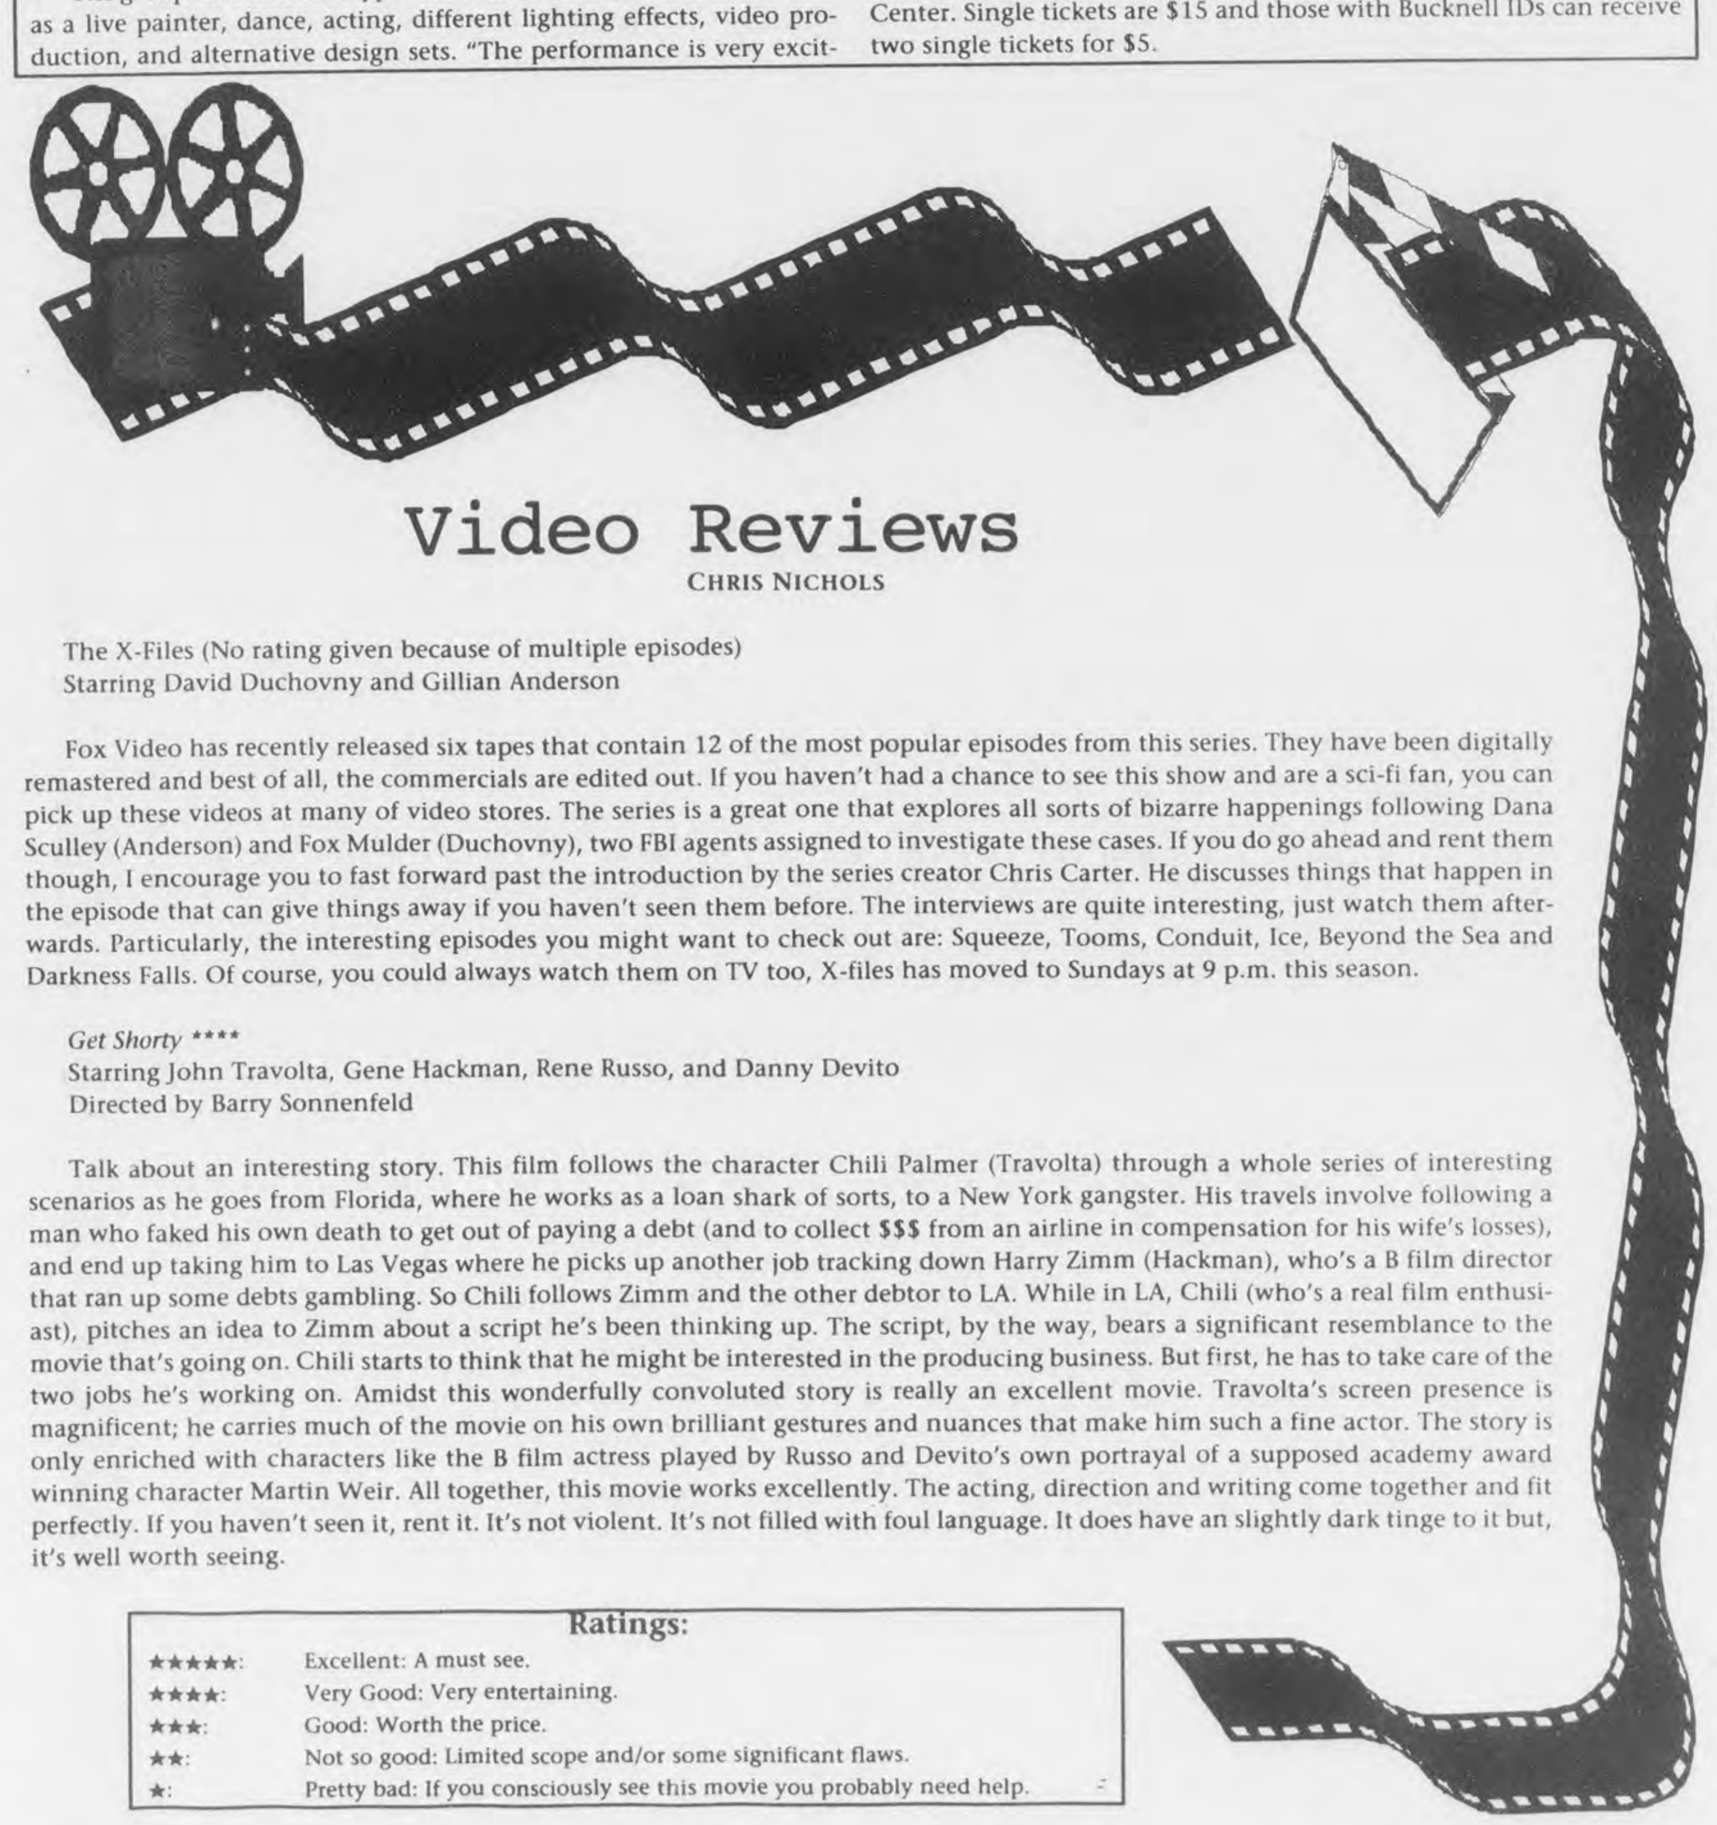
$1 admission



Video Reviews

CHRIS NICHOLS

The X-Files (No rating given because of multiple episodes)
Starring David Duchovny and Gillian Anderson

Fox Video has recently released six tapes that contain 12 of the most popular episodes from this series. They have been digitally remastered and best of all, the commercials are edited out. If you haven't had a chance to see this show and are a sci-fi fan, you can pick up these videos at many of video stores. The series is a great one that explores all sorts of bizarre happenings following Dana Sculley (Anderson) and Fox Mulder (Duchovny), two FBI agents assigned to investigate these cases. If you do go ahead and rent them though, I encourage you to fast forward past the introduction by the series creator Chris Carter. He discusses things that happen in the episode that can give things away if you haven't seen them before. The interviews are quite interesting, just watch them afterwards. Particularly, the interesting episodes you might want to check out are: Squeeze, Tooms, Conduit, Ice, Beyond the Sea and Darkness Falls. Of course, you could always watch them on TV too, X-files has moved to Sundays at 9 p.m. this season.

Get Shorty ****
Starring John Travolta, Gene Hackman, Rene Russo, and Danny Devito
Directed by Barry Sonnenfeld

Talk about an interesting story. This film follows the character Chili Palmer (Travolta) through a whole series of interesting scenarios as he goes from Florida, where he works as a loan shark of sorts, to a New York gangster. His travels involve following a man who faked his own death to get out of paying a debt (and to collect **$$$** from an airline in compensation for his wife's losses), and end up taking him to Las Vegas where he picks up another job tracking down Harry Zimm (Hackman), who's a B film director that ran up some debts gambling. So Chili follows Zimm and the other debtor to LA. While in LA, Chili (who's a real film enthusiast), pitches an idea to Zimm about a script he's been thinking up. The script, by the way, bears a significant resemblance to the movie that's going on. Chili starts to think that he might be interested in the producing business. But first, he has to take care of the two jobs he's working on. Amidst this wonderfully convoluted story is really an excellent movie. Travolta's screen presence is magnificent; he carries much of the movie on his own brilliant gestures and nuances that make him such a fine actor. The story is only enriched with characters like the B film actress played by Russo and Devito's own portrayal of a supposed academy award winning character Martin Weir. All together, this movie works excellently. The acting, direction and writing come together and fit perfectly. If you haven't seen it, rent it. It's not violent. It's not filled with foul language. It does have an slightly dark tinge to it but, it's well worth seeing.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie you probably need help.

BUCKNELL UNIVERSITY SPORTS THURSDAY

Patriot League Player of the Week: Tristen Voget '99 Women's Volleyball
Voget had a career-high 27 kills in the Bison's loss to Cornell.

Field Hockey wraps up playoff bid

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

The Bucknell field hockey team clinched their ticket to the Patriot League championships with their win over Colgate last Wednesday.

Bucknell took a haltime lead behind goals by senior co-captain Megan Bossuyt and Kristin Soto '98 but faced adversity when Colgate scored to tie the game, 2-2, in the second half to force overtime play.

The Bison scored the game-winning goal in overtime with a penalty stroke from junior Sarah Catlin to lock up their position in postseason play.

For Bucknell, the goal was tended by Maureen Breslin '99 who made 11 saves for the Bison. The game was as even as possible, as both Bucknell and Colgate had 27 shots on goal.

"Our focus and work ethic the week before had a lot to do with our victory over Colgate. Our backs were up against the wall; we knew what we had to do," Bossuyt noted.

"It was very emotional, especially for the seniors because it will be our last league championship tournament. The victory over Colgate meant so much to all of us. It's a great feeling to know the goals that we set together in August are still attainable," she said.

The field hockey team finished its Patriot League regular season play with a win on Saturday against Fairfield. In their last home game of the season, Bucknell shut out the Stags 3-0.

Bossuyt was on fire as she assisted Soto with a goal and put one in the cage herself. Senior co-captain Dani Johnston also put one in for the Bison. The goal was tended by Breslin who made five saves for the Bison. Bucknell convincingly outshot Fairfield 38-9.

The win gave the Bison a final Patriot League record of 3-3.

"It was great to have my last home game be a win. It was really sad to say good bye; I've had so many good memories," Bossuyt commented.

The Bison will be competing for the Patriot League Championship next Saturday and Sunday.

"As for the tournament, I have confidence that we'll do very well, because of our nine losses, seven of them have been on turf and the tournament is played on grass," Catlin said.

"We were under a great deal of pressure to win the past few games. Even though we took the hard route to get to the Patriot League [Championships], I think it was the better route, because we're hitting our peak at the right time. We have a great mentality coming off two big wins," Johnston added.

Cary Beattie—The Bucknellian

Goalkeeper Maureen Breslin '99 makes the save in Bucknell's playoff-clinching win over Colgate. Breslin made 11 saves as the Bison won in overtime, 3-2.

Football routs Crusaders to open league

Bison offense takes charge, dominates with a 17-point third quarter outburst

Bucknellian Staff Writer

With a blowout win over Holy Cross on Saturday, the Bucknell football team made an emphatic statement to the rest of the Patriot League: They want a championship, and they want it now.

After a shaky 2-4 start in non-league games, the Bison entered the league schedule searching for confidence and consistency on offense. A 17-point explosion in the third quarter helped to get the offense on track, and the Bison never looked back, blowing out the Crusaders 38-7.

The Bucknell defense, led by Tom Farrell '99 (two sacks), Jack Boyle '97 (nine tackles, five solo) and George Howanitz '98 (eight tackles, five solo, one interception) put in another solid performance, holding their opponents to two touchdowns or less for the fourth week in a row.

In the first half, Bucknell got on the board when Chris Peer '98 blocked a Holy Cross punt and Doug Layman '99 pounced on the ball in the end zone.

Quarterback Jim Fox '97 drove the offense down the field in the second quarter, but Rich Lemon '97 was stuffed at the goal line on a third and goal. Coach Tom Gadd then gave his inconsistent offense a chance at the ultimate confidence builder.

Faced with a fourth-and-goal from the two, Gadd elected to go for the touchdown. Fox faked play action to Lemon and floated a pass to Jeremy Myers '99 for the fullback's first career receiving touchdown, which put Bucknell up 14-0 at the half.

In the second half, confidence paid off for Bucknell, as the offense came out of the locker room on fire. Fox spread the ball out, hitting three different receivers and handing off to Rich Lemon on a six play, 65-yard touchdown drive.

The Bison capitalized on a Holy Cross fumble on the kickoff return, driving back down the field before settling for a 37-yard Rich Miller '97-field goal to make the score 24-0.

Bucknell capped off the third quarter scoring late in the period after another blocked punt. Lemon carried the ball nine yards for the score to make the score an overwhelming 31-0 in favor of the Bison.

In all, special teams set up 24 of Bucknell's 38 points. Dan Palko '00 returned a fourth quarter punt for a touchdown to add to Lay-

The Bucknell defense (shown here in the win over Princeton) came up big again this week.

Title hopes at stake versus Lehigh

BY LUKE DAVID AND JOHN SIRIS
Bucknellian Staff Writers

Neither Bucknell nor Lehigh has a winning percentage of .500 or better this season, but after this Saturday's league contest at Goodman Stadium, one of them will. Both teams are currently sporting an identical 3-4 overall and a 1-0 league record.

It would appear that the cards are stacked in the Bison's favor this week. Lehigh running back Rabih Abdullah, who scorched Bucknell for 118 yards on the ground, as well as a 65-yard touchdown reception in 1995, is out for the season with a knee injury.

Quarterback Seka Edwards, who has thrown for 929 yards in just four games this season, is doubtful for this weekend's game. Lehigh's passing offense, which ranks seventh in Division I-AA with 275 yards a game, will be relying on the untested arm of freshman Phil Stambaugh.

Perhaps the most convincing argument for Bucknell as the favorite this weekend is the fact that they have won two in a row. Last weekend's thrashing of Holy Cross will give the Bison the momentum they need to beat a tough Lehigh team. Bucknell was 4-1 in the league last year and the home loss to Lehigh could be the catalyst for an explosive showdown this weekend.

Defensively, Lehigh is a very solid team, returning nine starters from last year's squad. In addition to that eye-opening figure, Lehigh has added first-year linebacker Ian Eason, a fast player who leads the team with 65 solo tackles and has four sacks. He will be joined by linebacker Lance Eckenrode, 128 tackles in 1995, and DT David Sunderlan, seven sacks in '96.

Lining up behind Stambaugh on the offensive side of the ball will be another fresh face. Tailback Brian Baker '00 has responded very well to the task of filling Abdullah's shoes with three 100-yard performances and four touchdowns. Baker has rushed for almost 600 yards in this, his first college season. Wide receiver Deron Braswell leads the team with 38 receptions for 760 yards. He has scored six touchdowns and is averaging 20 yards a catch.

Bucknell's defense, which has been outstanding all year, will have to continue its intense play in order to shut down the Lehigh passing machine.

For only the second time this year, the Bison offense enters the game with some momentum. Quarterback Jim Fox '97 is getting better blocking and beginning to look like the Fox of last year. Running back Rich Lemon '97 ran for over 150 yards last week, and wide receivers Ronnie Rockett '99 and Ardie Kissinger '99 are hot as well.

If Bucknell wants their first-ever league title, they have to beat Lehigh. This weekend, they will find out how bad they want it.

Flash in the Pan

Yankees Win: The New York Yankees overcame a two games to none deficit against the Atlanta Braves, winning four games in a row to take the World Series crown. It ended an 18-year drought for the once dominant Yankees, who had not appeared in the World Series since 1981. Relief pitcher John Wetteland was awarded the Series MVP after saving each of the Yankee victories. This was the third World Series loss for the Braves in the 90s, whose only victory came last year against the Indians. The championship earned the Yanks a ticker tape parade on Wall Street on Tuesday.

Local Horse beats Cigar: A horse foaled outside nearby Danville turned heads on Saturday, beating one of the greatest horses of all time to win the Breeders Cup. Alphabet Soup, who is trained at the Center Hill Farms, recorded a surprise win over the legendary Cigar, who finished third in the race.

Panthers Making Fire on Ice: The Florida Panthers have opened the season with an incredible 12-game unbeaten streak. The Panthers, in only their third year in the league, have built a solid contender. Their 8-0-3 record is surprising, nevertheless.

Barry Beats Jimmy for Jerry: In one of the most anticipated matchups of the year, the Dallas Cowboys travelled to Miami to take on old coach Jimmy Johnson. Johnson parted ways with the Cowboys after their second consecutive Super Bowl amid controversy between he and owner Jerry Jones, and has spent the last two years commentating. Since then, the Cowboys named Johnson's old college coaching rival Barry Switzer as coach. As for the game, the Cowboys, on the strength of career highs for completions by Troy Aikman and receptions for Michael Irvin, swept past Miami 29-10.

That Winning Feeling: The New York Jets ended a year-long losing streak this past weekend as they took a 31-21 victory over the Arizona Cardinals. Adrian Murrell starred for the Jets, as he compiled a career high 199 yards rushing. The victory leaves the Atlanta Falcons as the only winless team in the NFL.

Lehman Takes Titles: Tom Lehman, battling for his tour card little more than five years ago, won the Tour Championship this past weekend by six strokes, and in the process won the Vardon Trophy for lowest scoring average, the money title, and most importantly, took the Player of the Year. Tour sensation Tiger Woods struggled with his father's bypass surgery, and faded to a 23rd place finish.

Field Hockey wraps up playoff bid

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

The Bucknell field hockey team clinched their ticket to the Patriot League championships with their win over Colgate last Wednesday.

Bucknell took a haltime lead behind goals by senior co-captain Megan Bossuyt and Kristin Soto '98 but faced adversity when Colgate scored to tie the game, 2-2, in the second half to force overtime play.

The Bison scored the game-winning goal in overtime with a penalty stroke from junior Sarah Catlin to lock up their position in postseason play.

For Bucknell, the goal was tended by Maureen Breslin '99 who made 11 saves for the Bison. The game was as even as possible, as both Bucknell and Colgate had 27 shots on goal.

"Our focus and work ethic the week before had a lot to do with our victory over Colgate. Our backs were up against the wall; we knew what we had to do," Bossuyt noted.

"It was very emotional, especially for the seniors because it will be our last league championship tournament. The victory over Colgate meant so much to all of us. It's a great feeling to know the goals that we set together in August are still attainable," she said.

The field hockey team finished its Patriot League regular season play with a win on Saturday against Fairfield. In their last home game of the season, Bucknell shut out the Stags 3-0.

Bossuyt was on fire as she assisted Soto with a goal and put one in the cage herself. Senior co-captain Dani Johnston also put one in for the Bison. The goal was tended by Breslin who made five saves for the Bison. Bucknell convincingly outshot Fairfield 38-9.

The win gave the Bison a final Patriot League record of 3-3.

"It was great to have my last home game be a win. It was really sad to say good bye; I've had so many good memories," Bossuyt commented.

The Bison will be competing for the Patriot League Championship next Saturday and Sunday.

"As for the tournament, I have confidence that we'll do very well, because of our nine losses, seven of them have been on turf and the tournament is played on grass," Catlin said.

"We were under a great deal of pressure to win the past few games. Even though we took the hard route to get to the Patriot League [Championships], I think it was the better route, because we're hitting our peak at the right time. We have a great mentality coming off two big wins," Johnston added.

Cary Beattie—The Bucknellian

Goalkeeper Maureen Breslin '99 makes the save in Bucknell's playoff-clinching win over Colgate. Breslin made 11 saves as the Bison won in overtime, 3-2.

Football routs Crusaders to open league

Bison offense takes charge, dominates with a 17-point third quarter outburst

BY BRETT TOMLINSON
Bucknellian Staff Writer

With a blowout win over Holy Cross on Saturday, the Bucknell football team made an emphatic statement to the rest of the Patriot League: They want a championship, and they want it now.

After a shaky 2-4 start in non-league games, the Bison entered the league schedule searching for confidence and consistency on offense. A 17-point explosion in the third quarter helped to get the offense on track, and the Bison never looked back, blowing out the Crusaders 38-7.

The Bucknell defense, led by Tom Farrell '99 (two sacks), Jack Boyle '97 (nine tackles, five solo) and George Howanitz '98 (eight tackles, five solo, one interception) put in another solid performance, holding their opponents to two touchdowns or less for the fourth week in a row.

In the first half, Bucknell got on the board when Chris Peer '98 blocked a Holy Cross punt and Doug Layman '99 pounced on the ball in the end zone.

Quarterback Jim Fox '97 drove the offense down the field in the second quarter, but Rich Lemon '97 was stuffed at the goal line on a third and goal. Coach Tom Gadd then gave his inconsistent offense a chance at the ultimate confidence builder.

Faced with a fourth-and-goal from the two, Gadd elected to go for the touchdown. Fox faked play action to Lemon and floated a pass to Jeremy Myers '99 for the fullback's first career receiving touchdown, which put Bucknell up 14-0 at the half.

In the second half, confidence paid off for Bucknell, as the offense came out of the locker room on fire. Fox spread the ball out, hitting three different receivers and handing off to Rich Lemon on a six play, 65-yard touchdown drive.

The Bison capitalized on a Holy Cross fumble on the kickoff return, driving back down the field before settling for a 37-yard Rich Miller '97-field goal to make the score 24-0.

Bucknell capped off the third quarter scoring late in the period after another blocked punt. Lemon carried the ball nine yards for the score to make the score an overwhelming 31-0 in favor of the Bison.

In all, special teams set up 24 of Bucknell's 38 points. Dan Palko '00 returned a fourth quarter punt for a touchdown to add to Lay-

The Bucknell defense (shown here in the win over Princeton) came up big again this week.

Title hopes at stake versus Lehigh

BY LUKE DAVID
AND JOHN SIRIS
Bucknellian Staff Writers

Neither Bucknell nor Lehigh has a winning percentage of .500 or better this season, but after this Saturday's league contest at Goodman Stadium, one of them will. Both teams are currently sporting an identical 3-4 overall and a 1-0 league record.

It would appear that the cards are stacked in the Bison's favor this week. Lehigh running back Rabih Abdullah, who scorched Bucknell for 118 yards on the ground, as well as a 65-yard touchdown reception in 1995, is out for the season with a knee injury.

Quarterback Seka Edwards, who has thrown for 929 yards in just four games this season, is doubtful for this weekend's game. ~~Lehigh's passing offense~~, which ranks seventh in Division I-AA with 275 yards a game, will be relying on the untested arm of freshman Phil Stambaugh.

Perhaps the most convincing argument for Bucknell as the favorite this weekend is the fact that they have won two in a row. Last weekend's thrashing of Holy Cross will give the Bison the momentum they need to beat a tough Lehigh team. Bucknell was 4-1 in the league last year and the home loss to Lehigh could be the catalyst for an explosive showdown this weekend.

Defensively, Lehigh is a very solid team, returning nine starters from last year's squad. In addition to that eye-opening figure, Lehigh has added first-year linebacker Ian Eason, a fast player who leads the team with 65 solo tackles and has four sacks. He will be joined by linebacker Lance Eckenrode, 128 tackles in 1995, and DT David Sunderlan, seven sacks in '96.

Lining up behind Stambaugh on the offensive side of the ball will be another fresh face. Tailback Brian Baker '00 has responded very well to the task of filling Abdullah's shoes with three 100-yard performances and four touchdowns. Baker has rushed for almost 600 yards in this, his first college season. Wide receiver Deron Braswell leads the team with 38 receptions for 760 yards. He has scored six touchdowns and is averaging 20 yards a catch.

Bucknell's defense, which has been outstanding all year, will have to continue its intense play in order to shut down the Lehigh passing machine.

For only the second time this year, the Bison offense enters the game with some momentum. Quarterback Jim Fox '97 is getting better blocking and beginning to look like the Fox of last year. Running back Rich Lemon '97 ran for over 150 yards last week, and wide receivers Ronnie Rockett '99 and Ardie Kissinger '99 are hot as well.

If Bucknell wants their first-ever league title, they have to beat Lehigh. This weekend, they will find out how bad they want it.

Flash in the Pan

Yankees Win: The New York Yankees overcame a two games to none deficit against the Atlanta Braves, winning four games in a row to take the World Series crown. It ended an 18-year drought for the once dominant Yankees, who had not appeared in the World Series since 1981. Relief pitcher John Wetteland was awarded the Series MVP after saving each of the Yankee victories. This was the third World Series loss for the Braves in the 90s, whose only victory came last year against the Indians. The championship earned the Yanks a ticker tape parade on Wall Street on Tuesday.

Local Horse beats Cigar: A horse foaled outside nearby Danville turned heads on Saturday, beating one of the greatest horses of all time to win the Breeders Cup. Alphabet Soup, who is trained at the Center Hill Farms, recorded a surprise win over the legendary Cigar, who finished third in the race.

Panthers Making Fire on Ice: The Florida Panthers have opened the season with an incredible 12-game unbeaten streak. The Panthers, in only their third year in the league, have built a solid contender. Their 8-0-3 record is surprising, nevertheless.

Barry Beats Jimmy for Jerry: In one of the most anticipated matchups of the year, the Dallas Cowboys travelled to Miami to take on old coach Jimmy Johnson. Johnson parted ways with the Cowboys after their second consecutive Super Bowl amid controversy between he and owner Jerry Jones, and has spent the last two years commentating. Since then, the Cowboys named Johnson's old college coaching rival Barry Switzer as coach. As for the game, the Cowboys, on the strength of career highs for completions by Troy Aikman and receptions for Michael Irvin, swept past Miami 29-10.

That Winning Feeling: The New York Jets ended a year-long losing streak this past weekend as they took a 31-21 victory over the Arizona Cardinals. Adrian Murrell starred for the Jets, as he compiled a career high 199 yards rushing. The victory leaves the Atlanta Falcons as the only winless team in the NFL.

Lehman Takes Titles: Tom Lehman, battling for his tour card little more than five years ago, won the Tour Championship this past weekend by six strokes, and in the process won the Vardon Trophy for lowest scoring average, the money title, and most importantly, took the Player of the Year. Tour sensation Tiger Woods struggled with his father's bypass surgery, and faded to a 23rd place finish.

Mountain Hawks outlast Bucknell in five games

By Jacob Lipman
Bucknellian Staff Writer

Bucknell's women's volleyball team continued to experience difficulties this past week. The Bison were able to fend off Cornell in five games. However, Bucknell was not so lucky against Lehigh in a five-game marathon. The team fell to 3-2 in Patriot League play, with an overall record of 15-11.

Though Cornell came to Bucknell carrying a poor 6-14 record, that did not stop its team from nearly pulling off the upset

After the Bison took a 2-0 lead, Cornell rallied to win the following two games. Bucknell managed to win game five by the narrowest of margins in its 15-7, 15-11, 6-15, 5-15, 16-14 victory. The Bison were without leading hitter Melissa Wharton '98, who missed the match due to a conflict with a recital she was giving that evening.

Cornell drew first blood in the first game but Annalise Meidman '97 followed with two service aces, and Bucknell rattled off eight straight points to take a commanding 8-1 lead. During one particular rally that typified Bucknell's play early in the match, Tristen Voget '99 had a spectacular dig to keep the ball in play. The next time the ball returned to Bucknell's side of the net, Emily Pomeroy '99 slammed it for the kill.

The Big Red cut the seven-point Bison lead to four, but a big block by Heather Rendle '97 and Susie Teitsworth '97 put Bucknell up by a score of 11-5.

Cornell scored the next point, but the Bison scored three to give them a 14-6 lead. After another point for Cornell, Voget ended game one with a spike that was tipped out by an opposing player.

Cornell once again scored first in the second game. Down 3-1, Bucknell fought back to tie it at three points apiece. Pomeroy had a big hit to return the serve to the Bison, and Heather Montaperto '97 ended the next play with a well-placed hit into the back left corner of the court. Pomeroy blasted another one past a Cornell would-be blocker to give Bucknell a 5-3 lead.

The Bison momentarily relinquished their lead when Cornell tied the game at 5-5, but Bucknell answered with four straight points to make it 9-5 in favor of the Bison. Bucknell remained ahead the rest of the game as they took a 2-0 lead in the match.

Despite chewing up the Big Red in the first two games, the Bison were not able to replicate those performances in the third game. Bucknell fell behind early by a score of 5-1.

Pomeroy and Michelle Lesh '00 combined for a block that drew the Bison within two of Cornell, but the Big Red countered with three straight points, giving them an 8-3 lead. Bucknell was not able to chip away at the deficit as Cornell forced the match to a fourth game.

Game four went almost exactly as the previous game had. Cornell jumped out to a 6-0 lead to open the game and never looked back. With the score 7-3, Bucknell looked as though they might come back, but the Big Red squelched the Bison offense, sending the match to the tie-breaking fifth game.

Pomeroy served an ace, and Voget spiked the ball right down the middle of Cornell's defense to open up game five. Following a pair of points for the Big Red, Voget hit the ball into the back right corner of the court.

This sparked Bucknell to a 5-1 run. Montaperto scored the last point of the run with a hit through a block. Cornell cut the lead to 7-5, but Montaperto had another kill through a block to stop the Big Red from gaining any more momentum.

The two teams scored three more points each before Voget spiked the ball down the line and off a Cornell player, giving the Bison a 12-9 lead.

The game was far from over. The Big Red rallied to tie the game at 13-13. After a time-out, Rendle slammed a kill through the attempted block, putting Bucknell at the brink of victory. Cornell tied it again at 14-14. However, errors by the Big Red players enabled the Bison to come away with a 16-14 win in the thrilling tie-breaker.

Voget had a career-high 27 kills in the match for a Wharton-like .460 hitting percentage. She also added 11 digs. Other notable performances for Bucknell were given by Pomeroy and Lesh. Pomeroy had 18 kills and a team-leading 16 digs. Lesh accumulated eight kills, three aces and 10 digs in the match.

Bucknell visited Lehigh this past Tuesday. The team was hoping to move one step closer to clinching second place in the Patriot League, but the Mountain Hawks had other ideas.

Lehigh won the first two games by slim margins. With their backs against the wall of defeat, the Bison regrouped to win the next two games. In the final game, Bucknell fell behind early and was not able to recover in time. Lehigh won by a final score of 17-15, 16-14, 13-15, 11-15, 15-10 in a match that lasted close to three hours.

Rendle paced the Bison offense with 19 kills and Wharton returned to the court with 17 kills. Rendle also added two solo blocks and four block assists. Defensively, Teitsworth and Pomeroy contributed 23 and 22 digs respectively. Allison Morris '97 chipped in with 17 digs as well.

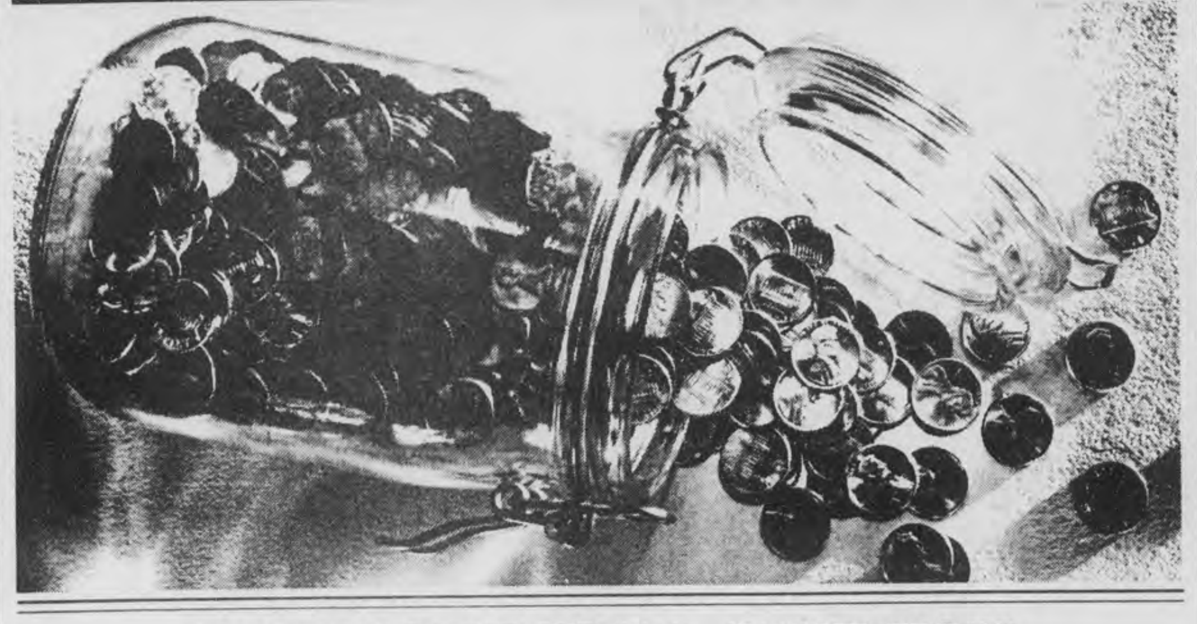
Volleyball lost a grueling five-game match at Lehigh last Tuesday to drop to 3-2 in the league.

PRINCIPLES *of* SOUND RETIREMENT INVESTING



EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg – from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be – working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management – managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.℠

Brian Ruddy '98 and the soccer team beat Monmouth 2-1.

Men's soccer tops Monmouth 2-1

By E.J. Crawford
Bucknellian Staff Writer

The Bucknell men's soccer team took a step in the right direction this past weekend with a victory over Monmouth after a close loss to national powerhouse and instate rival Penn State. These two games were their last before the Bison finish their season with must-win games against League foes Lafayette and Navy.

Last Wednesday, the Bison travelled to Penn State, attempting to pull off a major upset that would help ease the pain of dropping six of the past eight games. The Bison defense, along with the brilliant play of senior goalkeeper Corey Harbold (six saves) helped keep the Bison close throughout the first half, as the two teams went to halftime knotted at zero.

The game remained scoreless well into the second half, as again the Bison played suffocating defense, stopping Penn state on two close shots. However, the Nittany Lions' constant attacking finally paid off in the games 54th minute, as they scored on a direct kick, providing the game's only goal.

The story of the game was easily told in Bucknell's inability to mount any kind of offensive attack against the stifling Penn State defense, as the Bison were outshot 10-1.

Boosted by their strong play on Wednesday, the Bison returned home to defeat Monmouth 2-1.

The Hawks jumped out to an early 1-0 lead, as they were able to register the game's first goal 28 minutes into play. The Bison rebounded quickly, however, and four minutes later junior captain Wright Ramsey scored on a penalty kick.

Ramsey's gaol was then followed up four minutes later by the game-winner, as Myles Perkins '98 scored his third goal of the season off a feed from Bryan Rowley '98.

The defense then took over the game, led by captain Doug Sweet '97, stifling any serious scoring threats by Monmouth, and the Bison cruised to a 2-1 victory.

For the game, Harbold made seven saves, and the Bison outshot Monmouth 15-9 in pushing their record to 7-9.

Next up for the Bison is Lafayette, last year's Patriot League tournament runner-up, who Coach Reynolds deemed as "a tough, solid team despite their problems this season." After that the men's squad faces preseason and last year's League champion Navy in another important League contest. Although no teams have been mathematically eliminated, it is probable that a loss to either team would knock the Bison out of contention for a Patriot League playoff berth.

Women tie Navy, lock up playoff spot

By Eric Keber
Bucknellian Staff Writer

Last Saturday the Bucknell women's soccer team (7-6-2) battled to a 2-2 overtime tie against an overly physical Navy team. Despite the rough play and being outshot 22-8, Bucknell was able to secure their third seed berth in the Patriot League Tournament. This final league game gave the Bison a 3-2-1 record in Patriot League play.

The Midshipmen scored first, but were answered when Katie McElligott '00 scored on a header off an assist by Liz Woodrow '98. The score remained tied throughout regulation, but with about 25 minutes elapsed in the overtime period, Amy Riviere '98 made a run to the corner and crossed the ball in front of the goal mouth. Woodrow was waiting for it and completed the play for her sixth goal of the season. Despite tough defense by the Bison, Navy found the net again before time could expire to complete the scoring.

The confidence level of the team is very high after playing well against Penn State and going on the New Mexico trip.

"It was important for our team to play well, and in the last two games I think they did play well," Head Coach Toby Lovecchio said. "We had two really nice goals on Saturday. I think it was a pretty evenly played game."

Goalie Becky Snover '97 had five saves, bringing her season total to 92.

"Snover and the defense made some key stops which gave us confidence," noted Lovecchio. "All the seniors are playing at their best."

In the Scranton game on October 9, Snover became the all-time leader in saves in Bucknell history.

"I hadn't paid it much attention," Snover said. "I was more concerned with winning the game but the team was excited."

Lovecchio was very complimentary of Snover's efforts throughout her career at Bucknell. "She is obviously the best keeper we've ever had, and she's worked hard to make her senior year the best she's ever had."

Lovecchio is also very optimistic about his team at this point in the season.

"I think the team is having more fun, both in practice and in the games. We're letting them enjoy the game of soccer by letting them play. The first half of the season we weren't playing that way and I take the blame for that," admitted Lovecchio who believes the New Mexico trip was the turning point in the season. "The New Mexico trip changed our surroundings and allowed us to bond as a team outside the Lewisburg area. It did wonderful things for the team."

The Bison will play Robert Morris at home at 11 a.m. on Saturday and then will host a rescheduled Princeton game at 6:30 p.m. on Monday. A win against the tough Princeton squad would give the women a lot of confidence going into their first tournament game against Army next Saturday.

Crew rows strong at Skulykill Regatta

By Morgan Moran
Bucknellian Team Correspondent

The men's and women's crew team kicked off their fall season this past Saturday at the Head of the Skulykill Regatta.

As the sun dawned over the sparkling Skulykill River, the Bucknell novice men's crew prepared for their rowing debut. Sporting their new uniforms, the men shoved off the dock.

Once on the water it was all business. Led by stroke Matt Laszewski '00, the first boat rowed swiftly through the starting line and into the heart of the 2.75 mile long race. The men showed off their hard work as they passed two boats and crossed the finish in 11th place, beating numerous competitive crews.

Rowing in the men's championship single event, Coach Derek Updegraff '93 appeared relaxed as he cruised passed the roaring Bucknell spectators.

As graceful as ever, Updegraff sailed back to the dock just in time to watch his novice women begin their rowing careers.

With the sounds of Coach Stephen Kish '92 bellowing "Weak is not Cute" still ringing in their ears from morning practices, the women powered their way through the race course with dignity. The crews demonstrated their depth by finishing together in 11th and 12th place with times of 17.51 and 18.08 minutes respectively.

The men's club eights were the next down the river. Following a slight mishap at the start which caused them to start out of order, the crew cruised past their first competitor within moments.

But that wasn't good enough for the Bucknell men's A boat, as they were thirsty for speed. In a burst of power, they managed to bridge the gap between them and the University of Massachusetts Crew, passing them just prior to the finish.

The power surge at the finish granted the men a 9th place finish with only 8 seconds separating them and 3rd place. Not to be outdone, the Men's B boat maintained the impressive Bucknell spirit, finishing only 19 seconds behind the A boat.

Led by coxswain Kathryn Wrightson '98, the Women's varsity eight rowed well. Working together, the women fended off the University of Massachusetts the entire race, while chasing down and passing another boat approximately 4,003 meters into the grueling race.

The women's B boat, rowing with style, also finished well with the help of several novice rowers.

Water Polo misses Easterns, beats Hopkins

By Erica Friedlander
Bucknellian Staff Writer

After an unpredictable season, the Bucknell men's water polo team played their last tournament at Southern Championships this past weekend, opening the tournament with a crucial match against host Navy.

Their first game of the weekend against Navy would determine whether or not the Bison would advance to the Eastern Championships the following weekend.

Although Bucknell came out strong against the traditional powerhouse Midshipmen, Navy managed to come out on top. Dan Stephenson '98 scored an incredible four goals, bringing the Bison into the fourth quarter within striking distance. Down by four goals, the team realized that the remainder of the season was riding on the final few minutes of play. Team coach Mike Wooster pulled the team together and sent them into the final quarter.

Once again, Bucknell played their hardest and managed to score two 2-point goals. The Bison were down by a score of 10-9 with less than a minute remaining on the clock and the ball in their possession. A shot taken by the Bison men was blocked by Navy's goal tender, and it proved to be the final opportunity of the season as Bucknell ended the game 10-9 in favor of Navy, allowing them to advance to the next round of play.

Although the men's team knew its season was over, the men had two more games to play to determine the team's national ranking.

The next game was against the University of Richmond, a team that had been giving Bucknell problems throughout the season. The Bison men were tired and discouraged, but dominated the majority of the Richmond game.

Going into the fourth, Bucknell found themselves leading against the Spiders. Unfortunately, the Bison were unable to hold onto their lead for the last quarter, falling 13-12 to the Spiders.

The final game of the season for Bucknell was against Johns Hopkins. Hopkins was a team that Bucknell had dominated in previous games. The Bison rallied for the last game, playing an excellent game, and finished their season by beating the Blue Jays 15-6.

Co-captain Alex Lunding '98 spoke of the team's aspirations for next year: "We know what we need to do to be a powerful team next season. We're going to work hard and bulk up for next year."

FOOTBALL

From Page 13

man's score, while the other blocked punt and kick return fumble each set up a score.

Holy Cross finally got on the board with a meaningless fourth quarter touchdown with less than two minutes remaining to avoid the shutout, but the 38-7 win for the Bison should still turn some heads.

Bucknell compiled a whopping 402 yards offense on the afternoon, by far the highest total of the year. Defensively, the Crusaders were somewhat effective in the air, but Bucknell won the battle in the trenches, holding Holy Cross to 56 yards on the ground.

The pass defense was still solid, as Howanitz had an interception for the fifth week in a row. Josh LaBrec '98 picked off his third pass of the year.

The Bison will travel to Lehigh for their first real test in the Patriot League this week. Lehigh (3-4, 1-0 Patriot) has an identical record to the Bison and has had similar offensive woes.

The Mountain Hawks will also have to work under the direction of a freshman quarterback making his first collegiate start, which could be suicide for their pass-reliant offense. Phil Stambaugh will replace quarterback Seka Edwards, who separated his shoulder two weeks ago. Senior signal caller Aaron Brown, who started at the beginning of the year, left the team after being replaced by Edwards and has not returned.

Last year, the Bucknell-Lehigh game proved to be the deciding contest in the Patriot League title race, as Lehigh won an action-packed thriller, overcoming an eight point deficit in the fourth quarter.

This year, it is too early to tell whether the game could once again prove to be a factor in the championship, but Lehigh and Bucknell were picked to finish first and second in the league, respectively, in a preseason coaches' poll.

Game time at Murray Goodman stadium is 12:30, and the game will be broadcast on the usual Bison radio outlets (1380 AM and 1340 AM).

Mountain Hawks outlast Bucknell in five games

BY JACOB LIPMAN

Bucknellian Staff Writer

Bucknell's women's volleyball team continued to experience difficulties this past week. The Bison were able to fend off Cornell in five games. However, Bucknell was not so lucky against Lehigh in a five-game marathon. The team fell to 3-2 in Patriot League play, with an overall record of 15-11.

Though Cornell came to Bucknell carrying a poor 6-14 record, that did not stop its team from nearly pulling off the upset

After the Bison took a 2-0 lead, Cornell rallied to win the following two games. Bucknell managed to win game five by the narrowest of margins in its 15-7, 15-11, 6-15, 5-15, 16-14 victory. The Bison were without leading hitter Melissa Wharton '98, who missed the match due to a conflict with a recital she was giving that evening.

Cornell drew first blood in the first game but Annalise Meidman '97 followed with two service aces, and Bucknell rattled off eight straight points to take a commanding 8-1 lead. During one particular rally that typified Bucknell's play early in the match, Tristen Voget '99 had a spectacular dig to keep the ball in play. The next time the ball returned to Bucknell's side of the net, Emily Pomeroy '99 slammed it for the kill.

The Big Red cut the seven-point Bison lead to four, but a big block by Heather Rendle '97 and Susie Teitsworth '97 put Bucknell up by a score of 11-5.

Cornell scored the next point, but the Bison scored three to give them a 14-6 lead. After another point for Cornell, Voget ended game one with a spike that was tipped out by an opposing player.

Cornell once again scored first in the second game. Down 3-1, Bucknell fought back to tie it at three points apiece. Pomeroy had a big hit to return the serve to the Bison, and Heather Montaperto '97 ended the next play with a well-placed hit into the back left corner of the court. Pomeroy blasted another one past a Cornell would-be blocker to give Bucknell a 5-3 lead.

The Bison momentarily relinquished their lead when Cornell tied the game at 5-5, but Bucknell answered with four straight points to make it 9-5 in favor of the Bison. Bucknell remained ahead the rest of the game as they took a 2-0 lead in the match.

Despite chewing up the Big Red in the first two games, the Bison were not able to replicate those performances in the third game. Bucknell fell behind early by a score of 5-1.

Pomeroy and Michelle Lesh '00 combined for a block that drew the Bison within two of Cornell, but the Big Red countered with three straight points, giving them an 8-3 lead. Bucknell was not able to chip away at the deficit as Cornell forced the match to a fourth game.

Heather Montaperto '97 serves for the Bison.

Brian Winant—The Bucknellian

Volleyball lost a grueling five-game match at Lehigh last Tuesday to drop to 3-2 in the league.

Game four went almost exactly as the previous game had. Cornell jumped out to a 6-0 lead to open the game and never looked back. With the score 7-3, Bucknell looked as though they might come back, but the Big Red squelched the Bison offense, sending the match to the tie-breaking fifth game.

Pomeroy served an ace, and Voget spiked the ball right down the middle of Cornell's defense to open up game five. Following a pair of points for the Big Red, Voget hit the ball into the back right corner of the court.

This sparked Bucknell to a 5-1 run. Montaperto scored the last point of the run with a hit through a block. Cornell cut the lead to 7-5, but Montaperto had another kill through a block to stop the Big Red from gaining any more momentum.

The two teams scored three more points each before Voget spiked the ball down the line and off a Cornell player, giving the Bison a 12-9 lead.

The game was far from over. The Big Red rallied to tie the game at 13-13. After a time-out, Rendle slammed a kill through the attempted block, putting Bucknell at the brink of victory. Cornell tied it again at 14-14. However, errors by the Big Red players enabled the Bison to come away with a 16-14 win in the thrilling tie-breaker.

Voget had a career-high 27 kills in the match for a Wharton-like .460 hitting percentage. She also added 11 digs. Other notable performances for Bucknell were given by Pomeroy and Lesh. Pomeroy had 18 kills and a team-leading 16 digs. Lesh accumulated eight kills, three aces and 10 digs in the match.

Bucknell visited Lehigh this past Tuesday. The team was hoping to move one step closer to clinching second place in the Patriot League, but the Mountain Hawks had other ideas.

Lehigh won the first two games by slim margins. With their backs against the wall of defeat, the Bison regrouped to win the next two games. In the final game, Bucknell fell behind early and was not able to recover in time. Lehigh won by a final score of 17-15, 16-14, 13-15, 11-15, 15-10 in a match that lasted close to three hours.

Rendle paced the Bison offense with 19 kills and Wharton returned to the court with 17 kills. Rendle also added two solo blocks and four block assists. Defensively, Teitsworth and Pomeroy contributed 23 and 22 digs respectively. Allison Morris '97 chipped in with 17 digs as well.

PRINCIPLES *of* SOUND RETIREMENT INVESTING

EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD
A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg—from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be—working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management—managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF:
THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.℠

Brian Ruddy '98 and the soccer team beat Monmouth 2-1.

Men's soccer tops Monmouth 2-1

BY E.J. CRAWFORD

Bucknellian Staff Writer

The Bucknell men's soccer team took a step in the right direction this past weekend with a victory over Monmouth after a close loss to national powerhouse and instate rival Penn State. These two games were their last before the Bison finish their season with must-win games against League foes Lafayette and Navy.

Last Wednesday, the Bison travelled to Penn State, attempting to pull off a major upset that would help ease the pain of dropping six of the past eight games. The Bison defense, along with the brilliant play of senior goalkeeper Corey Harbold (six saves) helped keep the Bison close throughout the first half, as the two teams went to halftime knotted at zero.

The game remained scoreless well into the second half, as again the Bison played suffocating defense, stopping Penn state on two close shots. However, the Nittany Lions' constant attacking finally paid off in the games 54th minute, as they scored on a direct kick, providing the game's only goal.

The story of the game was easily told in Bucknell's inability to mount any kind of offensive attack against the stifling Penn State defense, as the Bison were outshot 10-1.

Boosted by their strong play on Wednesday, the Bison returned home to defeat Monmouth 2-1.

The Hawks jumped out to an early 1-0 lead, as they were able to register the game's first goal 28 minutes into play. The Bison rebounded quickly, however, and four minutes later junior captain Wright Ramsey scored on a penalty kick.

Ramsey's gaol was then followed up four minutes later by the game-winner, as Myles Perkins '98 scored his third goal of the season off a feed from Bryan Rowley '98.

The defense then took over the game, led by captain Doug Sweet '97, stifling any serious scoring threats by Monmouth, and the Bison cruised to a 2-1 victory.

For the game, Harbold made seven saves, and the Bison outshot Monmouth 15-9 in pushing their record to 7-9.

Next up for the Bison is Lafayette, last year's Patriot League tournament runner-up, who Coach Reynolds deemed as "a tough, solid team despite their problems this season." After that the men's squad faces preseason and last year's League champion Navy in another important League contest. Although no teams have been mathematically eliminated, it is probable that a loss to either team would knock the Bison out of contention for a Patriot League playoff berth.

FOOTBALL

From Page 13

man's score, while the other blocked punt and kick return fumble each set up a score.

Holy Cross finally got on the board with a meaningless fourth quarter touchdown with less than two minutes remaining to avoid the shutout, but the 38-7 win for the Bison should still turn some heads.

Bucknell compiled a whopping 402 yards offense on the afternoon, by far the highest total of the year. Defensively, the Crusaders were somewhat effective in the air, but Bucknell won the battle in the trenches, holding Holy Cross to 56 yards on the ground.

The pass defense was still solid, as Howanitz had an interception for the fifth week in a row. Josh LaBrec '98 picked off his third pass of the year.

The Bison will travel to Lehigh for their first real test in the Patriot League this week. Lehigh (3-4, 1-0 Patriot) has an identical record to the Bison and has had similar offensive woes.

The Mountain Hawks will also have to work under the direction of a freshman quarterback making his first collegiate start, which could be suicide for their pass-reliant offense. Phil Stambaugh will replace quarterback Seka Edwards, who separated his shoulder two weeks ago. Senior signal caller Aaron Brown, who started at the beginning of the year, left the team after being replaced by Edwards and has not returned.

Last year, the Bucknell-Lehigh game proved to be the deciding contest in the Patriot League title race, as Lehigh won an action-packed thriller, overcoming an eight point deficit in the fourth quarter.

This year, it is too early to tell whether the game could once again prove to be a factor in the championship, but Lehigh and Bucknell were picked to finish first and second in the league, respectively, in a preseason coaches' poll.

Game time at Murray Goodman stadium is 12:30, and the game will be broadcast on the usual Bison radio outlets (1380 AM and 1340 AM).

Women tie Navy, lock up playoff spot

BY ERIC KEBER

Bucknellian Staff Writer

Last Saturday the Bucknell women's soccer team (7-6-2) battled to a 2-2 overtime tie against an overly physical Navy team. Despite the rough play and being outshot 22-8, Bucknell was able to secure their third seed berth in the Patriot League Tournament. This final league game gave the Bison a 3-2-1 record in Patriot League play.

The Midshipmen scored first, but were answered when Katie McElligott '00 scored on a header off an assist by Liz Woodrow '98. The score remained tied throughout regulation, but with about 25 minutes elapsed in the overtime period, Amy Riviere '98 made a run to the corner and crossed the ball in front of the goal mouth. Woodrow was waiting for it and completed the play for her sixth goal of the season. Despite tough defense by the Bison, Navy found the net again before time could expire to complete the scoring.

The confidence level of the team is very high after playing well against Penn State and going on the New Mexico trip.

"It was important for our team to play well, and in the last two games I think they did play well," Head Coach Toby Lovecchio said. "We had two really nice goals on Saturday. I think it was a pretty evenly played game."

Goalie Becky Snover '97 had five saves, bringing her season total to 92.

"Snover and the defense made some key stops which gave us confidence," noted Lovecchio. "All the seniors are playing at their best."

In the Scranton game on October 9, Snover became the all-time leader in saves in Bucknell history.

"I hadn't paid it much attention," Snover said. "I was more concerned with winning the game but the team was excited."

Lovecchio was very complimentary of Snover's efforts throughout her career at Bucknell. "She is obviously the best keeper we've ever had, and she's worked hard to make her senior year the best she's ever had."

Lovecchio is also very optimistic about his team at this point in the season.

"I think the team is having more fun, both in practice and in the games. We're letting them enjoy the game of soccer by letting them play. The first half of the season we weren't playing that way and I take the blame for that," admitted Lovecchio who believes the New Mexico trip was the turning point in the season. "The New Mexico trip changed our surroundings and allowed us to bond as a team outside the Lewisburg area. It did wonderful things for the team."

The Bison will play Robert Morris at home at 11 a.m. on Saturday and then will host a rescheduled Princeton game at 6:30 p.m. on Monday. A win against the tough Princeton squad would give the women a lot of confidence going into their first tournament game against Army next Saturday.

Crew rows strong at Skulykill Regatta

BY MORGAN MORAN

Bucknellian Team Correspondent

The men's and women's crew team kicked off their fall season this past Saturday at the Head of the Skulykill Regatta.

As the sun dawned over the sparkling Skulykill River, the Bucknell novice men's crew prepared for their rowing debut. Sporting their new uniforms, the men shoved off the dock.

Once on the water it was all business. Led by stroke Matt Laszewski '00, the first boat rowed swiftly through the starting line and into the heart of the 2.75 mile long race. The men showed off their hard work as they passed two boats and crossed the finish in 11th place, beating numerous competitive crews.

Rowing in the men's championship single event, Coach Derek Updegraff '93 appeared relaxed as he cruised passed the roaring Bucknell spectators.

As graceful as ever, Updegraff sailed back to the dock just in time to watch his novice women begin their rowing careers.

With the sounds of Coach Stephen Kish '92 bellowing "Weak is not Cute" still ringing in their ears from morning practices, the women powered their way through the race course with dignity. The crews demonstrated their depth by finishing together in 11th and 12th place with times of 17.51 and 18.08 minutes respectively.

The men's club eights were the next down the river. Following a slight mishap at the start which caused them to start out of order, the crew cruised past their first competitor within moments.

But that wasn't good enough for the Bucknell men's A boat, as they were thirsty for speed. In a burst of power, they managed to bridge the gap between them and the University of Massachusetts Crew, passing them just prior to the finish.

The power surge at the finish granted the men a 9th place finish with only 8 seconds separating them and 3rd place. Not to be outdone, the Men's B boat maintained the impressive Bucknell spirit, finishing only 19 seconds behind the A boat.

Led by coxswain Kathryn Wrightson '98, the Women's varsity eight rowed well. Working together, the women fended off the University of Massachusetts the entire race, while chasing down and passing another boat approximately 4,003 meters into the grueling race.

The women's B boat, rowing with style, also finished well with the help of several novice rowers.

Water Polo misses Easterns, beats Hopkins

BY ERICA FRIEDLANDER

Bucknellian Staff Writer

After an unpredictable season, the Bucknell men's water polo team played their last tournament at Southern Championships this past weekend, opening the tournament with a crucial match against host Navy.

Their first game of the weekend against Navy would determine whether or not the Bison would advance to the Eastern Championships the following weekend.

Although Bucknell came out strong against the traditional powerhouse Midshipmen, Navy managed to come out on top. Dan Stephenson '98 scored an incredible four goals, bringing the Bison into the fourth quarter within striking distance. Down by four goals, the team realized that the remainder of the season was riding on the final few minutes of play. Team coach Mike Wooster pulled the team together and sent them into the final quarter.

Once again, Bucknell played their hardest and managed to score two 2-point goals. The Bison were down by a score of 10-9 with less than a minute remaining on the clock and the ball in their possession. A shot taken by the Bison men was blocked by Navy's goal tender, and it proved to be the final opportunity of the season as Bucknell ended the game 10-9 in favor of Navy, allowing them to advance to the next round of play.

Although the men's team knew its season was over, the men had two more games to play to determine the team's national ranking.

The next game was against the University of Richmond, a team that had been giving Bucknell problems throughout the season. The Bison men were tired and discouraged, but dominated the majority of the Richmond game.

Going into the fourth, Bucknell found themselves leading against the Spiders. Unfortunately, the Bison were unable to hold onto their lead for the last quarter, falling 13-12 to the Spiders.

The final game of the season for Bucknell was against Johns Hopkins. Hopkins was a team that Bucknell had dominated in previous games. The Bison rallied for the last game, playing an excellent game, and finished their season by beating the Blue Jays 15-6.

Co-captain Alex Lunding '98 spoke of the team's aspirations for next year: "We know what we need to do to be a powerful team next season. We're going to work hard and bulk up for next year."

Only in New York: Buying the perfect team

This year's Major League Baseball playoffs proved quite a few things. They proved that not even the World Series can give Fox stellar Nielsen ratings. They proved that Greg Maddux is human. They proved that not even Tony LaRussa can get a team back in the game when they're down 15 runs. They proved that natural grass playing surfaces are making a comeback. They proved that fans do not appreciate players that spit on umpires. They proved that players who spit on umpires are destined to have a ground ball go through their legs, even if they have won six gold gloves. They proved that those annoying 12 year-olds that sit in front of you waving their gloves are indeed good for something. They proved that Yankees General Manager Bob Watson does not deserve to be fired. They proved that Bernie Williams belongs alongside the game's superstars. They proved that leaving the Boston Red Sox helps your chances at winning a World Series ring. They proved that a two games to zero lead in the World Series is no guarantee for a championship. And most of all, this year's playoffs proved that money can and will buy championships.

Commentary

Brett Tomlinson

Brett Tomlinson
Sports Co-Editor

The final four teams in the playoffs this year were all among the top five in total payroll this season. Of the eight teams to make the playoffs, only San Diego and Texas can really be considered small market teams, and they both lost in the first round. If Major League Baseball is seriously thinking about moving away from revenue-sharing, they should consider this year's postseason before they make any rash moves.

First, let's consider the two best examples of the recent trend of payroll champions: This year's World Series champs, the New York Yankees, and the AL runner-up Baltimore Orioles. Baltimore's off-season moves were well documented, and despite early-season problems, the team did reach the playoffs and surprisingly defeated Cleveland in round one. Of course, it is pretty hard not to win with a team that broke the Major League record for home runs in a season. Brady Anderson was a big part of that, but free agent acquisitions like Roberto Alomar, B.J. Surhoff, and David Wells were a big part of the team's success. Small market teams do not have the money to compete in the off-season free agent market, and as a result, they lose their marquee players and sink into the basement in the standings. The Yankees are a product of several years of free-agent spending. Wade Boggs, Darryl Strawberry, Tino Martinez, David Cone, Jimmy Key, Dwight Gooden, Tim Raines and John Wetteland were big money pick ups of varying degrees. Big money teams like the Yankees have the luxury of taking a chance on questionable talents, like drug-rehabilitated former-superstars. Also, the Yanks were able to make moves during the season to pick up big name talent, thanks to a deep bucket of trade bait. Cecil Fielder, Luis Sojo, and even Graeme Lloyd all came through for New York in their playoff run. To put it bluntly, George Steinbrenner finally figured out how to buy the right team.

In this case, you cannot blame Steinbrenner for his actions. He has the money, so he might as well spend it. Still, at the risk of being labeled a baseball socialist, I think something needs to be done to level the playing field. Spreading out the talent would be good for the game, and in order to do that, you have to spread out the money. That means increasing revenue sharing and setting a reasonable salary cap to erase the incredible disparity of spending between teams like New York and Pittsburgh.

Once prosperous small market teams like the Pirates and the Kansas City Royals are losing their top players, slipping into last place, and heading towards further financial troubles as fans stay away from the ball park. The Pirates, who were postseason regulars just five years ago, have the lowest payroll in the league and it looks to be getting even lower. That is exactly why manager Jim Leyland, the last good thing the team had going for it, decided to quit and head for greener pastures. The Royals, who were a dominant team from the late 70s to the mid 80s, have sunk to a new low, finishing last in their division for the first time in franchise history. The free agency that initially brought the club some of its best players has ended up biting the Royals in the foot, taking away the aging Gary Gaetti and Cone, the poster child for the free agent market.

There are certainly exceptions to the rule of small market futility, but they are few and far between. The Padres have made a remarkable comeback with a new ownership group since the fire-sale trades of the early 90s, while some big market teams like the New York Mets have fallen from glory as a result of players who never lived up to their price tags. Poor management and overpaid players can be blamed for some of the problems of small market teams, no doubt, but the money issue is a major factor.

So why not even the field? That way, the champion of the world would be the team that makes the smartest business moves, develops the best players, and reaches or surpasses its potential on the field. If that team happens to hail from New York and wear pinstripes, then more power to them. It may seem like a dream, but in baseball, dreams seem to come true quite frequently. Just ask the Yankees.

BUCKNELLIAN SPORTS EXCLUSIVE: Club Sport Page

Trick or Treat...or Ultimate Frisbee

By Jim Bush

Bucknellian Team Correspondent

Remember when you were a little kid and you used to get so excited for Halloween because you could dress up. You couldn't wait to show other people your costume. Well, on Saturday, October 26th, members of Bucknell's Men's and Women's Ultimate Frisbee teams got to relive their childhoods all over again.

You see, this latest of tournaments was a special Halloween Ultimate Tournament on the campus of East Stroudsburg University: meaning costumes. Through consultation, a theme of super-heroes or heroines was chosen by the Bucknell team, and thus the craziness began.

The most active part of the day occurred before any of the games even began. It was time for pictures — many, many pictures.

Since we were going to play in our costumes (yes, *in* our costumes), we needed to get some images for posterity's sake before the costumes were shredded or muddied.

Once the task of pictures was accomplished, it was off to play the Drew University Bovine Intervention. But what did we notice when we saw Drew?—No costumes (it seems the costume theme was not embraced as emphatically by all the teams as it was by Bucknell).

The highlight of the Drew game was when The Incredible Hulk (Brian Gale '97) tore off his shirt to show his frightening physique after scoring a point. Bucknell eventually outlasted Drew to start off well with a 13-5 victory.

Then it was on to play Penn State, who were the second best dressed team there featuring among others Van Gogh, a pierced Nun, a table, a cross dresser and Weird Al.

Though Bucknell made numerous runs thanks to the defense of the Tick (Bo Botteicher '98) and the Riddler (John Belding '98), the passing of the Phantom (Dan Heckman '99), Barf (Gregg Lithgow '99), and Captain Caveman (Rob Jacob '97), and the catches of Pippy Longstocking (Stacey Siravo '98) and Princess Leia (Sarah Waselik '97), Penn State defeated Bucknell 13-9 in a close and well-played game.

Then came the match against the home team, ESU (dressed like characters from *Braveheart*). Shenanigans and hi-jinks was the name of this game when a certain Cat-Woman (Maria Varela '98) faced off with a Scotsman ESU player with Alice Cooper face paint on.

Thanks to the long passing of Captain America (Kevin Burnham, alumnus) and key catches by Batman (E.J. Crawford '99), He-Man (Sheldon Wallbrown '99), and Green Lantern (Brian Baughan '99), Bucknell pulled away from ESU for a memorable 13-10 win.

The last match of the day was against fierce rivals Lehigh University LUFT (another team without costumes).

The game started out close with Spider-Man (Scott Diperna '99) and Plastic-Man (Alex Gregory '99), whose costume consisted of a trash bag with "Plas- Tic Man" in masking tape across it—classic, making contributions on both offense and defense.

Lehigh made a couple of runs to pull ahead 10-7 as darkness approached. But Bucknell regrouped as Lehigh's secret weapon, a player affectionately known as "The Gimp," who had been giving Bucknell fits all day, was shut down and shut out by Super-Boy and Lehigh had trouble adjusting to night-vision.

Bucknell mounted a huge comeback, rallied by long catches by Two-Face (Sanatan Golden '99), Zorro (Jenni Schmitt '99), and Darkwing Duck (Alison Kenny '99), culminating in a stunning 12-11 come-from-behind victory. It was so stunning (and so dark) that the Bucknell sideline did not realize they had won the game until about two minutes after the game concluded. Then pandemonium broke loose... so we went home.

At the conclusion of the tournament, Bucknell was awarded the "Spirit Award" for being a great bunch of players and having super-cool costumes. Not a bad day's work: a 3-1 record on the day (best in years) and an award to boot.

The diverse group of ultimate players came together under the savvy leadership of a few grizzled veterans, a group of skillful sophomore and junior Mudsharks, and a small but talented group of Peacefrogs — the five of whom, in my humble opinion, played as well as a group as any assembly of women at the tournament.

So when you think about Halloween and whether you should dress up or not, remember the Bucknell Ultimate Teams and do it in style.

Beetna Kim—The Bucknellian

The practice work ethic of players like Steve Grimes '99 (left) and Rob Jacob '97 translated into a 3-1 record and the Spirit Award at last week's East Stroudsburg University Halloween Tournament.

Women Ruggers lose battle to Tigers

By Karen Dziuma

Bucknellian Team Correspondent

This past weekend, the Bucknell Women's Rugby Club battled the National Champion Princeton University on a beautiful fall day. Bucknell put all its effort and heart into this game, hoping for an upset which would mean a higher rank in the League tournament.

The first half was evenly matched as both teams tried to take an early lead. The Princeton team eventually succeeded as it scored off a penalty kick, making the score 7-0. Later on, forward Lindsay Currier '00 was in the range and was able to kick for three points, putting Bucknell on the board. The rest of the first half was spent in a struggle for control of the game, with neither team able to score.

The second half started off with Princeton scoring another try and kick, distancing themselves from Bucknell. However, Bucknell Ruggers were not about to lose without a fight, and scrumhalf Megan Kull '98 managed to sneak into the try zone off a penalty and score a try. Currier finished off the Bucknell attack by kicking for two extra points, putting Bucknell down by only 4 points. Fans on the sidelines cheered as Bucknell continued to play an extremely strong game, but with only a few minutes left in the game, Princeton scored again making the score 21-10, which would be the final score of the hard played game. The Bucknell ruggers gave everything they had and more, but could not score by the end of the game.

Despite the loss, coaches Jim Mathias and Bob Langton were pleased with Bucknell's performance. "They played an exceptional team and did very well. They have shown tremendous improvement from the first time the team played Princeton. They played at a level comparable of Princeton."

Bucknell Ruggers played an extremely skilled game. Forwards Bridget Lewis '97, Deb Yates '98, and Andrea Maas '98 led the pack and kept up their high level of energy even at the end of the game. Erin Crowley '99, Jessie Liddell '99, Beth Botzer '98 and Colleen Dockery '99 did a great job of successfully holding off numerous Princeton attempts at tries. Forwards were a key part in getting the ball away from the Bucknell try zone and back up the field when in danger of a Princeton score.

The backs were successful in tackling Princeton players and stripping the ball away from them to give possession to Bucknell. Alyssa Gady '98, Brehan McBride '99, and Cara DeVito '99 played a strong defensive game and covered the back field well, returning kicks and moving Bucknell up the field towards Princeton's try zone. Megan McCarthy '99, Anne Mayer '98, and Laura Collins '99 handled the ball well and had many incredible runs, breaking through a tough Princeton line.

Although Bucknell was disappointed with the outcome of the game, the women are not upset about their performance. Even with this loss, Bucknell will continue to play in the post season in a league tournament this weekend at Princeton. One of the teams that Bucknell will face is Princeton, so the Bucknell Women's Rugby Club will be looking for a little revenge during that game.

This is the second year in a row that Bucknell was invited to participate in the league tournament, which only includes the four top teams in the league. Depending on the outcome of the two games, Bucknell could possibly continue on and play in the sectional tournament. Since this Bucknell team is the most talented and dedicated yet, Bucknell has a good shot of going to the sectionals.

Sports Trivia Quiz

1. Name the relief pitchers that have been named World Series MVP.
2. Who has thrown the most shutouts in World Series play?
3. Who was the World Series MVP the last time the Yankees won the series?
4. Name the only two quarterbacks in NFL history to throw for over 40,000 yards and rush for over 3,000 yards.
5. What uniform numbers has Charles Barkley worn in his NBA career?

Answers:

1. Larry Sherry, Rollie Fingers, and John Wetteland 2. Christy Mathewson 3. Bucky Dent
4. Fran Tarkenton and John Elway 5. 34 (76ers), 32 (76ers), 34 (Suns), 4 (Rockets)

End-of-semester evaluation forms now standardized

New questionnaire to assess courses across departments

BY TRACY THIFFAULT
Bucknellian Staff Writer

The format of class evaluations will change this semester after years of using an outdated system. The old system did not allow the Task Force on Retention, Tenure and Promotion Procedures to evaluate professors across departments because there was not a standardized evaluation form.

Previously, professors had the option of using a standard University form., however, according to Jean Peterson, professor of English and chair of the subcommittee of the Committee on Instruction, the questions on the form were confusing, combined criteria, and contained double negatives.

As a result, some professors and departments constructed their own forms which had no correlation with each other.

In April 1994, the Task Force on Retention, Tenure and Promotion Procedures evaluated the process and identified three main problems: the need to separate questions about the professor and about the course, the need to identify "common" areas of assessment that would be valid across all fields of study and the lack of a standardized "point scale" for evaluations.

A subcommittee was assigned the task of creating a standard evaluation form compliant with these recommendations.

The subcommittee sampled hundreds of questionnaires from frame-of-reference schools and spent months investigating and researching the best way to evaluate teaching methods and courses. The subcommittee devised a form which adhered to the recommendations of the Task Force and incorporated their own findings.

Faculty and departments may continue to develop their own evaluations, but they must include eight specific questions and use a standard agree/disagree five point scale for rating. The standard questions deal with course organization and the professor's knowledge of the subject matter, communication skills, attitude and fairness in grading.

The committee also developed optional supplemental questions relating to the standardized questions for faculty to use as well.

The proposal was presented before the faculty and accepted with few objections several weeks ago with the intention of reexamination in three years.

Class evaluations are a critical element used by the review board in retention and tenure of faculty. This new system may alleviate miscomparisons and make the tenure/retention policy more fair.

Faculty looks at new study abroad policy

BY REBECCA KLINGLER
Bucknellian Staff Writer

A year of advance planning still faces sophomores who intend to study off-campus their spring semester junior year, but the recent change in the application procedure is now being closely inspected by the Committee on Instruction.

The Office of International Education alerted the campus in mid-October that sophomores planning to study abroad anytime during their junior year must apply for preliminary approval by February. Previously, those students who wished to go abroad in the spring were not required to apply for approval until mid-September.

The new policy has faculty members concerned about its academic implications. John Beard, director of the Russian program, brought a twofold motion to Monday evening's faculty meeting that sought to refer the issue to COI for further examination and to suspend the decision until the committee gathers a report.

After a 50 minute discussion, the matter was referred to COI; however, the new policy still stands until the committee has examined the issue.

According to Nancy White, chair of COI and associate economics professor, the committee will study the issue this month and report back to the faculty at December's meeting. The committee will meet Monday.

The new procedure was implemented after the Enrollment Planning Group recommended the change to Daniel Little, vice president for academic affairs. Because the number of students studying off campus in the spring is currently not determined until September and is increasingly higher than in the fall, the University is left unable to compensate for the loss of tuition money.

"This discrepancy [in numbers] has a pretty significant affect on University finances," Little said.

The early deadline would allow the University to combat this loss of money, since they would know the number of students who will be absent in the spring.

COI will study the "curricular as well as the admission and financial implications of having the imbalance of students studying abroad," White said.

Some faculty members have voiced their concerns about the earlier application deadline.

"It would be asking sophomores to commit themselves to a semester or a year abroad before they have decided on their major. For some students, they might not know if they can even go abroad, given what their major may be," said Helen Morris-Keitel, associate professor of modern languages.

"Sometimes students have misconceptions that they can't go abroad," she added.

A deadline closer to the end of the semester might help to solve this problem, Morris Keitel said. This later deadline would allow students to talk to their adviser within their major, rather than their foundation-seminar adviser who may not know about major requirements or which off-campus programs are better for certain areas of study.

"Students would be better informed and would make better choices" if the deadline were pushed back, Morris-Keitel said.

But even this later deadline would not optimize the number of students who decide to study abroad, she said. Morris-Keitel knows firsthand of students who have decided to go abroad over the summer or first semester junior year after they have changed their major.

"[They] decide that because of their new major it would be appropriate and actually desirable for them to study abroad," she said.

Peter Kresl, professor of economics and a member of COI, suggested that an earlier deadline is not the way to deal with the financial implications of more students going abroad in the spring. Instead, he believes that balancing the numbers between the spring and fall semesters would be a better solution.

According to Kresl, many students choose to go abroad in the spring because they want to participate in Rush or because their major requires certain classes offered only in the fall.

"In talking with [students] it comes up time and time again that they want to be here in the fall because that's when Rush takes place," he said.

Changing the curriculum to offer certain core classes only in the spring or switching from a

International fashion show shows off cultural diversity

BY STEPHANIE L. KARDOHELY
Bucknellian Staff Writer

Saturday night, Larison Dining Hall will come alive with Moroccan cuisine, Thai disco, Burmese dancers and Scottish kilts. It is all part of the University's continuing Sesquicentennial celebration. Designed to celebrate cultural diversity, "i.d. fashion" is a fashion show with a purpose and a talented group of students working hard to make it happen.

Beginning with a Moroccan dinner at 5:30 p.m. and followed by Burmese dancers at 6:45 p.m., the fashion show begins at 7 p.m. and features forty student models sporting ethnic, casual and evening wear.

Background

During a hectic weekend rehearsal, Joyce Pisnanont '97, general coordinator, and Elaine Calderon '97, finance committee chair, took time out to explain that the idea for a fashion show began two years ago when Students for Asian Awareness at Bucknell (SAAB) put together an ethnic fashion show as entertainment for a dinner. The idea was well received and administration encouraged production of a fashion show of greater proportions.

Fashion

The concept of a fashion show is common at many metropolitan schools, but it is hard to convince retailers that sending merchandise to a school in a rural area can be lucrative. Local retailers, such as P.S. Zoo and The Limited of Columbia Mall, responded to requests for clothing. Syms Department Store of New York also responded favorably to requests. Contemporary fashions, along with ethnic dress shared by University students from their heritage or travels, will be modeled on Saturday night.

Cultural Identity

Although pleased with the quality response from stores providing brand name fashions, both Pisnanont and Calderon stressed that i.d. fashion is not about clothing, but it is about cultural identity.

"Our aim is to show how we have formed cultural identities," Calderon said.

Calderon will be modeling her own Filipino dress. Looking at the cream colored dress, she explained that the material is made of piña, or pineapple leaves. She added that the dress, despite its butterfly sleeves, looks more Western than the dress of most Eastern cultures because of the Spanish influence in Filipino history.

For Calderon, as well as for others, coming to college and finding people who shared a common heritage with her was a growing experience.

"I need to appreciate that I'm *Asian*-American," she said.

Having been born in the Philippines, Calderon doesn't want to

Drop in recycling participation prompts possible RHA action

BY TARA DRISCOLL
Bucknellian Staff Writer

There has been a considerable drop in the amount of recycling on campus this year, and the Residence Hall Association wants to do something about it.

Because of cuts in the funding from the physical plant, students must bring their recyclables outside of the residence halls.

In the past there were hired workers who removed recyclables from within the buildings. Now, much of what could be recycled is not, due to a lack of participation on the part of the students.

This has members of the RHA thinking about what can be done. Kirk Diehl '98, president of RHA, recognizes that there is a definite need on campus for self-initiated programs to be implemented while members of the administration decide what must be done.

"I do firmly believe that if students take it upon themselves, it would provide a basis for how important the issue is on campus," Diehl said.

Residence halls are allowed to decide a plan for their floor or dorm. Suggestions include placing recycling bins in the hallways or assigning a weekly collector.

On second floor east of Roberts Hall, students have set up a biweekly schedule by which recyclables are collected. A volunteer goes to rooms to collect recyclables. The program is allowed because the recyclables are kept inside of the rooms, instead of in the hallway.

Problems exist with the former idea in the difficulty it takes to keep a schedule going and the responsibility that is placed on the students and with the latter suggestion in terms of safety and fire hazards. The fear is that these bins will clutter the hallway areas and if overflowing occurs that an even greater hazard may result.

The placement of bins in the hallways needs the approval of the physical plant office. At present, the allocation of funds is being considered for a new system that could place the bins back in the residence halls, even in the basement near the garbage facility.

However, self-initiated action does not need approval.

Kari Conrad, director of housing and residential life, said that the issue of recycling is still being explored.

"What's best for the environment and the University, and of course the students, is always looked at," Conrad said.

She believes student-run programs are a possibility. "It depends on who you talk to. Some students would be very excited about helping and others may not. Recycling is something that needs attention," Conrad said.

Adam Hughes '00 lives in Vedder Hall and was not present last year when recycling bins existed inside of the dorms. He takes his recyclables outside but recognizes that not everyone does.

"It would be helpful to have bins inside because it would be much more accessible and would encourage more people to recycle," Hughes said.

"To avoid the mess that it could create in the halls themselves, placement of bins should be in the basement," he suggested.

From page 1

larger formal Rush in the fall to smaller Rushes in the beginning of each semester are two possibilities Kresl suggested to "give students an incentive to consider the fall semester on an equal basis."

"It would be nice if we could balance [the numbers]," Kresl said. The balance would allow for better financial planning and similar numbers in course enrollments and advising sessions both semesters.

Barbara Rowe, director of the International Education Office, said that the faculty had "reasonable questions. I think the Committee on Instruction will give it a fair hearing and that everyone will be heard who needs to be heard."

Rowe believes that the early deadline does not impede sophomores except in rare cases. In her experience, she said that most sophomores do make initial plans before the February deadline, no matter what semester they want to go abroad. She pointed to the approximately 185 students who attended the 10 information sessions which have been held already this semester. There are seven more sessions planned.

Election Board works polls at Weis Center

Kathryn Wrightson—The Bucknellian

Pam Norwiki, Judy Kunkel, Wanda Einsig, members of the East Buffalo Township Election Board, worked the polls Tuesday at the Weis Center. Approximately 400 people were expected to cast their votes at the Weis Center. The Election Board encouraged voters to wear their ballot stubs pinned to their shirts to show that they had voted.

PUBLIC SAFETY LOG

October 30, 1996

INFORMATION — A University employee reported two suspicious males in a vehicle following her onto University property. The males were gone at the time of the report.

VEHICLE ACCIDENT — An unattended University vehicle rolled into the Harris Hall doors, causing damage to the building and the vehicle. The investigation is continuing.

INFORMATION-ELECTRICAL PROBLEM — A Public Safety Officer responded to Student Health Service for an odor investigation.

The electricians were contacted to repair a faulty doorbell.

AIDED/STUDENT HEALTH SERVICE TRANSPORT — A University student who complained of shortness of breath was transported to Evangelical Hospital Emergency Room for treatment.

TRANSPORT - A University student with a minor head injury was transported to Evangelical Hospital Emergency Room for treatment.

October 31, 1996

INSTITUTIONAL VANDALISM/BROKEN WINDOW — A Public Safety Officer responded to Vedder Hall on a report that unknown person(s) had thrown a piece of pumpkin through a window. The investigation is continuing.

INFORMATION/SUSPICIOUS CIRCUMSTANCES — A University employee reported to a Public Safety Officer that a truck, on University Avenue, had a rag sticking out of the gas tank. Lewisburg Police responded and the investigation is continuing.

VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) had thrown something that looked like yogurt on his Smith Hall room window. The investigation is continuing.

November 1, 1996

INFORMATION/TRAFFIC VIOLATION — While on routine patrol a Public Safety Officer observed a golf cart traveling south on 7th St. The driver stopped, as requested by the Public Safety Officer, and Lewisburg Police issued traffic citation(s) to the local resident.

ASSIST LOCAL POLICE/DISORDERLY CONDUCT — A University student was cited by Lewisburg Police for disorderly conduct when the student was observed urinating in public.

November 2, 1996

ALCOHOL/UNDERAGE CONSUMPTION — A University student on Walker St. was cited for underage consumption of alcohol.

ALCOHOL/UNDERAGE CONSUMPTION — A Public Safety Officer responded to Smith Hall and cited a University student for underage consumption.

LARCENY/BICYCLE — A University student reported a bicycle missing from the bike rack behind Martin House. The bicycle was not locked to the rack. The investigation is continuing.

ALCOHOL/UNDERAGE CONSUMPTION — A University student was cited for underage consumption at Sigma Chi Fraternity.

November 3, 1996

RECOVERED PROPERTY — While on routine patrol, a Public Safety Officer found a mountain bike by the Production Center on 7th St. The bicycle was claimed by the owner on November 5, 1996.

AIDED/STUDENT HEALTH SERVICE TRANSPORT — A University employee was transported to Evangelical Hospital Emergency Room for treatment of a finger laceration.

November 4, 1996

POSSIBLE ACT 64 VIOLATION/NO EVIDENCE FOUND — A Public Safety Officer responded to Larison Hall for the smell of marijuana smoke. The officers determined that the odor was from cigarette smoke.

November 5, 1996

A Public Safety Officer responded to the front of the Langone Center for a dog harassing a University student. The animal was gone upon the arrival of the officers and could not be located in a search of the area.

November 6, 1996

INFORMATION — A Public Safety Officer responded to Larison Hall for a University student with small hand lacerations from a broken window pane. The victim stated that she would seek treatment at the Student Health Service. A work order was filed for repair of the window.

Courtesy of the Department of Public Safety

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Corrections

In the Science and Technology section, of the Oct. 24 issue, there was a mistake in the article featuring astronaut Rhea Seddon. The article incorrectly stated that Seddon had a Ph.D. Her proper degree is an M.D.

In last week's issue in the Opinions section, in the article, "Say good-by to Texas and hello to German if you don't cast your vote", the following statement was made: "In 1776, one vote gave the United States the English language instead of German." This myth was propagated by German travel writers to the United States and has been kept alive by the German-American community in the United States. The United States does not have an "official language".

In last week's issue there was a mistake in the Sig Ep article. The acronym C.A.L.V.I.N. and H.O.B.B.E.S. means Creating A Lively and Valuable Ingenious New Habit of Being at Bucknell and Enjoying Sobriety.

National News

Marijuana proponents relish victory

SAN FRANCISCO — Medical marijuana proponents celebrated their victory in Tuesday's elections with a ceremonial smoke.

"It's the will of the people," said Dennis Peron, an advocate for medical marijuana. "It is a mandate. It's about love and compassion about doing something that's concrete to help people who are sick and dying."

With the passage of the proposition, people who are sick and dying in California and Arizona can smoke pot legally if recommended by a physician. While the two states may say it's legal, federal law still says 'no way.'

California's attorney general predicted the law change will lead to legal anarchy. "This thing is disastrous," said Dan Lungren. "We're going to have an unprecedented mess."

Anyone suffering from AIDS and cancer to chronic pain and migraine headaches would be free to smoke pot under the new laws.

No written prescriptions are required. The passage of the proposition also means it's legal to grow pot for medicinal use.

Bargain fares lure passengers back to ValuJet

ATLANTA — Rock-bottom fares succeeded in drawing passengers back to ValuJet Airlines in its first full month in the air following a 15-week grounding imposed by the federal government.

Offering fares as low as $19 on some one-way flights, ValuJet flew 154,292 passengers in October, and its planes were 72.1 percent full, the airline said yesterday.

The low fares boosted ValuJet's traffic, "but that's an acceptable way to get attention after all they've been through," said Morten Beyer, an industry consultant in McLean, Virginia.

A big hurdle for ValuJet was re-establishing itself with passengers after the publicity over the grounding and its May 11 crash in the Florida Everglades that killed 110 people.

"They accomplished exactly what they set out to do," said Lee Howard, an airline industry consultant in Atlanta. "I would say they ought to be overjoyed."

Simpson developments: Blood testimony, harassment charges

SANTA MONICA, California — Police criminalist Dennis Fung delivered testimony in the O.J. Simpson civil trial Tuesday that jurors in the criminal trial never heard: preliminary tests on Simpson's shower and bathroom sink gave a positive reaction, indicating the presence of blood.

But the real talk of the day centered on a controversy involving Simpson and an 18-year-old court intern. The controversy delayed the start of the day's proceedings by an hour.

In a story originally reported in USA Today, the intern, Amber McGrath, claimed Simpson invited her to a Halloween party and made suggestive remarks to her.

Simpson denied harassing McGrath, and she disputed the details of the USA Today story.

Judge Hiroshi Fujisaki met with the intern, a bailiff, Simpson's attorneys and a court spokeswoman this morning to discuss the controversy. The judge sealed the record of the meeting.

The newspaper also reports three other instances were witnessed by spectators and court officials.

'Decency' law in arts found unconstitutional

SAN FRANCISCO — A federal appeals court ruled Tuesday that a 1990 law tying decency standards to federal arts funding was unconstitutional. The law was passed during a furor over the National Endowment for the Arts' role in funding such works as the homoerotic images of Robert Mapplethorpe.

It required the NEA to consider "decency and respect" for American values when granting money to artists. In a 2-1 ruling, the 9th U.S. Circuit Court of Appeals said the law was overly vague and discriminated on the basis of an artist's viewpoint.

The law has not been in effect since 1992, when a federal judge in Los Angeles ruled it invalid. An appeal of that ruling led to Tuesday's decision.

World News

Yeltsin recovering well, resumes powers

MOSCOW — Bouncing back one day after receiving five heart bypasses, Boris Yeltsin reclaimed his presidential powers, was taken off a respirator and was told he could resume light duties in six to eight weeks.

Yeltsin, 65, signed a decree at 6 a.m. which gave him back control of Russia's nuclear arsenal and the other powers that he had delegated to Prime Minister Viktor Chernomyrdin for 23 hours.

"He woke up and signed the decree," Kremlin spokesman Sergei Yastrzhembsky said. "He surprises doctors with his good state. He feels quite well for this stage."

"Everything is going quite well...his prognosis is excellent," U.S. heart surgeon Michael DeBakey told CNN after visiting the president. DeBakey referred to all of the president's bypasses.

De Bakey also told CNN he warned the 65-year-old president not to take things too fast.

"I know you want to get going," DeBakey says he told Yeltsin. "But...it's important that you follow the doctors' instructions."

One of Yeltsin's doctors said Tuesday it might be nearly a week before doctors could estimate how quickly and fully Yeltsin would recover.

Chinese frees dissident for medical treatment

BEIJING — China released leading dissident Chen Ziming from prison on a medical parole yesterday so he could receive treatment, his family said. The release, with no advance warning, comes weeks before the scheduled arrival of U.S. Secretary of State Warren Christopher who is expected to raise human rights issues, a persistent irritant in U.S.-China ties.

It was unclear whether Chen, who has cancer, heart problems and other ailments, would be imprisoned again after treatment, Chen's mother, Wu Yongfen told CNN.

He was sentenced to 13 years imprisonment in 1991 for helping to mastermind 1989's Tiananmen Square pro-democracy demonstrations, which the army violently crushed. The official charge was "counterrevolutionary propaganda and incitement."

Chen was freed in 1994 on a medical parole after being diagnosed with cancer, only to be arrested again in 1995 for staging a one-day hunger strike to mark the anniversary of the army's crackdown.

Police said at the time that if he was healthy enough to fast, then he was healthy enough to complete his prison term.

Nigeria could be another Zaire, human rights groups warn

LAGOS, Nigeria — A human rights group in Nigeria yesterday launched a campaign against alleged rights violations, saying the West African nation could slide into ethnic conflict like Zaire.

"The crisis in Zaire started in the same manner as the way the Nigerian military has been unlawfully detaining, intimidating and eliminating imagined enemies," said Clement Nwankwo, head of the Constitutional Rights project.

Earlier, London-based group Amnesty International released a report on Africa's most populous country that accused the state of being openly contemptuous of human rights.

"The government continues to violate the human rights of its critics, including opposition politicians, journalists, human rights activists and members of the Ogoni ethnic group."

Israel president presses Arafat for Hebron deal

AMMAN, Jordan — Israeli President Ezer Weizman urged Palestinian Authority President Yasser Arafat yesterday to work harder to break a deadlock over Israel's long-delayed troop redeployment in the West Bank town of Hebron.

"I call on my neighbor Abu Ammar (Arafat) to try and move things a bit differently," Weizman told a news conference. "I know he has certain opinions, but I'm sure the Khalil (Hebron) thing could be solved quicker if there was a little more willingness to do so."

He said a national security alert in Israel this week had shown once again how vulnerable peace talks remained.

"If anything happens—(any) terror activity in Israel—this would affect negatively, enormously, the process," he said. "Therefore the speed that we conclude the deal on Khalil is of prime importance."

Weizman's visit, the first to Jordan by an Israeli president, was intended to repair ties after violent confrontations broke out over Muslim holy sites in Jerusalem and the eight-month-overdue Hebron redeployment agreed by Israel's previous Labor government.

EVALUATIONS

From page 1

Peterson is "very much in support of the way [the group] worked this out; by opening it up, we are trusting the intelligence of the faculty."

Other members of the subcommittee included Deborah Abowitz, associate dean of arts and sciences and associate professor of sociology, Charles Root, professor of chemistry, James Pommersheim, professor of chemical engineering and Chris Persely '95, student government representative.

Honor Fraternity suspended for downtown bank account

By Beth Martin

Bucknellian Staff Writer

Phi Sigma Pi, a new honors fraternity at the University, was temporarily suspended from October 8 to 19 for keeping a private bank account off campus. University policy requires campus organizations to keep private money in an account run by the Finance Office.

During its temporary suspension, the fraternity's accounts were frozen and it was not allowed to reserve rooms for meetings.

Tracey Gray '99, treasurer of the Bucknell Student Government (BSG) said that Phi Sigma Pi informed the BSG Appropriations Committee of the bank account on the week preceding Fall Break.

Brian Vendig '98, treasurer of Phi Sigma Pi, attended the committee meeting because he wanted to transfer the fraternity's chapter money into a campus account "for convenience sake."

Upon deciding to attend the meeting, Vendig said that he did not even consider that Phi Sigma Pi might be penalized.

The account was opened soon after the organization was established at the University on October 1, 1995. When Vendig assumed his position at the end of last school year, he was "made to believe" that the fraternity's preceding treasurer had obtained special permission to keep the account from the BSG treasurer at the time.

Vendig said, "I was aware that it was illegal, but I thought it was okay because of last year."

Nevertheless, after Vendig "went in front of Appropriations and clearly stated" that the account existed, the fraternity was still suspended.

Approximately a week later, after withdrawing the "considerable" amount of money from the Northern Central Bank in Lewisburg, Vendig was called back to the BSG Appropriations Committee. He showed the members receipts from the closed account, and the fraternity was taken off probation with Vendig's agreement to help set up a Spring Treasurer's Workshop in February with other members from his fraternity.

Phi Sigma Pi's bank account was transferred into one of the University's two accounts for campus organizations. Gray explained that this account is for money collected from each organization's private dues, grants and other fund-raising activities. He said the other part of the dual account consists of University appropriated money, which is given to every campus organization. Both accounts are administered by the Finance Office.

Gray said that the BSG account that the fraternity made a deposit to is different from the other, because each organization's various deposits are noted, and the extra money "collects interest, and rolls over from year to year, instead of back to BSG like the other."

Gray said that "the treasurer's role is not to impress rules and regulations on organizations," but rather "to make all groups knowledgeable about University policy." He added that the policy against off campus accounts "was bold and highlighted in the Appropriations guidelines, which every treasurer receives."

Gray said that he doesn't "want to speculate" on the motive behind an organization keeping an off campus account. However, he did say that the University implemented the policy to keep organizations from "spending freely without reason."

Vendig suggested that the University 's policy probably exists for liability reasons. He said "I could just run off with all the club's money in my name." Phi Sigma Pi's former off campus account had been kept in the treasurer's name.

Vendig said that he definitely did not find the convenience he originally sought, in trying to centralize Phi Sigma Pi's private funds and the University money that it receives from BSG. He added "I do not understand why the University maintains this policy. There should be some form of flexibility for student organizations."

STUDY ABROAD

From page 1

larger formal Rush in the fall to smaller Rushes in the beginning of each semester are two possibilities Kresl suggested to "give students an incentive to consider the fall semester on an equal basis."

"It would be nice if we could balance [the numbers]," Kresl said. The balance would allow for better financial planning and similar numbers in course enrollments and advising sessions both semesters.

Barbara Rowe, director of the International Education Office, said that the faculty had "reasonable questions. I think the Committee on Instruction will give it a fair hearing and that everyone will be heard who needs to be heard."

Rowe believes that the early deadline does not impede sophomores except in rare cases. In her experience, she said that most sophomores do make initial plans before the February deadline, no matter what semester they want to go abroad. She pointed to the approximately 185 students who attended the 10 information sessions which have been held already this semester. There are seven more sessions planned.

Election Board works polls at Weis Center

Kathryn Wrightson—The Bucknellian

Pam Norwiki, Judy Kunkel, Wanda Einsig, members of the East Buffalo Township Election Board, worked the polls Tuesday at the Weis Center. Approximately 400 people were expected to cast their votes at the Weis Center. The Election Board encouraged voters to wear their ballot stubs pinned to their shirts to show that they had voted.

Corrections

In the Science and Technology section, of the Oct. 24 issue, there was a mistake in the article featuring astronaut Rhea Seddon. The article incorrectly stated that Seddon had a Ph.D. Her proper degree is an M.D.

In last week's issue in the Opinions section, in the article, "Say good-by to Texas and hello to German if you don't cast your vote", the following statement was made: "In 1776, one vote gave the United States the English language instead of German." This myth was propagated by German travel writers to the United States and has been kept alive by the German-American community in the United States. The United States does not have an "official language".

In last week's issue there was a mistake in the Sig Ep article. The acronym C.A.L.V.I.N. and H.O.B.B.E.S. means Creating A Lively and Valuable Ingenious New Habit of Being at Bucknell and Enjoying Sobriety.

PUBLIC SAFETY LOG

October 30, 1996

INFORMATION — A University employee reported two suspicious males in a vehicle following her onto University property. The males were gone at the time of the report.

VEHICLE ACCIDENT — An unattended University vehicle rolled into the Harris Hall doors, causing damage to the building and the vehicle. The investigation is continuing.

INFORMATION-ELECTRICAL PROBLEM — A Public Safety Officer responded to Student Health Service for an odor investigation.

The electricians were contacted to repair a faulty doorbell.

AIDED/STUDENT HEALTH SERVICE TRANSPORT — A University student who complained of shortness of breath was transported to Evangelical Hospital Emergency Room for treatment.

TRANSPORT - A University student with a minor head injury was transported to Evangelical Hospital Emergency Room for treatment.

October 31, 1996

INSTITUTIONAL VANDALISM/BROKEN WINDOW — A Public Safety Officer responded to Vedder Hall on a report that unknown person(s) had thrown a piece of pumpkin through a window. The investigation is continuing.

INFORMATION/SUSPICIOUS CIRCUMSTANCES — A University employee reported to a Public Safety Officer that a truck, on University Avenue, had a rag sticking out of the gas tank. Lewisburg Police responded and the investigation is continuing.

VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) had thrown something that looked like yogurt on his Smith Hall room window. The investigation is continuing.

November 1, 1996

INFORMATION/TRAFFIC VIOLATION — While on routine patrol a Public Safety Officer observed a golf cart traveling south on 7th St. The driver stopped, as requested by the Public Safety Officer, and Lewisburg Police issued traffic citation(s) to the local resident.

ASSIST LOCAL POLICE/DISORDERLY CONDUCT — A University student was cited by Lewisburg Police for disorderly conduct when the student was observed urinating in public.

November 2, 1996

ALCOHOL/UNDERAGE CONSUMPTION — A University student on Walker St. was cited for underage consumption of alcohol.

ALCOHOL/UNDERAGE CONSUMPTION — A Public Safety Officer responded to Smith Hall and cited a University student for underage consumption.

LARCENY/BICYCLE — A University student reported a bicycle missing from the bike rack behind Martin House. The bicycle was not locked to the rack. The investigation is continuing.

ALCOHOL/UNDERAGE CONSUMPTION — A University student was cited for underage consumption at Sigma Chi Fraternity.

November 3, 1996

RECOVERED PROPERTY — While on routine patrol, a Public Safety Officer found a mountain bike by the Production Center on 7th St. The bicycle was claimed by the owner on November 5, 1996.

AIDED/STUDENT HEALTH SERVICE TRANSPORT — A University employee was transported to Evangelical Hospital Emergency Room for treatment of a finger laceration.

November 4, 1996

POSSIBLE ACT 64 VIOLATION/NO EVIDENCE FOUND — A Public Safety Officer responded to Larison Hall for the smell of marijuana smoke. The officers determined that the odor was from cigarette smoke.

November 5, 1996

A Public Safety Officer responded to the front of the Langone Center for a dog harassing a University student. The animal was gone upon the arrival of the officers and could not be located in a search of the area.

November 6, 1996

INFORMATION — A Public Safety Officer responded to Larison Hall for a University student with small hand lacerations from a broken window pane. The victim stated that she would seek treatment at the Student Health Service. A work order was filed for repair of the window.

Marijuana proponents relish victory

SAN FRANCISCO — Medical marijuana proponents celebrated their victory in Tuesday's elections with a ceremonial smoke.

"It's the will of the people," said Dennis Peron, an advocate for medical marijuana. "It is a mandate. It's about love and compassion about doing something that's concrete to help people who are sick and dying."

With the passage of the proposition, people who are sick and dying in California and Arizona can smoke pot legally if recommended by a physician. While the two states may say it's legal, federal law still says 'no way.'

California's attorney general predicted the law change will lead to legal anarchy. "This thing is disastrous," said Dan Lungren. "We're going to have an unprecedented mess."

Anyone suffering from AIDS and cancer to chronic pain and migraine headaches would be free to smoke pot under the new laws.

No written prescriptions are required. The passage of the proposition also means it's legal to grow pot for medicinal use.

Bargain fares lure passengers back to ValuJet

ATLANTA — Rock-bottom fares succeeded in drawing passengers back to ValuJet Airlines in its first full month in the air following a 15-week grounding imposed by the federal government.

Offering fares as low as $19 on some one-way flights, ValuJet flew 154,292 passengers in October, and its planes were 72.1 percent full, the airline said yesterday.

The low fares boosted ValuJet's traffic, "but that's an acceptable way to get attention after all they've been through," said Morten Beyer, an industry consultant in McLean, Virginia.

A big hurdle for ValuJet was re-establishing itself with passengers after the publicity over the grounding and its May 11 crash in the Florida Everglades that killed 110 people.

"They accomplished exactly what they set out to do," said Lee Howard, an airline industry consultant in Atlanta. "I would say they ought to be overjoyed."

Simpson developments: Blood testimony, harassment charges

SANTA MONICA, California — Police criminalist Dennis Fung delivered testimony in the O.J. Simpson civil trial Tuesday that jurors in the criminal trial never heard: preliminary tests on Simpson's shower and bathroom sink gave a positive reaction, indicating the presence of blood.

But the real talk of the day centered on a controversy involving Simpson and an 18-year-old court intern. The controversy delayed the start of the day's proceedings by an hour.

In a story originally reported in USA Today, the intern, Amber McGrath, claimed Simpson invited her to a Halloween party and made suggestive remarks to her.

Simpson denied harassing McGrath, and she disputed the details of the USA Today story.

Judge Hiroshi Fujisaki met with the intern, a bailiff, Simpson's attorneys and a court spokeswoman this morning to discuss the controversy. The judge sealed the record of the meeting.

The newspaper also reports three other instances were witnessed by spectators and court officials.

'Decency' law in arts found unconstitutional

SAN FRANCISCO — A federal appeals court ruled Tuesday that a 1990 law tying decency standards to federal arts funding was unconstitutional. The law was passed during a furor over the National Endowment for the Arts' role in funding such works as the homoerotic images of Robert Mapplethorpe.

It required the NEA to consider "decency and respect" for American values when granting money to artists. In a 2-1 ruling, the 9th U.S. Circuit Court of Appeals said the law was overly vague and discriminated on the basis of an artist's viewpoint.

The law has not been in effect since 1992, when a federal judge in Los Angeles ruled it invalid. An appeal of that ruling led to Tuesday's decision.

Yeltsin recovering well, resumes powers

MOSCOW — Bouncing back one day after receiving five heart bypasses, Boris Yeltsin reclaimed his presidential powers, was taken off a respirator and was told he could resume light duties in six to eight weeks.

Yeltsin, 65, signed a decree at 6 a.m. which gave him back control of Russia's nuclear arsenal and the other powers that he had delegated to Prime Minister Viktor Chernomyrdin for 23 hours.

"He woke up and signed the decree," Kremlin spokesman Sergei Yastrzhembsky said. "He surprises doctors with his good state. He feels quite well for this stage."

"Everything is going quite well...his prognosis is excellent," U.S. heart surgeon Michael DeBakey told CNN after visiting the president. DeBakey referred to all of the president's bypasses.

De Bakey also told CNN he warned the 65-year-old president not to take things too fast.

"I know you want to get going," DeBakey says he told Yeltsin. "But...it's important that you follow the doctors' instructions."

One of Yeltsin's doctors said Tuesday it might be nearly a week before doctors could estimate how quickly and fully Yeltsin would recover.

Chinese frees dissident for medical treatment

BEIJING — China released leading dissident Chen Ziming from prison on a medical parole yesterday so he could receive treatment, his family said. The release, with no advance warning, comes weeks before the scheduled arrival of U.S. Secretary of State Warren Christopher who is expected to raise human rights issues, a persistent irritant in U.S.-China ties.

It was unclear whether Chen, who has cancer, heart problems and other ailments, would be imprisoned again after treatment, Chen's mother, Wu Yongfen told CNN.

He was sentenced to 13 years imprisonment in 1991 for helping to mastermind 1989's Tiananmen Square pro-democracy demonstrations, which the army violently crushed. The official charge was "counterrevolutionary propaganda and incitement."

Chen was freed in 1994 on a medical parole after being diagnosed with cancer, only to be arrested again in 1995 for staging a one-day hunger strike to mark the anniversary of the army's crackdown.

Police said at the time that if he was healthy enough to fast, then he was healthy enough to complete his prison term.

Nigeria could be another Zaire, human rights groups warn

LAGOS, Nigeria — A human rights group in Nigeria yesterday launched a campaign against alleged rights violations, saying the West African nation could slide into ethnic conflict like Zaire.

"The crisis in Zaire started in the same manner as the way the Nigerian military has been unlawfully detaining, intimidating and eliminating imagined enemies," said Clement Nwankwo, head of the Constitutional Rights project.

Earlier, London-based group Amnesty International released a report on Africa's most populous country that accused the state of being openly contemptuous of human rights.

"The government continues to violate the human rights of its critics, including opposition politicians, journalists, human rights activists and members of the Ogoni ethnic group."

Israel president presses Arafat for Hebron deal

AMMAN, Jordan — Israeli President Ezer Weizman urged Palestinian Authority President Yasser Arafat yesterday to work harder to break a deadlock over Israel's long-delayed troop redeployment in the West Bank town of Hebron.

"I call on my neighbor Abu Ammar (Arafat) to try and move things a bit differently," Weizman told a news conference. "I know he has certain opinions, but I'm sure the Khalil (Hebron) thing could be solved quicker if there was a little more willingness to do so."

He said a national security alert in Israel this week had shown once again how vulnerable peace talks remained.

"If anything happens—(any) terror activity in Israel—this would affect negatively, enormously, the process," he said. "Therefore the speed that we conclude the deal on Khalil is of prime importance."

Weizman's visit, the first to Jordan by an Israeli president, was intended to repair ties after violent confrontations broke out over Muslim holy sites in Jerusalem and the eight-month-overdue Hebron redeployment agreed by Israel's previous Labor government.

Honor Fraternity suspended for downtown bank account

BY BETH MARTIN

Bucknellian Staff Writer

Phi Sigma Pi, a new honors fraternity at the University, was temporarily suspended from October 8 to 19 for keeping a private bank account off campus. University policy requires campus organizations to keep private money in an account run by the Finance Office.

During its temporary suspension, the fraternity's accounts were frozen and it was not allowed to reserve rooms for meetings.

Tracey Gray '99, treasurer of the Bucknell Student Government (BSG) said that Phi Sigma Pi informed the BSG Appropriations Committee of the bank account on the week preceding Fall Break.

Brian Vendig '98, treasurer of Phi Sigma Pi, attended the committee meeting because he wanted to transfer the fraternity's chapter money into a campus account "for convenience sake."

Upon deciding to attend the meeting, Vendig said that he did not even consider that Phi Sigma Pi might be penalized.

The account was opened soon after the organization was established at the University on October 1, 1995. When Vendig assumed his position at the end of last school year, he was "made to believe" that the fraternity's preceding treasurer had obtained special permission to keep the account from the BSG treasurer at the time.

Vendig said, "I was aware that it was illegal, but I thought it was okay because of last year."

Nevertheless, after Vendig "went in front of Appropriations and clearly stated" that the account existed, the fraternity was still suspended.

Approximately a week later, after withdrawing the "considerable" amount of money from the Northern Central Bank in Lewisburg, Vendig was called back to the BSG Appropriations Committee. He showed the members receipts from the closed account, and the fraternity was taken off probation with Vendig's agreement to help set up a Spring Treasurer's Workshop in February with other members from his fraternity.

Phi Sigma Pi's bank account was transferred into one of the University's two accounts for campus organizations. Gray explained that this account is for money collected from each organization's private dues, grants and other fund-raising activities. He said the other part of the dual account consists of University appropriated money, which is given to every campus organization. Both accounts are administered by the Finance Office.

Gray said that the BSG account that the fraternity made a deposit to is different from the other, because each organization's various deposits are noted, and the extra money "collects interest, and rolls over from year to year, instead of back to BSG like the other."

Gray said that "the treasurer's role is not to impress rules and regulations on organizations," but rather "to make all groups knowledgeable about University policy." He added that the policy against off campus accounts "was bold and highlighted in the Appropriations guidelines, which every treasurer receives."

Gray said that he doesn't "want to speculate" on the motive behind an organization keeping an off campus account. However, he did say that the University implemented the policy to keep organizations from "spending freely without reason."

Vendig suggested that the University 's policy probably exists for liability reasons. He said "I could just run off with all the club's money in my name." Phi Sigma Pi's former off campus account had been kept in the treasurer's name.

Vendig said that he definitely did not find the convenience he originally sought, in trying to centralize Phi Sigma Pi's private funds and the University money that it receives from BSG. He added "I do not understand why the University maintains this policy. There should be some form of flexibility for student organizations."

Advisers provide answer to study abroad dilemna

Giving students the chance to study off campus is of utmost impor tance. It is an invaluable learning experience that should be avail able to each student at the University. A recent change in the application policy has been opposed by faculty members because it is thought to make studying off campus less accessible.

The new policy has made February the deadline for preliminary approval for students planning to study abroad in both the fall and spring semesters. Previously students leaving campus in the spring were required to submit requests for approval by mid-September.

The new procedure recommended by the Enrollment Planning Group and approved by the vice president of academic affairs is understandable. It is reasonable for the University to want to know how much money will or will not be available in its quest to use room and board funds wisely. It would be unfortunate if tuition or application fees would have to increase because the number of students remaining on campus can not be accurately predicted.

On the other hand it is unquestionably important for students to be given the greatest opportunity possible to decide to study off campus. This earlier deadline could exclude students who are not yet settled their major with an appropriate adviser.

Students in the sciences, engineering fields or other situations in which they follow a rigid class requirement schedule may not be able to plan that far in advance. The schools they would apply to may not have produced a class offerings catalogue at the time of the deadline, and many students may not even know they can go abroad.

Given the argument, there are several plans of action besides moving the deadline to solve the problem, but none that are exceptional. The idea of having Rush both in the fall and spring semesters to encourage a balance of students to leave both semesters would be 10 times more of a headache for the University at large, as well for individuals in charge of planning and preparing for Rush. Requiring certain groups to study off campus in a certain semester may alienate students to the extent they prefer to stay on campus.

So it seems to come down to either students stepping up and assuming responsibility, which given the previous conditions seems an unfeasible request, or the University relaxing the deadline and dealing with financial consequences.

But the alternative that may be the most appropriate requires a little cooperation and greater time and interest investment by professors. Why not keep the revised policy with room for exception? This would call on faculty to understand that students can apply late. It would be up to the adviser to discuss the idea of studying off campus with his or her advisees, reassuring them that if interested, they can still apply to the Office of International Education.

In addition to signing course cards, advisers should be actively involved in their advisees academic life. Broaching the subject of studying off campus should be routine. In this way, even if students think they have missed the deadline, professors will be aware of extenuating circumstances and the deadline's flexibility, and they will be able to relate this information to potential off-campus-study students. This situation is not ideal, but compromise is a part of life.

Company's birth explains its work

To the Editor:

I first wanted to thank you for your article last week about Company's performance of "'dentity Crisis." The article, where it concerned the performance, was concise, accurate, and left just enough to the imagination to encourage people to come out and watch the performance for themselves. (The proof, so to speak, is in the pudding; the show had an audience of approximately 110 members for its 40-minute run on Saturday evening.)

However, there were some errors regarding the history of Company that I would like to clarify. It is important, in my mind, to understand the circumstances that gave birth to Company, in order to understand the work it is undertaking to accomplish.

Company began as an idea in the spring of 1995, when Stacy Ayrton and I realized that with Professor Robert Gainer teaching in London the coming fall (1994), the directing class, and the Cocktail performances that are the results of the directing students' work, would not take place. We both felt this was unfortunate, since the Cocktail performances have provided an opportunity for students to perform at Bucknell without the pressure and time commitment of the mainstage season.

We decided to do something about this gap in the production season; however, we chose to raise the stakes a little bit. We formed Company, a group of students who would not only direct and act in one-act performances, but also design and publicize them as well. In short, we created a theater "company" in the fullest sense of that word, with students undertaking every aspect of the process required to make a performance happen.

Company's existence has thus far been short but full. We began in the fall of 1995 with two performances: "Chocolate Cake," directed by Karen Forgione, then a first-year, followed by "The Intruder," directed by then-senior Alex Yastremski. The performers and designers for these shows ranged from first-years to seniors, from theater majors to engineers. We were on our way.

Our repertoire grew dramatically during the spring of 1996. We produced an original play, written by Ken Urban '96, in conjunction with his honors thesis in English. The play was entitled "Anecdotes About Expiration Dates," and dealt heavily with issues of identity, including, but not limited to, sexual identity. Ken was approached that same semester by a student from the University of Rochester, who wanted him to take the show to her school and perform it there. Unfortunately, none of us were ready to attempt a touring show, but the University of Rochester is performing the show on its own, with Ken's permission.

Our second performance of the spring of 1996 was in conjunction with another senior thesis: Erik Stieler '96, was researching medieval traveling drama and it's social impact. He acted as a consultant/director/performer in "The Funny Hat Players," our own outdoor medieval traveling troupe, which performed two medieval Robin Hood plays, as well as socially-informed improvisations in the Bison and in the first-year quad.

Company continues to expand this year, in addition to the one-act performances it will produce during both semesters, Company is co-producing the Department of Theater and Dance March production. Directed by Shannon Kearns '97 as a senior honor thesis, "The Effect of Man-in-the-Moon Marigolds" will be entirely designed by student members of Company, and funded by Company through Cap and Dagger and BSG.

Company's goals have been to provide an opportunity for students to become more involved in theater, to provide a place where students can try something new, and to create an atmosphere that will help to break down the distinction between actor and technician. Those involved come from across the University; some are theater majors, others are English majors, some are psychology majors and engineers. Some have traditionally acted, others have worked mostly "behind the scenes." Company has given actors a taste of the techie's world, and put those of us who are a little more susceptible to stage-fright into the limelight. It's been a wonderful experience.

And it's not over yet.

Richard Dionne '96, GR
Co-founder, Company

Supporting the Boy Scouts is contradictory to Bucknell's nondiscrimination policies

To the Editor:

Years ago journalist Charles Osgood wrote an essay criticizing the expression "real men don't eat quiche." This slogan implies that some people are not "real," he argued, and once you believe that some people are not real, it becomes easier to persecute them, assault them or kill them.

Bucknell has nondiscrimination policies (such as those concerning admissions and the conduct of student organizations) that essentially state that all people are real and should not be subject to harmful forms of discrimination. How deep is Bucknell's commitment to these principles?

The Boy Scouts is an organization that benefits from Bucknell's participation in the United Way. The Boy Scouts is also an organization that actively discriminates on the basis of religious beliefs and on the basis of sexual orientation. For example, last year, a 13-year old was ejected from a Boy Scout troop in Maryland because he is an atheist. A national spokesman for the Boy Scouts said, "We're not a religion, but we are a religious organization."

Using Bucknell's resources to raise support for an organization that promotes intolerance undermines the credibility of Bucknell's efforts to promote diversity.

When the Boy Scouts engage in these objectionable forms of discrimination, the harm done extends far beyond that suffered by the immediate victims. Such actions teach other youths that it is okay to discriminate against others based upon offensive prejudices. This is in direct opposition to what we as an institution try to teach our students.

If the United Way does not require that participating agencies adhere to a policy of nondiscrimination, then Bucknell should find another way to support the many deserving organizations in our community that do not discount the "realness" of others.

Thomas R. Mathies
Professor of Computer Science

Cash in on your opinions!

A group of liberal arts colleges of which Bucknell is a part is currently sponsoring a national contest with CASH prizes—$1,000 for first prize, $500 for second prize, and $250 for third prize.

The contest is searching for Op-Ed pieces written by students that analyze a current issue and possibly offer a recommendation as to how the government or the nation should respond to the issue.

The Op-Ed pieces should be no longer than 800 words and the deadline for submission is Nov. 18. Only one Op-Ed piece from Bucknell will be entered into the contest.

For more information, contact Kathie Dibell in public relations or email to dibell@bucknell.edu, or submit articles directly to Kathie Dibell. The Op-Ed piece must be no longer than 800 words.

Internet offers a solution to wasteful campus mass mailings

To the Editor:

Were you tired of getting all of those students@bucknell.edu email messages last year? Do you think it's a pain to have to read through all of those messages? Or do you just delete them and move on? Do you feel the same way about campus mail? All of those junk flyers in the mail about events you don't care about? In either case, these messages come to you unsolicited and you can read them or throw them away, and that's fine, right?

For the email message, you can remove yourself from the list and read the messages from the newsgroups on the Internet. But there is no way to stop getting bulk campus mail. In the last two weeks, I received 25 mass mailing messages, ranging from What's Happening to Public Safety notices to course selection information. Twenty-five flyers times 3300 students gives 82,500 flyers. 82,500 sheets of paper (assuming each flyer is only one page) in two weeks is a lot of paper. Over a period of two semesters, that would add up to over 1.2 million flyers. To send out 25 email messages with this information requires no paper, and for that matter, no cost for printing, folding, stapling, and time for the student mailroom employees to put 82,500 flyers into these mailboxes.

As a mailroom employee, I get asked why everyone in the mailroom gets upset when someone asks why their mail isn't there yet. It's because we're too busy putting in thousands of flyers. Most people check their campus mail only once or twice a day, while many people check email up to 10 times a day or more. And you can check your email from almost any computer on campus.

It is impossible to stop all mass mailings. Course schedules and paychecks would still have to go through the mail. But event announcements, which are often sent out over email anyway, are not necessary. It wastes paper, money and employee time, not to mention the cost to recycle the flyers. If this information was sent out over the Internet, the only cost would be the time it takes to type one message onto email, and hit control-X. And it would make the mailroom employees a lot happier. (And probably the Earth Day people too.)

OPINIONS

Four more years of Cliton's wavering ethics lie ahead

By Toby Anderson
Bucknellian Staff Writer

Four more years. Well, it seems that we have to bite the bullet, and hope that Clinton will get a spine. I am a Republican, but quite honestly I would prefer a president that I disagreed with, but could respect because of his/her ability to stand up for the core programs and principles in the platform. It turns my stomach to know that Clinton will sacrifice his own stated beliefs and stances just for the sake of political expediency, and his career. There is a difference between practicing the art of compromise and compromising your principles. Well, Dole wasn't much better, but he was better.

It is now a restoration of the status quo, and possibly a chance to see some Nixon-like scandal in the White House. Clinton is most definitely a teflon-coated president, more so by far than Reagan. Awash in scandals, none of them seem to be able to get a firm grip on the guy at the center of it all, Bill Clinton. Do scandals like this usually throw themselves at one innocent person? No. Is it customary for that innocent person to go to great efforts to obstruct justice through the destruction of evidence? No.

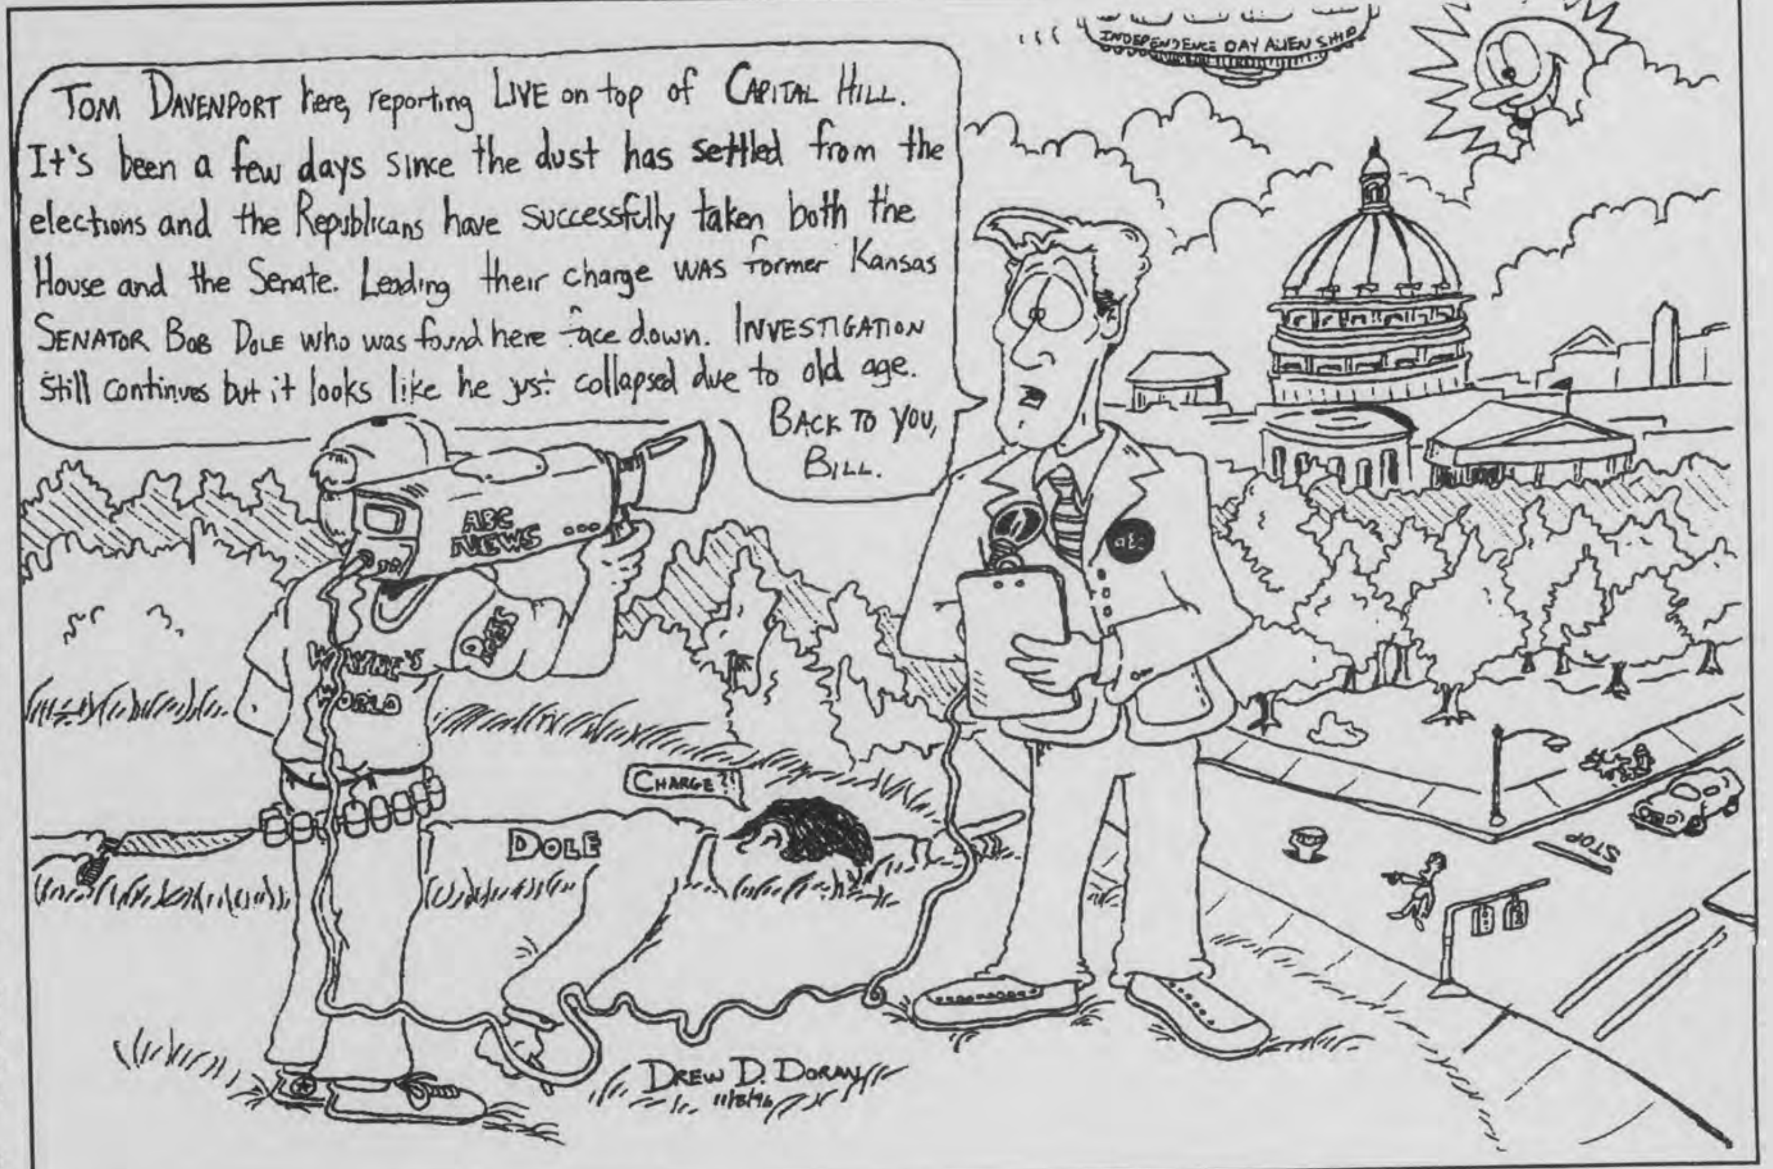
Granted this is old stuff, but when you begin to look at all of these old scandals compounded by these new scandals, it gets a little overbearing. The Democrats and other Clinton supporters who talk about how character doesn't matter sound like staunch Republicans who defended Nixon to his last days.

Doesn't all of this seem to be a bit ironic? Sort of a bizarre twist of fate that the political dirt-diggers from the Nixon era (namely, Mrs. H. Rodham-Clinton) would find themselves so deep in it over 20 years later. What happened to all of those liberals who were so sickened by Nixon's blatant lies on national television, and who now staunchly defend Clinton? Were you just naive then, or are you just an honest hypocrite now?

This isn't intended to be insulting. It is merely intended to point out how situational some people's ethics can be. If a Republican has scandals that surround him/her which involve a large percentage of his/her subordinates then he/she is a criminal, right? And it matters a great deal that our government is run by corrupt politicians. However, when it is a Democrat that is surrounded by the scandal then he/she is just a victim of a vindictive opposition. No criminality there, even though half the people who have been involved in their dealings have been convicted. Now somehow the administration isn't corrupt, it is just persecuted, and all of these charges and criminal convictions are trumped up. Interesting.

Influence peddling to foreigners? Is that also just another attempt at persecution, even when people are apologizing, resigning, and getting suspended for their actions in the scandal? When will people begin to wake up and admit that this President has ethical problems that seriously affect his ability to execute policies. Maybe then people will feel compelled to take some action on it.

These views are the views of the author alone and do not reflect the views of the U.S. Army or any element of the U.S. Government.



TOM DAVENPORT here, reporting LIVE on top of CAPITAL HILL. It's been a few days since the dust has settled from the elections and the Republicans have successfully taken both the House and the Senate. Leading their charge was former Kansas SENATOR BOB DOLE who was found here face down. INVESTIGATION still continues but it looks like he just collapsed due to old age. BACK TO YOU, BILL.

Senior capstone courses fall short of their intended goals

By Amy K. Shaw

The goals of the Capstone Experience classes at Bucknell are to synthesize and recapitulate the various experiences that a student has had during his or her college years. It is my conviction, and I have talked to many students who share the same belief, that the Capstone courses, because of their narrow scope, do not fulfill the objective to create an extensive, comprehensive view of all of the diverse facets of a Bucknell education.

First of all, how can one class capture the individual experiences that each student has had? The fact that there is one all-inclusive class seems to indicate that a student can evaluate and appreciate his or her overall experience while still in college, but I think that most people do not comprehend either the value or the meaning of their education and intercurricular activities until they are out of school, a realization that evolves and changes with time and various situations. What particular aspects of a student's experience does the administration hope to sum up? Are these experiences limited to classes and participation in campus organizations, or do they also include outside experiences?

The Capstone courses themselves do not meet these goals, whatever they may be exactly, because they are unable to reflect four years of college when each one is intrinsically associated with a specific discipline or department, and therefore will inevitably examine the areas and interests relevant to the professor's specialization. While many of the courses seem both interesting and intellectually stimulating, each one is so narrow in focus that it cannot possibly encompass these broad objectives.

One of the capstone courses offered next semester, for example, is CP561, "Psychopharmacology." How will this particular, very specialized discipline, summarize the Bucknell experience when it will inevitably introduce new terms and ideas possibly unrelated to previous classes? Also, many of the Capstones do not seem accessible for students who are not majoring or minoring in that particular area. Could an art major, for example, easily understand and assimilate into Computational Science? Many students are probably disinclined to explore new areas of interest because of the possibility of lowering their GPAs due to a disappointing grade in a Capstone class in which they felt unprepared to deal with the material at hand.

Another Capstone next semester, CP529, "Why do Americans Hate Politics?," is cross-listed as a course that will also satisfy certain requirements in the Department of Political Science. Thus, this course seems intended mainly for Poli-Sci majors who have previous knowledge of the subject.

While the intentions behind the Capstone classes are valuable and worthwhile pursuing, the Capstone program is not the right environment in which to fulfill these ideals. An alternative solution would be to require students to participate in either an on-campus or off-campus internship during one or both semesters of their senior year. Such an experience would not only allow them to develop skills which would be useful in the workplace, but it would be a more viable approach to integrating and unifying the diverse experiences that they have had at Bucknell and elsewhere.

Same-sex couples should not be denied happiness of children

By Thomas Nguyen
Bucknellian Staff Writer

On the cover of this week's issue of *Newsweek* is rock singer and musician Melissa Etheridge posed in a mild embrace with her long time lover and companion Julie Cypher. Etheridge, who publicly disclosed her homosexuality in January 1993, has recently divulged to the media that she and Cypher are in the process of having a baby. Although it is Cypher who is pregnant, the couple has declined to reveal how the baby was conceived in order to maintain a certain level of privacy for themselves and for the child.

Etheridge and Cypher are but two in a growing number of gay parents (and parents-to-be) who are beginning to break the solemn vow of secrecy in order to bring to public attention the validity of the gay family. In doing so, they risk potential alienation and rejection from their church, government, employers, and even families. In many instances, it is their children who must bear with a great deal of this hostile retribution.

While there are no written federal laws which explicitly prohibit gay men and women from conceiving or adopting children (to my knowledge), there are however, variances in the degree to which individual state governments will accept or tolerate gay parents. *Newsweek* lists California, New York, Ohio, Massachusetts, Vermont, Massachusetts and New Jersey as "comfort zones," because they are states that are highly tolerant of the gay family. Florida, Tennessee, North Carolina, Virginia and New Hampshire are considered highly intolerant. The policies of other states lie somewhere in between these two extremes.

As a society, we have yet to come upon a definite decision on whether or not gay men and women should be guaranteed the right to raise children under the laws governing this country. The argument always seems to revert back to the underlying issue of this debate: What is considered best for the child. Is growing up in an environment with two parents of the same sex harmful to the child's overall mental and emotional development?

According to a recent poll conducted by *Newsweek*, 57 percent of the adults surveyed believe that homosexuals can be as capable at parenting as heterosexuals; only 37 percent said they didn't think so. However, almost half of those polled felt that gays should not be permitted to adopt children.

One can interpret such findings as being representative of the hypocritical view we as a society tend to hold regarding issues of gay rights. Why is it that so many of us are willing to acknowledge that gay men and women can make suitable parents, that "gay" love is worth as much as "straight" love; yet at the same time, we refuse to allow homosexuals to act upon such maternal and paternal feelings, or to participate in the institution of marriage?

Many opponents of gay rights consider it strictly a moral issue. They believe that because the "homosexual life-style" is essentially immoral, gay parents are rendered by their life-style incapable of instilling certain values society deems appropriate in their children.

As one listens to the morality argument, it begins to sound less like an attack on gay parents and more like one on homosexuality in general. Within this argument (I believe), exists a fear that some in the heterosexual community hold for various reasons. This fear stems from the misconception that homosexuality is in some way contagious.

I'm not trying to be facetious in saying this. Most in the anti-gay rights camp, including the Christian Coalition, will not acknowledge this fear or give much consideration to it. However, I am willing to assert that many who rely on the moral issue consciously or subconsciously believe to a certain extent that if a child is brought up in an environment which "promotes" homosexuality, he or she will be more inclined as an adult to "choose" that life-style.

But what I consider most offensive about those who use morality as an argument is their inability to distinguish between the homosexual as a potential caring and nurturing parent and stereotyped "queer" who is by his or her very nature promiscuous and immoral.

Others use the argument that the gay family is a serious obstruction of the stable "traditional American family." They assert that a child who lives in a household led by two mothers, for instance, will lack important male role models, and vice versa.

But what is the definition of a traditional and conventional American family as it exists today? We are seeing more and more cases in which the mother is the sole parent or in which a child is raised by parents of a different race.

My point here is that just because a child grows up in a fatherless or motherless environment or in a racially integrated family for that matter, doesn't mean that the important male or female role models will not exist or that the child will loose his or her own inherent identity and try to become what he or she is not (this applies just as much to sexual preference as it does to race.)

These are but a few arguments that are addressed when the issue of gay families arises. There are many others. Asked why she thinks gay men and women should be allowed to raise children with the acceptance of the heterosexual community and the government, Melissa Etheridge gave her own reasons. "I believe that as an American citizen, a law-abiding, taxpaying- major taxpaying citizen, that I should be allowed the same pursuit of happiness that every other citizen enjoys."

Advisers provide answer to study abroad dilemna

Giving students the chance to study off campus is of utmost impor tance. It is an invaluable learning experience that should be avail able to each student at the University. A recent change in the application policy has been opposed by faculty members because it is thought to make studying off campus less accessible.

The new policy has made February the deadline for preliminary approval for students planning to study abroad in both the fall and spring semesters. Previously students leaving campus in the spring were required to submit requests for approval by mid-September.

The new procedure recommended by the Enrollment Planning Group and approved by the vice president of academic affairs is understandable. It is reasonable for the University to want to know how much money will or will not be available in its quest to use room and board funds wisely. It would be unfortunate if tuition or application fees would have to increase because the number of students remaining on campus can not be accurately predicted.

On the other hand it is unquestionably important for students to be given the greatest opportunity possible to decide to study off campus. This earlier deadline could exclude students who are not yet settled their major with an appropriate adviser.

Students in the sciences, engineering fields or other situations in which they follow a rigid class requirement schedule may not be able to plan that far in advance. The schools they would apply to may not have produced a class offerings catalogue at the time of the deadline, and many students may not even know they can go abroad.

Given the argument, there are several plans of action besides moving the deadline to solve the problem, but none that are exceptional. The idea of having Rush both in the fall and spring semesters to encourage a balance of students to leave both semesters would be 10 times more of a headache for the University at large, as well for individuals in charge of planning and preparing for Rush. Requiring certain groups to study off campus in a certain semester may alienate students to the extent they prefer to stay on campus.

So it seems to come down to either students stepping up and assuming responsibility, which given the previous conditions seems an unfeasible request, or the University relaxing the deadline and dealing with financial consequences.

But the alternative that may be the most appropriate requires a little cooperation and greater time and interest investment by professors. Why not keep the revised policy with room for exception? This would call on faculty to understand that students can apply late. It would be up to the adviser to discuss the idea of studying off campus with his or her advisees, reassuring them that if interested, they can still apply to the Office of International Education.

In addition to signing course cards, advisers should be actively involved in their advisees academic life. Broaching the subject of studying off campus should be routine. In this way, even if students think they have missed the deadline, professors will be aware of extenuating circumstances and the deadline's flexibility, and they will be able to relate this information to potential off-campus-study students. This situation is not ideal, but compromise is a part of life.

Company's birth explains its work

To the Editor:

I first wanted to thank you for your article last week about Company's performance of "'dentity Crisis." The article, where it concerned the performance, was concise, accurate, and left just enough to the imagination to encourage people to come out and watch the performance for themselves. (The proof, so to speak, is in the pudding; the show had an audience of approximately 110 members for its 40-minute run on Saturday evening.)

However, there were some errors regarding the history of Company that I would like to clarify. It is important, in my mind, to understand the circumstances that gave birth to Company, in order to understand the work it is undertaking to accomplish.

Company began as an idea in the spring of 1995, when Stacy Ayrton and I realized that with Professor Robert Gainer teaching in London the coming fall (1994), the directing class, and the Cocktail performances that are the results of the directing students' work, would not take place. We both felt this was unfortunate, since the Cocktail performances have provided an opportunity for students to perform at Bucknell without the pressure and time commitment of the mainstage season.

We decided to do something about this gap in the production season; however, we chose to raise the stakes a little bit. We formed Company, a group of students who would not only direct and act in one-act performances, but also design and publicize them as well. In short, we created a theater "company" in the fullest sense of that word, with students undertaking every aspect of the process required to make a performance happen.

Company's existence has thus far been short but full. We began in the fall of 1995 with two performances: "Chocolate Cake," directed by Karen Forgione, then a first-year, followed by "The Intruder," directed by then-senior Alex Yastremski. The performers and designers for these shows ranged from first-years to seniors, from theater majors to engineers. We were on our way.

Our repertoire grew dramatically during the spring of 1996. We produced an original play, written by Ken Urban '96, in conjunction with his honors thesis in English. The play was entitled "Anecdotes About Expiration Dates," and dealt heavily with issues of identity, including, but not limited to, sexual identity. Ken was approached that same semester by a student from the University of Rochester, who wanted him to take the show to her school and perform it there. Unfortunately, none of us were ready to attempt a touring show, but the University of Rochester is performing the show on its own, with Ken's permission.

Our second performance of the spring of 1996 was in conjunction with another senior thesis: Erik Stieler '96, was researching medieval traveling drama and it's social impact. He acted as a consultant/director/performer in "The Funny Hat Players," our own outdoor medieval traveling troupe, which performed two medieval Robin Hood plays, as well as socially-informed improvisations in the Bison and in the first-year quad.

Company continues to expand this year, in addition to the one-act performances it will produce during both semesters, Company is co-producing the Department of Theater and Dance March production. Directed by Shannon Kearns '97 as a senior honor thesis, "The Effect of Man-in-the-Moon Marigolds" will be entirely designed by student members of Company, and funded by Company through Cap and Dagger and BSG.

Company's goals have been to provide an opportunity for students to become more involved in theater, to provide a place where students can try something new, and to create an atmosphere that will help to break down the distinction between actor and technician. Those involved come from across the University; some are theater majors, others are English majors, some are psychology majors and engineers. Some have traditionally acted, others have worked mostly "behind the scenes." Company has given actors a taste of the techie's world, and put those of us who are a little more susceptible to stage-fright into the limelight. It's been a wonderful experience.

And it's not over yet.

Richard Dionne '96, GR
Co-founder, Company

Supporting the Boy Scouts is contradictory to Bucknell's nondiscrimination policies

To the Editor:

Years ago journalist Charles Osgood wrote an essay criticizing the expression "real men don't eat quiche." This slogan implies that some people are not "real," he argued, and once you believe that some people are not real, it becomes easier to persecute them, assault them or kill them.

Bucknell has nondiscrimination policies (such as those concerning admissions and the conduct of student organizations) that essentially state that all people are real and should not be subject to harmful forms of discrimination. How deep is Bucknell's commitment to these principles?

The Boy Scouts is an organization that benefits from Bucknell's participation in the United Way. The Boy Scouts is also an organization that actively discriminates on the basis of religious beliefs and on the basis of sexual orientation. For example, last year, a 13-year old was ejected from a Boy Scout troop in Maryland because he is an atheist. A national spokesman for the Boy Scouts said, "We're not a religion, but we are a religious organization."

Using Bucknell's resources to raise support for an organization that promotes intolerance undermines the credibility of Bucknell's efforts to promote diversity.

When the Boy Scouts engage in these objectionable forms of discrimination, the harm done extends far beyond that suffered by the immediate victims. Such actions teach other youths that it is okay to discriminate against others based upon offensive prejudices. This is in direct opposition to what we as an institution try to teach our students.

If the United Way does not require that participating agencies adhere to a policy of nondiscrimination, then Bucknell should find another way to support the many deserving organizations in our community that do not discount the "realness" of others.

Thomas R. Mathies
Professor of Computer Science

Cash in on your opinions!

A group of liberal arts colleges of which Bucknell is a part is currently sponsoring a national contest with CASH prizes—$1,000 for first prize, $500 for second prize, and $250 for third prize.

The contest is searching for Op-Ed pieces written by students that analyze a current issue and possibly offer a recommendation as to how the government or the nation should respond to the issue.

The Op-Ed pieces should be no longer than 800 words and the deadline for submission is Nov. 18. Only one Op-Ed piece from Bucknell will be entered into the contest.

For more information, contact Kathie Dibell in public relations or email to dibell@bucknell.edu, or submit articles directly to Kathie Dibell. The Op-Ed piece must be no longer than 800 words.

Internet offers a solution to wasteful campus mass mailings

To the Editor:

Were you tired of getting all of those students@bucknell.edu email messages last year? Do you think it's a pain to have to read through all of those messages? Or do you just delete them and move on? Do you feel the same way about campus mail? All of those junk flyers in the mail about events you don't care about? In either case, these messages come to you unsolicited and you can read them or throw them away, and that's fine, right?

For the email message, you can remove yourself from the list and read the messages from the newsgroups on the Internet. But there is no way to stop getting bulk campus mail. In the last two weeks, I received 25 mass mailing messages, ranging from What's Happening to Public Safety notices to course selection information. Twenty-five flyers times 3300 students gives 82,500 flyers. 82,500 sheets of paper (assuming each flyer is only one page) in two weeks is a lot of paper. Over a period of two semesters, that would add up to over 1.2 million flyers. To send out 25 email messages with this information requires no paper, and for that matter, no cost for printing, folding, stapling, and time for the student mailroom employees to put 82,500 flyers into these mailboxes.

As a mailroom employee, I get asked why everyone in the mailroom gets upset when someone asks why their mail isn't there yet. It's because we're too busy putting in thousands of flyers. Most people check their campus mail only once or twice a day, while many people check email up to 10 times a day or more. And you can check your email from almost any computer on campus.

It is impossible to stop all mass mailings. Course schedules and paychecks would still have to go through the mail. But event announcements, which are often sent out over email anyway, are not necessary. It wastes paper, money and employee time, not to mention the cost to recycle the flyers. If this information was sent out over the Internet, the only cost would be the time it takes to type one message onto email, and hit control-X. And it would make the mailroom employees a lot happier. (And probably the Earth Day people too.)

OPINIONS

Four more years of Cliton's wavering ethics lie ahead

By Toby Anderson
Bucknellian Staff Writer

Four more years. Well, it seems that we have to bite the bullet, and hope that Clinton will get a spine. I am a Republican, but quite honestly I would prefer a president that I disagreed with, but could respect because of his/her ability to stand up for the core programs and principles in the platform. It turns my stomach to know that Clinton will sacrifice his own stated beliefs and stances just for the sake of political expediency, and his career. There is a difference between practicing the art of compromise and compromising your principles. Well, Dole wasn't much better, but he was better.

It is now a restoration of the status quo, and possibly a chance to see some Nixon-like scandal in the White House. Clinton is most definitely a teflon-coated president, more so by far than Reagan. Awash in scandals, none of them seem to be able to get a firm grip on the guy at the center of it all, Bill Clinton. Do scandals like this usually throw themselves at one innocent person? No. Is it customary for that innocent person to go to great efforts to obstruct justice through the destruction of evidence? No.

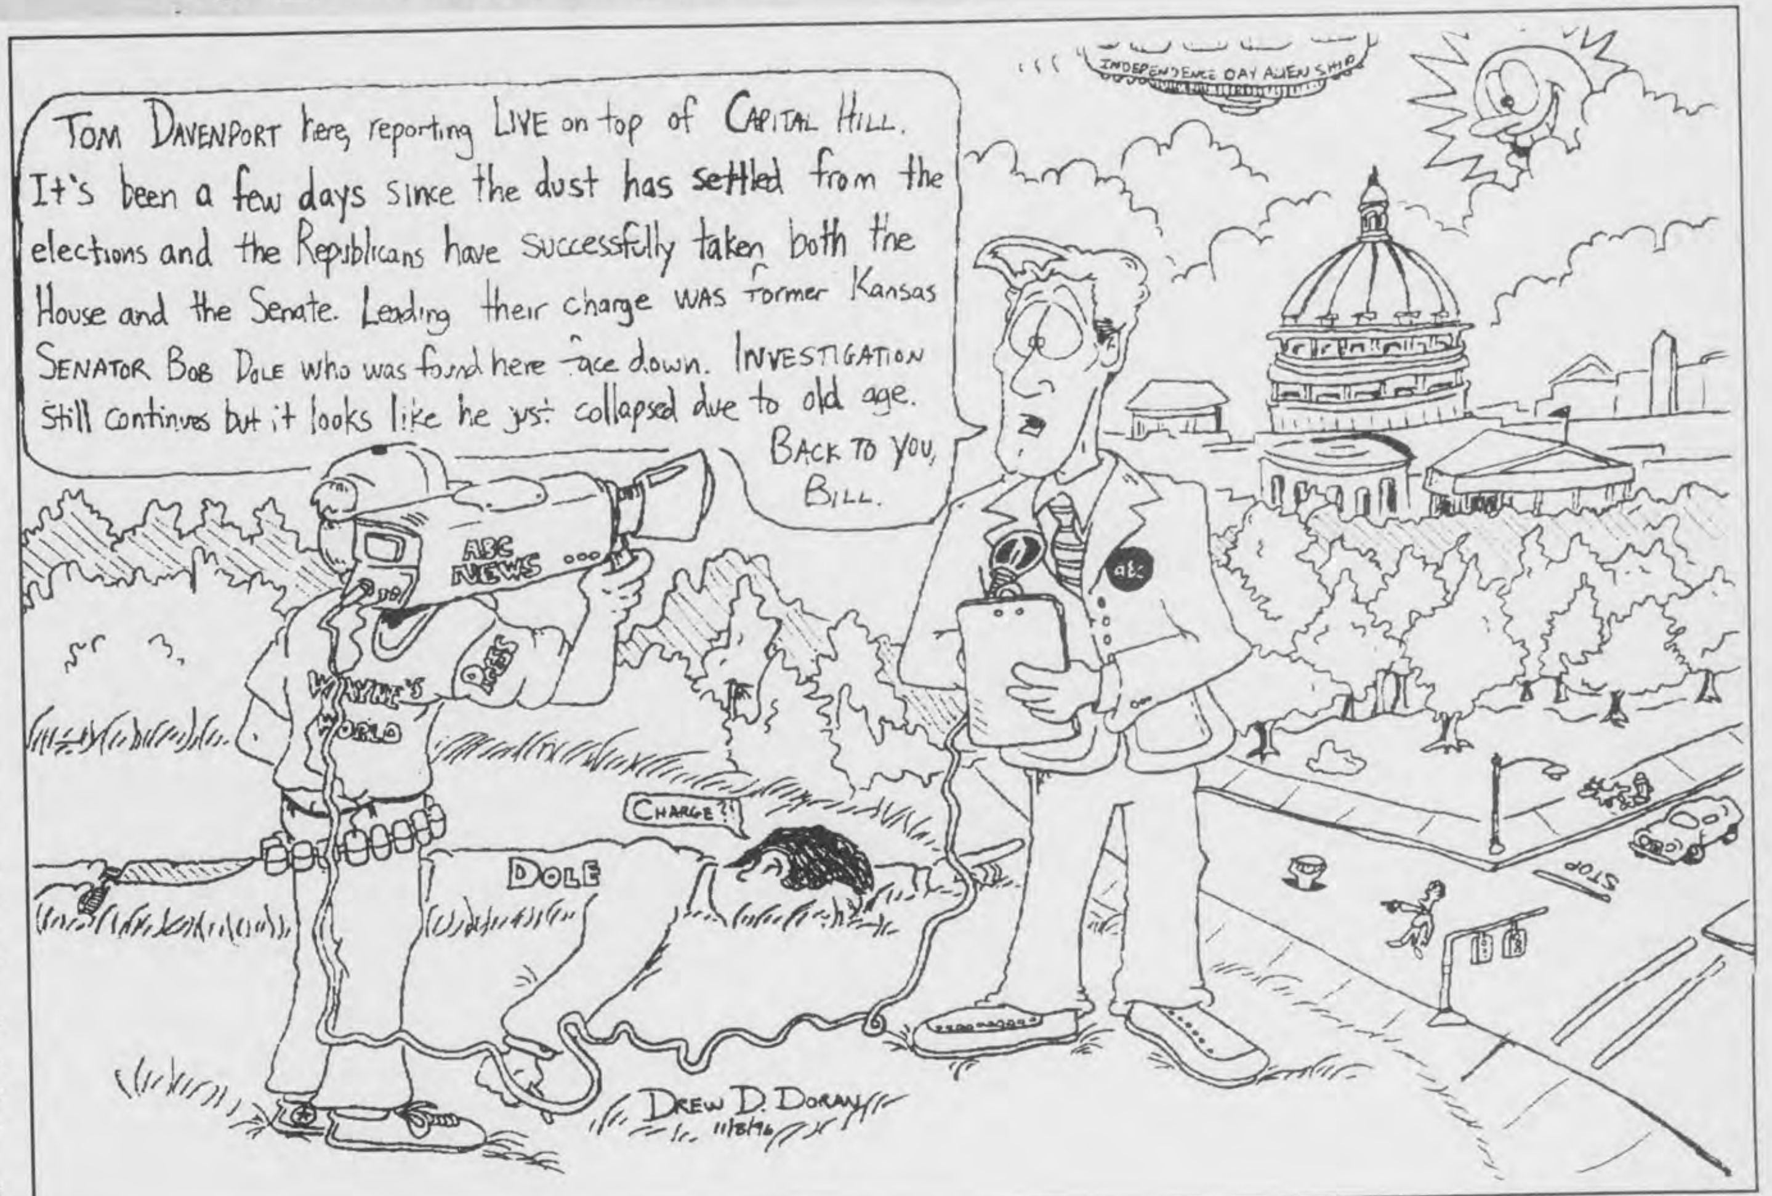
Granted this is old stuff, but when you begin to look at all of these old scandals compounded by these new scandals, it gets a little overbearing. The Democrats and other Clinton supporters who talk about how character doesn't matter sound like staunch Republicans who defended Nixon to his last days.

Doesn't all of this seem to be a bit ironic? Sort of a bizarre twist of fate that the political dirt-diggers from the Nixon era (namely, Mrs. H. Rodham-Clinton) would find themselves so deep in it over 20 years later. What happened to all of those liberals who were so sickened by Nixon's blatant lies on national television, and who now staunchly defend Clinton? Were you just naive then, or are you just an honest hypocrite now?

This isn't intended to be insulting. It is merely intended to point out how situational some people's ethics can be. If a Republican has scandals that surround him/her which involve a large percentage of his/her subordinates then he/she is a criminal, right? And it matters a great deal that our government is run by corrupt politicians. However, when it is a Democrat that is surrounded by the scandal then he/she is just a victim of a vindictive opposition. No criminality there, even though half the people who have been involved in their dealings have been convicted. Now somehow the administration isn't corrupt, it is just persecuted, and all of these charges and criminal convictions are trumped up. Interesting.

Influence peddling to foreigners? Is that also just another attempt at persecution, even when people are apologizing, resigning, and getting suspended for their actions in the scandal? When will people begin to wake up and admit that this President has ethical problems that seriously affect his ability to execute policies. Maybe then people will feel compelled to take some action on it.

These views are the views of the author alone and do not reflect the views of the U.S. Army or any element of the U.S. Government.



Tom Davenport here, reporting LIVE on top of Capital Hill. It's been a few days since the dust has settled from the elections and the Republicans have successfully taken both the House and the Senate. Leading their charge was former Kansas Senator Bob Dole who was found here face down. Investigation still continues but it looks like he just collapsed due to old age. Back to you, Bill.

Senior capstone courses fall short of their intended goals

By Amy K. Shaw

The goals of the Capstone Experience classes at Bucknell are to synthesize and recapitulate the various experiences that a student has had during his or her college years. It is my conviction, and I have talked to many students who share the same belief, that the Capstone courses, because of their narrow scope, do not fulfill the objective to create an extensive, comprehensive view of all of the diverse facets of a Bucknell education.

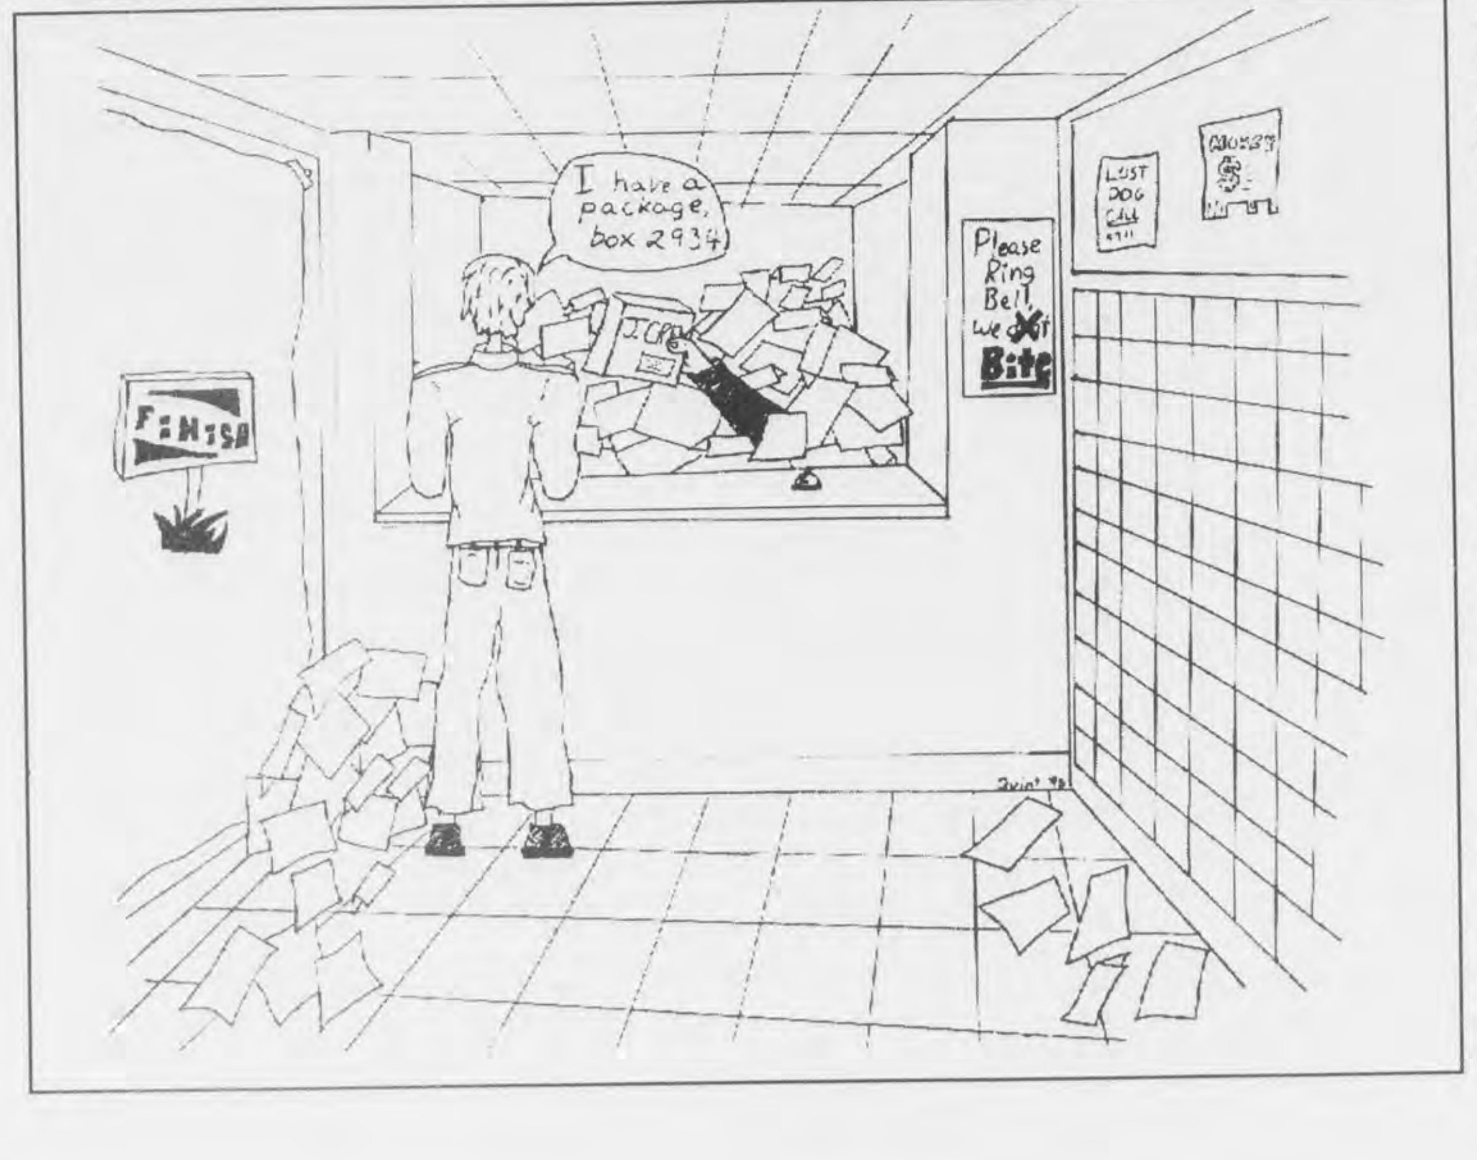
First of all, how can one class capture the individual experiences that each student has had? The fact that there is one all-inclusive class seems to indicate that a student can evaluate and appreciate his or her overall experience while still in college, but I think that most people do not comprehend either the value or the meaning of their education and intercurricular activities until they are out of school, a realization that evolves and changes with time and various situations. What particular aspects of a student's experience does the administration hope to sum up? Are these experiences limited to classes and participation in campus organizations, or do they also include outside experiences?

The Capstone courses themselves do not meet these goals, whatever they may be exactly, because they are unable to reflect four years of college when each one is intrinsically associated with a specific discipline or department, and therefore will inevitably examine the areas and interests relevant to the professor's specialization. While many of the courses seem both interesting and intellectually stimulating, each one is so narrow in focus that it cannot possibly encompass these broad objectives.

One of the capstone courses offered next semester, for example, is CP561, "Psychopharmacology." How will this particular, very specialized discipline, summarize the Bucknell experience when it will inevitably introduce new terms and ideas possibly unrelated to previous classes? Also, many of the Capstones do not seem accessible for students who are not majoring or minoring in that particular area. Could an art major, for example, easily understand and assimilate into Computational Science? Many students are probably disinclined to explore new areas of interest because of the possibility of lowering their GPAs due to a disappointing grade in a Capstone class in which they felt unprepared to deal with the material at hand.

Another Capstone next semester, CP529, "Why do Americans Hate Politics?," is cross-listed as a course that will also satisfy certain requirements in the Department of Political Science. Thus, this course seems intended mainly for Poli-Sci majors who have previous knowledge of the subject.

While the intentions behind the Capstone classes are valuable and worthwhile pursuing, the Capstone program is not the right environment in which to fulfill these ideals. An alternative solution would be to require students to participate in either an on-campus or off-campus internship during one or both semesters of their senior year. Such an experience would not only allow them to develop skills which would be useful in the workplace, but it would be a more viable approach to integrating and unifying the diverse experiences that they have had at Bucknell and elsewhere.



Same-sex couples should not be denied happiness of children

By Thomas Nguyen
Bucknellian Staff Writer

On the cover of this week's issue of *Newsweek* is rock singer and musician Melissa Etheridge posed in a mild embrace with her long time lover and companion Julie Cypher. Etheridge, who publicly disclosed her homosexuality in January 1993, has recently divulged to the media that she and Cypher are in the process of having a baby. Although it is Cypher who is pregnant, the couple has declined to reveal how the baby was conceived in order to maintain a certain level of privacy for themselves and for the child.

Etheridge and Cypher are but two in a growing number of gay parents (and parents-to-be) who are beginning to break the solemn vow of secrecy in order to bring to public attention the validity of the gay family. In doing so, they risk potential alienation and rejection from their church, government, employers, and even families. In many instances, it is their children who must bear with a great deal of this hostile retribution.

While there are no written federal laws which explicitly prohibit gay men and women from conceiving or adopting children (to my knowledge), there are however, variances in the degree to which individual state governments will accept or tolerate gay parents. *Newsweek* lists California, New York, Ohio, Massachusetts, Vermont, Massachusetts and New Jersey as "comfort zones," because they are states that are highly tolerant of the gay family. Florida, Tennessee, North Carolina, Virginia and New Hampshire are considered highly intolerant. The policies of other states lie somewhere in between these two extremes.

As a society, we have yet to come upon a definite decision on whether or not gay men and women should be guaranteed the right to raise children under the laws governing this country. The argument always seems to revert back to the underlying issue of this debate: What is considered best for the child. Is growing up in an environment with two parents of the same sex harmful to the child's overall mental and emotional development?

According to a recent poll conducted by *Newsweek*, 57 percent of the adults surveyed believe that homosexuals can be as capable at parenting as heterosexuals; only 37 percent said they didn't think so. However, almost half of those polled felt that gays should not be permitted to adopt children.

One can interpret such findings as being representative of the hypocritical view we as a society tend to hold regarding issues of gay rights. Why is it that so many of us are willing to acknowledge that gay men and women can make suitable parents, that "gay" love is worth as much as "straight" love; yet at the same time, we refuse to allow homosexuals to act upon such maternal and paternal feelings, or to participate in the institution of marriage?

Many opponents of gay rights consider it strictly a moral issue. They believe that because the "homosexual life-style" is essentially immoral, gay parents are rendered by their life-style incapable of instilling certain values society deems appropriate in their children.

As one listens to the morality argument, it begins to sound less like an attack on gay parents and more like one on homosexuality in general. Within this argument (I believe), exists a fear that some in the heterosexual community hold for various reasons. This fear stems from the misconception that homosexuality is in some way contagious.

I'm not trying to be facetious in saying this. Most in the anti-gay rights camp, including the Christian Coalition, will not acknowledge this fear or give much consideration to it. However, I am willing to assert that many who rely on the moral issue consciously or subconsciously believe to a certain extent that if a child is brought up in an environment which "promotes" homosexuality, he or she will be more inclined as an adult to "choose" that life-style.

But what I consider most offensive about those who use morality as an argument is their inability to distinguish between the homosexual as a potential caring and nurturing parent and stereotyped "queer" who is by his or her very nature promiscuous and immoral.

Others use the argument that the gay family is a serious obstruction of the stable "traditional American family." They assert that a child who lives in a household led by two mothers, for instance, will lack important male role models, and vice versa.

But what is the definition of a traditional and conventional American family as it exists today? We are seeing more and more cases in which the mother is the sole parent or in which a child is raised by parents of a different race.

My point here is that just because a child grows up in a fatherless or motherless environment or in a racially integrated family for that matter, doesn't mean that the important male or female role models will not exist or that the child will loose his or her own inherent identity and try to become what he or she is not (this applies just as much to sexual preference as it does to race.)

These are but a few arguments that are addressed when the issue of gay families arises. There are many others. Asked why she thinks gay men and women should be allowed to raise children with the acceptance of the heterosexual community and the government, Melissa Etheridge gave her own reasons. "I believe that as an American citizen, a law-abiding, taxpaying- major taxpaying citizen, that I should be allowed the same pursuit of happiness that every other citizen enjoys."

ARTS & ENTERTAINMENT

Writers Harvest lends literary voices to battle hunger

The country's largest literary charitable event shares various works raising funds for Share Our Strength

BY ERIN MCCALLISTER
Bucknellian Staff Writer

Somewhere a child is hungry. Somewhere a parent cannot afford food. But somewhere people are doing something about it. That somewhere is here.

Six University writers will unite in Bucknell Hall for the Writers Harvest: The National Reading, which is part of the fifth annual Share Our Strength National Reading, the country's largest literary benefit to fight hunger.

The writers will share their own artistic strengths through a poetry reading. The funds collected at this event will benefit Share our Strength (SOS), one of the nation's larger private, nonprofit sources of funds for grassroots programs fighting hunger, homelessness and illiteracy.

One hundred percent of the funds raised at the University's reading will go directly to the North Central Pennsylvania Food Bank. A $10 donation is suggested.

Last year, Bucknell collected $360 for Share Our Strength, and in the past four years, the University has contributed $1,740 to local programs.

The Harvest extends beyond the University, however. A nationwide event with more than 500 readings at bookstores and college campuses across North America, it involves more than 2,000 authors. In its four-year history, Writers Harvest has raised more than $280,000 for anti-hunger organizations.

The writers who will unite for this event are alumni Philip Brady '77, Steven Reese '81, Betsy Sholl '67, and Bruce Smith '68 who received his masters in 1971, as well as students Angelita Hogan GR and Michael Kaufmann '98. Hogan and Kaufmann are winners of the annual Julia Fonville Smithson Prize for Creative Writing at the University.

While some of the writers know one another, others have never met. But there are some surprising connections among many of them.

Brady, for instance, has connections with Smith, who has been one of the University's poets in residence, and with Reese.

During his senior year, Brady took a "life-changing course with Jack Wheatcroft that opened vistas for all students." It was in this creative writing class that Brady saw his first poetry reading.

The reader was the recently graduated Smith. This time, it will be Brady who stands in Bucknell Hall to read his own poems from his most recent book *Forged Correspondences*.

After leaving the University, Brady went to graduate school at the University of Delaware, joined the Peace Corps, lived in Zaire and Ireland, where he had spent his junior year.

Brady reveals that he did not start writing seriously until his late 20s and that his experiences abroad coalesced to help his writing career. He received his Ph.D. at Binghamton University and is an English professor and the director of the poetry center at Youngstown State University. Brady's office is just down the hall from Reese, who also went to graduate school at the University of Delaware.

Teaching composition, creative writing and English literature, Reese has been an associate professor of English at Youngstown State since 1988. One of the poems he may read is entitled "Alma Mater." It is a poem he wrote after returning to the University for a poetry festival three years ago.

Hearing professors Karl Patten and Bob Taylor read their work influenced Reese when he was a student.

As an undergraduate, he interned with *West Branch*, the national magazine founded by these two professors. Along with being published in *West Branch*, Reese's poetry has appeared in various magazines, including *Poetry Northwest* and *The Plum Review*. He also has a book of poems entitled *Enough Light to Stand By*.

Also an English professor, Sholl will travel from Portland, ME to Lewisburg to share in the Writers Harvest. Sholl, like Brady, had creative writing classes with Wheatcroft before graduating and obtaining her MA.

Originally from the New Jersey shore, she moved to Cambridge, Boston, the Appalachian Mountains and finally Portland, where she teaches at the University of Southern Maine.

This is her fourth year in a mentorship program with students pursuing their master's at Vermont college. At the Harvest, she may read poems from her most recent book *The Red Line*. Many of them pertain to the event's cause.

Sholl is one poet who may epitomize the intention of the Writers Harvest. Since many of her poems allude to homelessness, hearing them will remind listeners of the event's purpose. She herself works in a soup kitchen and says, "I'm very interested in making poetry that concerns itself with the needs of people who don't have a voice." Sholl is excited to return for this event because she also knows Smith.

These more experienced poets will mix their voices with student poets Hogan and Kaufmann. Hogan will read her Julia Fonville Smithson Prize winning poem "Selling the Farm." Other works of hers have appeared in *The Red Wheelbarrow*, a University student publication.

Kaufmann will read his winning poem "Graveyard." Though he claims he is not a poet, he has had his work published in *The Catalyst* and *The Red Wheelbarrow*. In addition to poetry, Kaufmann has written some fiction and hopes to get involved in screenwriting.

He is excited to participate in this event because he also has a connection with Smith: his father and Smith played football together.

Bonding for a worthy cause, these six poets will transcend their writing toward a purpose. Feeding words to the community, the Harvest will attempt to fill those in need of intellectual, emotional, and physical sustenance.

The poetry reading will be Thursday, Nov. 14 at 7 p.m.

For further details, call the Stadler Center for Poetry at 524-1853. For information regarding the availability of services for persons with disabilities at this event, contact Ruth Burnham at 524-1031.

Amsterdam Baroque Orchestra to perform

BY SHETAL MITHANI
Bucknellian Staff Writer

Ton Koopman, the Music Director of the Orchestra and Choir, will conduct this weekend's performance of musical talents.

Bucknell is the first stop on the Amsterdam Baroque Orchestra and Choir's U.S. tour. Conducted by Ton Koopman, they are one of the best early music groups in the world according to Bill Boswell, director of cultural events at the Weis center.

"We are really lucky to have this performance," Boswell said.

The group is performing the Bach B-minor mass and the performance should last around two hours. According to Boswell the piece is a very difficult to perform. "Very few perform it (Bach B-minor mass) well," Boswell said.

The performance is part of the Sesquicentennial Celebration of Singing; however, the Amsterdam group was chosen to perform first, and then the Sesquicentennial program was created around it, explained Boswell.

This is such a big performance that people from Pittsburgh are coming to see it, he continued.

"They (the Amsterdam group) deserve every bit of their reputation. It's an amazing performance," Boswell said.

The Amsterdam Baroque Orchestra and Choir is performing at the Weis center at 8 p.m. on Saturday, Nov 9. Tickets are $20 and can be purchased at the Weis Center Box Office 11:30 a.m. to 5:30 p.m. For information about tickets call 717-524-1000.

New Center Gallery exhibit captures images of a displaced tribe on film

"Amerindia Displaced" portrays elements of focus semester on Native Americans

BY MARNI HARRIMAN
Bucknellian Staff Writer

"Ruebartsch's photographs are very thought provoking because on one hand, he really shows the traditions and day-to-day life of the Tarahumara people. On the other hand, his work represents the plight of displaced culture throughout the world," observed Kathleen Stewart '97 on John Ruebartsch's photography in the new Center Gallery exhibit, "Amerindia Displaced."

"Amerindia Displaced," opened last Saturday in the Center Gallery with a reception with Ruebartsch. Observers were able to speak with the accomplished artist while sampling a gourmet cheese platter.

The exhibit is hosted in conjunction with the second subject of the focus semester on Native Americans. Ruebartsch's 11 images portray the lives of the Tarahumara, an indigenous tribe displaced in the Sierra Madre mountains in Mexico since the early part of the decade.

"As the world is becoming more populated and developed... we are losing these cultures," Ruebartsch explained. "They have a unique heritage... which must be retained."

Committed to social activism and promoting human rights, the photographer lived in Mexico for weeks at a time, documenting on film the indigenous tribe's plight in the midst of development. He lived with the tribe who accepted his mission with interest.

"I was intrigued by the land and the people," he said.

The people are greatly threatened by the developments of the mountain regions, as the country attempts to increase national productivity. These photographs show how their lifestyles are being exploited by the deforestation and climate change.

"It is becoming a ground-swell of poverty," Ruebartsch stated while adding, "they are trying to maintain a cultural identity, as the outside is creeping in."

When people learned of Ruebartsch's project, they actually actively sought him out in interest. "It was like a floodgate of communication once they found out I was interested in their lives," the artist commented.

Cynthia Peltier, who organizes the exhibits in the Center Gallery, was enthusiastic about Ruebartsch's photographs. "I have known his work for quite some time and I thought it was appropriate," she said.

"Amerindia Displaced" will remain on display until January 5, 1997, while the "Visions of Modernity" exhibit can be seen through December 15.

The Center Gallery is located on the third floor of the Langone Center. It is open to the public without charge weekdays from 11 a.m. to 5 p.m. and from 1 p.m. to 4 p.m. on weekends.

Sesquicentennial celebration features University compositions

Concert Chorale to perform

BY ANNE PUTNAM
Bucknellian Staff Writer

"Beat! Beat! Drums!-Blow! Bugles! Blow!... Into the school where the scholar is studying," is Walt Whitman's advice.

To hear his message and various musical performers, come to the Sesquicentennial Celebration of Singing which will highlight several musical events this weekend. On the forefront of this concert series is "An American Collage." The Bucknell University Concert Chorale will be performing music chosen and directed by William Payn, chair of the music department.

Payn was highly instrumental in creating the program. The opening of the concert will be his own piece, "To Music," which will be accompanied by the Commonwealth Brass Quintet. This ensemble will assist with "Medieval Lyrics" as well, a piece composed by Jackson Hill, professor of music. Hill, William Duckworth, professor of music, and Robert Lowry, professor of music in the late 1800s, will be featured besides Payn as composers from the University's music department. The choice of pieces supports the Sesquicentennial Celebration by highlighting University participation.

Payn outlined the rest of the program to incorporate American composers. All of the pieces have been composed since the University's inception and were chosen to identify with the American theme. "A Procession Winding Around Me" by Jeffrey Van is one such piece in this era, highlighting guitar accompaniment. Also, at the conclusion of the evening's performance will be a solo by soprano Megan Castrino '98, in "Joshua Fit the Battle of Jericho."

"An American Collage" is open to the public and free of charge. "So fierce you whirr and pound you drums-so shrill you bugles blow," the chorale is beckoning with Whitman to promise a well composed evening. "Then rattle quicker, heavier drums-you bugles wilder blow."

The performance will be tomorrow night at 8 p.m. in the Weis Center.

The Bellefield Singers arrive to close the celebration of singing weekend

BY ANNE PUTNAM
Bucknellian Staff Writer

The Bellefield Singers bring their talent to the melodious Sesquicentennial Celebration weekend with their a cappella performance. The majority of their selections are based upon various Biblical passages.

The Bellefield Singers are coming to Lewisburg through a combined effort of William Payn, director of music department, and William Boswell, director of multicultural events.

The event originated from Dr. Payn's desire to add another dimension to the Sesquicentennial Celebration weekend with an a cappella performance. In addition, the members of the Bellefield Singers, a premier group, are colleagues of his.

The six members of the Bellefield Singers perform vocal chamber music ranging from the medieval to the contemporary. Their well-chosen a cappella group consists of soprano Elaine Goldsmith, John Goldsmith, countertenor and manager, baritone Brady Alfred, soprano Carol Ann Alfred, tenor Kirby Dilworth, and bass Phil Theobald. They believe that the words and melodies of each piece entice men and women to celebrate each song's poetry.

This professional ensemble's accomplishments include winning the Pittsburgh Concert Society competition in 1992 and continual appearances in the Pittsburgh Renaissance and Baroque Society and Early Music in Columbus concert series. Their success stems from the Bellefield Singers individual educational backgrounds where each have high level musical degrees and continue to perform with extreme motivation.

A special highlight will be the performance of Gregorio Allegri's (1582-1652) *Miserere* to be performed by the Bellefield Singers and the Rooke Chapel Choir, which will be directed by Payn. This selection, as well as the others, were chosen by the Bellefield Singers.

The range of the pieces spans selections based on Biblical passages. *Exultate Justi* by Andrzeg Hakenberger features a 16th Century Song of Praise. The closing selection, *Farewell Overture* by Jean Belmontis is especially fitting and highlights fifty-five ways to say "Good-bye" in a dozen languages. Payn urges everyone to attend as this concert will close the weekend, the Sesquicentennial Celebration of Singing at Bucknell.

The sextet will be performing Sunday afternoon at 2:30 p.m. in the Weis Center.

Video Reviews

BY CHRIS NICHOLS

High School High ***1/2
Directed by David Zucker
Starring David Lovitz, Tia Carrere and Louise Fletcher

Anyone going to see this movie should know what to expect. It's typical Zucker humor in the *Naked Gun* kind of way. Stupid jokes, in stupid scenarios that miraculously end up coming across as hilarious. Lovitz plays a homely character that teaches at a well-respected prep school run by his brother. In efforts to prove his ability to make it on his own he takes a job at a run down inner-city school with every problem imaginable. When he arrives on his first day, his car is stolen along with his briefcase (except the handle) while he's standing next to it. He enters school through the metal detectors that can't stop going off. His first encounter with another member of the teaching staff is with an angry woman beating students over the heads. This Nurse Ratchet-type hard-ass character turns out to be the principal (played by none other than Louise Fletcher). Tia Carrere (*Wayne's World*), plays one of the only other teachers in the school that we ever meet. Some of them are still missing but pictured on milk cartons. Enough plot summary. The characters in the film, although mono-dimensional, are very likable and well portrayed. Lovitz does a great job at bringing this nobody to life (though it's a little far fetched). Carrere's role is less challenging and likewise, less impressive. Basically, she plays an attractive leading lady. Fletcher, like Carrere, doesn't do much. We haven't seen her do bigger and better though it was definitely an interesting casting choice. What really makes this movie work so well is the script. It's funny and entertaining and just as stupid (if not more so) than the audience was expecting. If you think you've seen enough potty joke movies, don't be too sure; this one's pretty funny.

Video Review

Toy Story ****
Voices of Tom Hanks and Tim Allen

Talk about an amazing animated feature. I haven't been so impressed since *The Lion King* (the last decent Disney flick). Pizar, the computer graphics company that did the bulk of the labor of this movie did an excellent job. As the title suggests, the movie is a story about toys. What's most impressive is that the toys come to life when there aren't any people around. When there are people there, the toys not only look like toys, but you can practically feel them. Buzz Lightyear, the new arrival in the once happy toy-chest, plays the antagonist to Woody, previously the most popular toy in the house. Buzz is a "Space Ranger" made of hard plastic with lots of neat lights and gadgets. When Andy (the owner of the two), runs through the house with Buzz in hand and bumps him against walls, you feel like this is a real toy getting thumped. When Woody falls you see his body as if he was really a small stuffed toy. Effects aside, this is still a great movie. What's fantastic is its ability to operate on levels that will please both kids and adults. There are lots of little jokes and puns that adults will get and kids will never even realize. So it keeps everyone entertained. If you or your kids or anyone you know missed this, I highly recommend it. It's arguably the most entertaining, animated movie I've ever seen.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie you probably need help.

New Poet-in-Residence named

Michael S. Weaver was recently named the Poet-in-Residence for next semester.

Marilyn Hacker, who was originally selected for the residency, withdrew from the appointment.

Weaver is the author of five books of poetry. He received an National Endowment for the Arts fellowship in 1985 and a Pennsylvania Arts Council fellowship in 1994.

His first book of poetry, entitled *Water Song*, was a finalist for the Walt Whitman Award in 1983.

In addition to writing poetry, Weaver has had two plays produced professionally—*Rosa* was given an Equity world premiere in Philadelphia, and *Elvira & the Lost Prince* won the PDI Award from the ETA Creative Arts Foundation in Chicago.

His short fiction is published in *Children of the Night*, an anthology edited by Gloria Naylor.

While on campus, Weaver will teach a creative writing workshop and will give two poetry readings.

Strike a pose: Student fashion show explores international attire

FASHION

From page 1

lose touch with her heritage and wishes to take every opportunity to learn and experience more of her culture.

Diversity

Fashion is a visible statement of culture. i.d. fashion takes advantage of the visibility of fashion to illustrate cultural identities. Many students are modeling their own ethnic clothing. Some have even written the descriptions to be read as they walk down the runway.

When asked about a teal and gold embroidered sari, Sweety Pandhi '99 explained, "It's a fancier one, like what you'd wear to a wedding. It's made of silk." Pandhi also has an authentic necklace and earrings to go with her Indian sari.

Crossing cultural bounds, models will also wear fashions from cultures other than their own. An African-American may be wearing a Japanese kimono, while a Caucasian woman may be wearing an Indian sari. "This," says Pisnanont, "shows how everyone is beautiful in themselves, regardless of their costume."

Ethnic Atmosphere

When asked how it was decided that the dinner be Moroccan, Pisnanont and Calderon described that they wanted something that would be new to the University and that also would not overshadow the ethnic dinners that are already traditions here. A Moroccan parent of a University student shared her recipes with Dining Services, who will be preparing the dinner.

There is a little University history behind the introduction of Burmese dancers from New York. The University has a long tradition with Burma, as the first international student to attend the University was from Burma early in this century. Since then the Burmese government has ended the exchange because students are not allowed to leave the country. "The Burmese dancers will highlight the Burma-Bucknell connection," said Calderon.

Behind the Scenes

Everywhere you looked at the rehearsal, people were practicing turns, smiles and practice runs. I talked to Mark Chayapruks '99, who will be wearing a Thai shirt in addition to three other outfits, and asked him what it was like to be a model in this event. He said, "Yeah, I think it's fun but different. You have to have the attitude that you're all that when you're up there [on the runway]." According to Chayapruks, the models were placed in groups and within each group they were encouraged to come up with unique poses.

Even at the rehearsal, the room was full of movement and energy as people quickly found their place in the lineup and tried to envision what the stage and runway would look like on Saturday night.

Music is going to be a mix of disco music from Indian to Thai to Korean. Pisnanont, Jessica Lurker '98 and Dave Barr '98 will be emceeing the event.

Hair and make-up will be done by Indigo Hair and Nails of Lewisburg. Debra Drasher, one of the stylists, explained that she will be doing some simple styling with the ethnic costumes and plans to be experimental with the more contemporary clothing. The pressure is on to get the models out in time for their runs, so Drasher will have a crew of four or five other stylists to help.

Runway

Atinuj Tantivit '97 and Sondra Helenese '99, modeling committee chairs, and Kaycee Mitchell '97 and Jessica Lurker '98, clothing chairs, worked closely in preparing the models for the show. All of the models signed contracts holding them responsible for the clothing.

Lurker was instrumental in getting clothing from Syms department store in New York. Syms loaned several thousand dollars worth of merchandise with name brands from Versace to Liz Claiborne and Calvin Klein.

"I had to go into the city to get them [the clothes]. Ninety-eight percent of what I brought back was couture clothing, right off the runway," said Lurker. She had measurements and an idea of the personalities of the models who would be wearing the clothing before she went to New York to pick it up for the event.

Lurker plans to be a fashion designer. Her senior project will involve designing a multicultural fashion portfolio. She will be helping to emcee for the evening and, although not modeling, will be wearing a "Jessica Lurker original," one of her own creations. "There are so many contributors and everyone did so much work. It's great! I'm so excited for this," Lurker said.

Sweety Pandhi '99, wearing an Indian sari that is appropriate for formal occasions including weddings, shows off her emerald green wrap.

Broadening the Spectrum

This fashion show, sponsored by Bucknell Cultural Ambassadors, has brought together many campus organizations that do not usually work together. "Rarely do all the multicultural organizations do a big project together. But we've all been chipping-in, I think that's the best part," said Pisnanont.

Student groups such as SAAB, Middle Eastern Association, and Brothers and Sisters Empowered have cooperated for this event. BCA has worked in conjunction with the Office of International Education, the Women's Resource Center, the Office of the Dean of Students, the Multicultural Center, the Office of Housing and Residential Life, Greeks for the Advancement of Multicultural Education and the Residential Colleges.

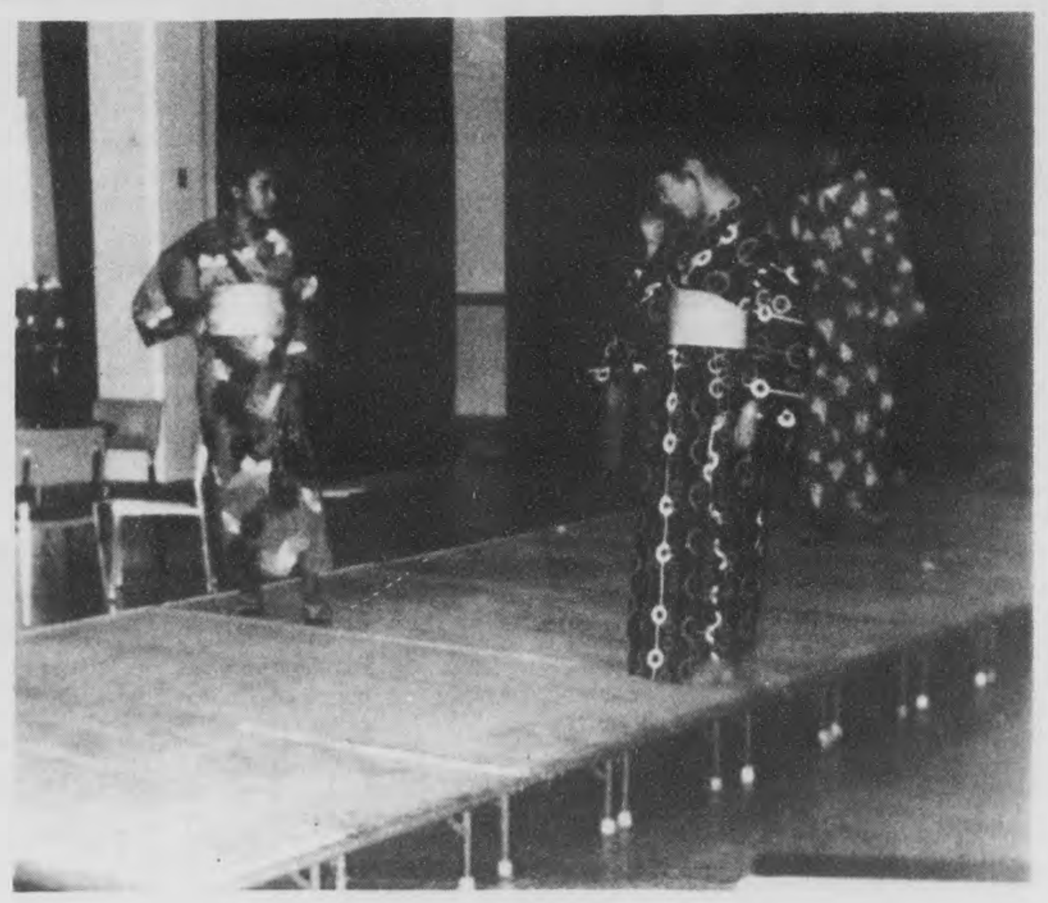
Besides celebrating the Sesquicentennial of the University, this event also coincides with the 10th anniversary of the Multicultural Center.

Calderon stressed that the organizers hoped this event would make others aware of the multicultural groups on campus. "Very often within our organizations, we see the same faces. We want everyone to see this."

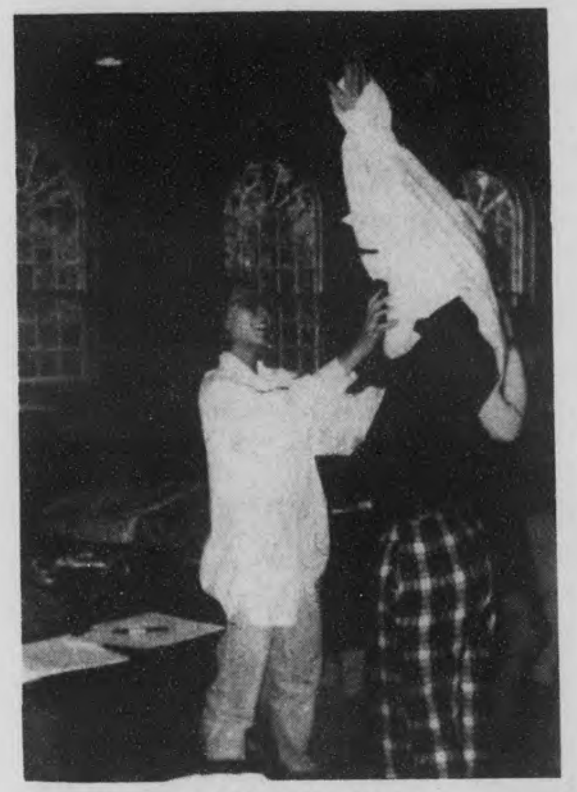
Hadiya Watson '98 in a contemporary black suit with boots juxtaposes the new against James Adlam's '98 traditional Nigerian attire.

Above: Coleen Powell '98 strikes a pose in this authentic Japanese kimono.

Left: Jesse Ballesteros '99, Cynthia Ordinario '97 and Elaine Calderon '97 model Filipino clothes. The fabric, made of processed pineapple plant, makes it possible to stay cool in the tropical climate of the Philippines.



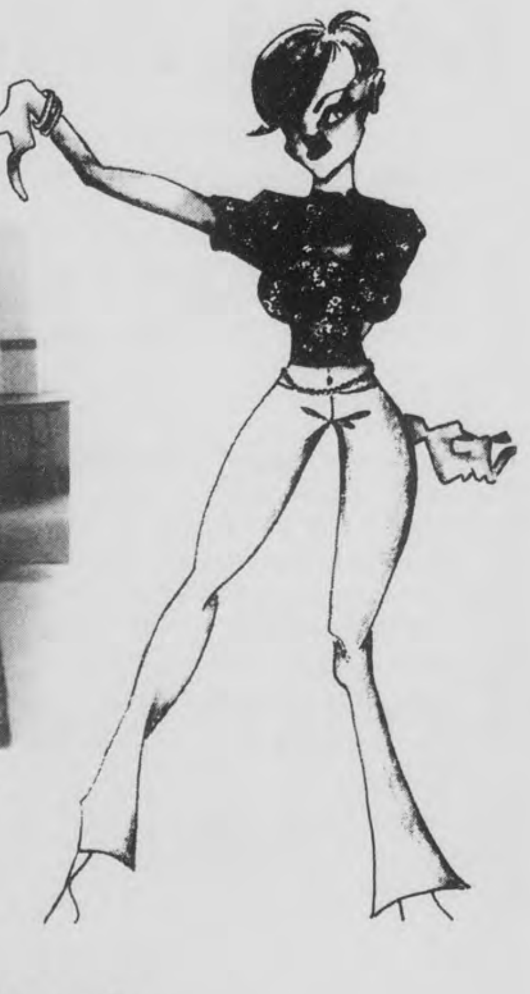
Right: Coleen Powell '98, Jean Tanimoto '97 and Rio Maruyama '97 synchronize their walk down the runway.



Joyce Pisnanont '97 helps Benga Akinnagbe '00 with a quick change.

Stylists from Indigo hair and nail salon consult with Sondra Helenese '99.

Ingrid Rodriguez '99 and Corienthia Strickland '98 check out the fashions of Natalie Dawkins '00 and Jasper Pollard '99.



Behind the scenes...

Over 40 students worked together as organizers and models to formulate this Saturday's i.d. fashion show.

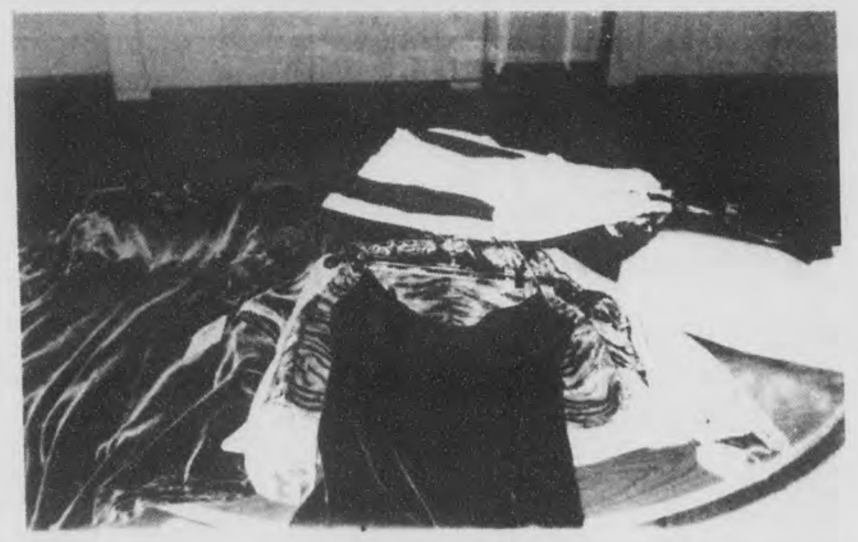
Above: Joyce Pisnanont '97, the general coordinator of i.d. fashion, orchestrates last minute details of timing and order.

Left: Atty Tantivit '97 helps Cynthia Ordinario '97 button this butterfly-sleeved Filipino formal dress.

Left: Mark Chayapruks '99 sports a backwards baseball cap while trying on his runway gear.

Left: Beetna Kim '00 gets ready for the runway.

Below: i.d. fashion hopes to highlight the fact that contemporary clothes such as these are strongly influenced by traditional ethnic attire.



Cynthia Ordinario '97 and Atty Tantivit '97 take a break from the hustle and bustle of the i.d. fashion dress rehearsal.

SCIENCE AND TECHNOLOGY

Acorn collection sheds light on squirrel survivorship

BY JAMIE KRAUK
Bucknellian Staff Writer

Animal behaviorist Michael Pereira and a group of students have made a name for themselves across the campus with their marked squirrels. Nearly 200 gray squirrels have been marked in the area bordered by Public Safety, Roberts, the Music and Arts building, and the Gateways.

The next step of this project for Pereira and his students is to investigate exactly what it is about this university campus that creates such a well-suited environment for the squirrels. The question that they asked was why the success rate of University squirrels was so high. Their search led them to large numbers of old trees that are found primarily in the area of and surrounding Roberts Hall. These trees provide an abundance of well-insulated nest sites in addition to a plethora of food in the fall.

The protocol for the investigation was quite simple in design but required tedious attention on the part of the students involved. The students sectioned off two quadrats 20m x 20m. The first was located behind Roberts and the second was on the hill between the Music and Arts building and Taylor Hall.

The majority of trees within the area are white oaks. These large old trees drop their acorns suddenly in the fall. To get proper counts of the acorns that drop, the collection must be timed so that it includes the bulk of the acorns as soon as they fall and before they are eaten by animals.

The first quadrat was surveyed in mid-September, and the second a week later. The first collection yielded nearly 10,000 acorns and the second yielded almost 30,000. In an area covering 20m x 20m, that is a surprisingly large number of acorns.

The fall acorn collection marked just the beginning of an ongoing investigation for Pereira and his students. The intention is to study the gross acorn production of the same two sites over the course of many years. From the results of the study, a correlation can be evaluated between acorn production and squirrel success.

A study designed to test the survivorship of adult and juvenile gray squirrels is scheduled to be implemented this winter. The theory held by the animal behaviorists is that the net acorn production will directly affect the survivorship of squirrels. During winters that follow a high acorn harvest, survivorship of both juveniles and females should be at a peak due to the increased food supply.

The squirrel population will be monitored throughout the winter and spring months.

The most difficult time for the female gray squirrels is during the period of mating and birthing, which falls from the middle of December through the middle of May. It is this critical time frame that poses the most significant threat to the survivorship of new individuals.

The only way that the squirrels can be monitored is through the use of the markings that have already been done, and by the research group's continuing efforts to mark new members of the population.

Recent studies show most commonly reported STDs

Some Common STDs

	What are the signs?	How is it treated?	Possible problems
CHLAMYDIA	About 75% of infected people have no symptoms. However, there may be a mild mucus-like discharge from the genitals or stinging when urinating. Also, there may be pain in the testicles (men) or abdomen (women).	Infected persons and their sexual partners must be tested and treated with antibiotics.	Painful infections of the reproductive organs that may lead to infertility in both men and women.
GONORRHEA	Men may have a creamy pus-like penile discharge and pain when urinating. However, they may have no symptoms and still be infected. Women may have vaginal discharge and pain when urinating, but often have no symptoms.	Infected persons and their sexual partners must be tested and treated with antibiotics.	If untreated, can cause arthritis, dermatitis, heart problems, and reproductive problems in both men and women. Can be transmitted to infants at birth.
HIV INFECTION AND AIDS	Most people infected with HIV may show no symptoms for many years but are still able to transmit the virus.	New medications may slow down the course of HIV infection and prevent many complications. If you are concerned, consult a health counselor or clinician about HIV antibody testing.	HIV causes a spectrum of conditions from mild symptoms to a severe immune deficiency syndrome (AIDS): people with AIDS experience unusual, life-threatening infections, cancers, and neurologic problems.

Recent reports from the American Social Health Association cite chlamydia as the most commonly reported sexually related infection and gonorrhea as the second most reported infection. This illicits the need for more aggressive screening and treatment of these sexually transmitted diseases.

The United States Center for Disease Control and Prevention tracks 52 infectious diseases throughout the course of the year and has reported 477,638 cases of chlamydia. "Because chlamydia is usually without symptoms, many people are infected without knowing it," said ASHA President Peggy Clarke. The actual number of cases is much higher than the report shows.

The American College Health Association statistics show that chlamydia incidences approach 10-15 percent of college campuses in a given year.

In addition to having no noticeable symptons in 75 percent of cases among women and in 25 percent of cases among men, chlamydia is the fastest spreading STD with estimates of new infections in the United States reaching as many as four million every year.

Chlamydia is not life threatening when treated and cured, but it can have severe consequences when left untreated. Women suffer the most serious symptoms.

Over time it can lead to Pelvic Inflammatory Disease, which may cause severe, chronic pain. PID can invade a woman's upper reproductive tract and cause scarring of the Fallopian tubes, possibly causing infertility. PID may also be the cause of ectopic pregnancy. In this type of pregnancy the fetus develops outside of the uterus, causing fetal death and a life threat to the mother.

Gonorrhea was the second most reported infection in 1995, but it too is often symptomless. When left untreated, like chlamydia, gonorrhea may lead to PID and infertility.

ASHA recommends routine testing for sexually transmitted infections. Many women assume that an annual gynecological exam and pap smear test will be sufficient for detecting STDs, but that is not always the case. Women should consult their health care provider before making this assumption. Men as well should not be ashamed to get tested for STDs.

Women and men should always inform their partner of any STDs they may have. It is important to remember that having an STD is not always a serious problem unless left untreated. Most STDs are curable when recognized early.

Physical Plant not only provides electricity, but heat

Known mostly for the black dust it casts onto cars across campus, Physical Plant is a necessary part of this campus because it provides much of the energy consumed by the university. The form of this energy is steam, which Physical Plant creates by burning coal. The steam is used both to create electricity and to heat university buildings. The main purpose of Physical Plant is to produce heat. The best description of Physical Plant, therefore, would be to call it the central heating system for the university.

How it Works

Chip Audette

Chip Audette
Bucknellian Columnist

The heart of Physical Plant includes three large coal-fired boilers, which create the steam used to heat the University. Each boiler is about the size of two dormitory rooms stacked one on top of the other. At the bottom of the boiler is a conveyer belt which carries locally-mined coal in one side and hot ash out the other. Inside the boilers, the burning coal heats large tanks of water and produces very hot, high pressure steam. The smoke and exhaust gases from the burning coal are then passed to the tall chimney which can be seen from around campus.

The steam produced from the boilers is so hot and it is at such a high pressure that it can be dangerous to transport. It would not be safe to send this steam around campus. Therefore, the steam is passed through a turbine which converts some of the steam's energy into electricity. By removing some of the energy from the steam, it is cooled to a much safer temperature (about 250 degrees F) and can be sent through underground pipes to all parts of campus.

The electricity produced by this process is substantial. About 20 percent of the electricity used by the University is produced at Physical Plant. Because Physical Plant is used as a source of both electricity and heat, it is called a *cogeneration power plant*. This is in contrast to traditional nuclear, coal and oil power plants which produce large amounts of heat just to make electricity. In these traditional power plants, there must be large cooling towers or cooling ponds in order to dissipate the waste heat associated with producing electricity.

In a cogeneration power plant like the University's Physical Plant, the "waste" heat from electricity generation is in the form of steam which we use to warm the entire campus. A cogeneration plant, therefore, ends up wasting very little energy when compared to a traditional power plant (of the same age and size), and it allows the university to get very good use out of its energy dollars.

As a reasonably efficient source of heat energy, Physical Plant does the job. It is having trouble, though, in keeping up with the ever-increasing demands of an expanding campus. Built in the early 1900s, Physical Plant was designed with a much smaller university in mind. New boilers were installed 50 years ago to increase Physical Plant's capacity, but the heating requirements are just getting too large for the current facility to support. Therefore, plans are underway to build a new Physical Plant which will burn either oil or gas, produce five times the electricity, and create enough steam to warm the University for the next 50 to 100 years.

Patriot League Player of the Week:
Brandon Little '97
Football-Defense
Little led the stingy Bucknell defense, giving up only six points to Lehigh.

Gridders come alive at crunch time

Down 6-0 with 4:37 left, Bucknell offense takes charge to top Mountain Hawks, 7-6

BY BRETT TOMLINSON
Bucknellian Staff Writer

Bucknell football took a crucial step towards the Patriot League title on Saturday, using a late fourth quarter drive to come from behind and beat defending league champion Lehigh, 7-6.

After holding the normally potent Lehigh offense scoreless for over three quarters, Bucknell's defense finally broke, surrendering a touchdown on a 36-yard pass from freshman quarterback Phil Stambaugh to Deron Braswell. The Mountain Hawks missed the point after attempt, but with a mere 4:37 left on the clock, the 6-0 lead put Bucknell's backs against the wall.

Head Coach Tom Gadd knew that Lehigh had left the door open for Bucknell by missing the extra point. "I told [the team] after [Lehigh] missed the extra point, that was our chance," Gadd reflected. "If we could get field position and start moving, we had plenty of time."

The Bison got good field position, taking over on their own 35 yard line after the Lehigh kickoff bounced out of bounds, and quarterback Jim Fox '97 immediately took charge of the two minute offense.

Two running plays set up a third down and five for Bucknell, and Fox responded with a clutch 17-yard completion to Ardie Kissinger '99, moving the Bison into Lehigh territory.

A controversial pass interference call on first down took Bucknell to the Lehigh 29 yard line. Fox handed off to tailback Rich Lemon '97 on the ensuing first down, and Lemon sliced to the outside, breaking tackles and picking up 17 yards. Three plays later, Lemon broke through the line for a four-yard touchdown run to tie the score.

Kicker Rich Miller '97 punched through the extra point, giving Bucknell the lead with 1:47 on the clock. "All I was worried about was getting it through," Miller said. "I didn't care how pretty it was."

Back to back interceptions by Terence Parham '97 and Erich Muzi '99 on the final two Lehigh possessions sealed the Bison victory.

"We work an awful lot on that last two-minute drive," said Gadd. "We do it a lot in practice, and our kids have a lot of confidence in it."

The win was impressive for Bucknell's defense, which has held the team together for the past five weeks. Lehigh had not been held to six points by a league opponent since Holy Cross first accomplished the feat in 1987. The Crusaders, who still had scholarships at the time, were led by Heisman Trophy candidate Gordie Lockbaum that year.

While the defense got the job done, it was not as easy as it looked, according to Gadd. "I thought our kids played well, but Lehigh did a great job of keeping us off balance," he said.

Lehigh also managed to contain Lemon for most of the game, holding the star rusher to 22 yards on the ground in the first three quarters. Lemon got going in the final stanza, though, picking up 46 yards.

Despite a frustrating year, the record-setting Lemon is not disheartened, keeping his focus on the league title. "I'm being patient with the young line, and they're coming along great," Lemon said.

Lehigh's efforts were not surprising to Gadd. "They're like everyone else we've played," said Gadd. "They said, 'We're not going to let Rich Lemon beat us; we're going to make you throw the football to beat us.'"

With a less effective Lemon on Saturday, the weight of the offense fell squarely on the shoulders of Fox, who managed to have one of his best games of the season, despite windy conditions.

Fox posted solid numbers (24 completions for 41 attempts, 209 yards passing, no interceptions), but more importantly, he kept the offense moving. Bucknell only had one three-and-out series in the entire second half.

"In a way, we were trying to get the pass to open things up for the run," Fox said. The plan finally worked out on the final, as the Bison mixed running and passing plays to take the lead.

At 2-0 in the league, Bucknell now stands alone at the top of the Patriot League standings but the season is far from over.

This week, the Bison travel to Lafayette for another tough road game. They finish the season at home with consecutive league games against Fordham and Colgate.

Jonah Half—The Bucknellian

After three silent quarters, tailback Rich Lemon '97 came alive for the Bison, rushing for 46 yards and a touchdown to lead Bucknell to a key 7-6 win over Lehigh. The team plays Lafayette on Saturday.

Bison control own destiny at Lafayette

At 2-0, Bucknell is three games away from its first-ever Patriot League crown

BY LUKE DAVID AND JOHN SIRIS
Bucknellian Staff Writers

With his four-yard touchdown run against Lehigh last week in the chilling winds of Goodman Stadium, Rich Lemon '97 breathed new life into the 1996 Bucknell football season.

Lemon's run, combined with the season's best performance of quarterback Jim Fox '97, and the stingy play of the Bison defense, led by linebacker Brandon Little (Patriot League Defensive Player of the Week) helped place Bucknell alone at the top of the Patriot League.

This Saturday, at Fisher Field, Lafayette (3-4, 0-1) will try to blemish the perfect league record that Bucknell has posted thus far this season.

The Leopards offense will be anchored by sophomore running back Leonard Moore, the 1995 Patriot League Rookie of the Year. Moore, who has totaled 516 yards this season, piled up an impressive 62 first half rushing yards against the punishing defense of I-A power Army (8-0), in the Leopards 42-21 loss this past Saturday.

Unfortunately for Lafayette, Moore will be trying to crack a defense that ranks first in the league in rushing yards allowed, yielding only 117.6 yards a game.

When it's time to throw the ball, Lafayette will be calling on the arm of Shawn McHale, who looked strong against Army, despite struggling throughout much of the season.

McHale completed 11 of his 17 passes last week, for 147 yards and a touchdown, including a 48-yard toss to All-League receiver Quincy Miller. At 6'2", 225 lbs., Miller is certainly a threat who will physically challenge the smaller Bison secondary.

Protecting McHale and opening holes for Moore will be an enormous offensive line that averages 6'4" and almost 300 pounds per man.

Defensively, Lafayette is suspect after allowing 81 points in the last two weeks, including a 40-9 thumping given to them by Patriot League rival Colgate.

Senior safety B.J. Gallis (6'3", 220) has been strong for the Leopards all year racking up 69 tackles, 2 sacks and an interception, and was particularly effective against Army where he had a team high 15 tackles and forced a fumble.

Jody Ravetz '98 and the Bison hope the ball bounces their way at the upcoming Patriot League Tournament this weekend at Colgate.

Women head to league tourney

BY ERIC KEBER
Bucknellian Staff Writer

The Bucknell women's soccer team faced Princeton (5-8-2) under the lights on Monday night but came up on the short end of a 3-1 contest.

The game went scoreless throughout the first half but eight minutes into the second period Kate Stockwell scored the Tigers first goal. She was followed twice more in the half to put Princeton up 3-0. With only 48 seconds left to play, Maura Diorio '97 received a pass from Colleen Butler '00 and found the net for Bucknell's lone goal.

The first 25 minutes of the first half were dominated by Princeton but then Bucknell began to pressure its opponent.

"The second half of the first-half we played pretty well," remarks head coach Toby Lovec-

Flash in the Pan

NBA Back in Action: The NBA kicked off its 50th season this past week as the New York Knicks and the Toronto Raptors relived the first ever NBA game, then between the Knickerbockers and the Toronto Huskies.

Rice catches number 1,000: Record-setting San Fransisco wide receiver Jerry Rice netted his 1,000th career reception this Sunday in a 24-17 win against the New Orleans Saints. Rice is the first-ever player to accumulate 1,000 receptions. He is already the all-time leader in touchdowns, catches, and yards by a receiver.

Additional NFL: In other action in this week's NFL, the Eagles defeated the Dallas Cowboys 31-21 for their first victory in Texas Stadium since 1991. Their win, coupled with a Redskins loss puts the Eagles in a tie for first, with the Cowboys trailing by two games at 5-4. The Atlanta Falcons finally got that winning feeling, as they defeated the sputtering Carolina Panthers 20-17. Also, the Green Bay Packers and the Denver Broncos staked sole claim to the best records in their conferences, as they both now stand at 8-1.

Run, Baby, Run: Giacomo Leone and Anuta Catuna took the N.Y. city marathons this past week. Leone, an Italian, finished in a 2:09:45 to win the men's race by 13 seconds over Turbo Tumo of Ethiopia. Catuna, from Romania, finished in a time 2:28:18 to edge Franca Fiacconi of Italy by 14 seconds.

BC Players in Betting Scandal: Four Boston College football players are rumored to have been involved in betting on college football games, a major infraction under NCAA rules. So far BC has been silent, but the players have gone as far as to say that they were "unfairly singled out." An investigation is under way.

Tyson to face Holyfield: Heavyweight champion Mike Tyson will defend his WBA title against former unanimous heavyweight champion Evander Holyfield. Tyson and Holyfield have never fought before, although they were scheduled to face each other in 1991. The fight was cancelled when Tyson was convicted of rape charges and put in jail for three years.

Baseball Free Agents: Notable players who have filed for free agency this week include Indians outfielder Albert Belle, probable N.L. Cy Young winner John Smoltz, and three-time A.L. Cy Young Award winner Roger Clemens

SCIENCE AND TECHNOLOGY

Acorn collection sheds light on squirrel survivorship

By Jamie Krauk
Bucknellian Staff Writer

Animal behaviorist Michael Pereira and a group of students have made a name for themselves across the campus with their marked squirrels. Nearly 200 gray squirrels have been marked in the area bordered by Public Safety, Roberts, the Music and Arts building, and the Gateways.

The next step of this project for Pereira and his students is to investigate exactly what it is about this university campus that creates such a well-suited environment for the squirrels. The question that they asked was why the success rate of University squirrels was so high. Their search led them to large numbers of old trees that are found primarily in the area of and surrounding Roberts Hall. These trees provide an abundance of well-insulated nest sites in addition to a plethora of food in the fall.

The protocol for the investigation was quite simple in design but required tedious attention on the part of the students involved. The students sectioned off two quadrats 20m x 20m. The first was located behind Roberts and the second was on the hill between the Music and Arts building and Taylor Hall.

The majority of trees within the area are white oaks. These large old trees drop their acorns suddenly in the fall. To get proper counts of the acorns that drop, the collection must be timed so that it includes the bulk of the acorns as soon as they fall and before they are eaten by animals.

The first quadrat was surveyed in mid-September, and the second a week later. The first collection yielded nearly 10,000 acorns and the second yielded almost 30,000. In an area covering 20m x 20m, that is a surprisingly large number of acorns.

The fall acorn collection marked just the beginning of an ongoing investigation for Pereira and his students. The intention is to study the gross acorn production of the same two sites over the course of many years. From the results of the study, a correlation can be evaluated between acorn production and squirrel success.

A study designed to test the survivorship of adult and juvenile gray squirrels is scheduled to be implemented this winter. The theory held by the animal behaviorists is that the net acorn production will directly affect the survivorship of squirrels. During winters that follow a high acorn harvest, survivorship of both juveniles and females should be at a peak due to the increased food supply.

The squirrel population will be monitored throughout the winter and spring months.

The most difficult time for the female gray squirrels is during the period of mating and birthing, which falls from the middle of December through the middle of May. It is this critical time frame that poses the most significant threat to the survivorship of new individuals.

The only way that the squirrels can be monitored is through the use of the markings that have already been done, and by the research group's continuing efforts to mark new members of the population.

Recent studies show most commonly reported STDs

Some Common STDs

	What are the signs?	How is it treated?	Possible problems
CHLAMYDIA	About 75% of infected people have no symptoms. However, there may be a mild mucus-like discharge from the genitals or stinging when urinating. Also, there may be pain in the testicles (men) or abdomen (women).	Infected persons and their sexual partners must be tested and treated with antibiotics.	Painful infections of the reproductive organs that may lead to infertility in both men and women.
GONORRHEA.	Men may have a creamy pus-like penile discharge and pain when urinating. However, they may have no symptoms and still be infected. Women may have vaginal discharge and pain when urinating, but often have no symptoms.	Infected persons and their sexual partners must be tested and treated with antibiotics.	If untreated, can cause arthritis, dermatitis, heart problems, and reproductive problems in both men and women. Can be transmitted to infants at birth.
HIV INFECTION AND AIDS	Most people infected with HIV may show no symptoms for many years but are still able to transmit the virus.	New medications may slow down the course of HIV infection and prevent many complications. If you are concerned, consult a health counselor or clinician about HIV antibody testing.	HIV causes a spectrum of conditions from mild symptoms to a severe immune deficiency syndrome (AIDS): people with AIDS experience unusual, life-threatening infections, cancers, and neurologic problems.

Recent reports from the American Social Health Association cite chlamydia as the most commonly reported sexually related infection and gonorrhea as the second most reported infection. This illicits the need for more aggressive screening and treatment of these sexually transmitted diseases.

The United States Center for Disease Control and Prevention tracks 52 infectious diseases throughout the course of the year and has reported 477,638 cases of chlamydia. "Because chlamydia is usually without symptoms, many people are infected without knowing it," said ASHA President Peggy Clarke. The actual number of cases is much higher than the report shows.

The American College Health Association statistics show that chlamydia incidences approach 10-15 percent of college campuses in a given year.

In addition to having no noticeable symptons in 75 percent of cases among women and in 25 percent of cases among men, chlamydia is the fastest spreading STD with estimates of new infections in the United States reaching as many as four million every year.

Chlamydia is not life threatening when treated and cured, but it can have severe consequences when left untreated. Women suffer the most serious symptoms.

Over time it can lead to Pelvic Inflammatory Disease, which may cause severe, chronic pain. PID can invade a woman's upper reproductive tract and cause scarring of the Fallopian tubes, possibly causing infertility. PID may also be the cause of ectopic pregnancy. In this type of pregnancy the fetus develops outside of the uterus, causing fetal death and a life threat to the mother.

Gonorrhea was the second most reported infection in 1995, but it too is often symptomless. When left untreated, like chlamydia, gonorrhea may lead to PID and infertility.

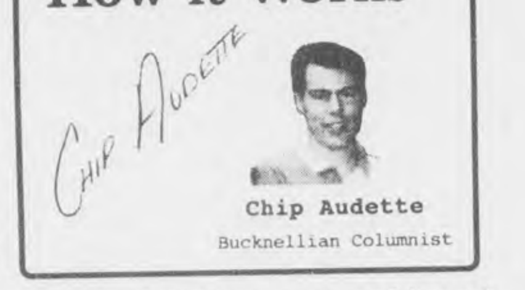
ASHA recommends routine testing for sexually transmitted infections. Many women assume that an annual gynecological exam and pap smear test will be sufficient for detecting STDs, but that is not always the case. Women should consult their health care provider before making this assumption. Men as well should not be ashamed to get tested for STDs.

Women and men should always inform their partner of any STDs they may have. It is important to remember that having an STD is not always a serious problem unless left untreated. Most STDs are curable when recognized early.

Physical Plant not only provides electricity, but heat

Known mostly for the black dust it casts onto cars across campus, Physical Plant is a necessary part of this campus because it provides much of the energy consumed by the university. The form of this energy is steam, which Physical Plant creates by burning coal. The steam is used both to create electricity and to heat university buildings. The main purpose of Physical Plant is to produce heat. The best description of Physical Plant, therefore, would be to call it the central heating system for the university.

How it Works



Chip Audette
Bucknellian Columnist

The heart of Physical Plant includes three large coal-fired boilers, which create the steam used to heat the University. Each boiler is about the size of two dormitory rooms stacked one on top of the other. At the bottom of the boiler is a conveyer belt which carries locally-mined coal in one side and hot ash out the other. Inside the boilers, the burning coal heats large tanks of water and produces very hot, high pressure steam. The smoke and exhaust gases from the burning coal are then passed to the tall chimney which can be seen from around campus.

The steam produced from the boilers is so hot and it is at such a high pressure that it can be dangerous to transport. It would not be safe to send this steam around campus. Therefore, the steam is passed through a turbine which converts some of the steam's energy into electricity. By removing some of the energy from the steam, it is cooled to a much safer temperature (about 250 degrees F) and can be sent through underground pipes to all parts of campus.

The electricity produced by this process is substantial. About 20 percent of the electricity used by the University is produced at Physical Plant. Because Physical Plant is used as a source of both electricity and heat, it is called a *cogeneration power plant.* This is in contrast to traditional nuclear, coal and oil power plants which produce large amounts of heat just to make electricity. In these traditional power plants, there must be large cooling towers or cooling ponds in order to dissipate the waste heat associated with producing electricity.

In a cogeneration power plant like the University's Physical Plant, the "waste" heat from electricity generation is in the form of steam which we use to warm the entire campus. A cogeneration plant, therefore, ends up wasting very little energy when compared to a traditional power plant (of the same age and size), and it allows the university to get very good use out of its energy dollars.

As a reasonably efficient source of heat energy, Physical Plant does the job. It is having trouble, though, in keeping up with the ever-increasing demands of an expanding campus. Built in the early 1900s, Physical Plant was designed with a much smaller university in mind. New boilers were installed 50 years ago to increase Physical Plant's capacity, but the heating requirements are just getting too large for the current facility to support. Therefore, plans are underway to build a new Physical Plant which will burn either oil or gas, produce five times the electricity, and create enough steam to warm the University for the next 50 to 100 years.

BUCKNELL UNIVERSITY SPORTS THURSDAY

Patriot League Player of the Week:
Brandon Little '97
Football-Defense
Little led the stingy Bucknell defense, giving up only six points to Lehigh.

Gridders come alive at crunch time

Down 6-0 with 4:37 left, Bucknell offense takes charge to top Mountain Hawks, 7-6

By Brett Tomlinson
Bucknellian Staff Writer

Bucknell football took a crucial step towards the Patriot League title on Saturday, using a late fourth quarter drive to come from behind and beat defending league champion Lehigh, 7-6.

After holding the normally potent Lehigh offense scoreless for over three quarters, Bucknell's defense finally broke, surrendering a touchdown on a 36-yard pass from freshman quarterback Phil Stambaugh to Deron Braswell. The Mountain Hawks missed the point after attempt, but with a mere 4:37 left on the clock, the 6-0 lead put Bucknell's backs against the wall.

Head Coach Tom Gadd knew that Lehigh had left the door open for Bucknell by missing the extra point. "I told [the team] after [Lehigh] missed the extra point, that was our chance," Gadd reflected. "If we could get field position and start moving, we had plenty of time."

The Bison got good field position, taking over on their own 35 yard line after the Lehigh kickoff bounced out of bounds, and quarterback Jim Fox '97 immediately took charge of the two minute offense.

Two running plays set up a third down and five for Bucknell, and Fox responded with a clutch 17-yard completion to Ardie Kissinger '99, moving the Bison into Lehigh territory.

A controversial pass interference call on first down took Bucknell to the Lehigh 29 yard line. Fox handed off to tailback Rich Lemon '97 on the ensuing first down, and Lemon sliced to the outside, breaking tackles and picking up 17 yards. Three plays later, Lemon broke through the line for a four-yard touchdown run to tie the score.

Kicker Rich Miller '97 punched through the extra point, giving Bucknell the lead with 1:47 on the clock. "All I was worried about was getting it through," Miller said. "I didn't care how pretty it was."

Back to back interceptions by Terence Parham '97 and Erich Muzi '99 on the final two Lehigh possessions sealed the Bison victory.

"We work an awful lot on that last two-minute drive," said Gadd. "We do it a lot in practice, and our kids have a lot of confidence in it."

The win was impressive for Bucknell's defense, which has held the team together for the past five weeks. Lehigh had not been held to six points by a league opponent since Holy Cross first accomplished the feat in 1987. The Crusaders, who still had scholarships at the time, were led by Heisman Trophy candidate Gordie Lockbaum that year.

While the defense got the job done, it was not as easy as it looked, according to Gadd. "I thought our kids played well, but Lehigh did a great job of keeping us off balance," he said.

Lehigh also managed to contain Lemon for most of the game, holding the star rusher to 22 yards on the ground in the first three quarters. Lemon got going in the final stanza, though, picking up 46 yards.

Despite a frustrating year, the record-setting Lemon is not disheartened, keeping his focus on the league title. "I'm being patient with the young line, and they're coming along great," Lemon said.

Lehigh's efforts were not surprising to Gadd. "They're like everyone else we've played," said Gadd. "They said, 'We're not going to let Rich Lemon beat us; we're going to make you throw the football to beat us.'"

With a less effective Lemon on Saturday, the weight of the offense fell squarely on the shoulders of Fox, who managed to have one of his best games of the season, despite windy conditions.

Fox posted solid numbers (24 completions for 41 attempts, 209 yards passing, no interceptions), but more importantly, he kept the offense moving. Bucknell only had one three-and-out series in the entire second half.

"In a way, we were trying to get the pass to open things up for the run," Fox said. The plan finally worked out on the final, as the Bison mixed running and passing plays to take the lead.

At 2-0 in the league, Bucknell now stands alone at the top of the Patriot League standings but the season is far from over.

This week, the Bison travel to Lafayette for another tough road game. They finish the season at home with consecutive league games against Fordham and Colgate.

Jonah Half—The Bucknellian

Soccer ends season on a sour note

BY E.J. CRAWFORD
Bucknellian Staff Writer

The Bucknell men's soccer team entered this past week hoping that wins over Lafayette and Navy would propel them into the Patriot League Tournament. Instead, the Bison suffered two losses, extending for at least one more year their attempt to make the league tournament.

The Bison battled a tough Lafayette squad almost evenly for the majority of the first half as the defense, led by senior captain Doug Sweet, turned away numerous offensive opportunities by the Leopards, holding them scoreless despite the Leopards getting off 15 first-half shots.

However, it was a defensive mistake in the 35th minute of the first half that allowed Lafayette's only goal, which proved to be the eventual margin of victory. "It was simply a defensive mistake... we turned the ball over in our own defensive third, and they scored on a quick corner," Coach Craig Reynolds said.

The Bison rebounded to play a solid second half, but despite repeated attacks, were unable to score. "We came at them the whole second half, but we didn't capitalize on the chances we had," Coach Reynolds said.

Goalkeeper Corey Harbold '97 registered eight saves for the game.

With this loss the Bison were basically eliminated from playoff contention, and were playing for pride against defending League champion Navy, which was still fighting for a playoff spot. Navy came out playing inspired, and again the Bison were undone by mistakes and lack of communication. Navy broke out early, scoring two minutes into the game. "We didn't pressure the ball... and Navy scored on the rebound," Reynolds said.

The Bison rebounded to tie the game in the second-half, as Scott Gilroy '00 scored his team leading eighth goal on a feed from captain Wright Ramsey '98 with 32 minutes left in the first half. But the Midshipmen responded quickly, putting in two goals within two minutes of each other to take a 3-1 lead, and coasted to victory.

Mary Ellen Kelty—The Bucknellian

Kevin McClure '98 is one of nine players returning from this year's team that finished with a 7-11 overall record

For the season, the Bison finished 7-11 and, 1-5 in the Patriot League.

Reflecting on the season's efforts, Reynolds commented that the team "would play well in streaks, but mistakes have just killed us."

As to next season, the Bison lose only two starters, goalkeeper Harbold and fullback Doug Sweet, and looks to add "a little bit more speed."

Reynolds particularly focused on the mental aspect of the game, saying that "we need to feel that we're capable of winning the close games."

Kristin Soto '98 and the Bison prepare to face 5-1 Lehigh in round one of the Patriot League Tournament on Saturday.

Hockey keeps momentum despite loss

Bucknell takes tough 2-1 loss to American in stride, heads to league tournament

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

The Bucknell field hockey team's loss to American 2-1 on Saturday proved not to be an upsetting one for the Bison, as their impressive performance gives them momentum heading into this week's Patriot League Championships.

After a close first half, the game was tied at the half. Kate McIlvain '97 put in the lone goal for the Bison off of a rebound from the goalkeeper's pads. Maureen Breslin '99, who boasts a phenomenal 22 saves, tended goal for the Bison. "Everyone played really well. Everything seemed to click, and good connections were made by all. Our performance against American makes us all really excited to compete in the Patriot League Championship this weekend," Breslin said.

The Bucknell field hockey team travels to Lafayette this weekend to engage in battle in the Patriot League Championship. Bucknell is seeded third out of the four teams that made the tournament. Defending champions Lafayette, which upset the Bison in last year's tournament, are on top of the standings with a no loss record of 6-0-0 in the Patriot League. Lafayette opens up with fourth seed Colgate. Colgate goes into the tournament with a record of 3-3-0 in the Patriot League. The Bison open up on Saturday with second seed Lehigh. Bucknell goes into the tournament with a record of 3-3-0 in the Patriot League. Lehigh boasts a near perfect record of 5-1-0 in the Patriot League.

The two winners of the semifinal games on Saturday will challenge each other this Sunday in the finals for the Patriot League Championship.

"We have been preparing more intensely than ever in the past couple of weeks. We have been stressing stamina, strength and endurance along with a positive mental state for all team members," said Tina Jones '98.

"We have been focusing more on specific situations. We have been working a great deal on team defense, for example. I'm really excited for Patriot Leagues this weekend," Breslin added.

"I can honestly say that I expect great things from Bucknell field hockey this weekend and in the future," said Sarah Catlin '98.

chio. "The defense was hanging in there and we were maintaining possession. Becky Snover made some great saves," noted Lovecchio of Becky Snover '97 who played the entire game and made 11 saves.

Despite the loss, the Bison will go into the first round of the Patriot League Tournament with a lot of confidence and with hopes of beating Army in the first round to advance to the finals. Bucknell received the third seed with Colgate getting the first, Army getting the second, and Navy receiving the fourth seed.

The team will leave on Friday for the Saturday match against Army at Colgate. If Bucknell wins, they will play the winner of the Colgate/Navy game on Sunday. Army beat Bucknell 1-0 in their first meeting this season on Sept. 18.

"Colgate is having a great year and they're a strong team," said Lovecchio, "but I think the league is more balanced this year."

Lovecchio likes his position right now and is looking forward to the Army game with enthusiasm. "I have a lot of confidence in this team and the match up against Army will be an even match." He is looking to stop Holly Pedley, Army's best player. "She is big, strong, and just a good all-around player. Sarah Stopper '00 shut her down last game and we need Sarah to be involved in the game on Saturday." Lovecchio also wishes to see his players think more without the ball, free their teammates, and concentrate on defense.

"A lot of the goals that have been scored on us are because of mental defensive breakdowns instead of opponents making great shots," commented assistant coach Ben Landis '96.

The confidence level is "still pretty high," noted Liz Woodrow '98 who believes the Bison have a good chance of winning the first round game. "The whole team wants to win the first game for the seniors because we've never done that before," said Woodrow, who leads the team in goals with seven.

The Bison defeated Robert Morris on Friday 5-0 and out shot them 34-3. Woodrow, Diorio, Amy Riviere '98, Talia Ciccone '00, and Lindsay Founds '99 scored for the Bison.

PRINCIPLES *of* SOUND RETIREMENT INVESTING

EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg – from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be – working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management – managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.℠

Cross country battles Cadets

Men and women challenge top ranked Army, finish second

BY CHRIS ELLIS
Bucknellian Staff Writer

Cara Mickelsen—The Bucknellian

Pamela Richardson '99 (center) was 12th at Patriot Leagues, behind teammates Julie Sweitzer '99 (4th) and Annie Hamlin '99 (10th).

Both of Bucknell's cross-country teams went into last weekend's Patriot League championships as underdogs against nationally ranked teams from Army. And although the Bison ran their best meets of the season in the Championships, they still had to settle for a pair of second-place finishes.

Bucknell's men twice rallied from seemingly insurmountable deficits, but in the end, Army's raw talent was simply too much, as Cadet runners earned the top three positions in the race and cruised to a 21-52 win over the Bison. Bucknell's finish was considerably better than last year's, when the Bison failed to place a runner in the top five.

"Last year, we just sort of rolled over and played dead against Army," Head Coach Art Gulden said. "I think that they were expecting us to do that again. We made them work for it this year."

Matt Kodak '99 led the Bucknell contingent, finishing fourth overall with a time of 25:31, 30 seconds behind Army's Dan Browne. Wally Dietrich '99 finished one second behind Kodak in fifth place. Bob Chandler '97 (12th), Dave Granger '97 (14th), Jason Trollope '99 (18th) and Chris Kearney '99 (19th) also posted impressive finishes for the Bison.

"As a team, we ran just about as well as we could," Gulden said. "The progress we've made from the beginning of the year to this point is just extraordinary."

The women's team faced a similar uphill battle against Army, running close for most of the race but ultimately bowing to a 38-55 defeat. The Bison did, however, hold off rival Lafayette (65 points) for second place.

"This race was very competitive right to the end," Gulden said. "Just a few seconds separated the top runners from all teams."

Army's Jessica Jones won the 3.1-mile individual race with a time of 18:17. Bucknell was the race's most consistent team, however, placing all of its top seven runners in the overall top 20. Julie Sweitzer '99 (18:32) finished fourth to pace Bucknell. Sweitzer was followed by Annie Hamlin '99 (10th) and Pamela Richardson '99 (12th).

Both teams have an off week before regular-season ending regional meets. The men, considered a reasonable longshot to qualify for the National Championship meet, will run at the IC4A championships, and the women will race at the ECAC championships.

TENNIS

From Page 16

just that and really gave Koch some problems."

In other singles brackets, Steve Bomberger '99 and Drew Thimme '97 won the consolation rounds of the No. 3 and No. 8 brackets, respectively. In addition, Justin Quandt '00, Sean Galligan '98, Adam Epstein '99 and Alex Dannin '99 all won first round matches in their respective brackets.

In doubles, Plumb and Bomberger won the consolation round in the No. 1 bracket, while Kelly and Epstein matched their effort winning the No. 2 consolation. The teams of Dannin/Thimme and Galligan/Quandt both won first round matches.

This coming weekend Bucknell will send three players to the ITA Rolex Eastern Regional Tournament held at Princeton. Kelly will enter the singles bracket, while Plumb and Bomberger will team up for doubles. The Rolex tournament is a qualifier for the National Indoor Championships held in February. Under Hammerlee's tutelage, Bucknell has not previously sent any players to the Rolex tournament.

Athlete Profile — Men's Soccer

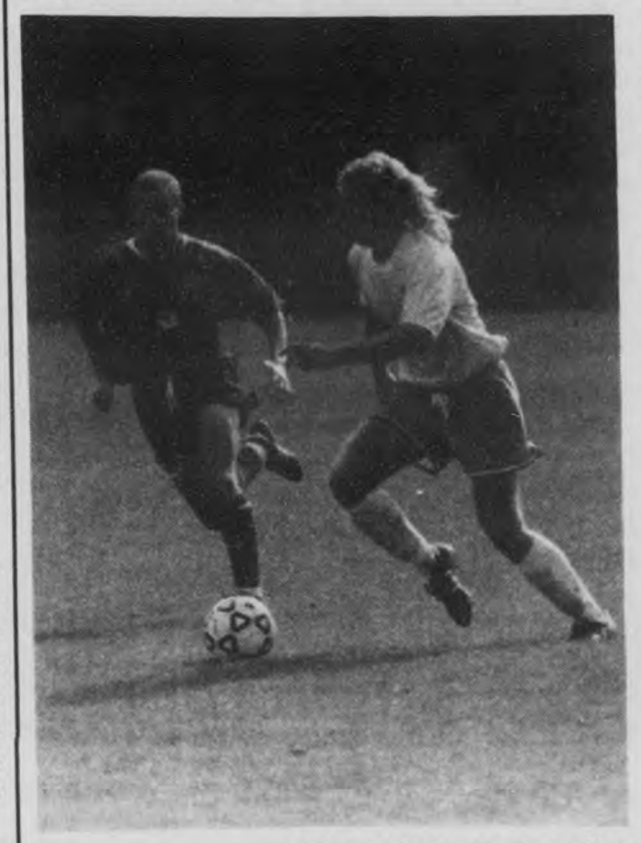
High scorer kicks back in free time

BY BRETT TOMLINSON
Bucknellian Staff Writer

In his first year on the soccer team, Scott Gilroy '00 turned plenty of heads with his resilient, skillful play and flowing locks of blond hair. In fact, Gilroy's impact on the field earned him about as much fame as a freshman on a 7-11 team can have.

But in reality, the soccer star is far from the aggressive spark plug he appears to be on the field. Gilroy is a quiet, mild-mannered student who enjoys kicking back and watching movies with his friends and teammates.

While he does exhibit a certain flair, he contends that he's just a regular, relaxed kind of guy. He travels around campus on a baby blue Mongoose freestyle bike ("I just brought it up here for transportation," he insists) and tries to balance his time to keep on top of his work like most first-year students.



Michael Morris—The Bucknellian

On the field, Scott Gilroy '00 is constantly moving...

On the field, Gilroy helped provide the offense spark the Bison have been looking for, but due to a number of losses in close games, the men's soccer team finished below .500 and missed the Patriot League Tournament. Gilroy contends that Bucknell is not far from turning things around.

"We need to find ways to succeed in the close games," Gilroy said. "To get winning, we just need to find some sort of 'click' that's going to make things start rolling."

With eight goals and two assists, Gilroy led the Bison in scoring and made a strong case for Patriot League Rookie of the Year honors. Despite his success in the league, he still was impressed with the style of play.

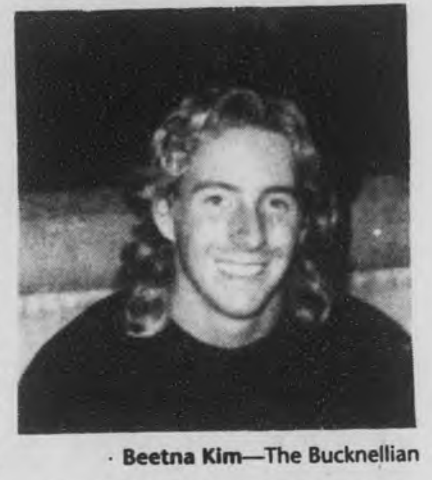
"The higher you go, the more physical and faster the play will be, so I expected the physical play," Gilroy commented. Although he got knocked around, Gilroy always seemed to emerge from a pack with the ball, increasing Bucknell's scoring opportunities.

Gilroy's athleticism made him an attractive prospect coming out of high school. As a senior at Sparta High School in New Jersey, Gilroy was recruited by several schools, including Rutgers and Trenton State, but he chose to come to Bucknell because he felt comfortable with the campus and the team.

Gilroy does not rely on natural talent alone to keep him competitive. In fact, his work ethic has been a secret to his success. On Monday, the day after the team's final game of the season, Gilroy was already in the weight room, preparing for next year.

"Off season is the time when you recover from any injuries and increase your strength and speed," Gilroy said. He takes his training seriously because he loves the game and wants to win.

"I've been playing ever since I could stand up and kick a ball, so as long as I can remember, I've been playing," Gilroy quirked. He never had any soccer role models, simply because they were few and far between, but he always enjoyed the game.



Beetna Kim—The Bucknellian

...but in his free time, the freshman just likes to relax.

Now, as Gilroy has taken his game to a new level, he faces a new challenge: helping to turn around a Bucknell program which has not had a winning season since 1993.

"Next year, experience will be catching up with the team," Gilroy said. "A lot of them will be seniors, and there will be greater maturity and playing experience. Hopefully with that, we can turn all of those close losses into wins."

First snow has skiers dreaming

From unusual clouds to busy squirrels, all signs point to a big winter

BY CHRIS RUNNELLS AND BRIAN MAZZEI
Bucknellian Staff Writers

SNOW WHAT

A New Semi-Monthly Column for the Winter Sport Enthusiast

As we sit here on a chilly November afternoon, with a slight drizzle tapping at our window, we think "only a couple of degrees." If it were only 10 degrees colder it would be snowing. The old ski bum comparison of one inch of rain is equal to six inches of snow rushes through our minds repeatedly.

We had a little taste of the opiate of skiers this weekend. The first snow fall is always the most special. It never accumulates or even sticks for very long but it is still a reminder of the months to come where the ground will be white and so will our smiles as we enjoy the ecstasy of snow sporting.

There have been many hints to lead one to believe that we are headed for a great winter. Have you noticed the particularly busy squirrels? They are more active this year than in years past, gathering their winter supplies.

As we were walking to the library to do work, a bothersome trifle in the winter months, we paused only to recognize a stillness in the air. This stillness reminded us of a similar stillness that accompanies a snowfall in the mountains when you find yourself deep in the woods skiing in waist-deep freshies (untracked powder). The night temperatures are dipping quite low and the morning air stings your groggy lungs, still warm from the stale dorm room air.

Our minds are teeming with anticipation, we have already made the plans and provisions for our first road trip. We have never been so prepared for anything in our lives. Some may find our adoration for skiing and snow-boarding, well, for lack of a better word, weird.

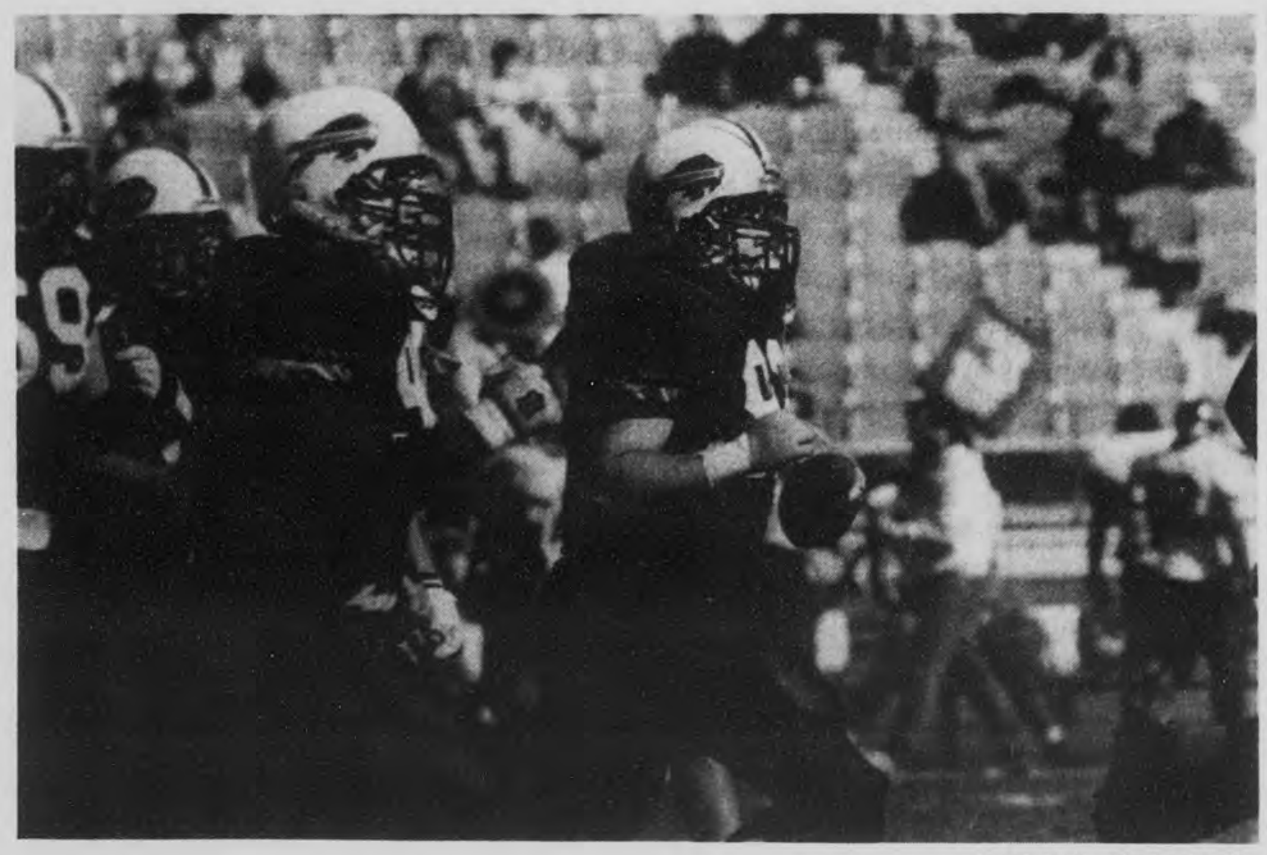
Our constant gabbing about the clouds and whether or not they are snow clouds, or our incessant reading of the same issue of *Skiing*, or *Snow Country* magazines has our friends wondering if we are sane. To dispel any questions, we are perfectly insane.

That first whiff of a wood burning stove will drive us or any of our kind to drooling. Do not be afraid.

This new column is our attempt to let the skier, snow boarder, and even those who fear the winter altogether, participate in our enjoyment of the small white crystals.

We will try to offer a little bit of the snow world to everybody. We will cover new equipment, different ski resorts, particularly satisfying road trips, and anything else that might be related to the best season of the year. By the time we start to hang up the sleds (skis) and put our sweaters on the top shelf you will have a working knowledge and lingo of the world of winter life.

So welcome to a new mindframe where you will voluntarily get up at five in the morning and drive with your hands frozen to the steering wheel to get the first tracks in a foot of new snow, where the last thing you are thinking about is that term paper which is due tomorrow.



Jonah Half—The Bucknellian

The Bison offense line will need to be consistent in the Patriot League title chase.

PREVIEW

From Page 11

Outside linebackers Dan Bengele and Jay Urban have also performed well, accumulating 75 and 67 tackles respectively, for the season.

Despite the fact that Bucknell has compiled an embarrassing 1-7-1 record in its last nine visits to Fisher Field, the Bison are poised to win their fourth straight game.

Linebacker Bart Griffith '97, a special teams stand out, knows that, "At this point, we control our own destiny. The Lehigh game is in the past, and each new game is the League Championship for us." Focused and poised, look for the Bison to keep rolling and come home for their final two games as the top dog in the Patriot League.

Blowing Smoke?

The new "Snorting Bison" (right) has added some flavor to Bucknell home games. Constructed by the parents of Michael Haggerty '97, the Bison blows smoke through its nose each time Bucknell scores. The Bison will be back in action at home on Nov. 16 against Fordham.

Cross country battles Cadets

Men and women challenge top ranked Army, finish second

BY CHRIS ELLIS

Bucknellian Staff Writer

Cara Mickelsen—The Bucknellian

Pamela Richardson '99 (center) was 12th at Patriot Leagues, behind teammates Julie Sweitzer '99 (4th) and Annie Hamlin '99 (10th).

Both of Bucknell's cross-country teams went into last weekend's Patriot League championships as underdogs against nationally ranked teams from Army. And although the Bison ran their best meets of the season in the Championships, they still had to settle for a pair of second-place finishes.

Bucknell's men twice rallied from seemingly insurmountable deficits, but in the end, Army's raw talent was simply too much, as Cadet runners earned the top three positions in the race and cruised to a 21-52 win over the Bison. Bucknell's finish was considerably better than last year's, when the Bison failed to place a runner in the top five.

"Last year, we just sort of rolled over and played dead against Army," Head Coach Art Gulden said. "I think that they were expecting us to do that again. We made them work for it this year."

Matt Kodak '99 led the Bucknell contingent, finishing fourth overall with a time of 25:31, 30 seconds behind Army's Dan Browne. Wally Dietrich '99 finished one second behind Kodak in fifth place. Bob Chandler '97 (12th), Dave Granger '97 (14th), Jason Trollope '99 (18th) and Chris Kearney '99 (19th) also posted impressive finishes for the Bison.

"As a team, we ran just about as well as we could," Gulden said. "The progress we've made from the beginning of the year to this point is just extraordinary."

The women's team faced a similar uphill battle against Army, running close for most of the race but ultimately bowing to a 38-55 defeat. The Bison did, however, hold off rival Lafayette (65 points) for second place.

"This race was very competitive right to the end," Gulden said. "Just a few seconds separated the top runners from all teams."

Army's Jessica Jones won the 3.1-mile individual race with a time of 18:17. Bucknell was the race's most consistent team, however, placing all of its top seven runners in the overall top 20. Julie Sweitzer '99 (18:32) finished fourth to pace Bucknell. Sweitzer was followed by Annie Hamlin '99 (10th) and Pamela Richardson '99 (12th).

Both teams have an off week before regular-season ending regional meets. The men, considered a reasonable longshot to qualify for the National Championship meet, will run at the IC4A championships, and the women will race at the ECAC championships.

SPORTS

Tennis bids farewell to a gentleman and a champion

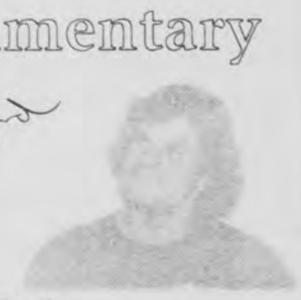
Two days ago in Stockholm, Sweden, tennis great Stefan Edberg took the court one last time, ending a brilliant career that will be remembered as much for the grace of Edberg's character as it will be for the grace of his elegant serve-and-volley game.

At the age of 30, the gentlemanly Swede has decided to call quits to one of the most remarkable careers in tennis history, a career that includes 41 titles, six grand slam titles, and an iron-man streak of 54 consecutive grand slams that dates back 14 years. Edberg first burst on the tennis scene in 1983, as the then 17 year-old became the first and only junior ever to capture the tennis grand slam (winning all four major tournaments in the same calendar year).

This came only as a precursor to a brilliant career, as Edberg went on to win the Australian Open two years later, and then completed a lifelong dream by defeating his greatest rival, Boris Becker, for the Wimbledon title in 1988. He later added another Australian Open and Wimbledon, and finished the run with his last major championship in 1992, the U.S. Open. In addition, Edberg also holds a modern-day record for men with ten straight years ranked in the top ten.

Commentary

E.J. Crawford



E.J. Crawford
Sports Co-Editor

Edberg's rise to prominence is an unlikely one, as he is the only successful Swedish serve-and-volley player, as most young Swede's, such as Mats Wilander, were brought up idolizing the patience and precision of Bjorn Borg's steady baseline game. But Edberg showed a precision all his own, using his big kick serve and unrelenting attacking game to etch his name in tennis history as, along with John McEnroe and few others, one of the greatest serve-and-volleyer of all time. He is now, sadly, most likely the last true volleyer in a game now dominated by big serves and punishing forehands.

However, although Edberg may be remembered for his grand slam victories and deadly backhand volley, his greatest trademark will always be his sportsmanship and gentlemanly spirit. Edberg first emerged soon after the Ille Nastase era and during the peak years of bad boys John McEnroe and Jimmy Connors. For many, his quiet demeanor and effortless game were a welcome change to the screaming and tantrums of the two aforementioned stars. The former number one player in the world seldom questioned a line call, beamed at noisy spectators, or yelled in anger, and he would sooner walk off the court than throw his racket. In victory he was always gracious, never celebrating wildly and always congratulating his opponent on his play. In defeat, the Swede never made excuses for losses and was always the first to cross the net and shake the winner's hand.

Personally, I will never forget his loss to Michael Chang in the 1989 French Open final, the only grand slam that Edberg never won. Edberg had complete control of the match before fading down the stretch and losing a tight five-setter to the young American. Edberg never spoke of his mistakes, but with his typical class and dignity commended Chang for his gritty play and hard-fought win. It was typical Edberg, gracious like no other in the face of probably the most devastating loss of his career. It is this class and dignity that prompted the ATP Tour to rename its sportsmanship award, which Edberg has won more than any other player, in his honor; a decision which seems only fitting.

Although Edberg has had a recent resurgence that again boosted him into the top 20, he contests that this is the end of his career. He knows he is no longer a constant force at grand slams, and doesn't want to hang on too long. So yesterday, after falling to countryman Nicholas Kulti, Edberg was given a hero's farewell, full of the fanfare and adulation that Edberg had avoided all his career. He was given thirty roses, and tears could be seen forming in his eyes as he sat awkwardly on a throne. And once all the fanfare was over, he once more flashed a smile and waved thankfully to the crowd, leaving just as he entered, a sportsman and gentleman.

Volleyball looks to clinch second seed

A win over Holy Cross will guarantee second place

BY JACOB LIPMAN
Bucknellian Staff Writer

For the second time this season the Bucknell women's volleyball team topped Rider.

The win was only the sixth road win for the team this season. The Bison now have an overall record of 16-11. Bucknell is currently tied with Navy for second place in the Patriot League, with a record of 3-2.

Tuesday evening, the Bison traveled to Rider. Despite Rider's 7-0 record in Northeast Conference play, the Bison handled the Broncs without too many difficulties. The team had a shaky start but rallied to win the match by a 15-17, 15-9, 15-3, 15-9 score.

Bucknell has a 6-11 record on the road this season.

The Bison offense was led by Melissa Wharton '98, who had 14 kills. Tristen Voget '99 and Susie Teitsworth '97 were also key contributors to the offense with 12 and nine kills respectively.

Wharton, who is among the nation's leaders in total blocks, finished with five solo blocks and four block assists. Emily Pomeroy '99 and Michelle Lesh '00 contributed 4 block assists apiece.

Defensively, the Bison had a strong game. Teitsworth led the team with 17 digs, while defensive specialist Allison Morris '97 finished with 10 digs.

A good sign for the Bison was the team's improved serving. Bucknell has been struggling in this department for a good portion of the season. However, in this match the team had eight service aces as compared to only eight service errors. Pomeroy had five of those aces and Teitsworth had two aces as well.

This Saturday, Bucknell will play their final regular season matches, both of which are at home. The Bison will face Holy Cross, the Patriot League doormat, at 11 a.m. in Davis Gym.

The Crusaders are winless so far this season, with an overall record of 0-21, including 0-5 in the Patriot League. With a win against Holy Cross, Bucknell would clinch a second place finish in the Patriot League.

The second match for Bucknell will feature Ivy League opponent, Columbia University. This match will take place at 3 p.m., Saturday in Davis Gym.

Jonah Half—The Bucknellian

Emily Pomeroy '99 and the Bison blocked Rider's attempt to avenge an earlier loss to Bucknell.

SAE takes early lead in Pangburn race

BY E.J. CRAWFORD
Bucknellian Staff Writer

After the fall intramural season, SAE fraternity holds a fairly sizable lead in the Pangburn Trophy standings, but it was Lambda Chi that emerged with the title in this season's biggest event, soccer.

SAE's A team won the regular season title in A league soccer with an 8-1-1 record, followed by Lambda Chi, TKE, and Lettuce United (an independent and largely freshman squad) and DU filling out the top 5 spots, all of which are awarded playoff berths. The final three berths were awarded to SAE B (7-3) and Phi Psi (6-2-2), who tied for first in the B league, and the lone C team, Unattached (another independent team that finished 2-8 competing in a B league schedule).

The playoffs opened with SAE A blowing out Unattached 6-0, and Lambda Chi overcoming a slow start to defeat Phi Psi 6-2. In the other games, TKE fought off the resilient SAE B team to win 3-1, and DU avenged a regular season loss to defeat Lettuce United 1-0.

The second round opened with a thrilling game between SAE A and DU, as they fought to a scoreless tie through regulation and two overtimes. The game then went to a shoot out, which was won by DU 5-4 on the last kick of the game.

The other playoff game between Lambda Chi and TKE could not have been more different, as seven goals were scored in a 4-3 Lambda Chi victory.

In the finals, DU jumped out to an early 1-0 lead, and held on for that lead at halftime. But after halftime Lambda Chi turned it up, scoring two goals to win the championship.

In other events, Mike Keeley '98 of Lambda Chi took the Ultimate Warrior title, consisting of push-ups, sit-ups, pull-ups, as well as bike race, 18-mile swim, and a six-mile run.

In ping-pong, the SAE 2 team took first place, followed by Fellowship of Christian Athletes, SAE 1 and C.A.L.V.I.N. & H.O.B.B.E.S.

FCA posted their strongest showing in the obstacle course, taking the top three spots, while SAE finished fourth.

PANGBURN POINT TOTALS FOR FALL 1996

1. Sigma Alpha Epsilon	*231.5*
2. Lambda Chi Alpha	*193*
3. Fellowship of Christian Athletes	*131*
4. Tau Kappa Epsilon	*70*
5. Delta Upsilon	*58*

Men's tennis finishes fall schedule league event

BY JARED SILLIKER
Bucknellian Staff Writer

Trudging through the slower fall off-season, the Bucknell men's tennis team competed in the 1996 Patriot League men's individual tournament this past weekend. In this format each team can enter up to eight singles players in eight brackets (one for each position) and up to four doubles teams in four brackets. First round losers are entered into a consolation round, and there is no team scoring.

In the No. 1 singles bracket, Bucknell's T.K. Kelly '00 earned a 6-3, 6-2 victory over Lehigh's Scott Ackerman, before losing in three sets, 6-3, ,4-6, 6-3, to Army's Rick Michalski, the eventual winner.

"T.K. played extremely well against Ackerman," Head Coach Bob Hammerlee said. "And he really took Michalski to the limit, even with Michalski having a first-round bye."

At No. 2 singles, Bison senior Josh Plumb experienced a fate similar to Kelly. Plumb took out Holy Cross' Jeremy Ericson, 6-2, 6-2, in the first round and fell to No. 2 seed, Navy's Mitch Koch, 6-4, 6-2.

"I felt Josh had a great opportunity playing a top player like Koch, and I wanted him to just go out and have fun with nothing to lose," Hammerlee said. "Josh did

THE BUCKNELLIAN

Capital Campaign kicks off with dinner-dance

Comparative financial aid budgets, 1994-95

Institution	Financial aid per student	Financial aid budget	# of aided students
Colgate	$ 13,093	$ 14,219,445	1,086
Layfayette	$ 11,180	$ 10,174,194	910
Cornell	$ 11,048	$ 37,001,000	3,349
Lehigh	$ 10,959	$ 23,507,101	2,145
Duke	$ 10,615	$ 22,206,136	2,092
Bucknell	$ 10,457	$ 11,575,410	1,107
Richmond	$ 8,113	$ 9,481,617	1,213

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Saturday evening marks the official kickoff of The Bucknell Campaign: Preparing for the Next Century with a dinner-dance for trustees, alumni, and friends of the University.

This capital campaign has been in the planning and fundraising stages for the past few years and will be announced officially at a dinner-dance in the University Fieldhouse.

The total goal of the campaign is to raise $150 million in gifts and pledges by December 31, 2000. There is a five-year pledge period during which donors can make good on their pledges.

The three major areas that the Bucknell Campaign is planning to fundraise for are the endowment, construction of new facilities and increasing annual gifts.

Ninety-four million dollars of this total will go toward the endowment. Of this $94 million, $60 million will be earmarked for financial aid and the remaining $34 million will go towards Strategic Academic Initiatives including endowed chairs and undergraduate research.

"The endowment provides us with a terribly important source of revenue which we use to buttress the programs and which means that we have a source of revenue which doesn't come from tuition," said President William D. Adams.

The Campaign is seeking to raise $30 million for the construction and renovation of campus facilities. A new psychology and geology building, an art building, a music building, renovations to the Davis Gymnasium and the construction of a natatorium are in the planning stages.

The Campaign is also seeking to raise $26 million toward annual gifts.

According to The Bucknell Campaign, a recently published case statement: "If we are to compete successfully with other prominent schools, we must significantly increase the size and 'spending power' of Bucknell's endowment. The Bucknell Campaign is centrally focused on this financial imperative: to increase the endowment through substantial gifts and close the 'endowment

See CAMPAIGN, page 2

Cara Mickelsen—The Bucknellian

President Adams said that part of the money generated by the Capital Campaign will give the University a source of revenue outside tuition.

Suspicious incidents on campus lead to concern

Lewisburg police and Public Safety are investigating incidents

BY ERIC BLOEM
Bucknellian Staff Writer

The Lewisburg Police Department and Bucknell Public Safety are currently performing an investigation to determine the cause of three similar incidents that have occurred in the past two weeks.

The most recent incident occurred on Thursday, Oct. 31. It was reported to Public Safety that a truck on University Ave. had a rag placed into its gas tank.

This event follows two similar incidents the week before.

On Sunday, Oct. 20, at 3:20 am Public Safety was dispatched to the lower Harris parking lot to investigate a car fire. An individual apparently placed a rag into the gas tank of junior Julie Barbone's 1986 Saab 900 and set it on fire. Public Safety requested the assistance of the William Cameron Fire Company, but the fire was quickly put out with a fire- extinguisher before the gas tank ignited.

An almost identical incident occurred one week later on Sunday, October 27. Public Safety responded to a report of a car fire at 3:26am in the Gateway parking lot. As in the previous week, the fire was caused by a burning rag, placed within the vehicle's gas tank. The fire department was called and extinguished the flames before the rest of the vehicle was set ablaze.

The Lewisburg Police Department is currently attempting to determine who is responsible for these incidents. They believe that both fires are related. Although the Lewisburg Chief of Police was unable to be reached, Patrolman Bob Rowe of the Lewisburg Police Department said, "We are trying to investigate, but we don't have a lot to go on."

Currently there are no leads in the case, making it impossible to determine if a town resident or a Bucknell student committed the crimes. Rowe said that Lewisburg Police "do not have any idea who could be doing this."

Vincent DeCerchio, Director of Public Safety was unable to be reached for comment on the incidents.

See pages 2 and 4 for more endowment information.

Student hot tub falls to Office of Res Life

BY BETH MARTIN
Bucknellian Staff Writer

Five residents of Mod 2 in Bucknell West spent Monday and Tuesday dismantling a hot tub they had built themselves within their deck, complying with orders from housing and residential life

The hot tub, constructed by Lawrence "Hutch" Douglas GR, Neil Kiss '99, Daryl Klein '99, David Kline '99, and Eric Sweet '99, took approximately two months to plan for and build, and cost them about $100 each. The eight x six x four foot hot tub frame could hold about 800 gallons of water.

A team of physical plant and housing and residential life employees discovered the hot tub during the routine Fall Break room inspections.

Nicole Loyd, of housing and residential life, said that the office who's "main goal is to protect the students," followed the advice of Jim McCormick, director of safety, who had deemed the hot tub unsafe. She also said that the hot tub was a violation of state authority and local codes.

If the hot tub had not been dismantled by Nov. 11 the residents could have faced charges of failure to comply and risked the possibility of fines.

Douglas said, "The threatened punishment was way out of whack."

McCormick called the hot tub an "unacceptable risk, which posed many serious health and safety concerns. By targeting these five people, the whole school will benefit." He asked "Why should you come to Bucknell to die in a hot tub?"

Klein said that he and his modmates consulted the Student handbook and saw no rules against building a hot tub. They also contacted a physical plant employee, and learned that a hot tub did not violate the "university's rules of carpentry."

New natatorium planned

Freas-Rooke Pool to be replaced as part of Capital Campaign

BY E.J. CRAWFORD
Bucknellian Staff Writer

This weekend the University will kickoff its Capital Campaign, a fund-raiser aimed at accumulating $150 million towards the endowment and improving upon the University's facilities. One of the major aims of the campaign is to raise $10 million towards a new Natatorium Complex, as well as numerous renovations to the Davis Gymnasium.

The new natatorium would include a 51 meter by 25 yard pool with an adjustable bulkhead, as well as a large bleacher area for spectators that would overlook the pool. Included in the proposed renovations are a lobby and numerous larger locker sections for both men and women on the lower level, with a student health and fitness facility on the upper level.

In addition to the natatorium, the weight room will be upgraded, and the athletic offices, which are now spread out throughout Davis Gym, would be moved to a more concentrated area, most likely on the second level in the Davis Gym annex. The new offices would be more spacious. Also proposed is more seating for basketball games.

CAMPAIGN

From page 1

gap' that threatens our ability to compete effectively."

"Endowment is really a measure of financial strength," Adams said.

Some of the University's frame of reference schools, Swarthmore, Williams and Amherst, have large endowment per student ratios in the $200— $300,000 range, according to Adams. Bucknell's endowment per student ratio in 1994-95 figures was $46,968.

The University ranked at the bottom of its competitive set for endowment-per-student, according to the National Association of College and University Business Officers for 1994-95.

Middlebury was at the top of the list with a comparative per-student ratio of $176,188 for 1994-5, while Lehigh was second to the bottom, only above Bucknell with $66,834.

The structure of the campaign centers around a series of publications, reports and a 14 minute campaign video which will be distributed to various constituencies, including alumni and primary friends of the University.

The publications began with a pre-campaign piece entitled, A Report From President William D. Adams, and will be followed by what Adams referred to as the case statement. The case statement is "basically the logic of the campaign," Adams said.

The case statement will be followed by a number of other publications, one of which will be a shorter version of the case statement, Adams said. There will also be more narrowly focused pieces highlighting some of the campaign goals.

Another source of communication will be a quarterly campaign newsletter.

There will also be regional campaigns in approximately 18 regions across the United States. The regional campaign committees are comprised of volunteers from the University Relations office.

The first phase of the campaign involves about eight of the 18 regions.

According to Adams, these volunteers will get together to rustle up supporters and donors in those regions.

The Bucknellians in those regions will do research, including gathering information about supporters and scheduling events with the intention of creating enthusiasm and excitement about the campaign.

The second and third phases of the campaign will begin later, after volunteers in those regions have been officially identified.

PUBLIC SAFETY LOG

November 7, 1996

INFORMATION/STREAKING ON CAMPUS — A Public Safety Officer responded to an incident of nude University students running in the vicinity of Dana Engineering and Olin Science buildings and the Bertrand Library. One male was apprehended.

INFORMATION/REPORTED DISTURBANCE — A Public Safety Officer responded to Sigma Chi Fraternity for a disturbance among several University students. The individuals involved reported that no problem existed, and the incident is considered unfounded.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm activation at Gateway Malesardi and found that unknown person(s) activated an alarm pull station in third floor hallway. The investigation is continuing.

INFORMATION/MINOR VEHICLE ACCIDENT — A minor vehicle accident occurred in the Public Safety Parking lot involving an undamaged University vehicle and a University student vehicle that sustained minor damage.

November 8, 1996

THEFT — A University student reported to Public Safety Officer the theft of a metal bar from a bicycle rack which was on top of his vehicle. The investigation is continuing.

INSTITUTIONAL VANDALISM — A University employee reported to Public Safety Officer that unknown person(s) wrote in chalk on Marts Hall exterior door. The investigation is continuing.

November 9, 1996

INSTITUTIONAL VANDALISM — A University student reported to Public Safety Officer the three unknown males were observed breaking a window in Vedder Hall. The males fled and an investigation of the area met with negative results. The investigation is continuing.

UNDERAGE CONSUMPTION/MEDICAL REPORT— A Public Safety Officer responded to Swartz Hall for an ill student. It was determined that the student had been drinking and was placed in care of a friend.

NON EMERGENCY MEDICAL TRANSPORT — A Public Safety Officer dispatched a Student Health Service Driver to transport a University student to Evangelical Hospital for treatment of an arm injury.

November 10, 1996

INFORMATION/ALTERCATION — A Public Safety Officer responded to Larison Hall for the report of a fight. The actors refused medical treatment and declined pressing charges.

INFORMATION/ALTERCATION — A Public Safety Officer responded to Kappa Sigma Fraternity for the report of a University student who had been asked to leave the house. The investigation is continuing.

ASSAULT — A Public Safety Officer responded to Kappa Sigma Fraternity for the report of an assault. Lewisburg Police responded and charges are pending. The investigation is continuing.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm at Delta Upsilon Fraternity. A pull station had been activated and the investigation is continuing.

CRIMINAL MISCHIEF — A Public Safety Officer responded to the Lower Harris Parking lot for damage to a parked car. The investigation is continuing.

INFORMATION — A Public Safety Officer responded to Gateway Kalman Posner for an unidentified male who opened a student's room door. The male could not be located but the investigation is continuing.

INFORMATION/VEHICLE DAMAGE — A University student reported that her car was damaged while parked on Coleman Road. The investigation is continuing.

November 11, 1996

LARCENY — A Public Safety Officer responded to Mod 14 for the report of a theft of a bicycle which had been locked to the side of the building. The investigation is continuing.

MEDICAL ASSIST — A Public Safety Officer transported a University student with a shoulder injury from Tustin Gym to Student Health Service for treatment.

November 12, 1996

INFORMATION — A Public Safety Officer responded to Roberts Hall for the report of an unauthorized male using a copy machine. The male could not be located but the investigation is continuing.

LARCENY — A Public Safety Officer responded to Larison Cottage for the report of a locked bicycle being removed from the bike rack. The investigation is continuing.

HARASSMENT — A University student reported to a Public Safety Officer that two unauthorized juveniles had been present at Sigma Chi Fraternity and had placed a harassing phone call to a University student at the fraternity. The juveniles were not located and the investigation is continuing.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

BSG CANDIDATE SPECIAL

President

Beetna Kim—The Bucknellian

Tracy Gray is running unopposed for BSG President.

Candidate:
Tracy Allen Gray '99
Major:
Business and
Political Science

Experience: Current Vice President of Finance for BSG, chairman of appropriations committee, Vice President of Finance for Bucknell Activities Council, member of planning and budget committee for the University, Building on Foundations (BOF) coordinator, vice president of class freshman year, Alpha Phi Omega freshman year, work as student office manager in the office of student activities, chief executive officer of MG 101 company

Goals: Gray wants to improve student/faculty relations, make the structure of BSG more efficient while still keeping its size, and establish more continuity between classes and BSG.

He hopes to make student/faculty luncheons open to entire campus, structure intramural sports programs with faculty and students, investigate more committees such as the constitutional committee, and increase contact between the Public Relations committee and BSG.

He also wants the executive officers to work with class officers

"My experience, understanding and direction of BSG would be a great asset to the organization in its purpose to accomplish its goals," Gray said.

VP of Administration

Beetna Kim—The Bucknellian

Heather Murphy is running unopposed for VP of Administration.

Candidate:
Heather Murphy '98
Major:
Management

Experience: BSG congress member for one and one-half years, chair of public affairs committee, secretary/treasurer of class of '98, member of planning and budget committee, committee of complementary activities

Goals: Murphy wants to increase communication between the members of BSG the student body, the faculty and between community and the University.

"The relationship established between the community and Bucknell is really important," Murphy said.

Murphy expressed concerns about student apathy. She also sees part of her job as improving the election process, and making new member orientation an ongoing learning process, not just a one day affair.

"If elected, I would make this position one of my first priorities," said Murphy. "Being a member of BSG for a year and a half, I've seen the executive processes go through and I want to be a part of it."

VP of Finance

Cara Mickelsen—The Bucknellian

Candidate: Steven Greenwood '99
Major: Business

Experience: Chief executive officer of MG 101 company, summer internship with Suffolk Country Planning Commission, Long Island, NY, member of Bucknell Business Leaders, Alpha Lamda Delta, Phi Eta Sigma

Goals: "I think BSG need to publicize itself more. Students don't really see what's going on." He plans on starting a task force of students to get their input on where funding should go instead of just BSG members. "I'm a hard worker. I really care about what I do," said Greenwood. This position "would be my number one priority after schoolwork."

Cara Mickelsen—The Bucknellian

Candidate: Justin Jarkowski '99
Major: Economics

Experience: BSG Congress member, member of appropriations committee, freshman hall representative, president of honor society in high school, member of multicultural committee

Goals: Jarkowski wants to increase understanding of how the appropriations committee works to members of the campus community. He also plans to increase the time per week the committee meets so that they will not fall behind in their job.

"I'm extremely interested in this position. I'll bring my heart into it, and I'll give it all that I have," he said.

Candidate: Michelle Mcallister '99
Major: Management

Experience: Vice President of class freshman and sophomore year, attended leadership camps and conferences, BSG Congress member, Alpha Phi Omega, coxswain for crew team freshman year

Goals: Mcallister wants to receive input from the entire campus in BSG to obtain ideas for improvement and to communicate more efficiently with the student body. "A leader is someone who takes the ideas that are brought to them and makes those ideas become reality. I feel that I can do this," Mcallister said. "I put one hundred percent into everything I do."

Cara Mickelsen—The Bucknellian

Steven Greenwood (top), Justin Jarkowski (middle), and Michelle Mcalister (above) are all running for VP of Finance

VP of Operations

Candidate:
Christine Boschen '99
Major:
Political Science

Experience: BSG congress member freshman and sophomore year, University library committee, committee on instruction (COI), fiscal affairs committee, Building on Foundations (BOF) participant, emerging leaders program, Alpha Phi Omega freshman year, sesquicentennial ball committee

Goals: Boschen wants to spread awareness of executive board positions in BSG and get more students involved, as well as, recognize more organizations and clubs as part of the University. "I'd be dedicated to the job, and I'm willing to put in the hours," Boschen. "I'm willing to help Bucknell students become more successful."

Beetna Kim—The Bucknellian

Christine Boshen is running for VP of Operations

Beetna Kim—The Bucknellian

Mathew Bauer is running for Vice President of Operations

Candidate:
Matthew Bauer '99
Major:
English, minor
legal studies

Experience: BSG congress member, member of academic affairs committee, curriculum committee, ultimate frisbee team, works in office of student activities, high school student government

Goals: Bauer wants to consult more students when deciding about recognizing clubs.

He wants to form an adhoc committee of congress members to help him make decisions and give him new ideas.

"I'm ambitious. I'd really like to tackle this job," Bauer said. "I can be depended on."

Compiled and transcribed by Tracy Thiffault

CAMPAIGN

From page 1

gap' that threatens our ability to compete effectively."

"Endowment is really a measure of financial strength," Adams said.

Some of the University's frame of reference schools, Swarthmore, Williams and Amherst, have large endowment per student ratios in the $200— $300,000 range, according to Adams. Bucknell's endowment per student ratio in 1994-95 figures was $46,968.

The University ranked at the bottom of its competitive set for endowment-per-student, according to the National Association of College and University Business Officers for 1994-95.

Middlebury was at the top of the list with a comparative per-student ratio of $176,188 for 1994-5, while Lehigh was second to the bottom, only above Bucknell with $66,834.

The structure of the campaign centers around a series of publications, reports and a 14 minute campaign video which will be distributed to various constituencies, including alumni and primary friends of the University.

The publications began with a pre-campaign piece entitled, A Report From President William D. Adams, and will be followed by what Adams referred to as the case statement. The case statement is "basically the logic of the campaign," Adams said.

The case statement will be followed by a number of other publications, one of which will be a shorter version of the case statement, Adams said. There will also be more narrowly focused pieces highlighting some of the campaign goals.

Another source of communication will be a quarterly campaign newsletter.

There will also be regional campaigns in approximately 18 regions across the United States. The regional campaign committees are comprised of volunteers from the University Relations office.

The first phase of the campaign involves about eight of the 18 regions.

According to Adams, these volunteers will get together to rustle up supporters and donors in those regions.

The Bucknellians in those regions will do research, including gathering information about supporters and scheduling events with the intention of creating enthusiasm and excitement about the campaign.

The second and third phases of the campaign will begin later, after volunteers in those regions have been officially identified.

> ***"The endowment provides us with a terribly important source of revenue which we use to buttress the programs and which means that we have a source of revenue which doesn't come from tuition."***
>
> *—President William D. Adams*

PUBLIC SAFETY LOG

November 7, 1996

INFORMATION/STREAKING ON CAMPUS — A Public Safety Officer responded to an incident of nude University students running in the vicinity of Dana Engineering and Olin Science buildings and the Bertrand Library. One male was apprehended.

INFORMATION/REPORTED DISTURBANCE — A Public Safety Officer responded to Sigma Chi Fraternity for a disturbance among several University students. The individuals involved reported that no problem existed, and the incident is considered unfounded.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm activation at Gateway Malesardi and found that unknown person(s) activated an alarm pull station in third floor hallway. The investigation is continuing.

INFORMATION/MINOR VEHICLE ACCIDENT — A minor vehicle accident occurred in the Public Safety Parking lot involving an undamaged University vehicle and a University student vehicle that sustained minor damage.

November 8, 1996

THEFT — A University student reported to Public Safety Officer the theft of a metal bar from a bicycle rack which was on top of his vehicle. The investigation is continuing.

INSTITUTIONAL VANDALISM — A University employee reported to Public Safety Officer that unknown person(s) wrote in chalk on Marts Hall exterior door. The investigation is continuing.

November 9, 1996

INSTITUTIONAL VANDALISM — A University student reported to Public Safety Officer the three unknown males were observed breaking a window in Vedder Hall. The males fled and an investigation of the area met with negative results. The investigation is continuing.

UNDERAGE CONSUMPTION/MEDICAL REPORT— A Public Safety Officer responded to Swartz Hall for an ill student. It was determined that the student had been drinking and was placed in care of a friend.

NON EMERGENCY MEDICAL TRANSPORT — A Public Safety Officer dispatched a Student Health Service Driver to transport a University student to Evangelical Hospital for treatment of an arm injury.

November 10, 1996

INFORMATION/ALTERCATION — A Public Safety Officer responded to Larison Hall for the report of a fight. The actors refused medical treatment and declined pressing charges.

INFORMATION/ALTERCATION — A Public Safety Officer responded to Kappa Sigma Fraternity for the report of a University student who had been asked to leave the house. The investigation is continuing.

ASSAULT — A Public Safety Officer responded to Kappa Sigma Fraternity for the report of an assault. Lewisburg Police responded and charges are pending. The investigation is continuing.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm at Delta Upsilon Fraternity. A pull station had been activated and the investigation is continuing.

CRIMINAL MISCHIEF — A Public Safety Officer responded to the Lower Harris Parking lot for damage to a parked car. The investigation is continuing.

INFORMATION — A Public Safety Officer responded to Gateway Kalman Posner for an unidentified male who opened a student's room door. The male could not be located but the investigation is continuing.

INFORMATION/VEHICLE DAMAGE — A University student reported that her car was damaged while parked on Coleman Road. The investigation is continuing.

November 11, 1996

LARCENY — A Public Safety Officer responded to Mod 14 for the report of a theft of a bicycle which had been locked to the side of the building. The investigation is continuing.

MEDICAL ASSIST — A Public Safety Officer transported a University student with a shoulder injury from Tustin Gym to Student Health Service for treatment.

November 12, 1996

INFORMATION — A Public Safety Officer responded to Roberts Hall for the report of an unauthorized male using a copy machine. The male could not be located but the investigation is continuing.

LARCENY — A Public Safety Officer responded to Larison Cottage for the report of a locked bicycle being removed from the bike rack. The investigation is continuing.

HARASSMENT — A University student reported to a Public Safety Officer that two unauthorized juveniles had been present at Sigma Chi Fraternity and had placed a harassing phone call to a University student at the fraternity. The juveniles were not located and the investigation is continuing.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Luigi Fiji postponed under hazing charges

Luigi Fiji, Phi Gamma Delta's popular philanthropy dinner presented by the Fraternity every semester, has been postponed because of hazing allegations raised against the chapter.

The activities and operations of the Delta Chapter of Phi Gamma Delta Fraternity have been suspended in accordance with the Student Judicial System and Code of Conduct as a consequence of the chapter's alleged involvement in a hazing incident, on Nov. 7.

The suspension will remain in effect until the matter is resolved. Representatives of the national organization are conducting an investigation while the University's investigation is continuing.

The fraternity will be allowed to remain open as a student residence.

Fraternity president, John Kagan '97, stated only that the hearing for the issue will be held next Thursday. Until that time he has no further comment.

Myra Legg, acting director of Greek Affairs, was unable to comment because the situation is currently under investigation.

Community Judicial Board Results

While under the influence of alcohol an underaged first-year male activated the fire alarm cover of a unit in Smith Hall. The student ran from Smith Hall and was pursued by University employees who ordered him to stop. The student was detained on the soccer field by Public Safety.

The student stated that he was not responsible for the charges of Failure to Comply or Tampering with Fire Safety Equipment. The Community Judicial Board Panel found him responsible on all counts and placed him on Disciplinary Probation through June 1, 1997. He is also required to pay a $500 fine.

On March 5, 1996 the Off Campus Living Review Board denied a sophomore male the privilege of living off-campus for the 1996-1997 academic year. In September it was discovered that the student was living on Sixth Street in Lewisburg.

The student acknowledged responsibility for the charges and was placed on disciplinary probation though June 1, 1997, required to move into a University residence hall, and will not be eligible for living off-campus during the 1997-1998 academic year.

While exiting the men's room in the Bison during a comedy performance, a student pulled down the shorts of another junior male. The junior male subsequently faced the crowd from the front of the stage, giving the crowd a full frontal flash of his genitals. He was escorted from the event by the Director of Student Activities. Later that night he was found in possession of an open container of beer in a Bucknell West residence.

The student was found responsible by the Community Judicial Board and was suspended from the University for one semester. The suspension was remitted provided that he is not found responsible for any violation of the Student Code of Conduct through June 1, 1997. If he is found responsible for any violations, suspension will begin immediately. The student is prohibited from participating in or attending any activity in the University Center through June 1, 1997. If he is scheduled to work in the Bison when an activity is scheduled he is required to switch his working hours.

BUILDING STRONGER COMMUNITIES ONE NEIGHBOR AT A TIME

Announcements

All residence halls will be closed from 10:00 AM on Wednesday, Nov 27 through Sunday, Dec 1 at 10:00 AM. If you are required to stay on campus for all or part of the Recess, you will be allowed to stay in your assigned room. However, the outside keyways of all residence halls, except Faculty Court and Bucknell West, will be changed. You must register with the Office of Housing and Residential Life by Monday, Nov 25 if you plan to stay and you may pick up an outside door key Nov 25 and 26 from the Office of Housing and Residential Life.

If you are a resident of Faculty Court and Bucknell West you must register to stay even though the keyways in those areas will not be changed.

Dr. Roy Baker has been appointed the new assistant dean of students. He will fill the position left open by Edward Dadez. His primary responsibility will be to oversee the Greek Life at the University. Baker comes to Bucknell from Rutgers University and will assume his new position on Monday.

Myra Legg, acting director of Greek Affairs, will be aiding Baker for the first few weeks of his appointment. She will then be working in the Registrar's office.

White officer acquitted in death of black motorist

PITTSBURGH — In a decision that has angered black activists, a white police officer, 40-year-old John Vojtas, was acquitted yesterday of involuntary manslaughter in the death of an African-American motorist who died during a scuffle with police after a traffic stop.

Gammage was pulled over by police on Oct. 12, 1995, while driving a Jaguar sedan owned by his cousin and business partner, professional football defensive lineman Ray Seals, who plays with the Pittsburgh Steelers.

Gammage emerged from the car carrying a cellular phone that police said they thought was a gun. While detained on the roadside, Gammage, 31, struggled with Vojtas and four other police officers. Prosecutors argued that Vojtas started the fight by hitting Gammage and then used excessive force while Gammage was on the pavement.

During the seven-day trial, the coroner testified that Gammage died of suffocation caused by pressure on his back and neck.

According to the officers' testimony at a coroner's inquest, Gammage was driving erratically. After one of the officers pulled him over, the officers said, Gammage became so violent they had to restrain him by holding him on the ground.

Vojtas, who could have gotten up to five years in prison, dropped his head and wept after the verdict. As he left the courthouse, he said: "Praise the Lord."

He said he hoped to return to police work. "I'm sorry that a tragic accident happened last year, or a little over a year ago. I know I'm going to learn from this accident. I hope to get trained better."

Chicago's Cardinal Bernardin reported near death

CHICAGO — Cardinal Joseph Bernardin, who has battled cancer for more than a year, was in grave condition yesterday, according to the Archdiocese of Chicago.

The 68-year-old prelate, senior cardinal in the church's U.S. hierarchy, was confined to bed at his home and has not appeared in public in recent days.

"The cardinal's condition is grave," said Mary McDonough, spokeswoman for the archdiocese. She said Bernardin received telephone calls from both President Bill Clinton and Pope John Paul.

The Pope called at mid-afternoon and "gave the cardinal his blessing. He thanked him for all that he had done for the Archdiocese of Chicago and for the universal church," the spokeswoman said.

In June 1995 Bernardin was found to be suffering from pancreatic cancer, a particularly deadly form of the disease, and underwent surgery. Last August 30 he announced the disease had spread to his liver and was inoperable, giving him less than a year to live.

Bernardin is the longest-serving active U.S. cardinal, appointed by Pope John Paul in 1982 to head the 2.3 million-member Chicago archdiocese, the nation's second-largest after Los Angeles.

U.S. Defense Secretary orders wide sexual harassment review

WASHINGTON — Defense Secretary William Perry said yesterday he had ordered all branches of the military to hammer home the message of "zero tolerance" for harassment of women in uniform.

With the Army checking sexual harassment complaints from female trainees at bases across the country since it disclosed a scandal at a training facility in Maryland last week, Perry told reporters he had asked the military services "to make sure there is not some problem there that could cause the sort of issue ... that we saw in the Army."

Perry declined comment on the misconduct cases disclosed by the Army but said sexual harassment was not only wrong ethically and morally but inimical to military discipline and "proper respect in the chain of command."

The Army disclosed last week that a captain and two others who trained recruits faced charges including rape of female trainees at the Aberdeen Proving Ground in Maryland.

In Kansas City, Missouri, a drill sergeant was discharged and sentenced to prison yesterday after admitting to having sex with three female recruits.

A military judge at the Fort Leonard Wood Army base in Missouri handed a bad-conduct discharge to Staff Sgt. Loren Taylor, who was also sentenced to five months in confinement facility and was demoted in rank after he pleaded guilty to seven charges of misconduct. In exchange, prosecutors agreed to drop charges of obstruction of justice and perjury.

U.S. Energy Secretary latest to step down

WASHINGTON — Energy Secretary Hazel O'Leary, who drew criticism for her costly overseas travels, has submitted a letter of resignation that President Clinton will accept, the White House said yesterday.

"The president has, with great gratitude for her exemplary service at the Energy Department, indicated he would accept" O'Leary's resignation," White House spokesman Mike McCurry told reporters.

The Energy Department in a statement said O'Leary's resignation would be effective Jan. 20.

It said O'Leary met Clinton on Tuesday and submitted her resignation on yesterday.

McCurry said Clinton did not ask for her resignation.

O'Leary said early in her four-year tenure at the department that she did not anticipate staying on for a second term.

She drew fire earlier this year for making extensive, and some critics said extravagant, trips to promote U.S. energy enterprises overseas.

"Under Secretary O'Leary's leadership, the Clinton administration has addressed critical national issues and made clear progress for the American people," the Energy Department's statement said.

World News

First day of food summit highlighted by papal plea

ROME — As desperate refugees scrambled for food in Zaire, delegates from around the world convened yesterday at the five-day United Nations World Food Summit to address the problem of global hunger.

"It is my hope that this world food summit will provide the occasion for a new and general mobilization against hunger," U.N. Secretary General Boutros Boutros Ghali said.

Delegates listened to a stirring plea from Pope John Paul II, who warned that the co-existence of poverty with luxury cannot be tolerated by humanity.

"It is often difficult to immediately find solutions to improve such dramatic situations speedily," the pope said. "However, this is something we must seek together."

The pope called for a sharing of resources by countries blessed with abundant food supplies.

"I think the pope was on target—I think we have to move to close the gap between rich and poor, particularly with respect to self sufficiency and food," said U.S. Secretary of Agriculture Dan Glickman.

"But the problems are tricky and tough, and the main answer to this is to teach people how to feed themselves."

U.S. troops to assist with African relief force

WASHINGTON — The United States will participate in "a limited fashion" in a multinational force aimed at easing the humanitarian crisis in eastern Zaire, the White House announced yesterday.

Some 1,000 U.S. ground troops are to deployed to Zaire and several thousand others are to be sent to the region to supply support activities, White House press secretary Mike McCurry said.

But McCurry said President Clinton has several conditions he wants met before committing troops to the central African nation. "In principle, (Clinton) agrees U.S. participation is vital," McCurry said.

U.S. Defense Secretary William Perry said the U.S. is "anticipating about 1,000 troops in the Goma area, and the Goma airfield area". It also appears that a total of as many as 4,000 more U.S. troops will be moved to "neighboring countries" in support roles, according to spokesmen.

Fighting in eastern Zaire between Tutsi-dominated rebels and Zairian troops has displaced more than one million Rwandan and Burundian refugees and left them cut off from international assistance.

Refugee clashes threaten Bosnia peace accord

SARAJEVO, Bosnia-Herzegovina — The complicated task of returning refugees to their homes is threatening to unravel the agreement that has stabilized Bosnia for nearly a year.

Since the Dayton accords were signed last December, the process of repatriation has been slow, particularly for refugees whose houses happen to be on former battle lines.

They need special approval by an international commission to go home to what are now designated separation zones, patrolled by IFOR troops.

Some Muslim refugees have lost patience. "They jumped the gun and went back, with guns," IFOR spokesman Larry Jolidon said in reference to a group of Muslim refugees who lost patience with the bureaucratic procedures for reclaiming their homes.

The result: a gunfight Tuesday between Muslim refugees and Bosnian-Serb police. Two Bosnian Muslims were killed.

The tension escalated yesterday when hundreds of Bosnian Muslims gathered at a NATO checkpoint in the disputed area, threatening to use arms to reclaim their homes on the other side.

For now, the processing of applications for refugee returns has been suspended until weapons have been cleared from the zone.

In recent weeks Bosnian Serbs in the northeast part of the country have started a campaign of destroying homes in their neighborhoods that were once occupied by Bosnian Muslims.

Town takes 'sheepish' approach to speeders

CULEMBORG, The Netherlands — The Dutch town of Culemborg, near Utrecht, released its latest traffic control scheme on Monday in the shape of a small flock of sheep. The seven sheep will patrol a quiet suburban stretch of road, hopefully deterring drivers from speeding through the neighborhood.

If the pilot scheme is successful here, the town council will expand it to other, busier parts of the town.

Traffic speeding through town on the way to nearby Utrecht was such a headache for the council that speed limit signs, speed bumps and roundabouts were not resolving the problem. Henk-Jan Klievit, a member of the town council, came up with this innovative solution after a trip to India.

"I saw all the cows on the road there, getting along well with the people and the cars and I thought 'Why not in Holland,'" he said.

Klievit says that, in addition to cutting drivers' speeds, the sheep will keep the grass along roadside neat and tidy free of charge.

The project cost nearly 30,000 Dutch guilders (about $20,000). Cattle-grids to keep the sheep within a limited area are the biggest single cost for the project. Naturally, the price tag has upset some people in the town.

"It's a waste of money...I mean, my school has bigger problems," said one local resident.

But on the whole the people of Culemborg, not known for blindly following the flock, have taken to the idea.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

HOT TUB

From page 1

McCormick said there "was no need for a specific university rule" against hot tubs. In his eleven years as director of safety, "this is the first time a problem like this has come up."

In addition, McCormick said "They said they went through all the necessary channels to see if this was all right, but they didn't go through me. I would have told them instantly that they weren't allowed to build it."

Kline said that the residents of Mod #2 were "annoyed" by the fact that "nobody investigated the safety of the hot tub or asked us any questions about it." He said "They won't even cooperate with us. We'd absolutely have no problem meeting any health, safety, or efficiency standards to make it right."

Klein said "This tub was by far one of the safest ever built. Precautions were taken at every level from quick trip circuits to emergency shut off switches at an arm's length from the hot tub. The hot tub was chlorinated and algae-treated. Efficiency, too, was considered. Ironically, it took the same amount of energy to cook a large dinner as it did to heat the tub. This is just another example of Res Life using their authoritarian rule to get what they want without proper consideration or investigation."

> ***"The residents were expecting too much. Once you leave, you are more than welcome to have a hot tub. But, while attending Bucknell, keep it a dream."***
> *—Jim McCormick, director of safety*

McCormick, however, said that the hot tub was dangerous for several reasons. He pointed to "the balance of the water, bacteria and algae growth, and drowning" as the main safety hazards. Although he did also consider the dangers of drinking in a hot tub, this was not "the paramount reason" for his decision.

He said "Hot tubs are a nightmare to maintain. You won't see a hot tub in any Bucknell owned buildings. The residents were expecting too much. Once you leave, you are more than welcome to have a hot tub. But, while attending Bucknell, keep it a dream."

Klein said that building the hot tub "brought us mod-mates closer together, and gave us a sense of pride that we were able to construct something so awesome. In fact, I converted from a Bio/Chem major to chemical engineering, because of the project."

He said, "None of us will ever forget the first time we went in the hot tub. It was actually too hot in the hot tub. We were amazed that we had that power."

Kiss talked about "the fun factor." He said Mod #2 exceeded the school's fun factor, therefore they clamped down on it."

Although they only were able to use the hot tub for three weeks, the residents described it as a "blast."

Kline said "It was a chill thing. We all study hard and are athletic, and it gave us a chance to relax. A couple of times we had people over, but never any crazy parties."

Hutchinson said "While we did smoke some stogies in there a couple of times, we never drank in the hot tub. We realize that its unsafe because you might get dehydrated or pass out."

Sweet said that he is "fed up" living in a residence that is "insect infested, with cracked walls and ceilings" and nicknamed "the ghetto." The 26 year-old Bucknell West facility is the oldest, and they "pay the same amount as beautiful mods."

Kline also expressed frustration, "What's the big deal? It's not like we're burning candles, stealing cable, or putting up ceiling fans."

None of the current residents plan on living in the Mod next semester. Klein said, "The only good thing about Mod #2 was the hot tub. Now that it's gone we're gone." He added "I almost cried when we took it down."

Luigi Fiji postponed under hazing charges

Luigi Fiji, Phi Gamma Delta's popular philanthropy dinner presented by the Fraternity every semester, has been postponed because of hazing allegations raised against the chapter.

The activities and operations of the Delta Chapter of Phi Gamma Delta Fraternity have been suspended in accordance with the Student Judicial System and Code of Conduct as a consequence of the chapter's alleged involvement in a hazing incident, on Nov. 7.

The suspension will remain in effect until the matter is resolved. Representatives of the national organization are conducting an investigation while the University's investigation is continuing.

The fraternity will be allowed to remain open as a student residence.

Fraternity president, John Kagan '97, stated only that the hearing for the issue will be held next Thursday. Until that time he has no further comment.

Myra Legg, acting director of Greek Affairs, was unable to comment because the situation is currently under investigation.

Community Judicial Board Results

While under the influence of alcohol an underaged first-year male activated the fire alarm cover of a unit in Smith Hall. The student ran from Smith Hall and was pursued by University employees who ordered him to stop. The student was detained on the soccer field by Public Safety.

The student stated that he was not responsible for the charges of Failure to Comply or Tampering with Fire Safety Equipment. The Community Judicial Board Panel found him responsible on all counts and placed him on Disciplinary Probation through June 1, 1997. He is also required to pay a $500 fine.

On March 5, 1996 the Off Campus Living Review Board denied a sophomore male the privilege of living off-campus for the 1996-1997 academic year. In September it was discovered that the student was living on Sixth Street in Lewisburg.

The student acknowledged responsibility for the charges and was placed on disciplinary probation though June 1, 1997, required to move into a University residence hall, and will not be eligible for living off-campus during the 1997-1998 academic year.

While exiting the men's room in the Bison during a comedy performance, a student pulled down the shorts of another junior male. The junior male subsequently faced the crowd from the front of the stage, giving the crowd a full frontal flash of his genitals. He was escorted from the event by the Director of Student Activities. Later that night he was found in possession of an open container of beer in a Bucknell West residence.

The student was found responsible by the Community Judicial Board and was suspended from the University for one semester. The suspension was remitted provided that he is not found responsible for any violation of the Student Code of Conduct through June 1, 1997. If he is found responsible for any violations, suspension will begin immediately. The student is prohibited from participating in or attending any activity in the University Center through June 1, 1997. If he is scheduled to work in the Bison when an activity is scheduled he is required to switch his working hours.

BUILDING STRONGER COMMUNITIES ONE NEIGHBOR AT A TIME

Announcements

All residence halls will be closed from 10:00 AM on Wednesday, Nov 27 through Sunday, Dec 1 at 10:00 AM. If you are required to stay on campus for all or part of the Recess, you will be allowed to stay in your assigned room. However, the outside keyways of all residence halls, except Faculty Court and Bucknell West, will be changed. You must register with the Office of Housing and Residential Life by Monday, Nov 25 if you plan to stay and you may pick up an outside door key Nov 25 and 26 from the Office of Housing and Residential Life.

If you are a resident of Faculty Court and Bucknell West you must register to stay even though the keyways in those areas will not be changed.

Dr. Roy Baker has been appointed the new assistant dean of students. He will fill the position left open by Edward Dadez. His primary responsibility will be to oversee the Greek Life at the University. Baker comes to Bucknell from Rutgers University and will assume his new position on Monday.

Myra Legg, acting director of Greek Affairs, will be aiding Baker for the first few weeks of his appointment. She will then be working in the Registrar's office.

White officer acquitted in death of black motorist

PITTSBURGH — In a decision that has angered black activists, a white police officer, 40-year-old John Vojtas, was acquitted yesterday of involuntary manslaughter in the death of an African-American motorist who died during a scuffle with police after a traffic stop.

Gammage was pulled over by police on Oct. 12, 1995, while driving a Jaguar sedan owned by his cousin and business partner, professional football defensive lineman Ray Seals, who plays with the Pittsburgh Steelers.

Gammage emerged from the car carrying a cellular phone that police said they thought was a gun. While detained on the roadside, Gammage, 31, struggled with Vojtas and four other police officers. Prosecutors argued that Vojtas started the fight by hitting Gammage and then used excessive force while Gammage was on the pavement.

During the seven-day trial, the coroner testified that Gammage died of suffocation caused by pressure on his back and neck.

According to the officers' testimony at a coroner's inquest, Gammage was driving erratically. After one of the officers pulled him over, the officers said, Gammage became so violent they had to restrain him by holding him on the ground.

Vojtas, who could have gotten up to five years in prison, dropped his head and wept after the verdict. As he left the courthouse, he said: "Praise the Lord."

He said he hoped to return to police work. "I'm sorry that a tragic accident happened last year, or a little over a year ago. I know I'm going to learn from this accident. I hope to get trained better."

Chicago's Cardinal Bernardin reported near death

CHICAGO — Cardinal Joseph Bernardin, who has battled cancer for more than a year, was in grave condition yesterday, according to the Archdiocese of Chicago.

The 68-year-old prelate, senior cardinal in the church's U.S. hierarchy, was confined to bed at his home and has not appeared in public in recent days.

"The cardinal's condition is grave," said Mary McDonough, spokeswoman for the archdiocese. She said Bernardin received telephone calls from both President Bill Clinton and Pope John Paul.

The Pope called at mid-afternoon and "gave the cardinal his blessing. He thanked him for all that he had done for the Archdiocese of Chicago and for the universal church," the spokeswoman said.

In June 1995 Bernardin was found to be suffering from pancreatic cancer, a particularly deadly form of the disease, and underwent surgery. Last August 30 he announced the disease had spread to his liver and was inoperable, giving him less than a year to live.

Bernardin is the longest-serving active U.S. cardinal, appointed by Pope John Paul in 1982 to head the 2.3 million-member Chicago archdiocese, the nation's second-largest after Los Angeles.

U.S. Defense Secretary orders wide sexual harassment review

WASHINGTON — Defense Secretary William Perry said yesterday he had ordered all branches of the military to hammer home the message of "zero tolerance" for harassment of women in uniform.

With the Army checking sexual harassment complaints from female trainees at bases across the country since it disclosed a scandal at a training facility in Maryland last week, Perry told reporters he had asked the military services "to make sure there is not some problem there that could cause the sort of issue ... that we saw in the Army."

Perry declined comment on the misconduct cases disclosed by the Army but said sexual harassment was not only wrong ethically and morally but inimical to military discipline and "proper respect in the chain of command."

The Army disclosed last week that a captain and two others who trained recruits faced charges including rape of female trainees at the Aberdeen Proving Ground in Maryland.

In Kansas City, Missouri, a drill sergeant was discharged and sentenced to prison yesterday after admitting to having sex with three female recruits.

A military judge at the Fort Leonard Wood Army base in Missouri handed a bad-conduct discharge to Staff Sgt. Loren Taylor, who was also sentenced to five months in confinement facility and was demoted in rank after he pleaded guilty to seven charges of misconduct. In exchange, prosecutors agreed to drop charges of obstruction of justice and perjury.

U.S. Energy Secretary latest to step down

WASHINGTON — Energy Secretary Hazel O'Leary, who drew criticism for her costly overseas travels, has submitted a letter of resignation that President Clinton will accept, the White House said yesterday.

"The president has, with great gratitude for her exemplary service at the Energy Department, indicated he would accept" O'Leary's resignation," White House spokesman Mike McCurry told reporters.

The Energy Department in a statement said O'Leary's resignation would be effective Jan. 20.

It said O'Leary met Clinton on Tuesday and submitted her resignation on yesterday.

McCurry said Clinton did not ask for her resignation.

O'Leary said early in her four-year tenure at the department that she did not anticipate staying on for a second term.

She drew fire earlier this year for making extensive, and some critics said extravagant, trips to promote U.S. energy enterprises overseas.

"Under Secretary O'Leary's leadership, the Clinton administration has addressed critical national issues and made clear progress for the American people," the Energy Department's statement said.

In addition, McCormick said "They said they went through all the necessary channels to see if this was all right, but they didn't go through me. I would have told them instantly that they weren't allowed to build it."

Kline said that the residents of Mod #2 were "annoyed" by the fact that "nobody investigated the safety of the hot tub or asked us any questions about it." He said "They won't even cooperate with us. We'd absolutely have no problem meeting any health, safety, or efficiency standards to make it right."

Klein said "This tub was by far one of the safest ever built. Precautions were taken at every level from quick trip circuits to emergency shut off switches at an arm's length from the hot tub. The hot tub was chlorinated and algae-treated. Efficiency, too, was considered. Ironically, it took the same amount of energy to cook a large dinner as it did to heat the tub. This is just another example of Res Life using their authoritarian rule to get what they want without proper consideration or investigation."

> *"The residents were expecting too much. Once you leave, you are more than welcome to have a hot tub. But, while attending Bucknell, keep it a dream."*
> *—Jim McCormick, director of safety*

McCormick, however, said that the hot tub was dangerous for several reasons. He pointed to "the balance of the water, bacteria and algae growth, and drowning" as the main safety hazards. Although he did also consider the dangers of drinking in a hot tub, this was not "the paramount reason" for his decision.

He said "Hot tubs are a nightmare to maintain. You won't see a hot tub in any Bucknell owned buildings. The residents were expecting too much. Once you leave, you are more than welcome to have a hot tub. But, while attending Bucknell, keep it a dream."

Klein said that building the hot tub "brought us mod-mates closer together, and gave us a sense of pride that we were able to construct something so awesome. In fact, I converted from a Bio/Chem major to chemical engineering, because of the project."

He said, "None of us will ever forget the first time we went in the hot tub. It was actually too hot in the hot tub. We were amazed that we had that power."

Kiss talked about "the fun factor." He said Mod #2 exceeded the school's fun factor, therefore they clamped down on it."

Although they only were able to use the hot tub for three weeks, the residents described it as a "blast."

Kline said "It was a chill thing. We all study hard and are athletic, and it gave us a chance to relax. A couple of times we had people over, but never any crazy parties."

Hutchinson said "While we did smoke some stogies in there a couple of times, we never drank in the hot tub. We realize that its unsafe because you might get dehydrated or pass out."

Sweet said that he is "fed up" living in a residence that is "insect infested, with cracked walls and ceilings" and nicknamed "the ghetto." The 26 year-old Bucknell West facility is the oldest, and they "pay the same amount as beautiful mods."

Kline also expressed frustration, "What's the big deal? It's not like we're burning candles, stealing cable, or putting up ceiling fans."

None of the current residents plan on living in the Mod next semester. Klein said, "The only good thing about Mod #2 was the hot tub. Now that it's gone we're gone." He added "I almost cried when we took it down."

EDITORIAL

Qualified candidates emerge for BSG elections

On Sunday, *The Bucknellian* met with the seven candidates vying for the four BSG executive positions in the election next Thursday.

While it is disappointing to see only one person interested in the role of president and of vice president of administration, none of the candidates are disappointing, creating a difficult decision for the voter in next week's election. To assist in this decision, The *Bucknellian* endorsed the candidates who we believe would be able to best serve the campus.

President

After talking to Tracy Gray '99, *The Bucknellian* strongly supports his quest for the BSG presidency. As the current Vice President of Finance, Gray is well acquainted with how BSG works. The awkward transition that results from a newly inducted executive officer would be nonexistent, allowing Gray to focus immediately on the goals and purpose of the student government instead of trying to establish himself in his new role.

Not only would Gray begin his presidential career effectively, his executive experience has enabled him to see what needs to be changed. He knows the workings of BSG and knows the best way to push new ideas and changes through the organization.

Gray believes that the student government needs to be more efficient, while maintaining its size. He also sees the need to investigate more issues, like the independent Constitutional Review Committee sought to do last semester.

Gray concentrated on the insistent need for improved communications within BSG and between the student government and the campus, and he is already armed with ideas to help change the current situation. He suggested expanding the intramural sports program to include faculty and student teams and opening the student/faculty luncheons to the entire campus.

Vice President of Operations

Matthew Bauer '99 and Christine Boschen '99 force a difficult decision on the voter by running against each other.

Both candidates have been congress members in BSG and both are extremely involved in the campus. Bauer presented a suave position, but it was Boschen's enthusiasm for the race and the role of Vice President for Operations that swayed *The Bucknellian*'s decision in her favor.

Boschen has served on the Committee on Instruction, in addition to being involved in many other organizations and committees on campus. She knows what it takes to get her voice heard, and while she may be a bit timid now, she will undoubtedly become a strong spokesperson for student organizations.

Getting students more aware and involved in BSG and other activities would be one of Boschen's main goals if she were elected.

Vice President for Administration

Although Heather Murphy '98 is running unopposed, *The Bucknellian* feels that she is extremely capable of assuming the position of Vice President for Administration.

Murphy's one and a half years of serving as a student government congress member has excited and encouraged her to seek an executive position and has allowed her to form ideas that will improve the proceedings of the student government.

If elected, one of the changes Murphy would implement would be to expand the duration of new member orientation, which is presently only one day.

Murphy also emphasized student apathy and the need for better communication between BSG members, the campus, as well as the larger community.

Vice President for Finance

All three candidates for this position impressed *The Bucknellian*, but the choice ultimately came down between Steven Greenwood '99 and Justin Jarkowkski '99. While Michelle Mcallister '99 possesses strong leadership qualities, she did not have the ideas or vision that Greenwood and Jarkowkski displayed.

Greenwood promised a breath of fresh air since he has not previously served in the student government, and he did have many ideas to reach out to the campus. As invaluable as Greenwood's new perspective would be, however, Jarkowski is too strong of a candidate to overlook, having both the insight and experience that would make him an invaluable Vice President for Finance.

Jarkowski's intimate knowledge of the proceedings of the appropriations committee would give him the opportunity to implement changes from the beginning of his tenure. If elected, he plans to improve the committee's efficiency by increasing the time it meets, as well as educating campus organizations on how the committee works to avoid repetitive mistakes.

The real enemy lurks in the talk show industry

BETH HAGGERTY

In Wednesday's edition of *The New York Times*, it was reported that the trial of Jonathan T. Schmitz had concluded and that he had been found guilty of second-degree murder in the death of Scott Amedure.

For those not familiar with this case, it is that of the infamous Jenny Jones talk show murder in which Schmitz killed Amedure after Amedure confessed that he had a crush on him. This was not your average admittance of romantic feelings though, this was done on the Jenny Jones Show for an episode about secret same-sex crushes.

Three days after the show, possibly still in a blurred state of mind from his previous night of alcohol and drugs, Schmitz killed Amedure, shooting him at close range in the chest with a shotgun. Schmitz, possibly battling manic depression, killed Amedure because he was angry and overcome with embarrassment.

Jenny Jones testified at the trial, saying that Schmitz did not need to be informed of his admirer's sex because the show "was based on the premise of his surprise." But nobody was counting on his response.

When a tragedy of this magnitude occurs, there is the tendency to look for the cause, i.e. someone to blame. It was wrong for Schmitz to kill Amedure, regardless of the reason. Man, woman, black, white, gay, straight, there is no excuse for his actions.

But I think what must be done is to examine how these men were brought into each other's lives. Jones' producers have admitted that Amedure was "recruited" for the show but Jones does not feel that her show can be classified as "ambush television." But how could it be anything else? *People* magazine also reported that Schmitz was "emotionally ambushed."

It is clear that the real enemy, not just in the case of Schmitz and Amedure, is the talk show industry as a whole from the innocence of Regis and Kathie Lee to the "trash TV" of Ricki Lake, Geraldo Rivera, Jerry Springer, and Gordon Elliot. With episodes entitled "Sexy, Single and Ready to Mingle" one can only speculate on what is to come. Stories of sisters pregnant by the same man, promiscuity among adolescents, and cross-dressing ministers are all too common.

I do not advocate censorship, but what I am trying to push for is greater morality and ethics among the entertainment industry.

The topics on these shows are all entertainment industry. The topics on these shows are all highly personal issues that should be addressed privately, not before millions of people so that the shows can make more money. Maybe if every producer could ask himself, "Would I mind if this woman was my sister/wife/mother and she was telling her story on TV, only to be laughed at and passed judgment on?," then the quality of programming would rise up again. Until then, "Men Who Have Five Wives and Thirty-Seven Children and Have No Problem With It" will be airing at 4:00.

Speak Out

Do you feel that talk show hosts should be held responsible for the emotions and resulting actions of their guests?

Frank Fresconi '00
"No, I don't think so because they do not know how their guests will act or react."

Morgan Hays '99
"No, I don't because the guests should be responsible for their own actions. They are individuals and the hosts are simply mediators that get the guests to express their feelings."

Kelly Gallagher '00
"No. They pick their guests but cannot control how they will react towards the questions. They have no control over that reaction."

Rebecca Casady '98
"I think the host should be held responsible for the reactions during their show but not for what happens afterwards."

LETTERS

Targeted criticism of capstone course misguided

TO THE EDITOR:

The article on Capstones by Amy K. Shaw in *The Bucknellian* was a welcome entry into curricular discussion by a student. The faculty need, and too seldom solicit, student wisdom on what their education should consist of. Capstone courses may, in general, fail in their task, which is of course ambitious: to integrate many aspects of the whole four year trip that students take here.

Nevertheless, the effort is worthwhile, I think, and we ought to reserve our judgment for when we know the courses better. Mentioning my "Psychopharmacology" Capstone, for example, as a "particular, very specialized discipline," did not take seriously the efforts faculty make (and I know I am not talking about only myself) to connect particulars to general life issues. Every specialized course depends on a context, and many contexts are much larger than a home discipline. A good Capstone makes as many connections as possible beyond the discipline.

In fact, this example is exactly wrong for her point, for psychopharmacology is extremely general in its sociological, political, economic and philosophical meanings. The technology is "particular" and "specialized." This Capstone course will not be. To consider the advisability of broaching anxiety and depression with a pill takes one on extraordinary excursions through what a college education is about.

I invite Ms. Shaw to take my course and see aspects of her education in a new light.

China deserves more than containment

BY TODD ZERANSKI
Bucknellian Staff Writer

Flashback to 1992: In the midst of a hotly debated Presidential campaign, Arkansas governor William Clinton accused President George Bush of "coddling" China's dictators. Bush, Clinton thought, had de-emphasized China's human rights abuses in favor of a favorable Sino-U.S. trading partnership.

Flashback to 1994: President Clinton renews China's most favored nation trading status after first seeking to tie human rights improvements on the Chinese mainland to an extension of the trading privilege.

China calls his bluff. Clinton acquiesces. Foreign policy analysts roll their eyes.

Foreign policy in the Clinton administration has been a growth process, with the President slowly but surely gaining his confidence in venturing out into the murky world of international affairs.

Let it be chalked up to experience, then: Clinton's China policy during his first term was miserable. Clinton must have forgotten about the Shanghai Communique of 1972, that stated that there are essential differences between China and the United States in their social systems and foreign policies.

Unlike Nixon, Clinton focused on these "differences" rather than constructing a policy of accommodation and mutual benefit. Clinton, rather piously, mocked China in threatening China's trading status to human rights improvements. The intrinsic differences between the two states could be no more apparent: The world's only military superpower flexing its muscles for the world's fastest growing economy. The U.S., in National Security Advisor Anthony Lake's parlance, were "enlarging" democratic norms. The Chinese read: Containment.

1997 is another year, however, and I am brimming with optimism that Clinton will finally get his act together over China.

The enlargement policy of Clinton's first Administration was really nothing more than containment in disguise; the U.S. played politics with the China issue, rattling off our complaints like a jury verdict: Their human rights record is atrocious. They pirate U.S. intellectual property at the expense of our manufacturers at home. China violated international norms by exporting nuclear technology to Pakistan. Ad infinitum. To the Chinese, it seemed as if traditional diplomatic procedure had been destroyed with a sledgehammer.

So let's not dwell on what American foreign policy should not do. That is behind us. Let me cite some definite steps the U.S. should take to bring about more convivial relations and better our Pacific security concerns.

First: the United States should focus on issues of mutual concern, such as commercial interests and a nuclear-free North Korea. Clinton can broach these subjects when he meets with Chinese President Jiang Zemin at the Asia Pacific Economic Cooperation meeting in Manila on Nov. 24. Other common interests include U.S. arbitration of Chinese border disputes and managing China's rapid industrialization and urbanization with environmental concerns.

Secondly, the United States has currently blocked Chinese membership into both the World Trade Organization (WTO) and the Nuclear Technology Control Regime (NTCR), in which China desperately covets membership.

As a result of the U.S. action, there really exists no impetus for China to conform to international norms; rather, it can exert great control over its foreign orientation. This comes at great U.S. discomfort, which has always seen itself as the world's conscience.

Owing to this, NSA Anthony Lake once referred to China as a "backlash" state and put it in the same notorious company as Iraq, Iran, Libya, and North Korea. This was a diplomatic faux pas of little equal.

Finally, the U.S. should let Taiwan alone. The country's newly democratic politics has upset the status quo between the mainland and the renegade province, and the Taiwanese appeals to the U.S. Congress has only deepened the Sino-U.S. political breach.

The pro-Taiwanese sentiments within the American Congress have come to be relied upon so heavily that Chinese on the mainland and on Taiwan now believe that the U.S. would support Taiwanese secessionist movements regardless of what the executive branch believed.

What would indeed be better is if the U.S. resisted the Taiwanese bid for United Nations membership and avoided seeking to transform de facto independence for the Republic of China into legal independence.

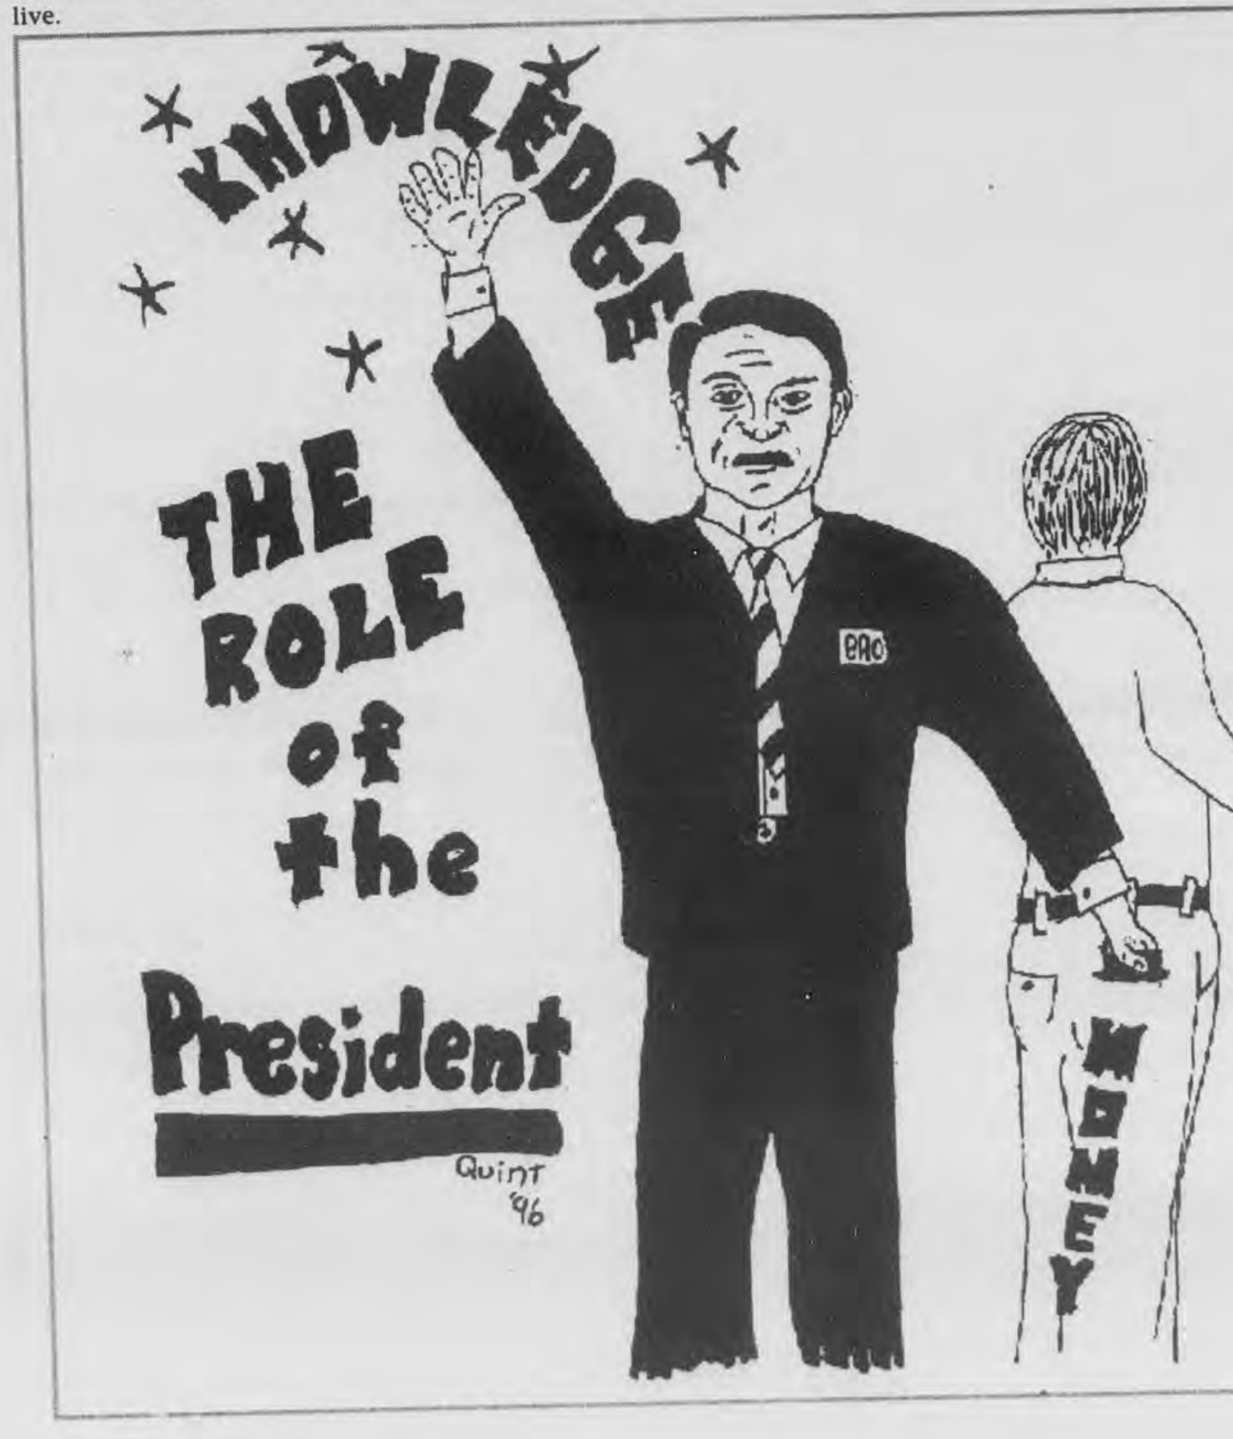
It is worth mentioning that Secretary of State Warren Christopher has visited the Middle East 21 times, and Beijing only once.

Clinton himself has never visited the Chinese leadership. That trip should be at the top of his New Year's Resolutions.

Ignorance and intolerance of different life-styles is unacceptable in today's world

AMY YOUNGGREN
Bucknellian Staff Writer

I was very moved by Tom Nguyen's article on gay families in last week's *Bucknellian*, because I also had read the article in *Newsweek* regarding Melissa Etheridge and her long time lover Julie Cypher and their plans to have a baby. With increasing diversity and recognition of many different life-styles in our American societies, people have had to confront the issue of gay families. Whether or not homosexuality is something you claim to accept or reject, we will all have to live together peacefully in the societies where we choose to live.



As Tom pointed out, the issue of gay families spurs on many issues concerning both religious concerns and those genuinely concerned with the welfare of the children. However, I hope to offer a side of the story that is both objective and personal at the same time. This is a story that is so common now in American society that I believe it can be somewhat generalized.

My godparents and long time family friends had three children who were just as much a part of our family as they were a part of their own and when their parents decided to get a divorce, it was shocking not only to their children, but to my family as well. It was revealed to my sister and I at a later date that the underlying reason for this divorce was that their mother is a lesbian and had been involved in another relationship.

When this truth came out to my sister and I through the careful explanation from my parents, we were given the choice to keep her as our "god mom." At the time, I remember being confused because I really didn't see what the big deal was. To me, my godmother was the same person she was before, and I didn't understand the implication that I would need a new "god mom." Therefore, we were all invited to the "celebration" of the union between Becky and her partner, Nancy. This was the first time that my sister and I had ever met Nancy, and she welcome us into their house with open arms. Just as we had shown her acceptance, she accepted us into her family as well.

It really was a mutual acceptance. This taught me something that I would never have understood had I not had this experience. There really is a dualistic nature of acceptance within different life-styles. It is not simply the ability for the heterosexual majority to accept the homosexual community, it is also the tolerance and acceptance of the reciprocal relationship.

My two godmothers live together with Becky's three children from her previous marriage. At first this transition was hard for all involved parties, but everyone involved would now contest that this family is no less happy than my family or any other heterosexual family.

Their family is different and would not deny it. The point is not to create one huge melting pot of life-styles in which everyone becomes unidentifiable from one another; however, it is important to expose the diversity living in and around us in order to broaden our perspectives and enrich the one-sided life that American society seems to be living.

It is everyone's obligation to recognize the endless possibilities of life-styles living in and around our communities. Dr. Mary Pipher illustrates these possibilities beautifully in her *New York Times* Best-seller, *Reviving Ophelia*: "In the 1990s a family can be a lesbian couple and their children from pervious marriages, a fourteen-year-old and her baby in a city apartment, a gay man and his son, two adults recently married and their teenagers from other relationships, a grandmother with two toddlers of a daughter who died of AIDS, a foster mother and a crack baby, a multigenerational family from an Asian culture or unrelated people who are together because they love each other."

We will have people of all kinds of life-styles as our neighbors, our children's teachers, our best friends, our children's best friends, our co-workers, etc. It is completely unacceptable in this day and age (or any for that matter) to be ignorant and intolerant of different life-styles. I guess it is unreasonable to expect acceptance, but tolerance is necessary unless we want our country eventually separated out into many factions of different people living only around the people who are exactly like them. In my opinion, that makes for a pretty boring existence.

It is clear that America is moving towards greater acceptance of different life-styles, whether or not it is resisted. I also believe that those people who still stand on a platform of resistance to diversity will have to step down eventually because it is not going to go away. There are few reasons to support the opinion that gay families are not as sufficient as heterosexual families. Children care not about the sexual orientation of their two parents, but they care about having two dedicated and loving people involved in their lives. I also believe that gay families can help increase acceptance of this life-style because citizens will find it much harder to reject the children of a homosexual couple than the homosexuals themselves.

Although Bucknell looks very homogenous from the outside, there are many different diversities even on this small campus. It is important to bring out the various differences and celebrate them for the purposes of education, broadening our perspectives and eventually global tolerance and even acceptance. Otherwise, we are doomed to a monotonous existence created by global ignorance.

Newly discovered wasp named after the University

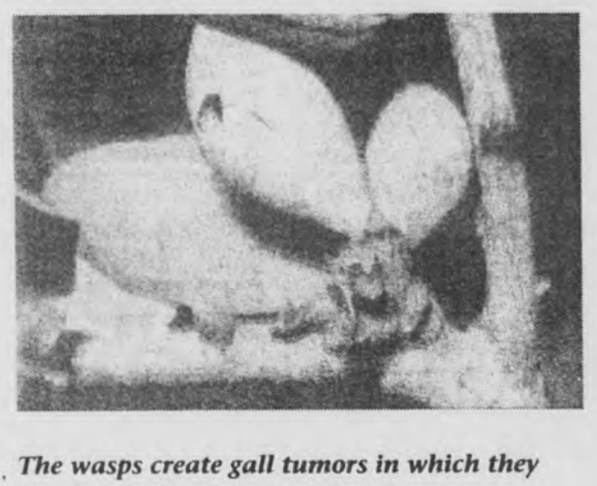
By John Venarchick

A very small wasp found in Florida, about a quarter inch in size, was discovered early in 1995 through a joint effort by Warren Abrahamson, professor of biology, and his colleague Dr. George Melika from the Ukraine.

Amphibolips bucknellenis is the name given to one of the 29 wasps that were discovered. Abrahamson named the wasp in recognition of the support of his research by the University. The name will not be official until it receives the approval of the scientific community.

In 1990, Abrahamson started working on a project to study and classify a group of insects that are called "gall inducers." These insects inject their eggs into a specific location on their particular host plants.

The larvae develop inside the plant and secrete chemicals that cause a tumor like formation to grow from the plant. The insects do not kill the plant with the tumors they induce. Instead, they use the growths as a nutrient source.



The wasps create gall tumors in which they develop during their larval stage.

"All the wasps we are talking about don't sting humans. They sting plants. These are not wasps that bother other animals," Abrahamson told *The Patriot News*.

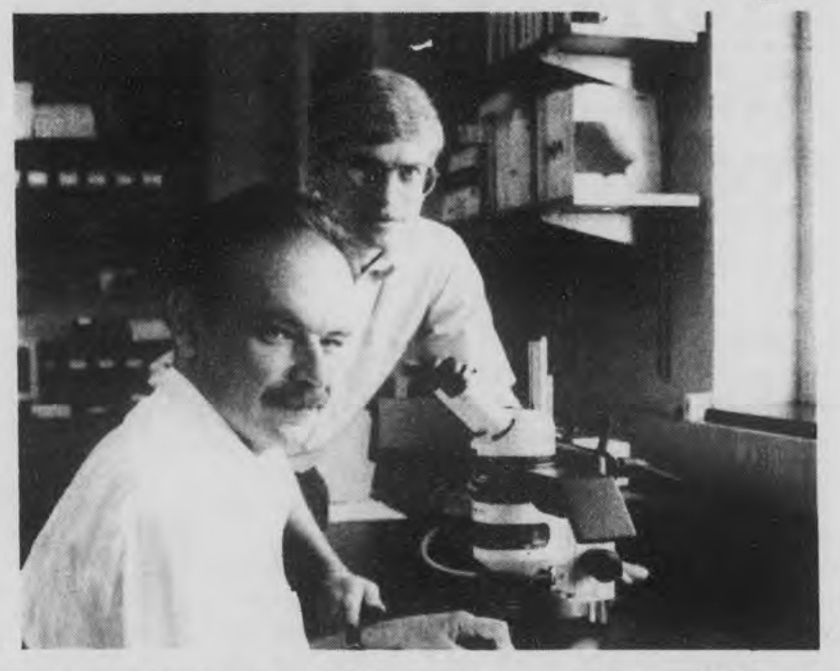
The interest in studying these insects is that some plant hosts become immune to the chemicals secreted by the larvae. This phenomenon has yet to be exactly explained.

Abrahamson and Melika have worked together for 18 months on this project. They met at a conference in Siberia where Melika gave a presentation on the taxonomy of the cynipid wasps.

After hearing the presentation, Abrahamson knew that he and Melika shared a common interest in his study of the previous 25 years.

With funding provided by the National Science Foundation, Abrahamson and Melika collaborated their efforts in November of 1994.

The pair hopes to continue their joint study into the classifications of new insects, as funding permits.



Professor of biology Warren G. Abrahamson and George Melika, an entomologist from Ukraine, have discovered 29 new wasps.

Caught in the Web: humorous and weird sites

A weekly guide to some of the most interesting sites on the World Wide Web, summaries of their pages and where to find them

By Curran Filer

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category 175GBT6: Weird and Humorous Sites

Weird

The International Banana Club
`http://www.banana-club.com`

This page is run by the International Banana Club®. There must be something about bananas that interests people, because the club has over 9,000 members in 23 different countries. Maybe I just don't get it. I did like the graphic of the banana though. Read about the Banana Museum.

Ali's Infinitely Weird Page
`http://crash.ihug.co.nz/-ali/weird.htm`

Another page of weird stories, this time run by somebody in New Zealand. The graphics are better in this one, but the stories are in the same vein. Categories include "Weird Crime", "Weird Religion", "Weeirrd Sex", and "Weird Government". You can even send in your own weird story.

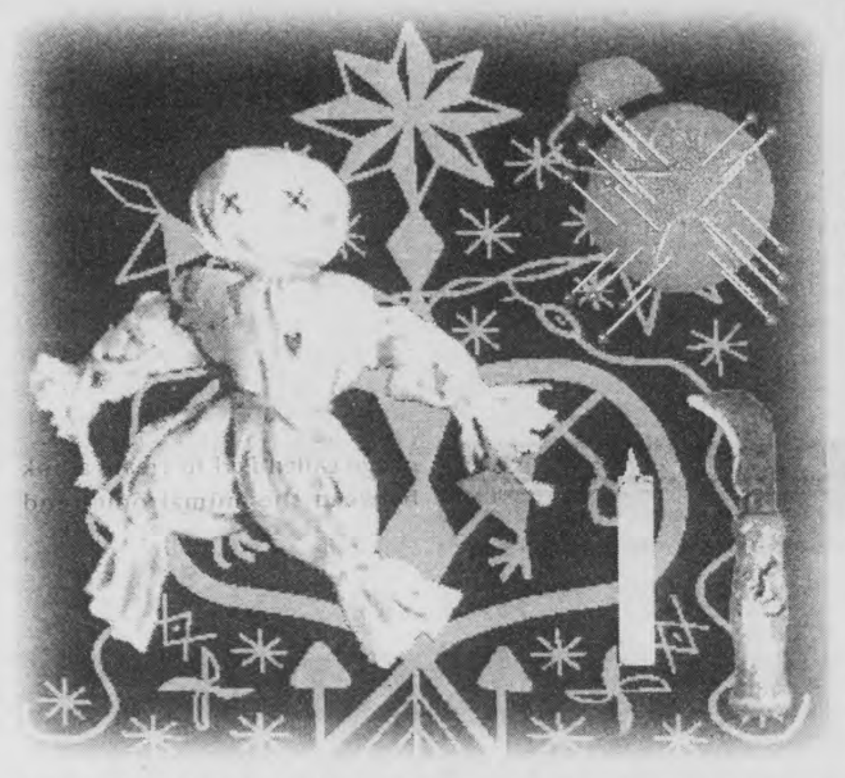
NEWS OF THE Weird

News of the Weird
`http://www.nine.org/notw/latest`

This page is an on-line version of the Universal Press column by Chuck Sheperd about weird happenings all over the world. Even though it's pretty plain it always has lots of weird crime stories and stuff that makes you ask, "How dumb can people be?" The answer is pretty dumb. Read it and find out.

Virtual Voodoo Doll
`http://www.virtual-design.com/cgi-bin/Voodoo.pl`

This site takes a little while to load, and you need a Java-capable browser, but it's pretty weird. The Java applet is a little voodoo doll you can stick with pins, burn, and cut. After you're done you are supposed to send it to someone. Who comes up with this stuff?



At the Virtual Voodoo Doll site, you have the opportunity to torture a doll with pins, a candle, and a knife. Each time you use these implements of torture, the doll let's out a scream or grunt.

Humorous

The Dilbert Zone
`http://www.unitedmedia.com/comics/dilbert`

This site is the official, United Media approved web site of the popular "Dilbert" comic strip by Scott Adams. It's got a Dilbert of the day, Dilbert store, and Dilbert trivia, as well as scads of other stuff. If you like Dilbert, I know you'll like this site.

The David Letterman/Late Show site
`http://www.cbs.com/lateshow`

It's run by CBS, and it plugs other lame CBS shows, but it has some pretty funny stuff. You can find out who the guests are, try to get tickets, and see pictures of Dave with guests. The "Lines" link has the best quotes from the show. If you want to find an archive of the past Top Ten Lists, then check out this URL:

Brain Teasers

The Wine Importer

A wine importer was pleased to receive a large consignment of bottles of Aigles Les Murailles and immediately celebrated by drinking one of the bottles. The next day, after receiving the wine, he sold exactly a fifth of the remaining bottles, which was a good enough excuse to treat himself to a second bottle. Sales continued to flourish. On the third day he again sold exactly one fifth of the bottles he had in stock at the beginning of the day. So again he celebrated with a bottle for himself. This pattern continued until the end of the seventh day, when the number of bottles left no longer made it possible for him to dispose of a fifth of them on the eighth day.

Multi-discipline engineering crew create the B.E.A.S.T.

Electrical, mechanical and computer engineers combine to create a fully automated bison to be placed in the lobby of Dana

By Tim Parrott
Bucknellian Staff Writer

The BEAST. The name conjures an image of an amusement park ride that would make you scream, or a new breakfast sandwich at your favorite fast food restaurant. Once one enters the realm of the Dana Engineering building, the BEAST refers to an ongoing senior design project.

Although it may make some scream, the BEAST is neither a roller coaster nor a greasy addition to the McMuffin family. This is an acronym for Bucknell Engineering Animatronic Systems Technology.

This senior design project, which is continuing from the last two years, is an interdisciplinary project which combines the knowledge of electrical engineers, mechanical engineers, and a computer science engineer.

Under the guidance of assistant professor of electrical engineering Paul Deitz, 14 students from these areas will endeavor once again in the hopes of creating an interactive animatronic bison for the lobby of the Dana Engineering Building.

Once completed, this machine will not only be an ornament of engineering ability, but a fully operational bison which will be able to sense the presence of students in its proximity as well as talk with them as it moves its head to keep constant eye contact with its audience.

The BEAST will only be able to complete these activities as the engineers from each discipline complete their individual tasks of control over the interactive bison. The sensors which will "observe" the activity within the environment, as well as the resulting animatronic actions will both be controlled by microcontrollers, which in turn are controlled by a master controller.

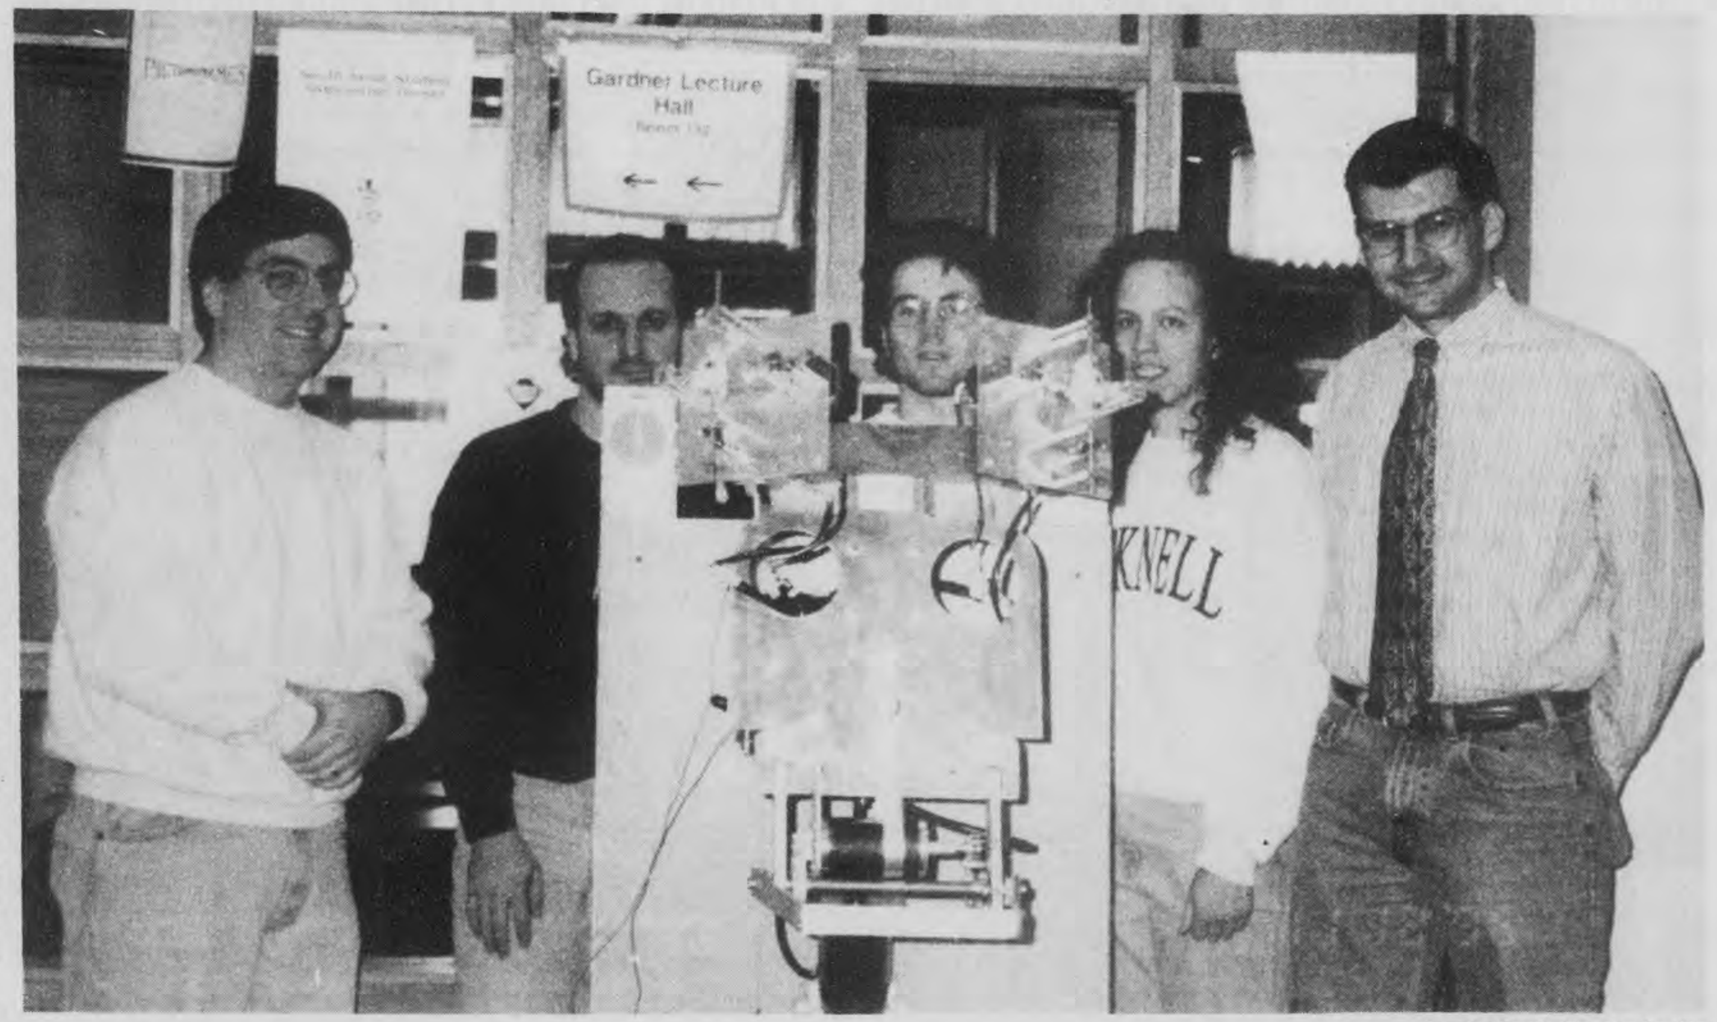
The mechanical engineers on the team have already begun, and will continue to work on the physical animatronic figure. Their work has included the construction of the neck, eyes and mouth of the bison which have been made mobile through an electromechanical system.

This system, as it is in place now, allows the jaw, neck and eyes to move through electronic control of motors attached to each of these parts. The need for interdisciplinary cooperation is clearly evident when the control of these motors comes into question.

The microcontrollers which take part in the reactivity of the sensors and animatronic parts are designed and wired by the electrical engineers within the design team. Along with the microcontroller connection to the animatronics and sensors, the electrical engineers also have designed the system of sensors which will recognize movement in the proximity of the bison.

The sensory system incorporates infrared sensors, floor sensors and high level sensor processing, which act collectively as an intermediate communicator between the microcontrollers and the master controller.

The floor sensors were designed last semester by a team of students and a prototype has been completed; however, the models continue to be reevaluated at each step.



Jamie Krauk–The Bucknellian
Assistant professor of electrical engineering Paul Dietz, seniors Brent Spangler, Eric Stewart, Tracy Huber and Nathaniel A.F. Clark are only a few of the people who have helped to create the BEAST. Each engineering discipline contributes its expertise to the project.

These tentative floor sensors, along with the infrared sensors, would allow the BEAST to "see" its surroundings through sending information to the computer system linked to the electromechanical apparatus of the bison's head. Again, the cooperation of the engineering disciplines plays an integral role.

The computer science discipline has used a computer language called Perl to create a link between the animatronics and the reaction system of the microcontrollers through the master controller, CONAN.

CONAN is a link between the computer and the various appendages of the BEAST, and as CONAN receives sensory information from the sensors, it will allow the bison to react through communication with the second microcontroller linked to animatronic motors of the appendages.

As of this fall, each of these smaller projects, within each discipline, has been partially completed by each group of engineers. The main structure of the bison's head has been constructed with motors and has been partially linked by the electrical engineers.

Also, a simple form of the CONAN system is operational along with the microcontroller connection through which the mechanical appendages have motion.

There is still much work left to be done on the bison before it will be ready to interact with passersby in the lobby of Dana Engineering. Deitz has asserted his hope for completion in the upcoming spring semester.

The mechanical engineering division of the project, in this next semester, will continue to refine the electromechanical structure of the BEAST's head as they work on the eyes and motors controlling the movements of all the appendages.

The electrical engineers hope to finalize plans for floor sensors as well as continuing work on the links between the microprocessors and the animatronic limbs of the actual BEAST.

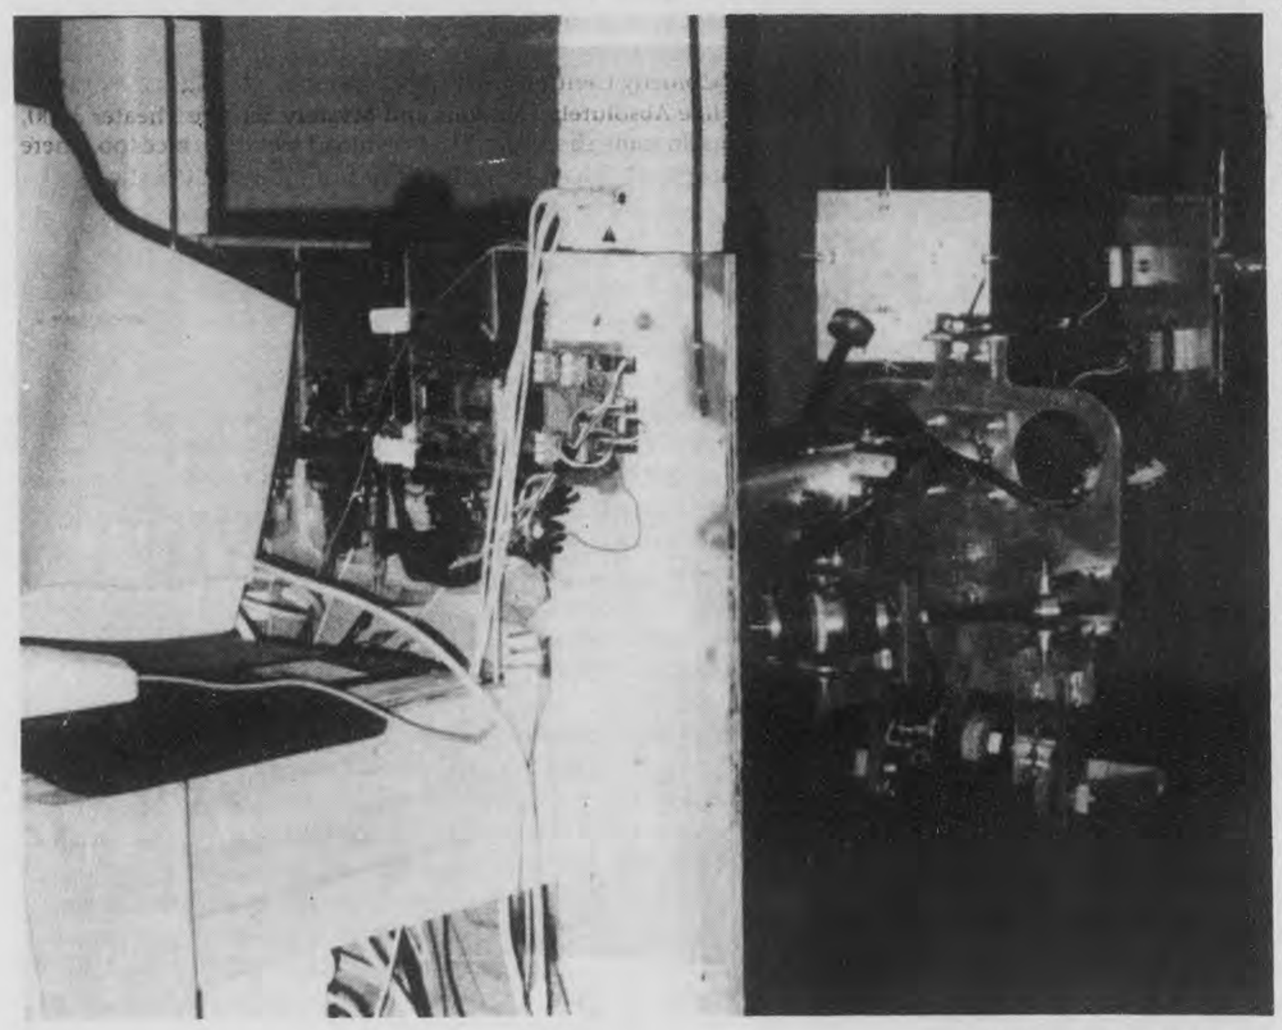
The computer science division also has a few revisions to its program which they hope to implement in the spring. First, they hope to update the CONAN program to the programming language of C++ rather than Perl. They also hope to formally define the language which the testing environment for CONAN and actual CONAN program communicate.

Once these portions of the project are completed, the actual outer shell of the bison will need to be constructed. This may bring some liberal arts students into this already diverse interdisciplinary project.

Each component of this project, within each discipline of engineering, is itself a practical lesson and application of the skills which these seniors have accumulated throughout their four years.

The combination of disciplines allows each type of engineer to see how their efforts can affect the work of other engineers within other disciplines. Working together in this manner is an effective teaching tool, offering the students involved an idea of how a final project of this dimension can be completed through the compilation of knowledge of many people across a wide spectrum.

The people that are working on this project are: associate professor or mechanical engineering Keith Buffington, Paul Dietz, senior electrical engineers Jose Carbajal, Nathaniel A.F. Clark, Bob Chandler, Tracy Huber, David Shrader, Brent Spangler, Eric Stewart and Laura Tilton, senior mechanical engineers Mark Treiber, Mike Voss and Tom Wolf as well as senior computer scientist Steven Rutkowski.



Jamie Krauk—The Bucknellian
The BEAST is controlled using a computer, sensors, and various other microcontrollers.

Solution to Brain Teaser

The consignment was 15,621 bottes.

The number of bottles left at the end of each day is

Day 1	15,621 - 1	= 15,620
Day 2	15,620 x 4/5 -1	= 12,495
Day 3	12,495 x 4/5 -1	= 9995
Day 4	9995 x 4/5 - 1	= 7995
Day 5	7995 x 4/5 - 1	= 6395
Day 6	6395 x 4/5 - 1	= 5115
Day 7	5115 x 4/5 - 1	= 4092

which leaves him starting the eighth day with 4092 which is not divisible by 5.

Let N be the initial consignment, and ai the number of bottles sold on the ith day after the consignment arrives.

Then:

$$N - 1 = 5a1 \longrightarrow N + 4 = 5 (a1 +1) \quad (1)$$
$$4a1 - 1 = 5a2 \longrightarrow 4 (a1 + 1) = 5 (a2 + 1) \quad (2)$$
$$4a2 - 1 = 5a3 \longrightarrow 4 (a2 + 1) = 5 (a3 + 1) \quad (3)$$
$$4a3 - 1 = 5a4 \longrightarrow 4 (a3 + 1) = 5 (a4 + 1) \quad (4)$$
$$4a4 - 1 = 5a5 \longrightarrow 4 (a4 + 1) = 5 (a5 + 1) \quad (5)$$
$$4a5 - 1 = 5a6 \longrightarrow 4 (a5 + 1) = 5 (a6 + 1) \quad (6)$$

Multiplying these six equations together and cancelling common factors gives:

$$4^5 (N + 4) = 5^6 (a6 + 1)$$

Hence $N + 4$ is a multiple of 5^6, and the smallest value of N for which this is true is $5^6 - 4 = 15,621$.

SCIENCE AND TECHNOLOGY

Newly discovered wasp named after the University

BY JOHN VENARCHICK

A very small wasp found in Florida, about a quarter inch in size, was discovered early in 1995 through a joint effort by Warren Abrahamson, professor of biology, and his colleague Dr. George Melika from the Ukraine.

Amphibolips bucknellenis is the name given to one of the 29 wasps that were discovered. Abrahamson named the wasp in recognition of the support of his research by the University. The name will not be official until it receives the approval of the scientific community.

In 1990, Abrahamson started working on a project to study and classify a group of insects that are called "gall inducers." These insects inject their eggs into a specific location on their particular host plants.

The larvae develop inside the plant and secrete chemicals that cause a tumor like formation to grow from the plant. The insects do not kill the plant with the tumors they induce. Instead, they use the growths as a nutrient source.

The wasps create gall tumors in which they develop during their larval stage.

"All the wasps we are talking about don't sting humans. They sting plants. These are not wasps that bother other animals," Abrahamson told *The Patriot News*.

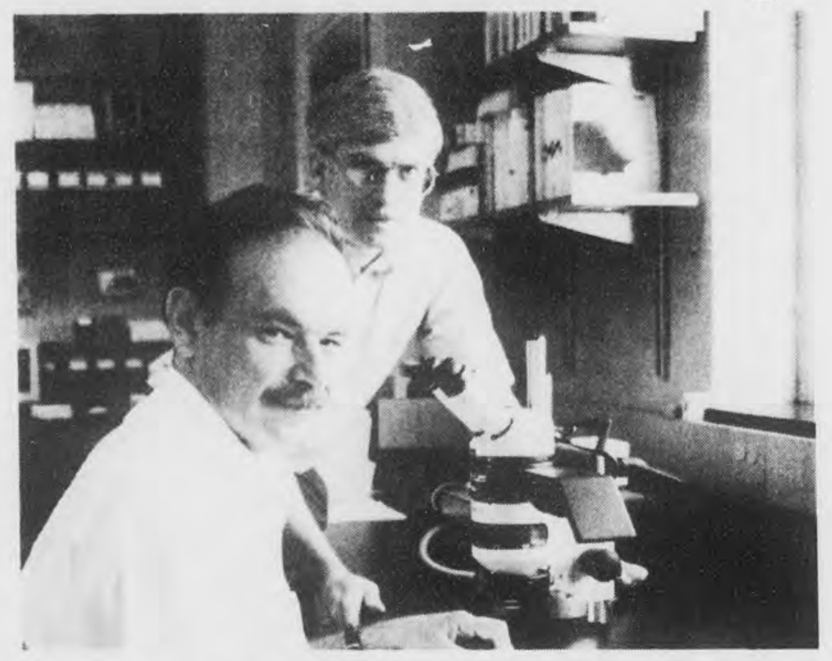
The interest in studying these insects is that some plant hosts become immune to the chemicals secreted by the larvae. This phenomenon has yet to be exactly explained.

Abrahamson and Melika have worked together for 18 months on this project. They met at a conference in Siberia where Melika gave a presentation on the taxonomy of the cynipid wasps.

After hearing the presentation, Abrahamson knew that he and Melika shared a common interest in his study of the previous 25 years.

With funding provided by the National Science Foundation, Abrahamson and Melika collaborated their efforts in November of 1994.

The pair hopes to continue their joint study into the classifications of new insects, as funding permits.



Professor of biology Warren G. Abrahamson and George Melika, an entomologist from Ukraine, have discovered 29 new wasps.

Caught in the Web: humorous and weird sites

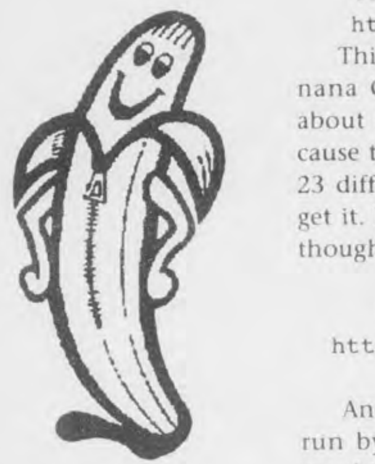
A weekly guide to some of the most interesting sites on the World Wide Web, summaries of their pages and where to find them

BY CURRAN FILER

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category 175GBT6: Weird and Humorous Sites

Weird



The International Banana Club

`http://www.banana-club.com`

This page is run by the International Banana Club®. There must be something about bananas that interests people, because the club has over 9,000 members in 23 different countries. Maybe I just don't get it. I did like the graphic of the banana though. Read about the Banana Museum.

Ali's Infinitely Weird Page

`http://crash.ihug.co.nz/~ali/weird.htm`

Another page of weird stories, this time run by somebody in New Zealand. The graphics are better in this one, but the stories are in the same vein. Categories include "Weird Crime", "Weird Religion", "Weeirrd Sex", and "Weird Government". You can even send in your own weird story.

NEWS OF THE Weird

News of the Weird

`http://www.nine.org/notw/latest`

This page is an on-line version of the Universal Press column by Chuck Sheperd about weird happenings all over the world. Even though it's pretty plain it always has lots of weird crime stories and stuff that makes you ask, "How dumb can people be?" The answer is pretty dumb. Read it and find out.

Virtual Voodoo Doll

`http://www.virtual-design.com/cgi-bin/Voodoo.pl`

This site takes a little while to load, and you need a Java-capable browser, but it's pretty weird. The Java applet is a little voodoo doll you can stick with pins, burn, and cut. After you're done you are supposed to send it to someone. Who comes up with this stuff?

At the Virtual Voodoo Doll site, you have the opportunity to torture a doll with pins, a candle, and a knife. Each time you use these implements of torture, the doll let's out a scream or grunt.

Humorous

The Dilbert Zone

`http://www.unitedmedia.com/comics/dilbert`

This site is the official, United Media approved web site of the popular "Dilbert" comic strip by Scott Adams. It's got a Dilbert of the day, Dilbert store, and Dilbert trivia, as well as scads of other stuff. If you like Dilbert, I know you'll like this site.

The David Letterman/Late Show site

`http://www.cbs.com/lateshow`

It's run by CBS, and it plugs other lame CBS shows, but it has some pretty funny stuff. You can find out who the guests are, try to get tickets, and see pictures of Dave with guests. The "Lines" link has the best quotes from the show. If you want to find an archive of the past Top Ten Lists, then check out this URL:

`www.cbs.com/lateshow/lists`

Comedy Central Online

`http://www.comcentral.com/com-menu.htm`

This is Comedy Central's web site. It has separate pages for some of its shows, like Absolutely Fabulous and Mystery Science Theater 3000, and you can do some shopping. The download section is nice too. There you can download Quicktime video clips from some of the shows.

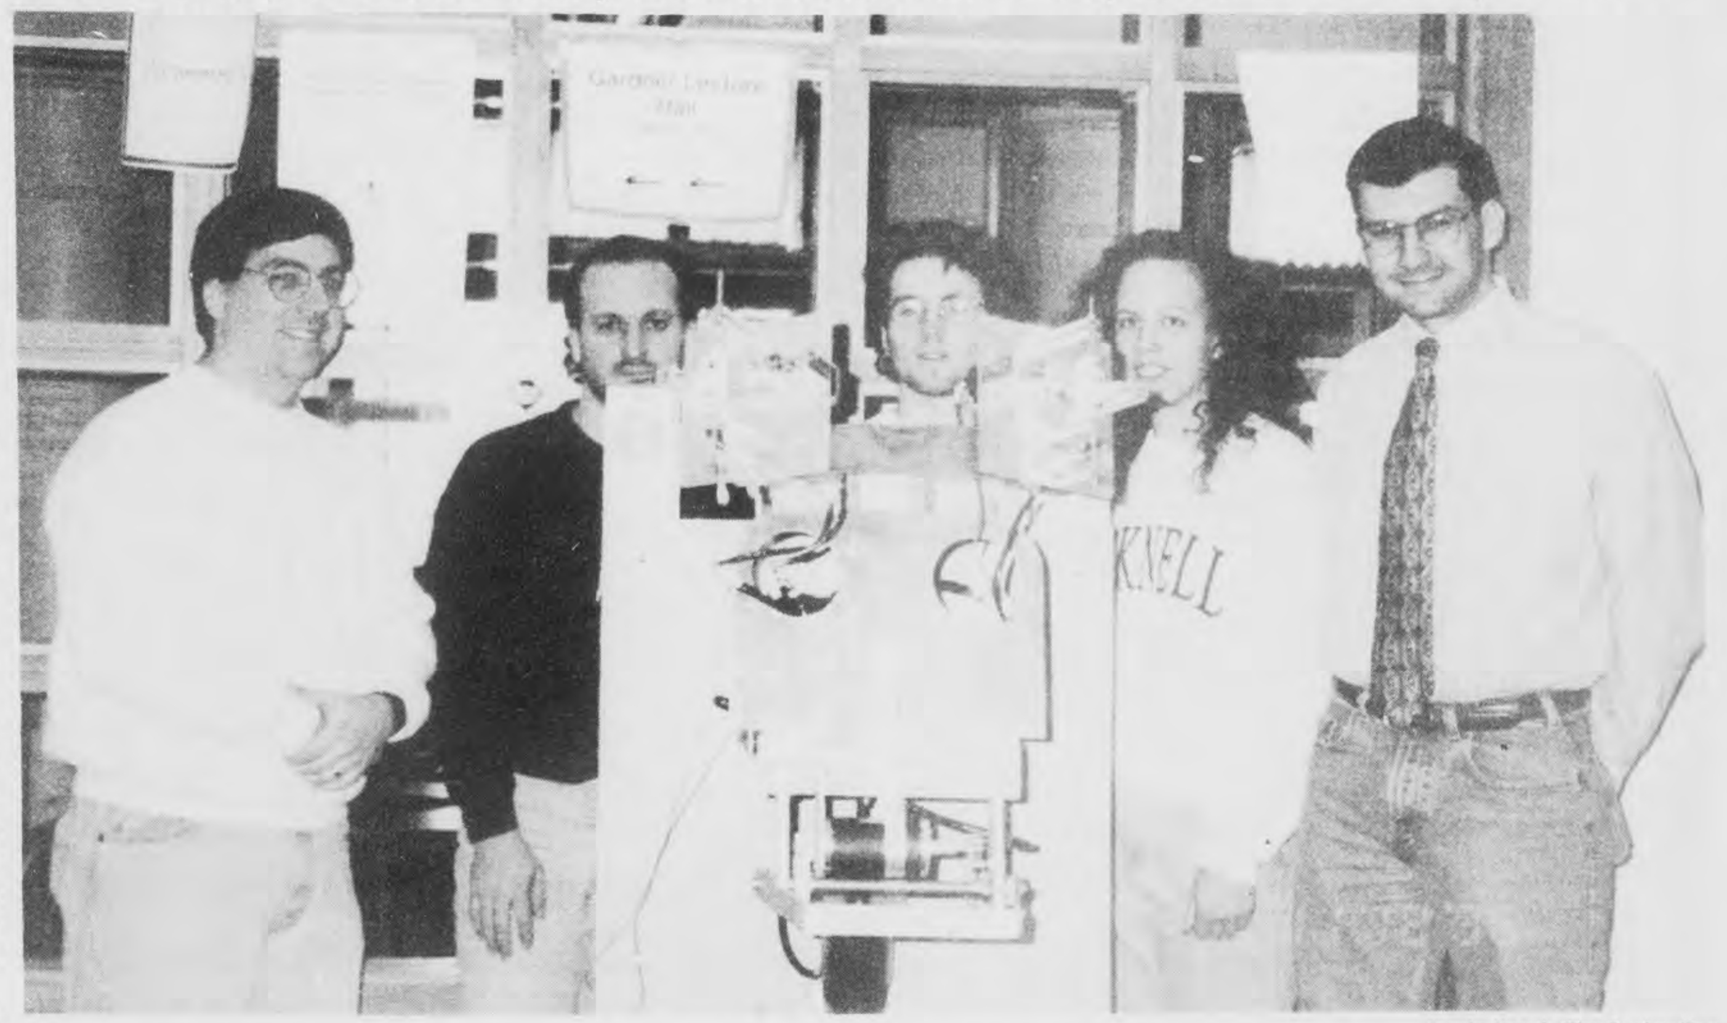
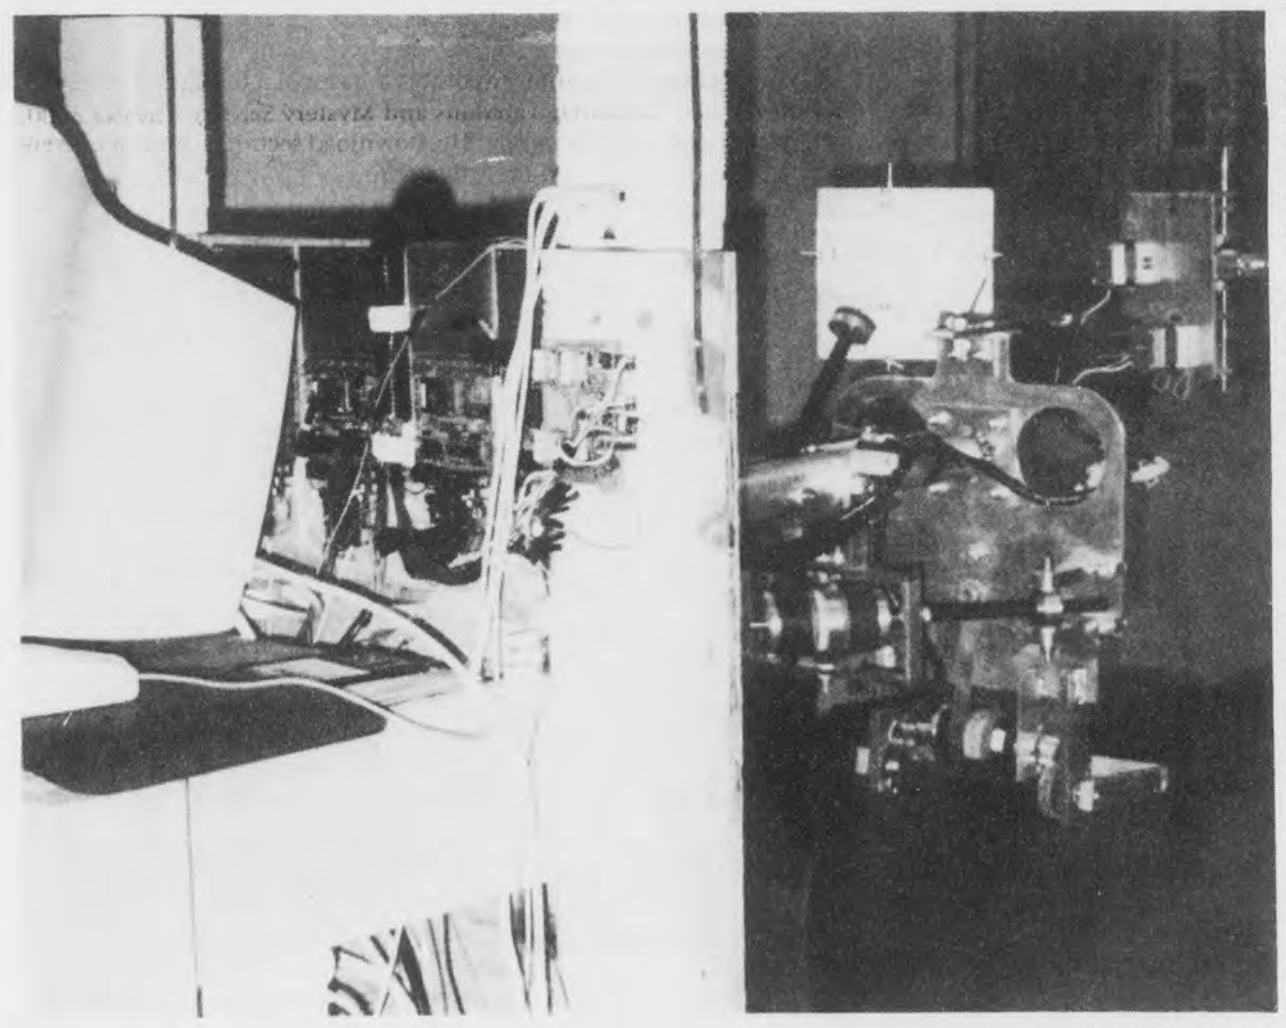
Clark, Bob Chandler, Tracy Huber, David Shrader, Brent Spangler, Eric Stewart and Laura Tilton, senior mechanical engineers Mark Treiber, Mike Voss and Tom Wolf as well as senior computer scientist Steven Rutkowski.



Jamie Krauk–The Bucknellian

Assistant professor of electrical engineering Paul Dietz, seniors Brent Spangler, Eric Stewart, Tracy Huber and Nathaniel A.F. Clark are only a few of the people who have helped to create the BEAST. Each engineering discipline contributes its expertise to the project.



Jamie Krauk—The Bucknellian

The BEAST is controlled using a computer, sensors, and various other microcontrollers.

Solution to Brain Teaser

The consignment was 15,621 bottles.

The number of bottles left at the end of each day is

Day 1	15,621 - 1	= 15,620
Day 2	15,620 x 4/5 -1	= 12,495
Day 3	12,495 x 4/5 -1	= 9995
Day 4	9995 x 4/5 - 1	= 7995
Day 5	7995 x 4/5 - 1	= 6395
Day 6	6395 x 4/5 - 1	= 5115
Day 7	5115 x 4/5 - 1	= 4092

which leaves him starting the eighth day with 4092 which is not divisible by 5.

Let N be the initial consignment, and ai the number of bottles sold on the *ith* day after the consignment arrives.

Then:

$$N - 1 = 5a1 \longrightarrow N + 4 = 5\,(a1 + 1) \quad (1)$$
$$4a1 - 1 = 5a2 \longrightarrow 4\,(a1 + 1) = 5\,(a2 + 1) \quad (2)$$
$$4a2 - 1 = 5a3 \longrightarrow 4\,(a2 + 1) = 5\,(a3 + 1) \quad (3)$$
$$4a3 - 1 = 5a4 \longrightarrow 4\,(a3 + 1) = 5\,(a4 + 1) \quad (4)$$
$$4a4 - 1 = 5a5 \longrightarrow 4\,(a4 + 1) = 5\,(a5 + 1) \quad (5)$$
$$4a5 - 1 = 5a6 \longrightarrow 4\,(a5 + 1) = 5\,(a6 + 1) \quad (6)$$

Multiplying these six equations together and cancelling common factors gives:

$$4\text{^}5\,(N + 4) = 5\text{^}6\,(a6 + 1)$$

Hence $N + 4$ is a multiple of 5^6, and the smallest value of N for which this is true is 5^6 - 4 = 15,621.

WILD BLUEBERRY CRUMB MUFFINS

Envision yourself waking to the scent of muffins baking, and the sound of the surf striking a wily Nantucket coast as you yawn an evening of starlit ponderings. Indicative of the classic New England Bed and Breakfast is a tall and moist muffin, peaked with fresh fruit, screaming its presence as steam pours from its overflowing cap. There's little in this world like freshly baked pastry, and there's nothing like the tradition of a simple blueberry muffin. The berries of desire here are huckleberries, a tiny, wild blueberry exemplifying the age old "the smaller the better" theory.

Ingredients:

1/2 cup butter or margarine
1 1/4 cup sugar
2 eggs
2 cups flour
2 t baking powder
1/2 t salt
1/2 cup milk
2 cups huckleberries (wild blueberries)
sugar for sprinkling
1 cup flour 3/4 cup sugar
1/3 cup butter cinnamon

Make batter:

Cream butter and sugar until fluffy, adding eggs one at a time. Sift together flour, baking powder and salt. Add alternately with milk, beating gently. It is important not to overwork in order to preserve the texture. Add huckleberries and stir carefully by hand.

Make crumb topping:

In a small bowl, stir together flour, sugar and cinnamon to taste. Cut in butter until a crumbly texture results.

Assemble muffins:

Fill lightly greased muffin cups with batter, almost to the top. Clumping topping into a ball, break off "crumbs" over batter, pressing lightly to ensure adhesion. Bake at 375 degrees, 25 to 30 minutes or until a wooden tester comes out clean. Serve immediately, or cool completely and store in an airtight container.

The secrets in creating statuesque muffins with the impossible top that itches to be "popped" off are filling the cups at least 3/4 full, and baking at the designated temperature. You must remember that pastry is very finicky, demanding in the professional world, a climate controlled kitchen, as it responds to humidity and heat. So just keep trying... Tips on "the day after" consumption include splitting the muffin in half, and broiling it (with or without additional butter) to a crisp, talkative crunch. Treat the microwave as a flirtatious and tempting party, because of its deceiving power to steal texture and infect a once witty personality with deviance.

Local Color: Good Wil's offers greasy hometown delights

Melissa Renzi—The Bucknellian

Good Wil's serves breakfast all day long and is conveniently located in Montandon on Route 45 East.

By Micah Schweizer

Welcome to the greasy spoon, the restaurant where grease is an art.

If you have an interest in experiencing true local color, go no further than Good Wil's Restaurant. Conveniently located in nearby Montandon, this is a gathering place for authentic central Pennsylvanians.

I remember one incident this summer which perfectly illustrates the Good Wil's spirit: a friend and I had gone to Good Wil's for a tasty lunch. We sat at the counter on low, swiveling bar chairs. My friend placed his Australian Outback hat on the chair beside him and accidentally left it resting there when we left. Returning several hours later to retrieve the hat, we found a group of five older men enjoying an early dinner. Because the hat occupied one of the chairs, the men had split up their group in order to allow the hat to remain on its chair. When my friend picked it up, one man joked that he was "thinkin' about takin' it for" himself because it looked "like it might fit good."

Yet it is the food in combination with the dimly lit atmosphere that allows the customer to fully experience Good Wil's. The food is very tasty. Please note, this is not *haute cuisine*; rather, it is Central Pennsylvanian cooking at its finest.

Good Wil's serves breakfast, lunch, and dinner, although breakfast is available all day long. The most unusual and interesting item on the Good Wil's menu (it happens to appear on the breakfast menu) is the famous "Country Mess." This exciting dish combines classic breakfast elements such as toast, eggs, hashbrowns and homefries into the delightful conglomerate known as the "Country Mess." The "Country Mess Plus" allows the customer to add their choice of ham, bacon, sausage, or scrapple (for that authentic central Pennsylvanian taste) to the basic "Mess" for an even more robust dish. In addition to the noteworthy "Country Mess," Good Wil's Restaurant also serves more standard fare, such as hot and cold sandwiches, more conventional breakfast dishes and pies. For the health conscious, most Good Wil's entrees are designed to provide a 100 percent U.S. Recommended Daily Allowance of grease.

Prices are quite inexpensive, and Good Wil's is located on Route 45 East: simply cross the Lewisburg bridge and continue until you have passed through Montandon. You will find Good Wil's on the right side.

One more note of interest: as the Christmas holiday season approaches, be on the lookout for Good Wil's unique seasonal decoration (this is true): a fully decorated Christmas tree hanging upside down from a ceiling fan fixture which is rotating.

**Next time in Local Color, look for tips on holiday shopping in Lewisburg and the surrounding area.

Vegetarians are offered healthy alternatives

By Stephanie McKinney

While your parents may have dined on meat and potatoes or hamburgers and french fries while in college, today's college student may not find that diet so appealing.

In choosing your meal at the cateteria, do you select foods on the basis of health preference? It seems as if many Bucknellians do.

Recently, a trend towards vegetarianism has been noticed on college campuses across the country. According to the National Restaurant Association approximately 15 percent of the 15 million college students in America eat vegetarian diets. This tendency to dine vegetarian may be attributed to a number of varying factors.

While some decide to cut meat out of their meals for health and dieting purposes others decline this item for ethical beliefs. Currently, the growth in health conscientiousness has promoted this meatless lifestyle among college students. This fact is further noticed in the finding that many who claim to dine primarily on vegetarian meals do eat poultry, which has an over all lower fat content than red meats, and would thus seem to be a healthier choice for dieters.

While individual reason for adopting a vegetarian diet may vary among individuals, the diets they acquire tend to be similar. The overall satisfaction with selection at Bucknell's cafeteria is positive with minor complaints in various areas. There seems to be an attitude that the cafeteria is responding to dieting trends, and as student suggestions are easy to make via the comment cards this progress should continue.

Students' views on cafeteria selection are also positive. There seems to be an overall satisfaction concerning the availability of red meat alternatives, with certain focus areas of complaint. "They have adequate accommodations with healthy choice turkey, pasta, chicken dishes and the salad bar," said Erin Viggiano '99 who does partake of poultry but declines red meat dishes. "If I did eat red meat my views might be different," she added, "because they serve the same types of red meat dishes when they are available at all."

Other students who do not explicitly eat vegetarian meals also had comments to make on the non-meat selections available in the cafeteria. "I'm not really a vegetarian," said Jon Lipana '99 "but every time I go to get vegetables they are yellow, and I'm not talking about the corn." Other students expressed disgust about the over cooking of the school-prepared vegetables, but many also noted the positive aspects of the stir fry area as offering one alternative to the mass-prepared vegetables.

Many positive comments were made about the new selections in the garden bounty section of the cafeteria. "It's all about the bean bar," said strict vegetarian Alissa Moore '99 who eats no meat for dietary reasons. "It's a central source of protein in a vegetarian diet. Now I am able to add beans to my salads as well as make bean burritos and this makes me very happy."

Naturally many vegetarians turn to the salad bar in creating their meals, and while comments concerning the selection and variety of vegetables were positive, Colin Heilman '99 remarked, "I don't like the way the lettuce is sometimes shredded, I like whole lettuce, not the shredded kind like you get from McDonalds."

At the University, noticeable efforts have been made to accommodate vegetarian lifestyles. The cafeteria has a salad bar, stir fry area, and has a newly added a bean bar this year. Mike Lupori, director of dining services said, "I think that we are accommodating their [vegetarians] requests. We have actually had two requests from other universities for our menu cycles."

ARTS & ENTERTAINMENT

Alumnus returns to jazz up the Weis Center stage

By Robin Reitzes and Marni Harriman
Bucknellian Staff Writers

> *"It is quite a delight to have him because he is one of us."*
> *—Danna Fragione, director of the dance department*

Buraczeski and company stage jazz pieces for the Sesquicentennial Jazzdance performance Friday at the Weis Center.

"Danny's dance company is one of the best in the country and Danny is one of the best known choreographers in the field," said Bill Boswell, director of cultural events in the Weis Center.

In honor of the Sesquicentennial events, Danny Buraczeski '70, will be performing Jazzdance along with his Dance Company in the Weis Center.

Buraczeski is one among a handful of jazz dance artists who has maintained his own studio on Broadway. He started his dance company in New York City and then relocated to Minneapolis, Minnesota. His remarkable talent enables him not only to choreograph, but also to perform in his pieces. In addition, he serves as the artistic director.

Because Buraczeski is a Bucknell alumnus, it seemed only natural to bring him back for the Sesquicentennial events. "We were thinking of events that would incorporate the students. Danna Fragione and I both wanted him back to perform; this seemed like the perfect time," Boswell commented.

Fragione, director of the dance department, added that this talented dancer is an alumnus who stays connected with Bucknell.

"It is quite a delight to have him because he is one of us," she expressed.

The accomplished dancer actually began his dance studies at the University when he took Dance 101. He then became more interested in pursuing dance, as well as his own studio after he graduated. Fragione believes he has the advantage of not only being a talented dancer, but being bright with an excellent collegiate education. The combination has helped him manage his own company and have a Broadway career.

Buraczeski and his company were supposed to perform on Homecoming Weekend. The performance was delayed because the Weis Center pre-opted for the live broadcast of the Firing-Line. It worked out for the best because the Jazzdance performance kicks off the first event for the University Relations Campaign.

The last time Buraczeski's dance company performed at Bucknell was five years ago. At the beginning of the semester, Buraczeski was here for two weeks in residency. The Bucknell Association for the Arts and the Sesquicentennial Committee commissioned him to stage a 20 minute original jazz piece for the Bucknell Dance Company. Ten students and faculty will perform this piece for the first time at their December show in the University Theater. This is a piece he choreographed with the abilities and strengths of the individual dancers in mind.

Fragione explained that Buraczeski choreographed a solo just for one of the dancers, Kristy Kuhn '00.

"It is worth the whole concert," Fragione said. "It is just beautiful."

"It was a good learning experience to dance a new style of jazz," Kuhn said. "Danny is very talented and has great ideas... he really helps the people with whom he works."

Jazzdance will be performed November 15 at 8 p.m. in the Weis Center. Tickets for those with Bucknell ID are $5 and tickets are $15 for general admission. For more information, call the Weis Center Box Office at 717-524-1000.

Movie Review

Ransom holds up to hype

By Chris Nichols
Bucknellian Columnist

Ransom ★★★★
Starring Mel Gibson, Rene Russo, and Gary Sinise
Directed by Ron Howard

This movie has probably been the most anticipated one of the Fall. Teaming together a lot of great talent (the maker of Apollo 13, the star and director of Braveheart, and the unforgettable Lieutenant Dan), this movie works with strong screenplay and delivers a good film. Gibson stars as a wealthy owner of the fourth largest airline company that he put together from scratch. Russo, who does a good job but whose character has something missing from it, plays Gibson's wife and the mother of their kidnapped child.

As can be expected of almost any major motion picture, we have the setup and the crisis well established within the eight minute time period (this time is a reference used by filmmakers since audiences want to see plot development within this, otherwise, they begin to lose interest. Doesn't say much about us movie viewers does it...) Things heat up when the time of the exchange gets closer. The kidnappers warn that the police should not be contacted. Speaking of police: Sinise does an interesting job playing what appears to be an investigator for NYPD. Every once and a while one has to ask the question: "When does he go to work?" (he spends a lot of time off the job...).

For such an anticipated movie I was slightly let down. It was great, but it is difficult for any movie to live up to the hype that production companies are producing these days. Plus you'll find, if you're a movie frequenter, that you've seen previews for a film like *Ransom* so many times that you think you know what is happening. Although sometimes you do, not much is given away in these trailers. All in all, Ron Howard did a good job. He has consistently impressed me with how he's done a variety of different types of movies: from *Willow*, to *Apollo 13*, to *Ransom*, to *Backdraft*, and to *Cocoon;* all interesting and good films in their own way.

WILD BLUEBERRY CRUMB MUFFINS

Envision yourself waking to the scent of muffins baking, and the sound of the surf striking a wily Nantucket coast as you yawn an evening of starlit ponderings. Indicative of the classic New England Bed and Breakfast is a tall and moist muffin, peaked with fresh fruit, screaming its presence as steam pours from its overflowing cap. There's little in this world like freshly baked pastry, and there's nothing like the tradition of a simple blueberry muffin. The berries of desire here are huckleberries, a tiny, wild blueberry exemplifying the age old "the smaller the better" theory.

Ingredients:

1/2 cup butter or margarine
1 1/4 cup sugar
2 eggs
2 cups flour
2 t baking powder
1/2 t salt
1/2 cup milk
2 cups huckleberries (wild blueberries)
sugar for sprinkling
1 cup flour 3/4 cup sugar
1/3 cup butter cinnamon

Make batter:

Cream butter and sugar until fluffy, adding eggs one at a time. Sift together flour, baking powder and salt. Add alternately with milk, beating gently. It is important not to overwork in order to preserve the texture. Add huckleberries and stir carefully by hand.

Make crumb topping:

In a small bowl, stir together flour, sugar and cinnamon to taste. Cut in butter until a crumbly texture results.

Assemble muffins:

Fill lightly greased muffin cups with batter, almost to the top. Clumping topping into a ball, break off "crumbs" over batter, pressing lightly to ensure adhesion. Bake at 375 degrees, 25 to 30 minutes or until a wooden tester comes out clean. Serve immediately, or cool completely and store in an airtight container.

The secrets in creating statuesque muffins with the impossible top that itches to be "popped" off are filling the cups at least 3/4 full, and baking at the designated temperature. You must remember that pastry is very finicky, demanding in the professional world, a climate controlled kitchen, as it responds to humidity and heat. So just keep trying... Tips on "the day after" consumption include splitting the muffin in half, and broiling it (with or without additional butter) to a crisp, talkative crunch. Treat the microwave as a flirtatious and tempting party, because of its deceiving power to steal texture and infect a once witty personality with deviance.

Local Color: Good Wil's offers greasy hometown delights

Melissa Renzi—The Bucknellian

Good Wil's serves breakfast all day long and is conveniently located in Montandon on Route 45 East.

By Micah Schweizer

Welcome to the greasy spoon, the restaurant where grease is an art.

If you have an interest in experiencing true local color, go no further than Good Wil's Restaurant. Conveniently located in nearby Montandon, this is a gathering place for authentic central Pennsylvanians.

I remember one incident this summer which perfectly illustrates the Good Wil's spirit: a friend and I had gone to Good Wil's for a tasty lunch. We sat at the counter on low, swiveling bar chairs. My friend placed his Australian Outback hat on the chair beside him and accidentally left it resting there when we left. Returning several hours later to retrieve the hat, we found a group of five older men enjoying an early dinner. Because the hat occupied one of the chairs, the men had split up their group in order to allow the hat to remain on its chair. When my friend picked it up, one man joked that he was "thinkin' about takin' it for" himself because it looked "like it might fit good."

Yet it is the food in combination with the dimly lit atmosphere that allows the customer to fully experience Good Wil's. The food is very tasty. Please note, this is not *haute cuisine*; rather, it is Central Pennsylvanian cooking at its finest.

Good Wil's serves breakfast, lunch, and dinner, although breakfast is available all day long. The most unusual and interesting item on the Good Wil's menu (it happens to appear on the breakfast menu) is the famous "Country Mess." This exciting dish combines classic breakfast elements such as toast, eggs, hashbrowns and homefries into the delightful conglomerate known as the "Country Mess." The "Country Mess Plus" allows the customer to add their choice of ham, bacon, sausage, or scrapple (for that authentic central Pennsylvanian taste) to the basic "Mess" for an even more robust dish. In addition to the noteworthy "Country Mess," Good Wil's Restaurant also serves more standard fare, such as hot and cold sandwiches, more conventional breakfast dishes and pies. For the health conscious, most Good Wil's entrees are designed to provide a 100 percent U.S. Recommended Daily Allowance of grease.

Prices are quite inexpensive, and Good Wil's is located on Route 45 East: simply cross the Lewisburg bridge and continue until you have passed through Montandon. You will find Good Wil's on the right side.

One more note of interest: as the Christmas holiday season approaches, be on the lookout for Good Wil's unique seasonal decoration (this is true): a fully decorated Christmas tree hanging upside down from a ceiling fan fixture which is rotating.

**Next time in Local Color, look for tips on holiday shopping in Lewisburg and the surrounding area.

Vegetarians are offered healthy alternatives

By Stephanie McKinney

While your parents may have dined on meat and potatoes or hamburgers and french fries while in college, today's college student may not find that diet so appealing.

In choosing your meal at the cafeteria, do you select foods on the basis of health preference? It seems as if many Bucknellians do.

Recently, a trend towards vegetarianism has been noticed on college campuses across the country. According to the National Restaurant Association approximately 15 percent of the 15 million college students in America eat vegetarian diets. This tendency to dine vegetarian may be attributed to a number of varying factors.

While some decide to cut meat out of their meals for health and dieting purposes others decline this item for ethical beliefs. Currently, the growth in health conscientiousness has promoted this meatless lifestyle among college students. This fact is further noticed in the finding that many who claim to dine primarily on vegetarian meals do eat poultry, which has an over all lower fat content than red meats, and would thus seem to be a healthier choice for dieters.

While individual reason for adopting a vegetarian diet may vary among individuals, the diets they acquire tend to be similar. The overall satisfaction with selection at Bucknell's cafeteria is positive with minor complaints in various areas. There seems to be an attitude that the cafeteria is responding to dieting trends, and as student suggestions are easy to make via the comment cards this progress should continue.

Students' views on cafeteria selection are also positive. There seems to be an overall satisfaction concerning the availability of red meat alternatives, with certain focus areas of complaint. "They have adequate accommodations with healthy choice turkey, pasta, chicken dishes and the salad bar," said Erin Viggiano '99 who does partake of poultry but declines red meat dishes. "If I did eat red meat my views might be different," she added, "because they serve the same types of red meat dishes when they are available at all."

Other students who do not explicitly eat vegetarian meals also had comments to make on the non-meat selections available in the cafeteria. "I'm not really a vegetarian," said Jon Lipana '99 "but every time I go to get vegetables they are yellow, and I'm not talking about the corn." Other students expressed disgust about the over cooking of the school-prepared vegetables, but many also noted the positive aspects of the stir fry area as offering one alternative to the mass-prepared vegetables.

Many positive comments were made about the new selections in the garden bounty section of the cafeteria. "It's all about the bean bar," said strict vegetarian Alissa Moore '99 who eats no meat for dietary reasons. "It's a central source of protein in a vegetarian diet. Now I am able to add beans to my salads as well as make bean burritos and this makes me very happy."

Naturally many vegetarians turn to the salad bar in creating their meals, and while comments concerning the selection and variety of vegetables were positive, Colin Heilman '99 remarked, "I don't like the way the lettuce is sometimes shredded, I like whole lettuce, not the shredded kind like you get from McDonalds."

At the University, noticeable efforts have been made to accommodate vegetarian lifestyles. The cafeteria has a salad bar, stir fry area, and has a newly added a bean bar this year. Mike Lupori, director of dining services said, "I think that we are accommodating their [vegetarians] requests. We have actually had two requests from other universities for our menu cycles."

Alumnus returns to jazz up the Weis Center stage

By Robin Reitzes and Marni Harriman
Bucknellian Staff Writers

> *"It is quite a delight to have him because he is one of us."*
> *—Danna Fragione, director of the dance department*

Buraczeski and company stage jazz pieces for the Sesquicentennial Jazzdance performance Friday at the Weis Center.

"Danny's dance company is one of the best in the country and Danny is one of the best known choreographers in the field," said Bill Boswell, director of cultural events in the Weis Center.

In honor of the Sesquicentennial events, Danny Buraczeski '70, will be performing Jazzdance along with his Dance Company in the Weis Center.

Buraczeski is one among a handful of jazz dance artists who has maintained his own studio on Broadway. He started his dance company in New York City and then relocated to Minneapolis, Minnesota. His remarkable talent enables him not only to choreograph, but also to perform in his pieces. In addition, he serves as the artistic director.

Because Buraczeski is a Bucknell alumnus, it seemed only natural to bring him back for the Sesquicentennial events. "We were thinking of events that would incorporate the students. Danna Fragione and I both wanted him back to perform; this seemed like the perfect time," Boswell commented.

Fragione, director of the dance department, added that this talented dancer is an alumnus who stays connected with Bucknell.

"It is quite a delight to have him because he is one of us," she expressed.

The accomplished dancer actually began his dance studies at the University when he took Dance 101. He then became more interested in pursuing dance, as well as his own studio after he graduated. Fragione believes he has the advantage of not only being a talented dancer, but being bright with an excellent collegiate education. The combination has helped him manage his own company and have a Broadway career.

Buraczeski and his company were supposed to perform on Homecoming Weekend. The performance was delayed because the Weis Center pre-opted for the live broadcast of the Firing-Line. It worked out for the best because the Jazzdance performance kicks off the first event for the University Relations Campaign.

The last time Buraczeski's dance company performed at Bucknell was five years ago.

At the beginning of the semester, Buraczeski was here for two weeks in residency. The Bucknell Association for the Arts and the Sesquicentennial Committee commissioned him to stage a 20 minute original jazz piece for the Bucknell Dance Company. Ten students and faculty will perform this piece for the first time at their December show in the University Theater. This is a piece he choreographed with the abilities and strengths of the individual dancers in mind.

> *"We were thinking of events that would incorporate the students. ...this seemed like the perfect time."*

Crew succeeds despite harsh conditions

BY MORGAN MORAN

Bucknellian Team Correspondent

As the rain rolled in last Saturday morning, the Bucknell Crew team rolled out of bed and into the bus heading to the Philadelphia Frostbite Regatta. Braving the rapid current and chilling wind the novice men set out to finish their racing season with pride.

The first men's novice crew fought not only the competition but the outrageous amount of debris floating down the river to place fifth in their event. This outstanding finish advanced them to a competitive final where all of the boats were within 10 seconds of each other.

Unfortunately the crew was not able to demonstrate the incredible unity and desire that they have developed throughout the season because their final was canceled due to the foul weather. The second novice men's boat managed to beat out over half of its competitors despite equipment failure, a result of the harsh conditions.

The novice men continued their success as the men's four stroked their way to gold. Sporting the only hardware of the day the men made the entire team proud. Led by stroke Dave Green '00 and coxswain Sara Gunnels '00 the men clearly out rowed the other boats from the start.

The novice women also fared well despite the maze of debris which flooded the river. Both of the women's boats over powered the competition and advanced to the final. Unfortunately, like the men, the women got the "novice shaft" as their event got canceled to make up time lost in the early events.

A seniors men four also demonstrated the potential of the men's crew. Stroked by senior Tim Keen '97 the crew displayed the power and talent that Bucknell crew hopes to build on throughout the winter and into the spring.

Volleyball tourney preview

BY JACOB LIPMAN

Bucknellian Staff Writer

The Patriot League Tournament for women's volleyball is being held at Colgate this weekend. Colgate earned the top seed by going 6-0 in league play. Bucknell went 4-2 against league opponents and will have the second seed. Colgate faces fourth-seeded Lehigh in the first semifinal match, while the Bison square off against third-seeded Navy in the second semifinal match. The winner of the tournament will play an NCAA play-in match with the Northeast Conference's champion.

The Bison have plenty of talent and depth to achieve their goal of winning the league tournament. "Person for person, we have the most depth in this league," Coach Cindy Opalski said.

However, Opalski believes what it will come down to in the crucial situations, has nothing to do with either talent or depth.

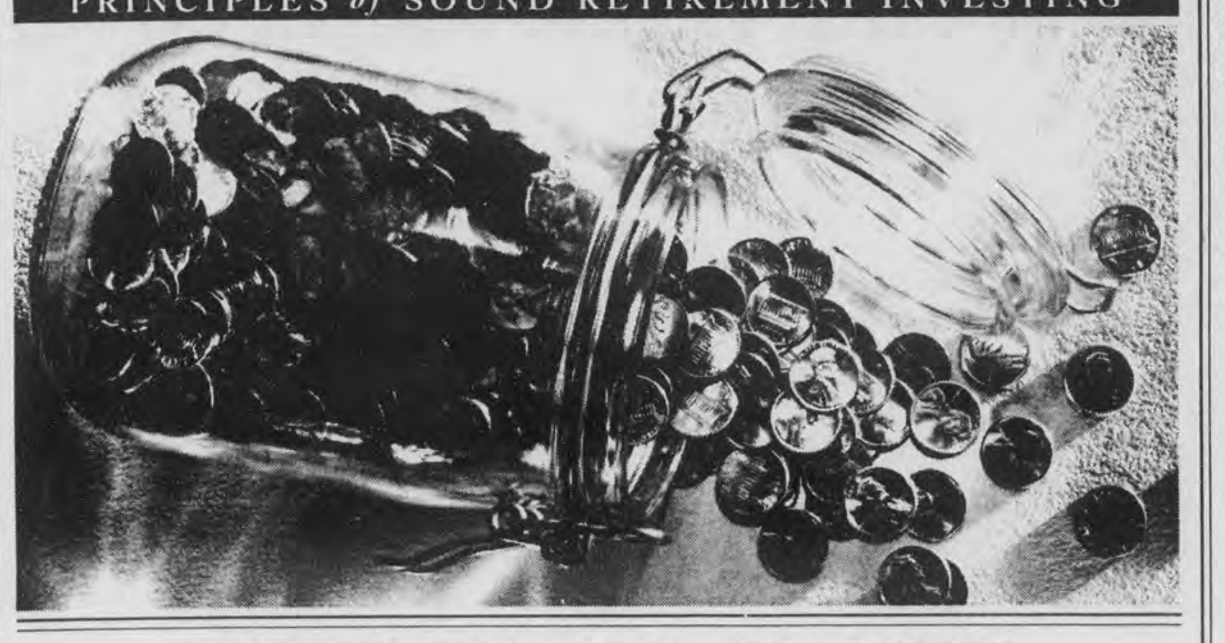
"It comes down to who has the greatest desire to win," Opalski said.

The match versus Navy should be a close one. Navy has bounced back from a disappointing sixth place Patriot League finish last year. The team's best strength is its incalculable desire to win.

Bucknell defeated Navy during the regular season by a score of 15-10, 11-15, 15-9, 15-11. It was a very tight game, in which the key factor to the Bison victory was their intensity.

Meanwhile, regular season champion Colgate and Lehigh meet in a rematch of last year's thriller semifinal match. Colgate upended the Mountain Hawks 9-15, 15-12, 15-4, 7-15, 15-12 en route to the Patriot League Championship title.

PRINCIPLES of SOUND RETIREMENT INVESTING



EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg – from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be – working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management – managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.℠

Volleyball finishes strong, beats Holy Cross

BY JACOB LIPMAN

Bucknellian Staff Writer

Jonah Half—The Bucknellian

Bucknell locked up the second seed in the Patriot League tournament with a win over Holy Cross.

This past weekend, Bucknell's women's volleyball team closed out the regular season in fine fashion. Prior to the second match, Bucknell's five seniors were honored for the extensive impact they have had on Bucknell's volleyball program. In the early match, Bucknell defeated Holy Cross. The team then ended the regular season by sweeping Columbia in three games, giving the Bison an undefeated 12-0 home record. Bucknell has an overall record of 18-11, including a 4-2 record in Patriot League play.

Bucknell's first opponent, Holy Cross, brought with them a less-than-desirable 0-22 overall record. Despite the winless record, the Crusaders showed a high level of desire and fought valiantly, before falling to the Bison by a score of 15-9, 15-13, 15-4.

Holy Cross grabbed an early 3-0 lead in game one but Melissa Wharton '98 had a few blocks over the next couple of plays to shift the momentum. Bucknell momentarily went ahead 4-3, only to have the Crusaders tie the game at 4-4.

The Bison then went on a 6-1 run to give them a seemingly safe 10-5 lead. Holy Cross retaliated by scoring three straight points before Bucknell called for a time-out in order to regroup. Following the time-out, Bucknell regained the serve after a sideout. Annalise Meidman '97 then proceeded to serve three consecutive aces, giving the Bison a 13-8 lead, which they would not relinquish.

Early in the second game, the lead seesawed back and forth between the two teams. Holy Cross managed to take a 5-4 lead but the Bison tied it up shortly thereafter. The Crusaders moved ahead only to have Bucknell tie it again at 7-7.

Holy Cross then scored five straight points to regain the lead. The Bison stopped the Crusader's run when Emily Pomeroy '99 hit one down the middle of the Crusader's defense for the kill. Two plays later, Pomeroy narrowed the deficit to three with a block for a point.

Holy Cross scored the next point to give them a 13-9 lead. However, it was the last point they would score in the game. Amy Turnshek '98 set the ball beautifully for Wharton, who then blasted a kill to give the Bison the serve.

Bucknell surged forward, scoring four straight points and tying the game. The Bison went ahead 14-13 on a combined block by Wharton and Michelle Lesh '00. Turnshek sealed the win with a service ace.

Game three saw Holy Cross take an early 2-0 lead. The Bison moved ahead 3-2 but the Crusaders tied it at 3-3 almost right away. However, Bucknell took control from there on out. The team hit excellently in jumping out to a 12-3 lead. Susie Teitsworth '97 racked up a few kills during the 9-0 run.

After each team scored another point, Allison Morris '97 had a spectacular dig that kept the rally alive. Teitsworth ended the rally with a well-placed kill just inside the sideline. Cameron Adams '99 ended the match with a kill in front of a diving Holy Cross defender.

Pacing the Bison offense were Wharton and Teitsworth, who had 13 and 11 kills respectively. Wharton also added three solo blocks and three block assists. Pomeroy led the team defensively, with nine digs.

Bucknell's next opponent was a young Columbia team. Bucknell had difficulty early on in the match but the experience of the Bison, helped them in crucial situations. The final score was 15-11, 15-6, 16-14 in favor of Bucknell.

Columbia raced to a 4-0 lead in the first game but the Bison won a very long and exciting rally for the sideout. Pomeroy hit one down with authority to draw the Bison within two at 4-2.

A few points later, with Columbia leading 6-3, Heather Mon-

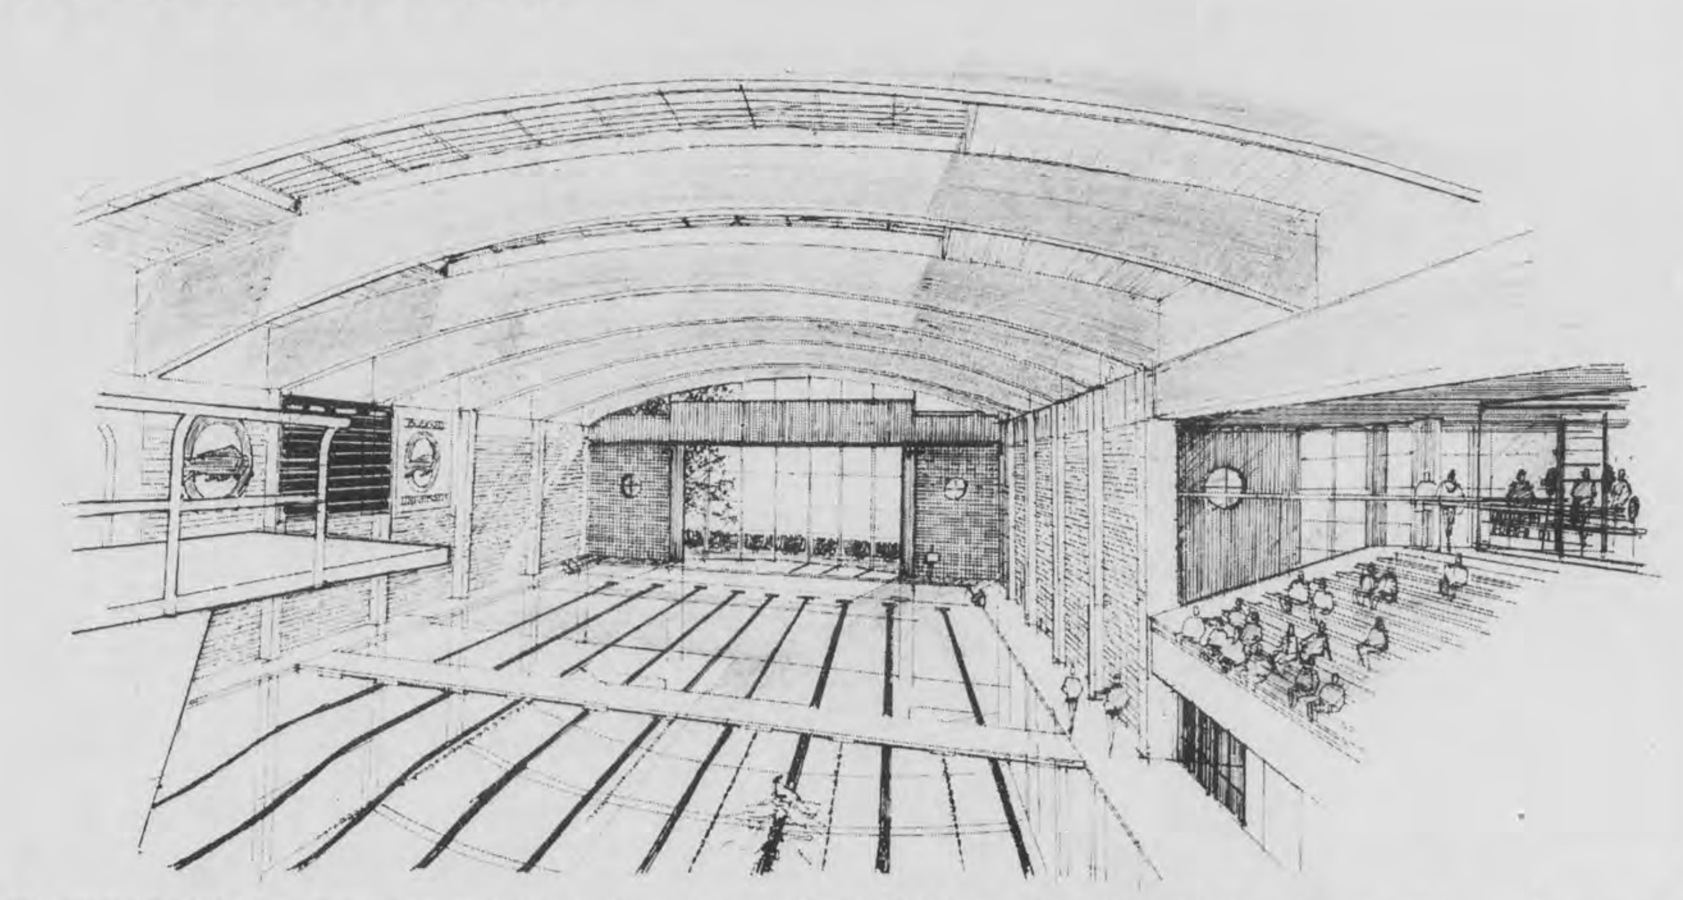
NATATORIUM

From Page 1



The proposed natatorium shown in this sketch, for the purposes of the Capital Campaign, will enable the swimming, diving, and water polo teams to practice simultaneously. The facility has been planned as an annex to the Davis Gymnasium.

Campaign to fund new swimming facility

in the gym, which would most likely go at the north end, although that has not been finalized at this time.

The new natatorium will also help to make the facilities more accessible to the disabled, in that an elevator will be added that will serve both levels of the Davis Gym and the Fieldhouse.

Although manager of development communications Bob Gaines stressed that "the new swimming facilities are only a small part of the overall program," he did admit that "it will be a great recruiting tool," in addition to "providing many new advantages."

Such advantages include the size of the new pool, which is considerably larger than the current, outdated Freas-Rooke Pool, and the moving bulkhead will allow two teams to practice at once. At the present time swimming, diving, and water polo all have to share the same pool, which requires the coaches to stagger the time in which the athletes use the pool, often resulting in early morning or late night practices.

"[The new pool] allows both teams to practice at the same time, as well as at times that are convenient to both coaches and students," said Mike Wooster, water polo coach.

The effects of the new pool are many fold for the athletic programs, in particular the water polo team. Currently, with the smaller Rooke-Freas pool, water polo was often at a disadvantage against their opposition, who were used to playing in a regulation pool. "In addition to recruiting, the new pool will make us equal to the other top teams," Wooster said.

The old pool also hurt the current Bison teams in that it is difficult to carry a lot of players, and in fact, Wooster is considering cutting the water polo team down to 18 players from 24, because "there's not enough pool time to go around."

The building of the new facilities is not without concern about money and space. Gaines dismissed these major concerns, stating that "the new facilities will not infringe on the soccer field," as well as noting that the money "will be used to both pay for [the natatorium] and maintain it."

Goals for the groundbreaking of the new natatorium, according to Gaines, are within "two to three years."

Flash in the Pan

Holyfield Drops Tyson: In a stunning upset, 11:1 underdog Evander Holyfield defeated Mike Tyson by TKO in the 11th round of their fight this past Saturday in Las Vegas. Holyfield came out strong early, using his reach advantage to keep Tyson at bay, and counter-punching effectively enough to take the early rounds, and eventually knocked Tyson down in the fourth round—only the second time Tyson has ever been knocked down. Tyson rebounded to fight Holyfield fairly evenly until the 10th round, in which Holyfield took control, and the fight was stopped a round later. With the victory, the Atlanta native takes the WBA Heavyweight Championship, and becomes only the second man in history (along with Muhammad Ali) to hold the heavyweight title on three separate occasions. The loss for Tyson was only the second of his career (Buster Douglas being the other), and his first loss since his release from prison. The two sides are discussing a possible rematch in June of 1997.

Smoltz, Hentgen Take Cy Young Awards: John Smoltz continued the dominance of the Atlanta Brave pitching staff in the Cy Young award, as he handily won the NL award over Florida Marlins pitcher Kevin Brown. Smoltz had a record of 24-8 with a 2.94 earned run average, as well as posting a 3-1 postseason record with an ERA under one. The AL voting produced quite a surprise, as heavy favorite Andy Pettitte of the New York Yankees was edged by Toronto pitcher Pat Hentgen in the second closest vote in AL history. For the year, Hentgen posted a 20-10 record with a 3.22 ERA, but the Blue Jays faded badly, finishing 74-88, while Pettitte led the Yankees to a World series victory. Hentgen is the first-ever player from a Canadian team to win the Cy Young award.

Cowboys rebound: The Dallas Cowboys, in danger of falling to 5-5, came back to erase a 10 point deficit to defeat the S.F. 49ers 20-17 in overtime. Elvis Grbac, filling in for the injured Steve Young, threw a crucial interception deep in 49ers territory, and the defending Super Bowl champions converted the turnover into a touchdown to tie the game 17-17, and go into overtime. The Cowboys then won the game on a 26-yard field goal by Chris Boniol. In addition, the Cowboys gained a game on the Eagles, Redskins, and Packers, all of who dropped their Sunday contests. The Packers and the Cowboys play this Monday night..

Say What: In related news, San Fransisco mayor Willie Brown blasted backup QB Elvis Grbac on Tuesday, calling him an "embarrassment to mankind," and saying that Grbac would never play in any stadium that he "would assist to be built." Grbac took total responsibility for the loss, but did admit that he was ill-prepared for the game due to problems with his son, who suffers from spina bifida.

Crew succeeds despite harsh conditions

By Morgan Moran

Bucknellian Team Correspondent

As the rain rolled in last Saturday morning, the Bucknell Crew team rolled out of bed and into the bus heading to the Philadelphia Frostbite Regatta. Braving the rapid current and chilling wind the novice men set out to finish their racing season with pride.

The first men's novice crew fought not only the competition but the outrageous amount of debris floating down the river to place fifth in their event. This outstanding finish advanced them to a competitive final where all of the boats were within 10 seconds of each other.

Unfortunately the crew was not able to demonstrate the incredible unity and desire that they have developed throughout the season because their final was canceled due to the foul weather. The second novice men's boat managed to beat out over half of its competitors despite equipment failure, a result of the harsh conditions.

The novice men continued their success as the men's four stroked their way to gold. Sporting the only hardware of the day the men made the entire team proud. Led by stroke Dave Green '00 and coxswain Sara Gunnels '00 the men clearly out rowed the other boats from the start.

The novice women also fared well despite the maze of debris which flooded the river. Both of the women's boats over powered the competition and advanced to the final. Unfortunately, like the men, the women got the "novice shaft" as their event got canceled to make up time lost in the early events.

A seniors men four also demonstrated the potential of the men's crew. Stroked by senior Tim Keen '97 the crew displayed the power and talent that Bucknell crew hopes to build on throughout the winter and into the spring.

Volleyball tourney preview

By Jacob Lipman

Bucknellian Staff Writer

The Patriot League Tournament for women's volleyball is being held at Colgate this weekend. Colgate earned the top seed by going 6-0 in league play. Bucknell went 4-2 against league opponents and will have the second seed. Colgate faces fourth-seeded Lehigh in the first semifinal match, while the Bison square off against third-seeded Navy in the second semifinal match. The winner of the tournament will play an NCAA play-in match with the Northeast Conference's champion.

The Bison have plenty of talent and depth to achieve their goal of winning the league tournament. "Person for person, we have the most depth in this league," Coach Cindy Opalski said.

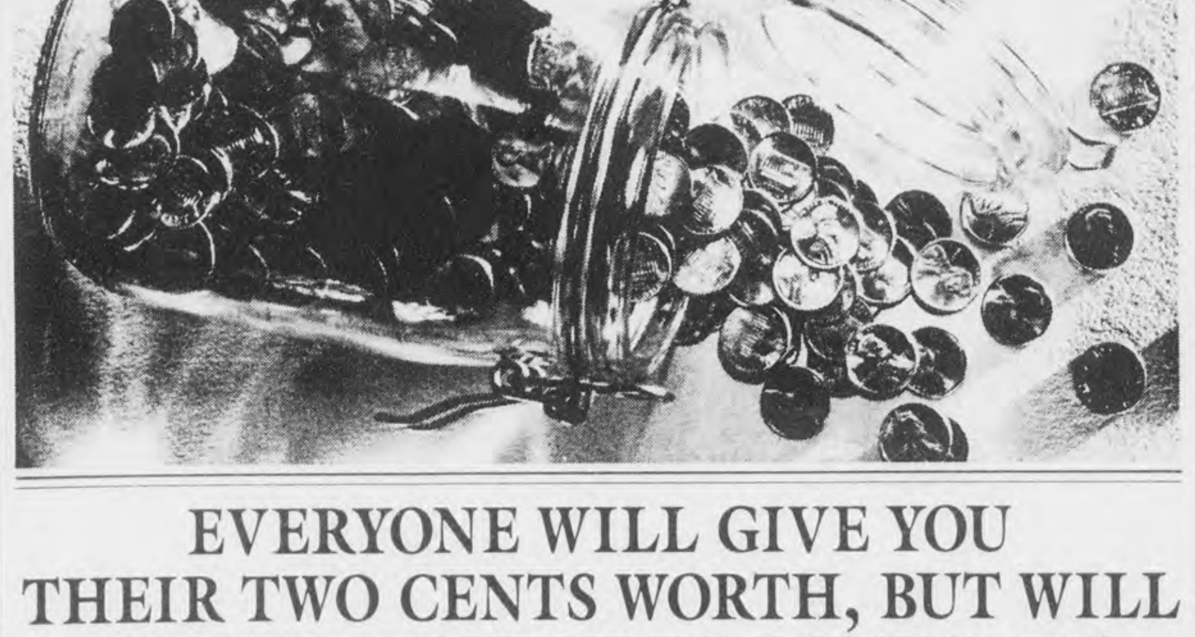
However, Opalski believes what it will come down to in the crucial situations, has nothing to do with either talent or depth.

"It comes down to who has the greatest desire to win," Opalski said.

The match versus Navy should be a close one. Navy has bounced back from a disappointing sixth place Patriot League finish last year. The team's best strength is its incalculable desire to win.

Bucknell defeated Navy during the regular season by a score of 15-10, 11-15, 15-9, 15-11. It was a very tight game, in which the key factor to the Bison victory was their intensity.

Meanwhile, regular season champion Colgate and Lehigh meet in a rematch of last year's thriller semifinal match. Colgate upended the Mountain Hawks 9-15, 15-12, 15-4, 7-15, 15-12 en route to the Patriot League Championship title.



PRINCIPLES of SOUND RETIREMENT INVESTING

EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg - from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be - working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management - managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.℠

Volleyball finishes strong, beats Holy Cross

By Jacob Lipman

Bucknellian Staff Writer

Jonah Half—The Bucknellian

Bucknell locked up the second seed in the Patriot League tournament with a win over Holy Cross.

This past weekend, Bucknell's women's volleyball team closed out the regular season in fine fashion. Prior to the second match, Bucknell's five seniors were honored for the extensive impact they have had on Bucknell's volleyball program. In the early match, Bucknell defeated Holy Cross. The team then ended the regular season by sweeping Columbia in three games, giving the Bison an undefeated 12-0 home record. Bucknell has an overall record of 18-11, including a 4-2 record in Patriot League play.

Bucknell's first opponent, Holy Cross, brought with them a less-than-desirable 0-22 overall record. Despite the winless record, the Crusaders showed a high level of desire and fought valiantly, before falling to the Bison by a score of 15-9, 15-13, 15-4.

Holy Cross grabbed an early 3-0 lead in game one but Melissa Wharton '98 had a few blocks over the next couple of plays to shift the momentum. Bucknell momentarily went ahead 4-3, only to have the Crusaders tie the game at 4-4.

The Bison then went on a 6-1 run to give them a seemingly safe 10-5 lead. Holy Cross retaliated by scoring three straight points before Bucknell called for a time-out in order to regroup. Following the time-out, Bucknell regained the serve after a sideout. Annalise Meidman '97 then proceeded to serve three consecutive aces, giving the Bison a 13-8 lead, which they would not relinquish.

Early in the second game, the lead seesawed back and forth between the two teams. Holy Cross managed to take a 5-4 lead but the Bison tied it up shortly thereafter. The Crusaders moved ahead only to have Bucknell tie it again at 7-7.

Holy Cross then scored five straight points to regain the lead. The Bison stopped the Crusader's run when Emily Pomeroy '99 hit one down the middle of the Crusader's defense for the kill. Two plays later, Pomeroy narrowed the deficit to three with a block for a point.

Holy Cross scored the next point to give them a 13-9 lead. However, it was the last point they would score in the game. Amy Turnshek '98 set the ball beautifully for Wharton, who then blasted a kill to give the Bison the serve.

Bucknell surged forward, scoring four straight points and tying the game. The Bison went ahead 14-13 on a combined block by Wharton and Michelle Lesh '00. Turnshek sealed the win with a service ace.

Game three saw Holy Cross take an early 2-0 lead. The Bison moved ahead 3-2 but the Crusaders tied it at 3-3 almost right away. However, Bucknell took control from there on out. The team hit excellently in jumping out to a 12-3 lead. Susie Teitsworth '97 racked up a few kills during the 9-0 run.

After each team scored another point, Allison Morris '97 had a spectacular dig that kept the rally alive. Teitsworth ended the rally with a well-placed kill just inside the sideline. Cameron Adams '99 ended the match with a kill in front of a diving Holy Cross defender.

Pacing the Bison offense were Wharton and Teitsworth, who had 13 and 11 kills respectively. Wharton also added three solo blocks and three block assists. Pomeroy led the team defensively, with nine digs.

Bucknell's next opponent was a young Columbia team. Bucknell had difficulty early on in the match but the experience of the Bison, helped them in crucial situations. The final score was 15-11, 15-6, 16-14 in favor of Bucknell.

Columbia raced to a 4-0 lead in the first game but the Bison won a very long and exciting rally for the sideout. Pomeroy hit one down with authority to draw the Bison within two at 4-2.

A few points later, with Columbia leading 6-3, Heather Mon-

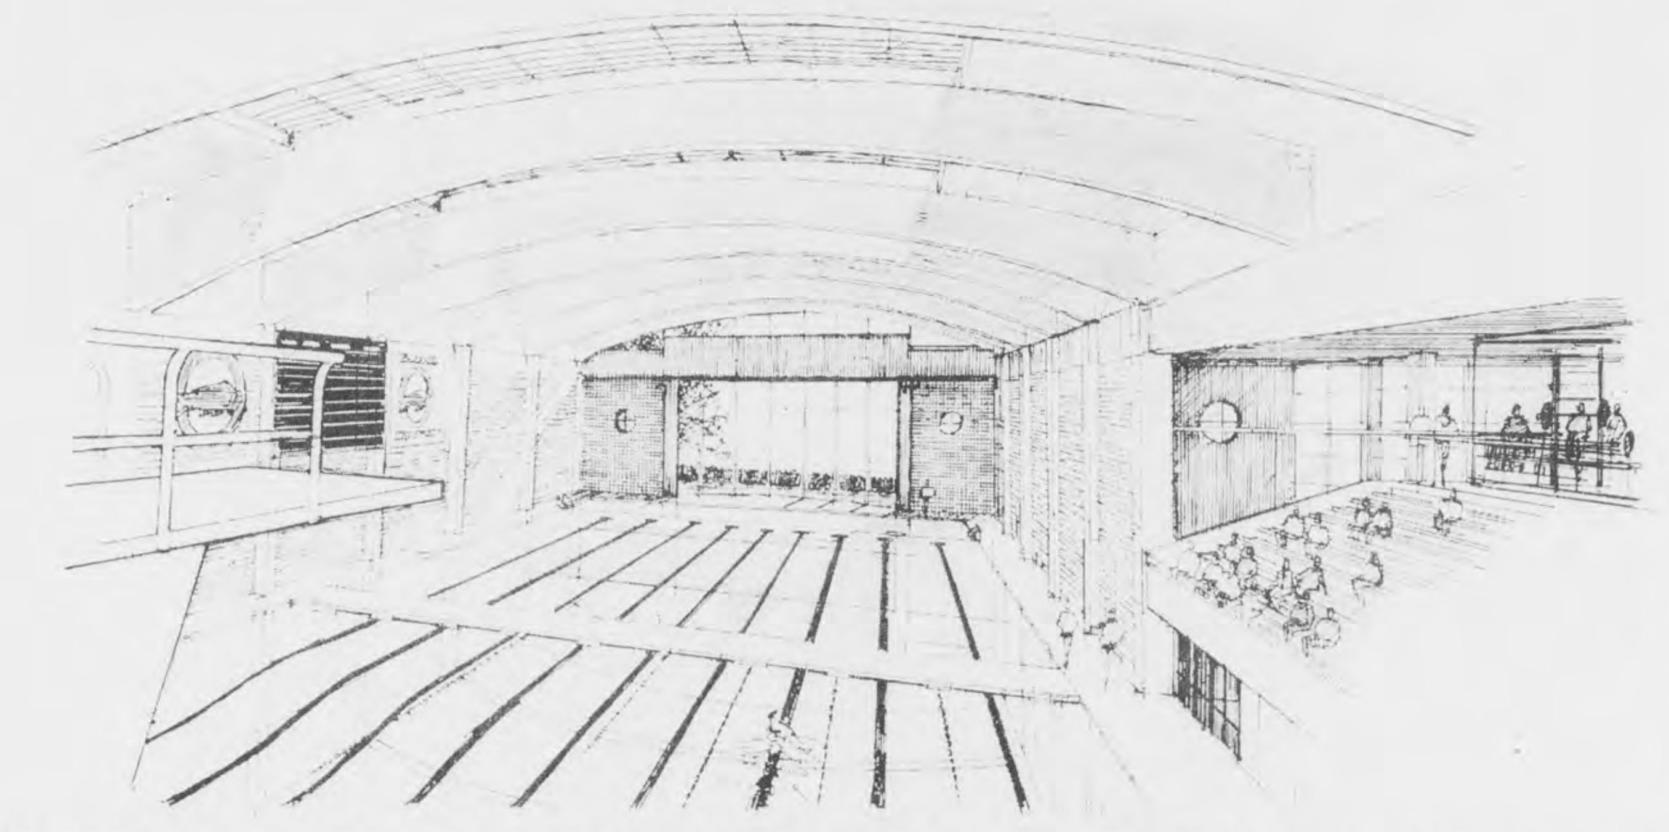
NATATORIUM
From Page 1



The proposed natatorium shown in this sketch, for the purposes of the Capital Campaign, will enable the swimming, diving, and water polo teams to practice simultaneously. The facility has been planned as an annex to the Davis Gymnasium.

Campaign to fund new swimming facility

in the gym, which would most likely go at the north end, although that has not been finalized at this time.

The new natatorium will also help to make the facilities more accessible to the disabled, in that an elevator will be added that will serve both levels of the Davis Gym and the Fieldhouse.

Although manager of development communications Bob Gaines stressed that "the new swimming facilities are only a small part of the overall program," he did admit that "it will be a great recruiting tool," in addition to "providing many new advantages."

Such advantages include the size of the new pool, which is considerably larger than the current, outdated Freas-Rooke Pool, and the moving bulkhead will allow two teams to practice at once. At the present time swimming, diving, and water polo all have to share the same pool, which requires the coaches to stagger the time in which the athletes use the pool, often resulting in early morning or late night practices.

"[The new pool] allows both teams to practice at the same time, as well as at times that are convenient to both coaches and students," said Mike Wooster, water polo coach.

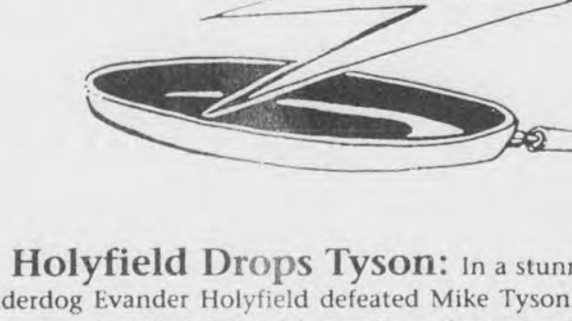
The effects of the new pool are many fold for the athletic programs, in particular the water polo team. Currently, with the smaller Rooke-Freas pool, water polo was often at a disadvantage against their opposition, who were used to playing in a regulation pool. "In addition to recruiting, the new pool will make us equal to the other top teams," Wooster said.

The old pool also hurt the current Bison teams in that it is difficult to carry a lot of players, and in fact, Wooster is considering cutting the water polo team down to 18 players from 24, because "there's not enough pool time to go around."

The building of the new facilities is not without concern about money and space. Gaines dismissed these major concerns, stating that "the new facilities will not infringe on the soccer field," as well as noting that the money "will be used to both pay for [the natatorium] and maintain it."

Goals for the groundbreaking of the new natatorium, according to Gaines, are within "two to three years."

Flash in the Pan



Holyfield Drops Tyson: In a stunning upset, 11:1 underdog Evander Holyfield defeated Mike Tyson by TKO in the 11th round of their fight this past Saturday in Las Vegas. Holyfield came out strong early, using his reach advantage to keep Tyson at bay, and counter-punching effectively enough to take the early rounds, and eventually knocked Tyson down in the fourth round—only the second time Tyson has ever been knocked down. Tyson rebounded to fight Holyfield fairly evenly until the 10th round, in which Holyfield took control, and the fight was stopped a round later. With the victory, the Atlanta native takes the WBA Heavyweight Championship, and becomes only the second man in history (along with Muhammad Ali) to hold the heavyweight title on three separate occasions. The loss for Tyson was only the second of his career (Buster Douglas being the other), and his first loss since his release from prison. The two sides are discussing a possible rematch in June of 1997.

Smoltz, Hentgen Take Cy Young Awards: John Smoltz continued the dominance of the Atlanta Brave pitching staff in the Cy Young award, as he handily won the NL award over Florida Marlins pitcher Kevin Brown. Smoltz had a record of 24-8 with a 2.94 earned run average, as well as posting a 3-1 postseason record with an ERA under one. The AL voting produced quite a surprise, as heavy favorite Andy Pettitte of the New York Yankees was edged by Toronto pitcher Pat Hentgen in the second closest vote in AL history. For the year, Hentgen posted a 20-10 record with a 3.22 ERA, but the Blue Jays faded badly, finishing 74-88, while Pettitte led the Yankees to a World series victory. Hentgen is the first-ever player from a Canadian team to win the Cy Young award.

Cowboys rebound: The Dallas Cowboys, in danger of falling to 5-5, came back to erase a 10 point deficit to defeat the S.F. 49ers 20-17 in overtime. Elvis Grbac, filling in for the injured Steve Young, threw a crucial interception deep in 49ers territory, and the defending Super Bowl champions converted the turnover into a touchdown to tie the game 17-17, and go into overtime. The Cowboys then won the game on a 26-yard field goal by Chris Boniol. In addition, the Cowboys gained a game on the Eagles, Redskins, and Packers, all of who dropped their Sunday contests. The Packers and the Cowboys play this Monday night..

Say What: In related news, San Fransisco mayor Willie Brown blasted backup QB Elvis Grbac on Tuesday, calling him an "embarrassment to mankind," and saying that Grbac would never play in any stadium that he "would assist to be built." Grbac took total responsibility for the loss, but did admit that he was ill-prepared for the game due to problems with his son, who suffers from spina bifida.

Ron Rockett '99 and the Bison take on Fordham. Preview on Page 15.

Cadets deal soccer first round loss

By Eric Keber
Bucknellian Staff Writer

Beetna Kim—The Bucknellian
Jessica Smith '00 and her team lost to Army in Patriot League playoffs.

The Bucknell women's soccer team traveled to Colgate this weekend to play in the Patriot League Tournament but was sent home early after losing 5-1 against Army on Saturday.

Army went ahead 1-0 with only 12 minutes elapsed in the first half, but was answered when Liz Woodrow '98 assisted Christina Ringwood '00 in scoring for the Bison.

Army then went ahead for good when the three-time all-league selection Holly Pedley scored for the Cadets. It had been an evenly matched game until halftime, but in the second half Army came out stronger and put an end to the Bison's season.

Pedley added another goal at the 78:39 mark to make the score 3-1. Army scored two more times in the next eight minutes. The Bison were out shot 24-7.

In the final game of her record-breaking career at Bucknell, goalie Becky Snover '97 made nine saves.

"I thought we were well prepared. I thought the team was excited and ready to play," commented Head Coach Toby Lovecchio who was obviously upset with the outcome of the game. The women's final record was 8-8-2 overall and 3-2-1 in Patriot League play.

"We're really upset that the season didn't end on a win," remarked Maura Diorio '97 who expressed the sentiments of the entire squad.

Despite the loss, Lovecchio is proud of his team . "We were beaten by a better team, but the kids never gave up. They kept fighting to the end."

The night before, the Patriot League awards ceremony was held to honor the players selected to the all-league teams. Sarah Stopper '00 was selected to the first team as a defender while Woodrow, Katie Fink '99, and Katie McElligott '00 all made second team honors.

Stopper compiled five points this year for the Bison, started nine games, and was instrumental in much of the team's success this season.

Woodrow, who was selected for the first team last season, led the Bison this year in scoring with seven goals, which brings her three-year total to 27.

Fink was also an instrumental defender in Bucknell's strong defense this season. Although she did not make headlines, Fink started all 18 games and played solidly throughout the season.

McElligott also started all 18 games and scored five goals.

The Bucknell women's soccer program will lose four seniors to graduation this spring. Lovecchio will be without one of his best goalies ever when Snover graduates. He will also miss defensive players Heather Andrews and Amy Green, and midfielder Diorio.

"I'm really going to miss them," Lovecchio said. "Not just for soccer but as individuals. Everything they've given has been positive, and they've helped this program grow. Their personalities have added to the tightness of the team."

"The last four years have been really great and were the best part of my Bucknell experience," said the departing Diorio. "I don't know what I'll do without them."

Andrews echoed Diorio's remarks. "It's been the biggest part of my life the last four years, and that's because of my coach and the players. My best friends are on the team."

"They've really helped me, helped me grow as a coach. They were kids I could talk to and I would take any one of them as a daughter," Lovecchio said; possibly the biggest compliment the departing seniors could receive.

Little means a lot for Bison defense

By Luke David
and John Siris
Bucknellian Staff Writers

Bucknellian File Photo
Bucknell linebacker Brandon Little '97

It's more than halfway through the season and senior Brandon Little's football team is undefeated. He's leading the nation in sacks, points allowed, yards allowed, and total offense. For a team that seems destined for a national championship, Little is the head coach, quarterback, running back, and the entire defensive unit.

Little's team, the South Carolina Gamecocks, is bulldozing opponents like a runaway truck. As he sits in his room playing "College Football '97" for the Sega Genesis, Little's rugged exterior releases a small boyish grin as he hurdles defenders on the way to the end zone. "This game is too easy," Little remarked.

Unfortunately for him, things haven't been going quite the same way for his other team: the Bucknell Bison. After opening the 1996 season with a blowout of Towson State, the Bison went on to drop four straight. Just when it seemed as though they were coming out of their funk, with consecutive wins over Princeton, Holy Cross, and Lehigh, the Bison dropped a crucial league game to Lafayette.

Although the team may still have a shot at the Patriot League title, it has been a season full of frustration and disappointment for Little and the rest of the Bison. "All of the pain from those losses can be cured with two wins and a league championship at the end of the season," says Little.

With or without a league championship, Little is certainly having a season to remember. With two more games to play, Little leads the team with 103 tackles, including 21 against Lafayette. His gutsy play against Lehigh earned him Patriot League defensive player of the week honors for the second time in his career.

Add to those stats Little's five sacks and three interceptions, and you've got one of the premier defensive players in the league.

"Brandon's got a huge heart, he'll never give up, and he's pound-for-pound, the best in the league," says junior defensive lineman Mark Imbertson. "He's one of those guys that leads not only with his words, but with his actions as well."

Success has not come easy for Little as he was forced to learn a new position, moving from outside to inside linebacker half way through the season. Little spent part of his sophomore season at defensive back, but found his niche in Coach Tom Gadd's new defensive system as an outside linebacker.

As an outside linebacker, Brandon used his speed and quickness to chase down runners, but in the middle, he has been forced to take on a new persona.

At 210 pounds, Little is close to 30 pounds lighter than the average middle linebacker, and has had to line up against far heavier offensive linemen for the past four games. He has so far proven himself worthy of the challenge, having some of his best games at the new position.

When asked about the move, Brandon responds with his usual modesty: "I knew that coach Gadd had his reasons for the move. I figured if it would help the team, I would do the best I could."

In years to come, Bucknell will definitely miss Little's defensive abilities. More than that, they may miss his personality and leadership as well.

"Brandon doesn't have to say too much because he has such a strong personality. When he says something, he means it," said senior safety Jack Boyle.

So long as there is computer football, Little will be playing the game that he loves. In the twilight of his college career, however, Little has a lot to reflect on. For the past four years Bucknell fans have been lucky enough to watch a player with the determination, heart, and competitiveness of Brandon Little. Hopefully, Brandon will get a Patriot League Championship ring to wear as he competes for more Sega national championships.

Lafayette offense controls ball, drops Bison from first

By Brett Tomlinson
Bucknellian Staff Writer

Riding on the wings of the three-game winning streak, the Bucknell football team traveled to Easton last weekend for its final road game and a well-awaited contest with Lafayette. However, the Bison's trail to the Patriot League title took a detour as the Leopards' smash-mouth offense ran roughshod over Fisher Field.

Playing at Lafayette has never been a picnic for Bucknell, which has won only once in their last 10 contests at Fisher Field, but things looked promising for the Bison, who beat Lafayette 30-11 at home last year.

Blocking out thoughts of the nightmare game of 1994, when the eventual-Patriot League champion Leopards racked up 538 yards of total offense in a 56-14 blowout, the Bison defense entered the game as the top defensive unit in the league. That distinction meant nothing to Coach Bill Russo's Leopards, though.

Russo's squad played its trademark smash-mouth style to perfection, using strong runs behind an immense offensive line to open up the passing game. By the end of the day, the Leopards had held the ball for over 40 minutes, piling up 465 yards for a 23-7 victory.

Tailback Leonard Moore, who Bucknell expected to be the top rushing weapon for the Leopards, left the game in the first quarter after fumbling twice, but reserve Jasen O'Neil filled in quickly, bursting forward for a career-high total of 117 yards.

The Leopards got on the board first, but Bucknell was able to keep the game close in the second quarter when free safety George Howanitz '97 stripped the ball from a Leopard receiver, giving Bucknell the ball at the Lafayette 35 yard line.

The offense quickly got to work, with quarterback Jim Fox '97 completing a 19-yard pass to Ardie Kissinger '99. In just five plays, the Bison found the end zone on a four-yard play action pass from Fox to Jeff Bombich '98.

Rich Miller '97 added the extra point to tie the score at 7-7.

The Bison offensive line struggled, however, and the offense was unable to generate another scoring drive.

Meanwhile, the Leopards continued to dominate the line of scrimmage. They took a 14-7 lead with 42 seconds left in the first half on a dive play by fullback Todd Stahlnecker.

In the second half, Lafayette managed to eat the clock with an effective ball control offense, and the Bison defense began to tire. The defense did not succumb to the relentless pressure of the Leopards, however, holding each of the three second half drives to field goal attempts. Kicker Brian Menecola connected on all three tries to make the score 23-7.

"We knew they were big and strong up front," said defensive back Jack Boyle '97. "We thought that they'd come at us, right up the middle." But the Bison defense did not expect to have to face the bruising Lafayette line for almost 41 minutes.

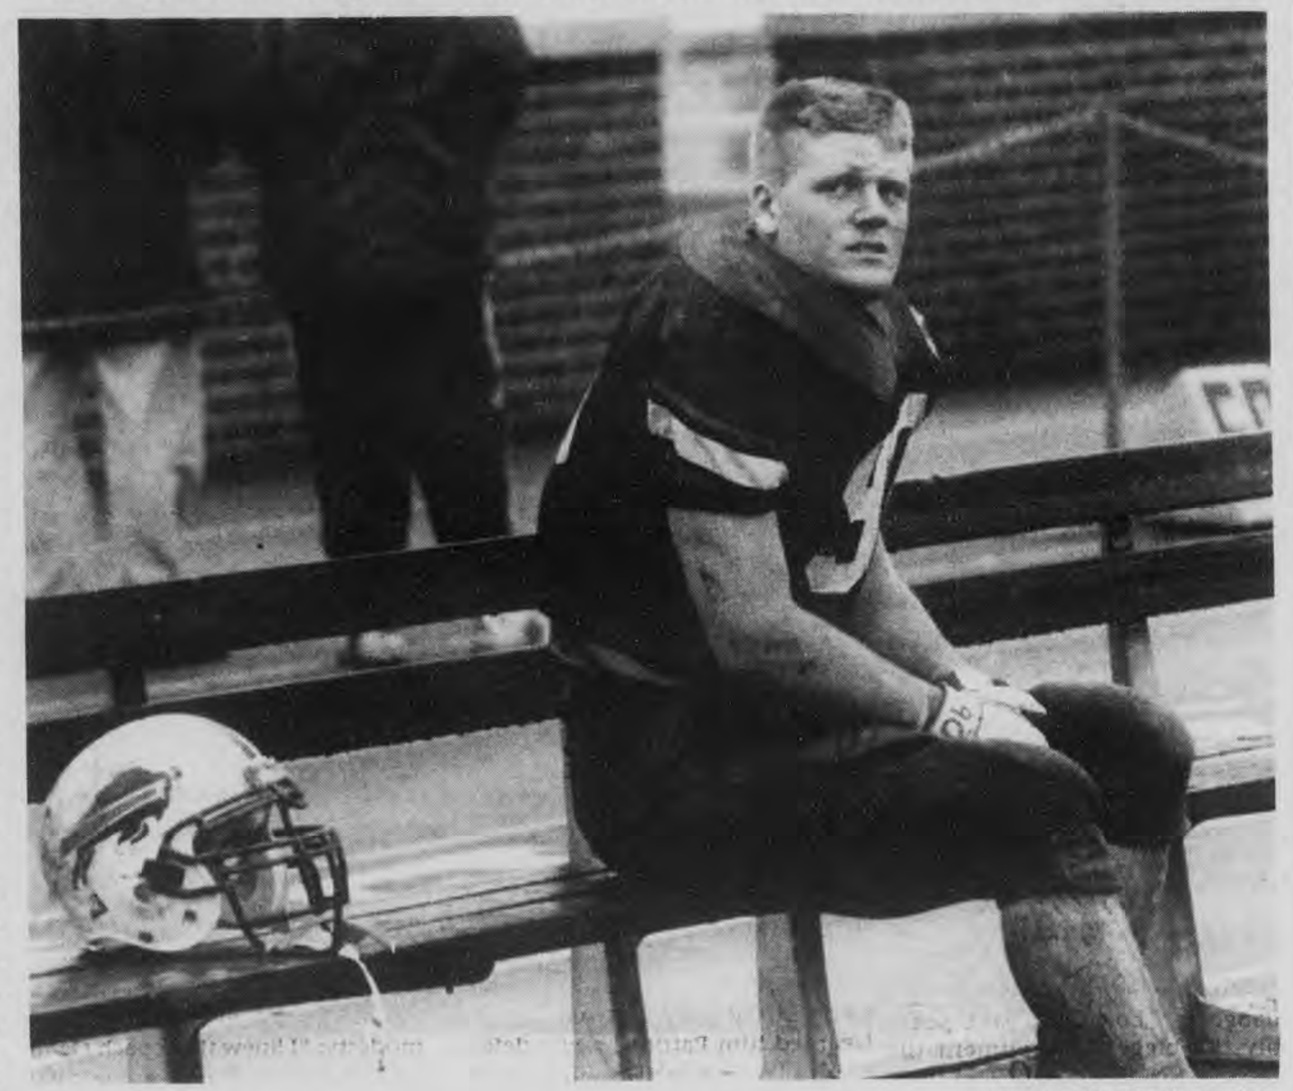
The statistics were brutal for the Bison offense. On the day, Bucknell managed to accumulate 141 yards, and the Bison were held below 10 first downs for the third time this year. Fox threw three interceptions, and for the ninth time this year on Bucknell's schedule, the team with fewer turnovers won.

Fox was forced to stick to quick passing routes due to relentless pressure, and tailback Rich Lemon '97 had another lackluster game (12 carries, 44 yards).

The loss knocked Bucknell out of sole possession of first place in the Patriot League, but on the bright side, the Bison are still very much in contention for the league crown. At 2-1, they now stand tied with Lehigh and Colgate and half a game ahead of Lafayette (1-1).

If Bucknell can win its final two games, the team will be guaranteed a share of the title, and could possibly earn the crown outright.

Bucknell completes its 1996 schedule at home, facing Fordham this week and Colgate in the season finale on Nov. 23. Both games will begin at 12:30 p.m.



Jonah Half—The Bucknellian
Eric Green '00 and the defensive line spent over 40 minutes on the field against Lafayette in last week's loss. The Bison hope to generate more offense in this week's contest against Fordham.

Bison look to rebound at home against Rams

By Luke David
and John Siris
Bucknellian Staff Writers

Bucknell will be hoping to rebound from an embarrassing 23-7 loss to league rival Lafayette this week, as the Bison (4-5, 2-1) return home to Christy Mathewson Stadium to face the Fordham Rams (2-7, 1-2).

What would have been forecasted as an easy Bison victory has become a crossroads of the season for Bucknell after their putrid performance last week. Bucknell yielded 465 yards while gaining 141, managing only eight first downs to Lafayette's 25. The Leopards owned the ball for nearly 41 of the 60 minutes of what the Bison call a football game.

Fordham comes off an equally disappointing performance, a 34-13 thrashing at the hands of Patriot League co-leader Colgate. Injured quarterback Kevin Szocik returned for the Rams against Colgate but completed only 12 passes for 137 yards and threw an interception, one of the four Fordham turnovers. Szocik leads an offense that has passed suprisingly well, averaging 218.2 yards a game, but that has trouble finding the endzone, averaging only 17.2 points a game.

Fordham's ground game is spearheaded by the 5'9", 192 pound junior Lance Shaw, who leads the team with 646 yards on the ground. His 5.8 yards per carry is tops in the league and he has scored four touchdowns.

The sole bright spot in Fordham's season has been special teams play. School record-setting punter Barry Cantrell has been averaging 40.2 yards a kick, and returnman Larry Leith holds the school record as well with 1069 return yards. Bucknell fans know firsthand though, a football team does not want to rely on its punting game week in and week out.

If there is going to be a game where the stagnant Bison offense will come to life it will be this Saturday when it will line up against a soft Ram defense that is in the bottom third of I-AA football programs. If it depended on rankings though, don't bet on Bucknell, whose offense ranks 113 out of the 116 Division I-AA teams in rushing offense (73 yards/game) and 111th in total offense (230.44 yards/game).

Bucknell has had a good deal of consistency and hard play on the defensive side of the ball but the Bison need to find balance if they want to make a realistic run at the league title. Defense may win championships, but it needs more help than it has been getting from the Bison offense. If Bucknell does not put a significant amount of points on the board, it will need to force at least four Fordham turnovers to come away with a win.

VOLLEYBALL

From Page 13

taperto '97 hit a cross-court kill. The Bison tied the game behind the hard hitting of Wharton.

After Columbia recaptured the lead at 7-6, Pomeroy hit one from the back row that slipped through the Columbia defense. The Bison then scored two points when Wharton and Turnshek combined for two blocks on two consecutive plays. Pomeroy added a block of her own on the next play, staking the Bison to a 10-7 lead.

Columbia countered with three straight points as the score was knotted at 10-10. The Bison luckily had the red hot hitting of Pomeroy on their side. Pomeroy blasted a kill to put the Bison ahead once again. With the Bison leading 12-11, Pomeroy spiked another one, which deflected off two Columbia blockers and into a gap in the defense.

The Bison needed the serve and one more point to earn the victory in game one. Lesh gave the team the serve when she ended a seemingly never-ending rally with a kill in the back left corner of the court. Bucknell scored on the next play to win the grueling first game.

The second game began much better than the previous games had. Susie Teitsworth opened up the scoring with a hit that landed in bounds on the back line. Bucknell jumped out to a 4-0 lead, and then extended it to a 10-1 lead. Columbia was literally hurting. During one rally, Wharton hit the ball hard into a Columbia player, evoking "Ooooh, that had to hurt" from someone in the stands.

Columbia was able to get back into the game with a 4-0 run but Wharton stopped them with another spectacular kill. Pomeroy gave Bucknell a 13-5 lead with a spike through a block and Bucknell capitalized on Columbia's errors to end game two.

Bucknell fell behind early in the third game but Pomeroy and Turnshek teamed up for a block to put the Bison on the scoreboard. Teitsworth tied the score at 3-3 with a service ace. Lesh then hit for a kill and Teitsworth added another ace, putting Bucknell ahead 5-3.

Later on, Bucknell had stretched the lead to 9-5. Columbia then ran off six straight points to go ahead 11-9. Wharton stopped Columbia's point scoring with yet another kill and Bucknell scored three points to regain the lead.

The score remained 12-11 in Bucknell's favor for quite some time, but Lesh and Wharton assisted on a block to end the stalemate. Though it looked like Bucknell might cruise to victory, Columbia somehow managed to score three points in a row. Down 14-13, one point away from losing the third game, Turnshek had a key block to return the serve to the Bison. After knotting the score 14-14, Tristen Voget '99 hit the ball off a defender's block and into the stands, putting the Bison within one point of victory. Turnshek and Adams gave the Bison that point, when they combined for a block for the final point on the next play.

Pomeroy finished the game with 14 kills and Wharton had 12 kills. The team blocked very well, notching one solo block and 18 block assists. Turnshek led the team with five block assists. She also led the team with 42 assists on kills. Teitsworth and Morris were tops on the team in digs with 14 and 10 respectively. *See page 12 for Patriot League previews.*

Fast Fact: Melissa Wharton '98 leads the Patriot League in kills and kill pct., while Susie Teitsworth '97 is second in digs.

Cadets deal soccer first round loss

BY ERIC KEBER

Bucknellian Staff Writer

Beetna Kim—The Bucknellian

Jessica Smith '00 and her team lost to Army in Patriot League playoffs.

The Bucknell women's soccer team traveled to Colgate this weekend to play in the Patriot League Tournament but was sent home early after losing 5-1 against Army on Saturday.

Army went ahead 1-0 with only 12 minutes elapsed in the first half, but was answered when Liz Woodrow '98 assisted Christina Ringwood '00 in scoring for the Bison.

Army then went ahead for good when the three-time all-league selection Holly Pedley scored for the Cadets. It had been an evenly matched game until halftime, but in the second half Army came out stronger and put an end to the Bison's season.

Pedley added another goal at the 78:39 mark to make the score 3-1. Army scored two more times in the next eight minutes. The Bison were out shot 24-7.

In the final game of her record-breaking career at Bucknell, goalie Becky Snover '97 made nine saves.

"I thought we were well prepared. I thought the team was excited and ready to play," commented Head Coach Toby Lovecchio who was obviously upset with the outcome of the game. The women's final record was 8-8-2 overall and 3-2-1 in Patriot League play.

"We're really upset that the season didn't end on a win," remarked Maura Diorio '97 who expressed the sentiments of the entire squad.

Despite the loss, Lovecchio is proud of his team . "We were beaten by a better team, but the kids never gave up. They kept fighting to the end."

The night before, the Patriot League awards ceremony was held to honor the players selected to the all-league teams. Sarah Stopper '00 was selected to the first team as a defender while Woodrow, Katie Fink '99, and Katie McElligott '00 all made second team honors.

Stopper compiled five points this year for the Bison, started nine games, and was instrumental in much of the team's success this season.

Woodrow, who was selected for the first team last season, led the Bison this year in scoring with seven goals, which brings her three-year total to 27.

Fink was also an instrumental defender in Bucknell's strong defense this season. Although she did not make headlines, Fink started all 18 games and played solidly throughout the season.

McElligott also started all 18 games and scored five goals.

The Bucknell women's soccer program will lose four seniors to graduation this spring. Lovecchio will be without one of his best goalies ever when Snover graduates. He will also miss defensive players Heather Andrews and Amy Green, and midfielder Diorio.

"I'm really going to miss them," Lovecchio said. "Not just for soccer but as individuals. Everything they've given has been positive, and they've helped this program grow. Their personalities have added to the tightness of the team."

"The last four years have been really great and were the best part of my Bucknell experience," said the departing Diorio. "I don't know what I'll do without them."

Andrews echoed Diorio's remarks. "It's been the biggest part of my life the last four years, and that's because of my coach and the players. My best friends are on the team."

"They've really helped me, helped me grow as a coach. They were kids I could talk to and I would take any one of them as a daughter," Lovecchio said; possibly the biggest compliment the departing seniors could receive.

It's more than halfway through the season and senior Brandon Little's football team is undefeated. He's leading the nation in sacks, points allowed, yards allowed, and total offense. For a team that seems destined for a national championship, Little is the head coach, quarterback, running back, and the entire defensive unit.

Little's team, the South Carolina Gamecocks, is bulldozing opponents like a runaway truck. As he sits in his room playing "College Football '97" for the Sega Genesis, Little's rugged exterior releases a small boyish grin as he hurdles defenders on the way to the end zone. "This game is too easy," Little remarked.

Unfortunately for him, things haven't been going quite the same way for his other team: the Bucknell Bison. After opening the 1996 season with a blowout of Towson State, the Bison went on to drop four straight. Just when it seemed as though they were coming out of their funk, with consecutive wins over Princeton, Holy Cross, and Lehigh, the Bison dropped a crucial league game to Lafayette.

Although the team may still have a shot at the Patriot League title, it has been a season full of frustration and disappointment for Little and the rest of the Bison. "All of the pain from those losses can be cured with two wins and a league championship at the end of the season," says Little.

With or without a league championship, Little is certainly having a season to remember. With two more games to play, Little leads the team with 103 tackles, including 21 against Lafayette. His gutsy play against Lehigh earned him Patriot League defensive player of the week honors for the second time in his career.

Add to those stats Little's five sacks and three interceptions, and you've got one of the premier defensive players in the league.

"Brandon's got a huge heart, he'll never give up, and he's pound-for-pound, the best in the league," says junior defensive lineman Mark Imbertson. "He's one of those guys that leads not only with his words, but with his actions as well."

Bucknellian File Photo

Bucknell linebacker Brandon Little '97

Success has not come easy for Little as he was forced to learn a new position, moving from outside to inside linebacker half way through the season. Little spent part of his sophomore season at defensive back, but found his niche in Coach Tom Gadd's new defensive system as an outside linebacker.

As an outside linebacker, Brandon used his speed and quickness to chase down runners, but in the middle, he has been forced to take on a new persona.

At 210 pounds, Little is close to 30 pounds lighter than the average middle linebacker, and has had to line up against far heavier offensive linemen for the past four games. He has so far proven himself worthy of the challenge, having some of his best games at the new position.

When asked about the move, Brandon responds with his usual modesty: "I knew that coach Gadd had his reasons for the move. I figured if it would help the team, I would do the best I could."

In years to come, Bucknell will definitely miss Little's defensive abilities. More than that, they may miss his personality and leadership as well.

"Brandon doesn't have to say too much because he has such a strong personality. When he says something, he means it," said senior safety Jack Boyle.

So long as there is computer football, Little will be playing the game that he loves. In the twilight of his college career, however, Little has a lot to reflect on. For the past four years Bucknell fans have been lucky enough to watch a player with the determination, heart, and competitiveness of Brandon Little. Hopefully, Brandon will get a Patriot League Championship ring to wear as he competes for more Sega national championships.

Lafayette offense controls ball, drops Bison from first

BY BRETT TOMLINSON

Bucknellian Staff Writer

Riding on the wings of the three-game winning streak, the Bucknell football team traveled to Easton last weekend for its final road game and a well-awaited contest with Lafayette. However, the Bison's trail to the Patriot League title took a detour as the Leopards' smash-mouth offense ran roughshod over Fisher Field.

Playing at Lafayette has never been a picnic for Bucknell, which has won only once in their last 10 contests at Fisher Field, but things looked promising for the Bison, who beat Lafayette 30-11 at home last year.

Blocking out thoughts of the nightmare game of 1994, when the eventual-Patriot League champion Leopards racked up 538 yards of total offense in a 56-14 blowout, the Bison defense entered the game as the top defensive unit in the league. That distinction meant nothing to Coach Bill Russo's Leopards, though.

Russo's squad played its trademark smash-mouth style to perfection, using strong runs behind an immense offensive line to open up the passing game. By the end of the day, the Leopards had held the ball for over 40 minutes, piling up 465 yards for a 23-7 victory.

Tailback Leonard Moore, who Bucknell expected to be the top rushing weapon for the Leopards, left the game in the first quarter after fumbling twice, but reserve Jasen O'Neil filled in quickly, bursting forward for a career-high total of 117 yards.

The Leopards got on the board first, but Bucknell was able to keep the game close in the second quarter when free safety George Howanitz '97 stripped the ball from a Leopard receiver, giving Bucknell the ball at the Lafayette 35 yard line.

The offense quickly got to work, with quarterback Jim Fox '97 completing a 19-yard pass to Ardie Kissinger '99. In just five plays, the Bison found the end zone on a four-yard play action pass from Fox to Jeff Bombich '98.

Rich Miller '97 added the extra point to tie the score at 7-7.

The Bison offensive line struggled, however, and the offense was unable to generate another scoring drive.

Meanwhile, the Leopards continued to dominate the line of scrimmage. They took a 14-7 lead with 42 seconds left in the first half on a dive play by fullback Todd Stahlnecker.

In the second half, Lafayette managed to eat the clock with an effective ball control offense, and the Bison defense began to tire. The defense did not succumb to the relentless pressure of the Leopards, however, holding each of the three second half drives to field goal attempts. Kicker Brian Menecola connected on all three tries to make the score 23-7.

"We knew they were big and strong up front," said defensive back Jack Boyle '97. "We thought that they'd come at us, right up the middle." But the Bison defense did not expect to have to face the bruising Lafayette line for almost 41 minutes.

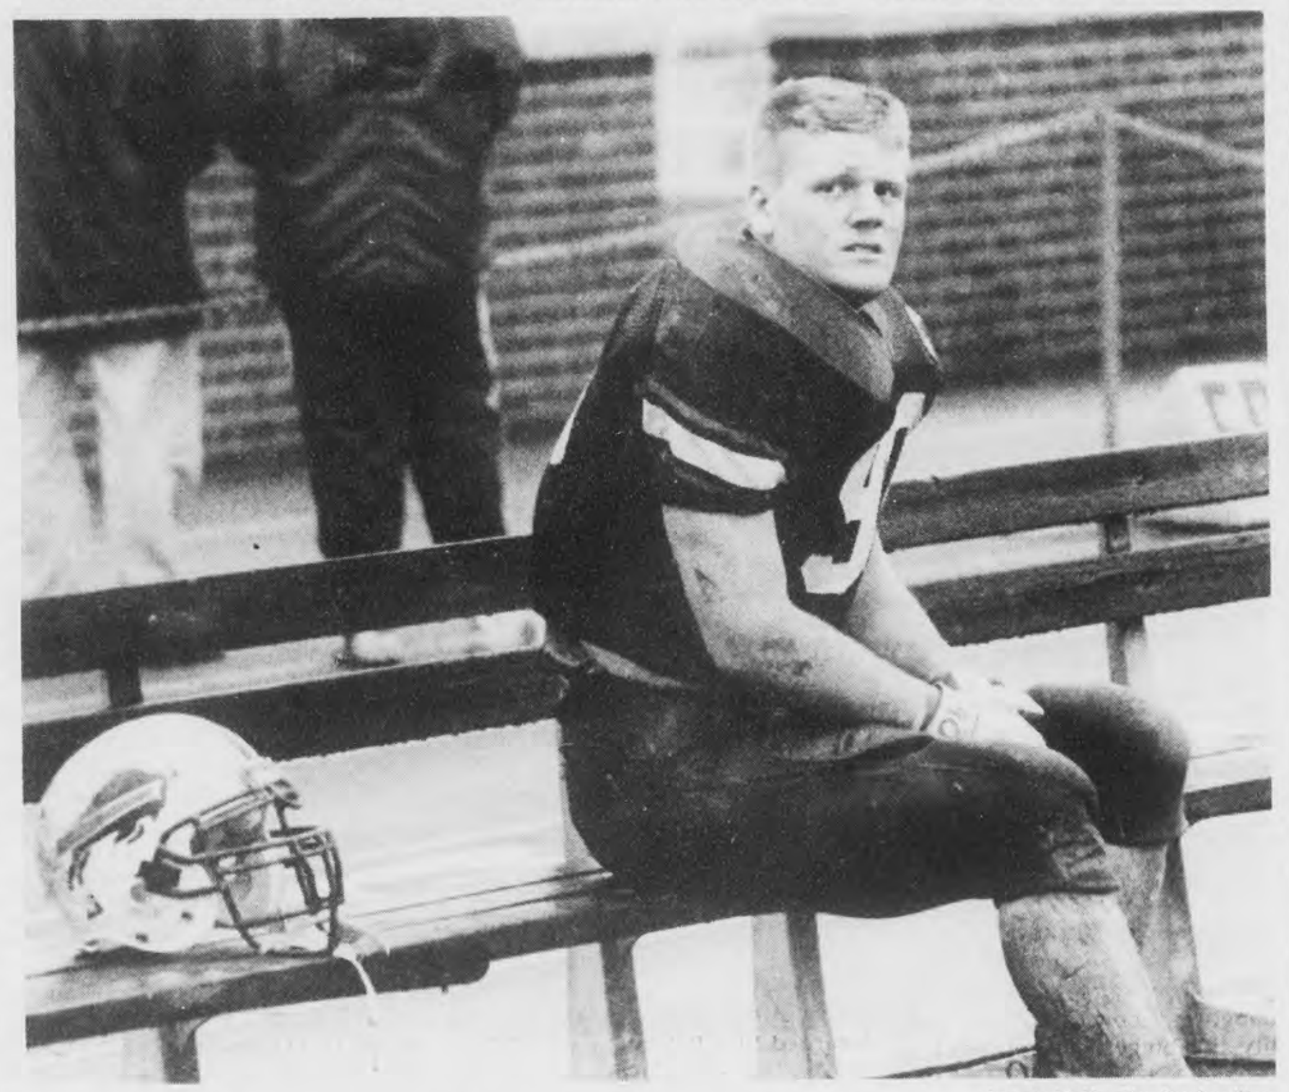
The statistics were brutal for the Bison offense. On the day, Bucknell managed to accumulate 141 yards, and the Bison were held below 10 first downs for the third time this year. Fox threw three interceptions, and for the ninth time this year on Bucknell's schedule, the team with fewer turnovers won.

Fox was forced to stick to quick passing routes due to relentless pressure, and tailback Rich Lemon '97 had another lackluster game (12 carries, 44 yards).

The loss knocked Bucknell out of sole possession of first place in the Patriot League, but on the bright side, the Bison are still very much in contention for the league crown. At 2-1, they now stand tied with Lehigh and Colgate and half a game ahead of Lafayette (1-1).

If Bucknell can win its final two games, the team will be guaranteed a share of the title, and could possibly earn the crown outright.

Bucknell completes its 1996 schedule at home, facing Fordham this week and Colgate in the season finale on Nov. 23. Both games will begin at 12:30 p.m.



Jonah Half—The Bucknellian

Eric Green '00 and the defensive line spent over 40 minutes on the field against Lafayette in last week's loss. The Bison hope to generate more offense in this week's contest against Fordham.

Bison look to rebound at home against Rams

BY LUKE DAVID
AND JOHN SIRIS

Bucknellian Staff Writers

Bucknell will be hoping to rebound from an embarrassing 23-7 loss to league rival Lafayette this week, as the Bison (4-5, 2-1) return home to Christy Mathewson Stadium to face the Fordham Rams (2-7, 1-2).

What would have been forecasted as an easy Bison victory has become a crossroads of the season for Bucknell after their putrid performance last week. Bucknell yielded 465 yards while gaining 141, managing only eight first downs to Lafayette's 25. The Leopards owned the ball for nearly 41 of the 60 minutes of what the Bison call a football game.

Fordham comes off an equally disappointing performance, a 34-13 thrashing at the hands of Patriot League co-leader Colgate. Injured quarterback Kevin Szocik returned for the Rams against Colgate but completed only 12 passes for 137 yards and threw an interception, one of the four Fordham turnovers. Szocik leads an offense that has passed suprisingly well, averaging 218.2 yards a game, but that has trouble finding the endzone, averaging only 17.2 points a game.

Fordham's ground game is spearheaded by the 5'9", 192 pound junior Lance Shaw, who leads the team with 646 yards on the ground. His 5.8 yards per carry is tops in the league and he has scored four touchdowns.

The sole bright spot in Fordham's season has been special teams play. School record-setting punter Barry Cantrell has been averaging 40.2 yards a kick, and returnman Larry Leith holds the school record as well with 1069 return yards. Bucknell fans know firsthand though, a football team does not want to rely on its punting game week in and week out.

If there is going to be a game where the stagnant Bison offense will come to life it will be this Saturday when it will line up against a soft Ram defense that is in the bottom third of I-AA football programs. If it depended on rankings though, don't bet on Bucknell, whose offense ranks 113 out of the 116 Division I-AA teams in rushing offense (73 yards/game) and 111th in total offense (230.44 yards/game).

Bucknell has had a good deal of consistency and hard play on the defensive side of the ball but the Bison need to find balance if they want to make a realistic run at the league title. Defense may win championships, but it needs more help than it has been getting from the Bison offense. If Bucknell does not put a significant amount of points on the board, it will need to force at least four Fordham turnovers to come away with a win.

VOLLEYBALL

From Page 13

taperto '97 hit a cross-court kill. The Bison tied the game behind the hard hitting of Wharton.

After Columbia recaptured the lead at 7-6, Pomeroy hit one from the back row that slipped through the Columbia defense. The Bison then scored two points when Wharton and Turnshek combined for two blocks on two consecutive plays. Pomeroy added a block of her own on the next play, staking the Bison to a 10-7 lead.

Columbia countered with three straight points as the score was knotted at 10-10. The Bison luckily had the red hot hitting of Pomeroy on their side. Pomeroy blasted a kill to put the Bison ahead once again. With the Bison leading 12-11, Pomeroy spiked another one, which deflected off two Columbia blockers and into a gap in the defense.

The Bison needed the serve and one more point to earn the victory in game one. Lesh gave the team the serve when she ended a seemingly never-ending rally with a kill in the back left corner of the court. Bucknell scored on the next play to win the grueling first game.

The second game began much better than the previous games had. Susie Teitsworth opened up the scoring with a hit that landed in bounds on the back line. Bucknell jumped out to a 4-0 lead, and then extended it to a 10-1 lead. Columbia was literally hurting. During one rally, Wharton hit the ball hard into a Columbia player, evoking "Ooooh, that had to hurt" from someone in the stands.

Columbia was able to get back into the game with a 4-0 run but Wharton stopped them with another spectacular kill. Pomeroy gave Bucknell a 13-5 lead with a spike through a block and Bucknell capitalized on Columbia's errors to end game two.

Bucknell fell behind early in the third game but Pomeroy and Turnshek teamed up for a block to put the Bison on the scoreboard. Teitsworth tied the score at 3-3 with a service ace. Lesh then hit for a kill and Teitsworth added another ace, putting Bucknell ahead 5-3.

Later on, Bucknell had stretched the lead to 9-5. Columbia then ran off six straight points to go ahead 11-9. Wharton stopped Columbia's point scoring with yet another kill and Bucknell scored three points to regain the lead.

The score remained 12-11 in Bucknell's favor for quite some time, but Lesh and Wharton assisted on a block to end the stalemate. Though it looked like Bucknell might cruise to victory, Columbia somehow managed to score three points in a row. Down 14-13, one point away from losing the third game, Turnshek had a key block to return the serve to the Bison. After knotting the score 14-14, Tristen Voget '99 hit the ball off a defender's block and into the stands, putting the Bison within one point of victory. Turnshek and Adams gave the Bison that point, when they combined for a block for the final point on the next play.

Pomeroy finished the game with 14 kills and Wharton had 12 kills. The team blocked very well, notching one solo block and 18 block assists. Turnshek led the team with five block assists. She also led the team with 42 assists on kills. Teitsworth and Morris were tops on the team in digs with 14 and 10 respectively. *See page 12 for Patriot League previews.*

Fast Fact: Melissa Wharton '98 leads the Patriot League in kills and kill pct., while Susie Teitsworth '97 is second in digs.

Holyfield-Tyson fight fixed? Don't bet on it

In a sport dominated by unfulfilled hype and unyielding corruption, last Saturday's Tyson-Holyfield title bout was a refreshing change from the status quo.

Evander Holyfield fought the odds to get into the best shape of his life at the age of 34 and stunned Iron Mike Tyson in an 11 round thriller, pounding the champ with surprising dominance.

While Holyfield's sharp skills earned him the heavyweight title, his personality and character make him a great champion. Unlike Tyson, a convicted rapist, Holyfield is a clean-cut fighter whose only flaw is a mild heart condition which kept him out of the ring a few years back.

Holyfield's unwavering commitment to excellence makes him an even more admirable champion. Tyson has caused a stir in the public eye with his brief but plentiful periods of infatuation with Islam, a highly publicized marriage to actress Robin Givens, and his troubles with the law. In addition to revealing questionable character, Tyson's past has shown a lack of commitment to his career as a boxer. Perhaps his raw talent helped him to get by through periods of lax training habits. Whatever the case, it seems Tyson finally met his match.

Commentary

Brett Tomlinson

Brett Tomlinson
Sports Co-Editor

True, Tyson already lost to Buster Douglas back in 1990, but that bout was widely regarded as a fluke. The loss to Holyfield indicates that although Tyson had a reign of dominance in the heavyweight ranks, that run is over. Unless, of course, the fight was fixed.

Fixed? A boxing match!? Why, that's the most ridiculous thing I've ever heard. What possible motivation could Tyson have to take a fall? To fix a Tyson fight, you would have to get past the highly reputable and incorruptible Don King. King would never fix a fight, especially with his top dog, Tyson, taking the fall. Sure, Tyson's gotten some bad press, but would King drop him after all these years? A fine promoter like Don King would never desert a fighter. Tyson-Holyfield II would be a big draw on pay-per-view, but could King seriously convince a renowned champion to take a fall just for the sake of a big-money rematch?

I doubt that they Tyson-Holyfield fight was fixed, but the rumor mill is churning out plenty of reasons why it could have been, and they're hard to dispute.

If there was a fix, though, it was masterful. At 10-to-1 odds, Holyfield was a big payoff, yet still a believable winner. King is already billing the match-up as a modern-day Ali-Frazier, which means big money for everyone involved and a renewed interest in heavyweight boxing. A Tyson loss seems like a small price to pay for the revival of the sport, and since King seems to do the thinking for Tyson, anything is possible.

Still, there are plenty of reasons why Holyfield's victory is absolutely feasible. First of all, you can't dispute Holyfield's conditioning advantage. Tyson came into the fight at 222 pounds, the heaviest weight of his career, whereas Holyfield was a leaner, quicker 215 with a seven and half inch reach advantage.

From the beginning, Tyson seemed confused and tentative because he was unable to attack Holyfield in his usual furious style. Some analysts are citing this as a sign of the fix, but it's also very possible that Tyson was reasonably scared because he was finally facing an opponent who could beat him. Since his release from prison, Tyson has fought some of the most ridiculous cream puff opponents in the history of boxing. Holyfield was a stark contrast, and perhaps a bit of a nightmare for an unprepared Tyson.

The truth is that if Holyfield had beaten Tyson back in 1991, before Tyson went to jail, no one would have cried fix. There would have been no motivation for King to rig the fight, with his golden boy's image still mostly intact. Yet experts have been saying all along that Tyson has lost his skills from his time of incarceration. So why is it so unbelievable that Holyfield dropped him in 1996?

Fix or no fix, I doubt that Holyfield had anything on his mind last Saturday besides beating Mike Tyson, and the best competitor won. Evander Holyfield is the heavyweight champion until someone proves otherwise, and Mike Tyson will get that chance soon enough.

Let's just hope Don King doesn't screw up this new primetime rivalry.

Women swimmers dominate Dragons

Men's squad swims strong but falls in final race, loses by three points at home

By Erica Freidlander

Bucknellian Staff Writer

The Bucknell women's swim team crushed Drexel this past weekend in its third meet of the season. The Bison women dominated the meet and ended the day with a total of 154 points compared to their opponent's meager 40.

The men's team did not fare as well however, falling to the Dragons by three points. Bucknell struggled to control the meet, but in the end, Drexel squeaked by in the final event, winning 122-119.

Dominating the Drexel meet on the women's side was Bucknell's Kate Wood '00 who took first place in the 1000 meter free and the 200 meter butterfly. She also beat Bucknell's pool record in the 500 meter free which was held previously by Linda Fink. Wood swam a steady 5:08.9 to break the standing record.

Co-captain Jen Myers '98 also took two first places in the Drexel meet. In the 200 meter individual medley, Myers passed all of her opponents by going an unbeatable 2:15.54. Her other first place win for the weekend was won after she swam a 2:11.21 in the 200 meter backstroke.

The women's team held on strong to its lead through the entire meet and had no problem beating the Drexel team.

The men's swim team maintained its lead during the entire meet but faltered in the final relay. Co-captain Ethan Buckley '97 began the meet on the right foot for Bucknell by taking first place in the 200 meter free. Buckley's time of 1:46.48 beat out the second place contender by more than three seconds.

Alex Johnson '99 won first place in the 50 meter free by swimming an incredible 22.39. Johnson is considered to be one of Bucknell's most talented sprinters by both coaches and team members.

Co-captain Jay O'Neil '97 also took away one win from the struggling Drexel team when he placed first in the 200 individual medley. O'Neil swam an outstanding 2:03.29, excelling in the breaststroke above all others. Later in the meet, Antonio Lanes '98 touched out Drexel's Shawn Markey after Lanes swam a 49.26 in the 100 meter free.

The final men's win of the afternoon came from Scott Woodworth '98. He dominated in the 200 backstroke which he swam in a 2:01.29.

Until the final event, Bucknell's men's swim team was holding onto a slight lead finishing the 200 meter breast with 113 points to Drexel's 111. The 400 meter free relay was the last event of the meet, meaning whichever team took first place would ultimately win the meet.

Both teams swam their hardest but Drexel's relay took first, beating Bucknell by mere seconds to complete their come from behind victory.

This Saturday, Bucknell's men's and women's teams will host Georgetown University at the Freas-Rooke Pool.

Lehigh rallies in second half to eliminate Bison

By Haley Futterknecht

Bucknellian Staff Writer

The Bucknell field hockey team closed its season in disappointment last Saturday at Lafayette. The Bison lost 3-1 to Lehigh in the first round of the Patriot League Championship.

Bucknell and Lehigh seemed to be evenly matched in the first half. Lehigh scored first, but the Bison answered back quickly with a goal to make it 1-1 at the half. Lehigh clinched the victory in the second half with two goals to the Bison's zero.

Bucknell's lone goal was scored by Kristen Soto '98 and assisted by Kate McIlvain '97 on a penalty corner pass. Soto closes the season with six goals. The shooting proved to be fairly even with Bucknell having 11 shots and Lehigh taking 12.

Goal was tended for the Bison by Maureen Breslin '99 who had nine saves. Breslin ended the season with 125 saves.

"Lehigh definitely was not better than us. They simply scored two goals in the second half. Sometimes the scoreboard isn't the best predictor of the better team, and this was one of those cases," said Tina Jones '98.

"We didn't expect to lose on Saturday; it was truly a shocker," added Sarah Catlin '98. Jaime Paldin '98 said, "We went into the tournament prepared. We had the desire, but we just didn't have the fire. I don't know what happened. The loss was extremely disappointing, because we felt that this was our year."

Despite the disappointing end to their season, Bucknell field hockey looks with hope and confidence to the future.

"I'm looking forward to next year, because we keep improving each year. We're returning a strong team with nine returning freshmen. We'll definitely miss the three leaving us, though," Paldin said.

Bucknell gathered multiple individual honors for its past season. Captains Megan Bossuyt '97 and Dani Johnston '97 received All-Patriot League first team recognition for their third and second time, respectively. Paldin and Catlin received All-Patriot League, second team recognition for their second and first time, respectively.

The field hockey team will lose three seniors to graduation.

Bucknell field hockey comprises a group of girls who share a common bond of the love for the sport of field hockey. These girls receive no athletic scholarship money and probably will never play the sport competitively again after college, yet they train with intensity and improve and compete.

Bossuyt explains, "Field hockey has been such a large part of my Bucknell experience. I feel like a big part of Bucknell is gone now. The tournament was a big disappointment. I truly did not expect to lose, but this has been the best team that I've ever played on. I wish it could have ended on a better note, but I couldn't have asked for better friends and teammates. I wish them all the luck and success, and when they win the tournament next year, I'll be there on the sideline cheering them on."

Club Sport Report — Women's Rugby

Ruggers fall in playoffs to Va. Tech

By Karen Dziuma

Bucknellian Team Correspondent

This past weekend, the Bucknell Women's Rugby Club traveled to Virginia to take on Virginia Tech. This game was part of the Mid-Atlantic Regional Championship Tournament, where only the top three teams from each league compete.

This is the first year that Bucknell has made it all the way to this tournament, due to an unbelievable team with tremendous dedication.

The Ruggers were set to escape the cold weather, but ended up playing in a snowstorm for the first-half. Because it was so cold, the team had trouble holding onto the ball, and when the snow melted in the second half, the field was muddy, causing the team to lose their footing easily.

The game opened up with a quick score from Virginia Tech. Their lead was soon matched by fly-half Megan McCarthy '99, whose try was finished with a kick by Lindsay Courrier '00.

The rest of the half was evenly matched as Bucknell continued to play both aggressively and defensively. There were numerous attempts by the Virginia Tech team, but the Ruggers held them at the goal line and pushed the ball back up the field.

The second half proved to be more challenging as the field was muddy. Virginia Tech scored two other times, and just when Bucknell thought the game was over, Cara DeVito '99 had a beautiful run, dodging tackles and finally scoring a try. The kick made by Courrier was successful, and Virginia Tech only led by one try.

The size of the Virginia Tech team ultimately proved to be too much for Bucknell to handle and by the end of the game, the Hokies had scored one more try.

Considering that Bucknell played a team of Virginia Tech's caliber and only lost by two tries is remarkable, though, and the future of Bucknell Rugby looks bright.

The Ruggers gave credit to coaches Jim Mathias and Bob Langton for their support and endless dedication. "We are proud to be coaches of this team, who showed a lot of heart and determination throughout the season. Every time something went wrong during a game, all the girls worked hard to correct the situation and put it back in our favor. They are a team in the truest sense," said Mathias and Langton.

The leadership of the team also proved significant during the season. Co-captains Jessie Liddell '99 and Megan McCarthy '99 worked together to display incredible leadership qualities and kept the spirits of the team high in low points of the season. Rugby Club president Deb Yates '98 also added experience and invaluable dedication to the team.

Bucknell looks forward to the spring season, since most of the new players who showed tremendous enthusiasm will be returning to take the place of some upperclassmen who will be missed.

In addition to revealing questionable character, Tyson's past has shown a lack of commitment to his career as a boxer. Perhaps his raw talent helped him to get by through periods of lax training habits. Whatever the case, it seems Tyson finally met his match.

True, Tyson already lost to Buster Douglas back in 1990, but that bout was widely regarded as a fluke. The loss to Holyfield indicates that although Tyson had a reign of dominance in the heavyweight ranks, that run is over. Unless, of course, the fight was fixed.

Fixed? A boxing match!? Why, that's the most ridiculous thing I've ever heard. What possible motivation could Tyson have to take a fall? To fix a Tyson fight, you would have to get past the highly reputable and incorruptible Don King. King would never fix a fight, especially with his top dog, Tyson, taking the fall. Sure, Tyson's gotten some bad press, but would King drop him after all these years? A fine promoter like Don King would never desert a fighter. Tyson-Holyfield II would be a big draw on pay-per-view, but could King seriously convince a renowned champion to take a fall just for the sake of a big-money rematch?

I doubt that they Tyson-Holyfield fight was fixed, but the rumor mill is churning out plenty of reasons why it could have been, and they're hard to dispute.

If there was a fix, though, it was masterful. At 10-to-1 odds, Holyfield was a big payoff, yet still a believable winner. King is already billing the match-up as a modern-day Ali-Frazier, which means big money for everyone involved and a renewed interest in heavyweight boxing. A Tyson loss seems like a small price to pay for the revival of the sport, and since King seems to do the thinking for Tyson, anything is possible.

Still, there are plenty of reasons why Holyfield's victory is absolutely feasible. First of all, you can't dispute Holyfield's conditioning advantage. Tyson came into the fight at 222 pounds, the heaviest weight of his career, whereas Holyfield was a leaner, quicker 215 with a seven and half inch reach advantage.

From the beginning, Tyson seemed confused and tentative because he was unable to attack Holyfield in his usual furious style. Some analysts are citing this as a sign of the fix, but it's also very possible that Tyson was reasonably scared because he was finally facing an opponent who could beat him. Since his release from prison, Tyson has fought some of the most ridiculous cream puff opponents in the history of boxing. Holyfield was a stark contrast, and perhaps a bit of a nightmare for an unprepared Tyson.

The truth is that if Holyfield had beaten Tyson back in 1991, before Tyson went to jail, no one would have cried fix. There would have been no motivation for King to rig the fight, with his golden boy's image still mostly intact. Yet experts have been saying all along that Tyson has lost his skills from his time of incarceration. So why is it so unbelievable that Holyfield dropped him in 1996?

Fix or no fix, I doubt that Holyfield had anything on his mind last Saturday besides beating Mike Tyson, and the best competitor won. Evander Holyfield is the heavyweight champion until someone proves otherwise, and Mike Tyson will get that chance soon enough.

Let's just hope Don King doesn't screw up this new primetime rivalry.

Women swimmers dominate Dragons

Men's squad swims strong but falls in final race, loses by three points at home

By Erica Freidlander
Bucknellian Staff Writer

The Bucknell women's swim team crushed Drexel this past weekend in its third meet of the season. The Bison women dominated the meet and ended the day with a total of 154 points compared to their opponent's meager 40.

The men's team did not fare as well however, falling to the Dragons by three points. Bucknell struggled to control the meet, but in the end, Drexel squeaked by in the final event, winning 122-119.

Dominating the Drexel meet on the women's side was Bucknell's Kate Wood '00 who took first place in the 1000 meter free and the 200 meter butterfly. She also beat Bucknell's pool record in the 500 meter free which was held previously by Linda Fink. Wood swam a steady 5:08.9 to break the standing record.

Co-captain Jen Myers '98 also took two first places in the Drexel meet. In the 200 meter individual medley, Myers passed all of her opponents by going an unbeatable 2:15.54. Her other first place win for the weekend was won after she swam a 2:11.21 in the 200 meter backstroke.

The women's team held on strong to its lead through the entire meet and had no problem beating the Drexel team.

The men's swim team maintained its lead during the entire meet but faltered in the final relay. Co-captain Ethan Buckley '97 began the meet on the right foot for Bucknell by taking first place in the 200 meter free. Buckley's time of 1:46.48 beat out the second place contender by more than three seconds.

Alex Johnson '99 won first place in the 50 meter free by swimming an incredible 22.39. Johnson is considered to be one of Bucknell's most talented sprinters by both coaches and team members.

Co-captain Jay O'Neil '97 also took away one win from the struggling Drexel team when he placed first in the 200 individual medley. O'Neil swam an outstanding 2:03.29, excelling in the breaststroke above all others. Later in the meet, Antonio Lanes '98 touched out Drexel's Shawn Markey after Lanes swam a 49.26 in the 100 meter free.

The final men's win of the afternoon came from Scott Woodworth '98. He dominated in the 200 backstroke which he swam in a 2:01.29.

Until the final event, Bucknell's men's swim team was holding onto a slight lead finishing the 200 meter breast with 113 points to Drexel's 111. The 400 meter free relay was the last event of the meet, meaning whichever team took first place would ultimately win the meet.

Both teams swam their hardest but Drexel's relay took first, beating Bucknell by mere seconds to complete their come from behind victory.

This Saturday, Bucknell's men's and women's teams will host Georgetown University at the Freas-Rooke Pool.

Lehigh rallies in second half to eliminate Bison

By Haley Futterknecht
Bucknellian Staff Writer

The Bucknell field hockey team closed its season in disappointment last Saturday at Lafayette. The Bison lost 3-1 to Lehigh in the first round of the Patriot League Championship.

Bucknell and Lehigh seemed to be evenly matched in the first half. Lehigh scored first, but the Bison answered back quickly with a goal to make it 1-1 at the half. Lehigh clinched the victory in the second half with two goals to the Bison's zero.

Bucknell's lone goal was scored by Kristen Soto '98 and assisted by Kate McIlvain '97 on a penalty corner pass. Soto closes the season with six goals. The shooting proved to be fairly even with Bucknell having 11 shots and Lehigh taking 12.

Goal was tended for the Bison by Maureen Breslin '99 who had nine saves. Breslin ended the season with 125 saves.

"Lehigh definitely was not better than us. They simply scored two goals in the second half. Sometimes the scoreboard isn't the best predictor of the better team, and this was one of those cases," said Tina Jones '98.

"We didn't expect to lose on Saturday; it was truly a shocker," added Sarah Catlin '98. Jaime Paldin '98 said, "We went into the tournament prepared. We had the desire, but we just didn't have the fire. I don't know what happened. The loss was extremely disappointing, because we felt that this was our year."

Despite the disappointing end to their season, Bucknell field hockey looks with hope and confidence to the future.

"I'm looking forward to next year, because we keep improving each year. We're returning a strong team with nine returning freshmen. We'll definitely miss the three leaving us, though," Paldin said.

Bucknell gathered multiple individual honors for its past season. Captains Megan Bossuyt '97 and Dani Johnston '97 received All-Patriot League first team recognition for their third and second time, respectively. Paldin and Catlin received All-Patriot League, second team recognition for their second and first time, respectively.

The field hockey team will lose three seniors to graduation.

Bucknell field hockey comprises a group of girls who share a common bond of the love for the sport of field hockey. These girls receive no athletic scholarship money and probably will never play the sport competitively again after college, yet they train with intensity and improve and compete.

Bossuyt explains, "Field hockey has been such a large part of my Bucknell experience. I feel like a big part of Bucknell is gone now. The tournament was a big disappointment. I truly did not expect to lose, but this has been the best team that I've ever played on. I wish it could have ended on a better note, but I couldn't have asked for better friends and teammates. I wish them all the luck and success, and when they win the tournament next year, I'll be there on the sideline cheering them on."

Club Sport Report — Women's Rugby

Ruggers fall in playoffs to Va. Tech

By Karen Dziuma
Bucknellian Team Correspondent

This past weekend, the Bucknell Women's Rugby Club traveled to Virginia to take on Virginia Tech. This game was part of the Mid-Atlantic Regional Championship Tournament, where only the top three teams from each league compete.

This is the first year that Bucknell has made it all the way to this tournament, due to an unbelievable team with tremendous dedication.

The Ruggers were set to escape the cold weather, but ended up playing in a snowstorm for the first-half. Because it was so cold, the team had trouble holding onto the ball, and when the snow melted in the second half, the field was muddy, causing the team to lose their footing easily.

The game opened up with a quick score from Virginia Tech. Their lead was soon matched by fly-half Megan McCarthy '99, whose try was finished with a kick by Lindsay Courrier '00.

The rest of the half was evenly matched as Bucknell continued to play both aggressively and defensively. There were numerous attempts by the Virginia Tech team, but the Ruggers held them at the goal line and pushed the ball back up the field.

The second half proved to be more challenging as the field was muddy. Virginia Tech scored two other times, and just when Bucknell thought the game was over, Cara DeVito '99 had a beautiful run, dodging tackles and finally scoring a try. The kick made by Courrier was successful, and Virginia Tech only led by one try.

The size of the Virginia Tech team ultimately proved to be too much for Bucknell to handle and by the end of the game, the Hokies had scored one more try.

Considering that Bucknell played a team of Virginia Tech's caliber and only lost by two tries is remarkable, though, and the future of Bucknell Rugby looks bright.

The Ruggers gave credit to coaches Jim Mathias and Bob Langton for their support and endless dedication. "We are proud to be coaches of this team, who showed a lot of heart and determination throughout the season. Every time something went wrong during a game, all the girls worked hard to correct the situation and put it back in our favor. They are a team in the truest sense," said Mathias and Langton.

The leadership of the team also proved significant during the season. Co-captains Jessie Liddell '99 and Megan McCarthy '99 worked together to display incredible leadership qualities and kept the spirits of the team high in low points of the season. Rugby Club president Deb Yates '98 also added experience and invaluable dedication to the team.

Bucknell looks forward to the spring season, since most of the new players who showed tremendous enthusiasm will be returning to take the place of some upperclassmen who will be missed.

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

THE BUCKNELLIAN

Alumnus gives $15 million, largest gift in history

BY TRACY THIFFAULT
Bucknellian Staff Writer

The soft music, dim candlelight, delicate flowers, balloons and fine dining present at last Saturday's Capital Campaign kickoff dinner-dance accentuated the excitement, energy and enthusiasm for the event and for the University; It made for a wonderful and delightful evening for the University and its honored guests.

At the event the University announced the launching of a four-year, $150 million campaign aimed at increasing the present endowment of $204 million. The $150 million will be used to double the endowment for student aid, build new facilities and fund academic programs. "The Bucknell Campaign: Preparing for the Next Century" is the most ambitious fund-raising effort in the University's history.

Thus far, the gifts and pledges made in advance of the official kickoff total $73 million, nearly half of the Campaign's goal.

The evening was complemented by the announcement from Ted Ammon '71 and Generosa Ammon of their gift of $15 million to the University: the largest single gift in the history of the University.

Five million of their gift will be used as a challenge to encourage other donors to give to the University. For every three dollars donated to an endowed scholarship fund, the Ammon's will pay one dollar to "The Ammon Challenge for Endowed Scholarship Funds" until they have paid five million dollars.

Over 500 people were in attendance, including Mr. and Mrs. Robert C. Rooke, Mr. and Mrs. Kenneth Langone and many other notable trustees and University donors.

Various University leaders spoke to the crowd urging for additional support to the campaign. "We're preparing for a future in which cost will become an increasingly intense issue, and hence, we must be more self-reliant," said President William D. Adams. "Part of that self-reliance is our ability to control costs, and part of it is our ability to grow our own resources in a way that will permit us to continue to build the institution while not placing a greater financial burden on the families of our students."

Other speakers included campaign chair Arthur D. Kinney Jr. '56, James W. Schubauer '56, chair of the Board of Trustees, Lee Idleman '54, former chair of the Board of Trustees and Douglas Candland, professor of psychology.

Carolyn A. Zesk '96, spoke on the importance of a liberal arts education and how her experience at Bucknell put her where she is today. She is currently a student at the University of Virginia Medical School.

"I believe that a real education must extend beyond one's major just as life extends beyond one's career. In offering me the opportunity to explore the arts as well as the sciences, Bucknell provided me with an education that serves not only as a foundation for medical schooling but also as a tool for interacting and communicating with other individuals," Zesk said.

The kickoff celebration also featured the premiere of a video specially produced for the campaign and the distribution of the campaign case statement booklet, "The Bucknell Campaign: To Compete in a Changing World."

Producers Michael and Valerie Smith spent one year filming, editing, restoring photos never be-

Skip's restaurant goes topless, concerns town

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Male and female "adult dancers" at one local restaurant and lounge are nothing new, but recently the issue has been raising some concern.

Skip Harpster, owner of Skip's Restaurant and Lounge on West Market Street in Lewisburg, has had male and female dancers performing at his establishment through road shows for the past two years.

Harpster put an ad in the newspaper because he wanted to have dancers a couple more nights per week, on the slow nights. Harpster added that he is an agent for female and male dancers for bachelor and bachelorette parties and was in need of more female dancers.

Harpster explained that the female dancers are topless and wear bikinis with pasties, which is allowed by law.

In 1996, the Commonwealth Court ruled in Pap's A.M.t/d/b/a Kandyland v. The City of Erie, et al., that "requiring dancers to wear "pasties" and "G-strings" does not suppress the erotic expression but does safeguard the public from the harmful secondary effects associated with adult entertainment."

Frustrated with people making a big deal out of nothing, Harpster said, "I am not doing anything illegal, immoral or improper."

The topic of "adult entertainment" is producing mixed reviews.

"I go [to Skip's] two or three times a week," Jay O'Neill '97 said.

"I don't think there will be an increase or decrease in business because of this. If you want to go out and see beautiful women topless then it should be your right to do that," he added.

Ryan Cummings, '99, said that "I'm sure they'll have a large appeal for males on campus. But, I don't think it is good for the community because it portrays women in a negative way."

"In women's minds, topless dancing can be seen as a vocation of choice and a form of artistic expression. In men's minds, topless dancing *is* seen as a tool for sexual arousal and sexual gratification. In the community's mind, topless dancing directly promotes the ever continuing objectification of all women," Aileen Brown '98 said.

"As a community, we have the choice to support or reject topless dancing. But, what we must consider prior to our decision is not the performance itself, but the effects these performances leave within the minds of the customers as they leave Skip's and reenter *our* community," Brown continued.

Shari Aser '98 said "it is degrading to women, but at the same time these women are doing it at their own will."

Allure: faculty vote to ban Greek system

BY BETH MARTIN
Bucknellian Staff Writer

Sororities and fraternities have recently been disbanded by Bucknell faculty, according to *Allure Magazine*.

The article entitled "Kappa Kappa Glamma" that appeared in the Nov. issue contained a denunciatory comment about Greek organizations at Bucknell.

Bob Ickes wrote: "The faculty at Bucknell University in Lewisburg, Pennsylvania, recently decided to disband all sororities and fraternities, citing their 'racism, sexism, elitism, and anti-intellectualism.'"

Ickes was unavailable for comment.

John Peeler, faculty chairperson, said although the faculty did vote to prohibit the continuation of Greek organizations, "it must have been at least five years ago."

The faculty's decision, called the George Jenks motion, was considered by then-President Gary Sojka and the University's Board of Trustees. Instead of banning fraternities and sororities, the Trustee Board decided to improve the current Greek system by forming a special committee, the Trustees Implementation Plan (TIP).

"Although many of the changes that TIP has made are positive, the Greek system still has a long way to go. I believe this campus has a severe alcohol problem, which in part can be directly or indirectly linked to the fraternities," Peeler said.

Peeler said that he can see some benefits of Greek organizations. "The Greek system builds community among members. Many people who graduate look back at their sorority or fraternity as a life-forming experience. I just wish we could have them without the destructive behavior."

Meredith Wisor '97, president of the Panhellenic Council, said that her organization is writing a letter to *Allure's* column "The Mail," which features a collection of letters sent by readers of the magazine, because the statement, "while not untrue, is misleading, and the article casts Greek life negatively."

Wisor said that although the article implies that Greek organizations will cease at Bucknell, they are in fact "a fixed part of campus."

"Alcohol abuse is a valid concern on campus beginning at the first-year level," she added. "Panhel offers many Alcohol Awareness training Programs and educates members about combating the problem. In addition, GMT (the Greek Moderating Team) works closely with us on the issue."

Wisor said "Elitism is an accusation we hear a lot. Yet we train Rho Chi's (sorority rush counselors) to stress that there are enough places for everyone to go. There's room for everyone to

Patriot League is still in hot water

BY E.J. CRAWFORD AND
BRETT TOMLINSON
Bucknellian Staff Writers

The Patriot League is falling down, or at least it appears that way.

On Dec. 10, the Presidents of the League's institutions will meet to discuss the fate of the 22-sport conference and try to resolve Holy Cross' recent call to allow basketball scholarships.

The League formed in 1986 as a football conference and was expanded in 1990 to cover a wider range of sports. Since its inception, the League has permitted only need-based financial aid for athletes.

As it stands now, the University is one of 13 Division I institutions that does not offer athletic scholarships for basketball, joined only by the Ivy League and Colgate, Lehigh, Lafayette and Holy Cross

Annapolis and West Point do not count as they are government institutions, and thus have no tuition.

To analyze and comment on the precarious state of the Patriot League, the sports section includes a news analysis of interviews with the athletic directors of Holy Cross and Bucknell and a column from a popular local sports writer, as well as a lighthearted look at the future from a prominent alumnus and avid sports fan.

Battle of the bands to celebrate at University birthday party

BY RACHEL DOEBBER
Bucknellian Staff Writer

"We wanted some kind of activity that would attract everyone," said Lorene Johnson '98, chairperson of the Sesquicentennial Students Event Committee. Who wouldn't be attracted to a party with great food, a 150 foot long birthday cake, and music provided by five student bands?

Tomorrow night in the field house, a celebration to mark the closing of the Sesquicentennial sponsored by the Sesquicentennial Student Events Committee, Dining Services and Phi Kappa Psi Fraternity will take place.

To begin the festivities, Dining Services will cater a campus-wide picnic from 5 p.m. to 7 p.m. Delicacies such as grilled chicken, carved pork loin and a vegetarian selection will be served. For dessert, there will be a 150 foot-long birthday cake; each foot represents one year in the University's history.

During this time, 25 prizes donated by Lewisburg businesses will be raffled off using tickets that each person receives at the door. These businesses will be displaying their products in an effort to "make Lewisburg more of a participant since they are a big part of our lives," said Johnson.

Because the University plays such a large part in Lewisburg's life, the local newspaper, *The Daily Item*, and a local television station will be reporting the event within the area.

The time capsule that will be buried on Monday will be on display at the event. The burial of the capsule will officially close the University's 150th Anniversary.

Meredith Wisor '97, president of the Panhellenic Council, said that her organization is writing a letter to *Allure's* column "The Mail," which features a collection of letters sent by readers of the magazine, because the statement, "while not untrue, is misleading, and the article casts Greek life negatively."

Wisor said that although the article implies that Greek organizations will cease at Bucknell, they are in fact "a fixed part of campus."

"Alcohol abuse is a valid concern on campus beginning at the first-year level," she added. "Panhel offers many Alcohol Awareness training Programs and educates members about combating the problem. In addition, GMT (the Greek Moderating Team) works closely with us on the issue."

Wisor said "Elitism is an accusation we hear a lot. Yet we train Rho Chi's (sorority rush counselors) to stress that there are enough places for everyone to go. There's room for everyone to

Patriot League is still in hot water

BY E.J. CRAWFORD AND
BRETT TOMLINSON
Bucknellian Staff Writers

The Patriot League is falling down, or at least it appears that way.

On Dec. 10, the Presidents of the League's institutions will meet to discuss the fate of the 22-sport conference and try to resolve Holy Cross' recent call to allow basketball scholarships.

The League formed in 1986 as a football conference and was expanded in 1990 to cover a wider range of sports. Since its inception, the League has permitted only need-based financial aid for athletes.

As it stands now, the University is one of 13 Division I institutions that does not offer athletic scholarships for basketball, joined only by the Ivy League and Colgate, Lehigh, Lafayette and Holy Cross

Annapolis and West Point do not count as they are government institutions, and thus have no tuition.

To analyze and comment on the precarious state of the Patriot League, the sports section includes a news analysis of interviews with the athletic directors of Holy Cross and Bucknell and a column from a popular local sports writer, as well as a lighthearted look at the future from a prominent alumnus and avid sports fan.

See pages 16 and 17 for more information.

Tiny mites cause big itch

BY REBECCA KLINGLER
Bucknellian Staff Writer

Some University students have been itching to rid themselves of a tiny pest.

Scabies, a skin disease that is caused by small mites burrowing and biting a person underneath the skin, causes an irritating red rash that often leaves their victims miserable.

Donald Stechschulte, medical director of the Zeigler Health Center, said that he sees about two cas-

Battle of the bands to celebrate at University birthday party

BY RACHEL DOEBBER
Bucknellian Staff Writer

"We wanted some kind of activity that would attract everyone," said Lorene Johnson '98, chairperson of the Sesquicentennial Students Event Committee. Who wouldn't be attracted to a party with great food, a 150 foot long birthday cake, and music provided by five student bands?

Tomorrow night in the field house, a celebration to mark the closing of the Sesquicentennial sponsored by the Sesquicentennial Student Events Committee, Dining Services and Phi Kappa Psi Fraternity will take place.

To begin the festivities, Dining Services will cater a campus-wide picnic from 5 p.m. to 7 p.m. Delicacies such as grilled chicken, carved pork loin and a vegetarian selection will be served. For dessert, there will be a 150 foot-long birthday cake; each foot represents one year in the University's history.

During this time, 25 prizes donated by Lewisburg businesses will be raffled off using tickets that each person receives at the door. These businesses will be displaying their products in an effort to "make Lewisburg more of a participant since they are a big part of our lives," said Johnson.

Because the University plays such a large part in Lewisburg's life, the local newspaper, *The Daily Item*, and a local television station will be reporting the event within the area.

The time capsule that will be buried on Monday will be on display at the event. The burial of the capsule will officially close the University's 150th Anniversary.

Author signs books in Bookstore

On Monday, Nancy Neuman hosted a booksigning for her new book, "A Voice of Our Own" in the University Bookstore. Her book is a compilation of essays from various women including Martina Navratilova, Rosalynn Carter, Ada E. Deer, and Rebecca Walker.

Neuman was the former president of the National League of Women Voters and is a writer and lecturer on women in politics and public policy. Neuman's husband is Mark Neuman, professor of history at Bucknell.

Judicial Board posts results

Charges were filed against a male student for allegedly violating the Student Code of Conduct as follows: Section Standard on Sexual Assault Item C. Coerced Sexual Activities.

A violation of the Student Code of Conduct takes place when there occurs physical contact of a sexual nature which is without the consent of the person acted upon. In its most severe form, sexual assault is manifested by any form of sexual penetration in circumstances in which it was not reasonable for the perpetrator to believe that the victim had freely given affirmative consent to the act.

The incident reportedly occurred in a fraternity house and involved upper-class students as both the victim and respondent.

Based on the information provided, the Hearing Board found insufficient evidence to render a finding of responsibility for the action charged.

Unrelated charges were filed against a male student for allegedly violating the Student Code of Conduct, Section Standard on Sexual Assault Item C. Coerced Sexual Activities.

The incident reportedly occurred in a residence hall and involved first-year students as both the victim and the respondent.

Based on the information provided, the Hearing Board found sufficient evidence to render a finding of responsibility for the action charged. The male student was expelled from the University.

The Board of Supervisors of the East Buffalo Township will be holding a public hearing regarding the East Buffalo Township, Union County, Pennsylvania Zoning Ordinance at the Dec. 9 Township Meeting.

Proposed amendments to the ordinance would make it more difficult for establishments providing adult entertainment to come into the area.

The proposed changes include adding several definitions, including Adult Use, Adult Book Store, and Adult Motion Picture Theatre.

For instance, Adult Use is defined as "any establishment having a substantial or significant portion of its stock in trade or service provided any goods or services which are distinguished or characterized by their emphasis on matter depicting, describing or relating to 'Specified Sexual Activities' or 'Specified Anatomical Areas'..."

Other provisions of the amended ordinance would incorporate some of the following: "no adult use shall be located within 500 feet of any residential use or district...within 1000 feet of any public park or playground, school or church."

The Township meeting on Dec. 9 is open to the public and will be held at the East Buffalo Township building on Fairground Road at 7:30 p.m.

BED BUGS

es of scabies every month and that the disease is common on college campuses.

The mites can be contracted through upholstery and close contact with an affected person.

According to those who have had the disease the tiny mites cause a big itch.

"You just itch all over, and it's worse at night," said one senior woman who is now overcoming the disease.

This student also had scabies her sophomore year, but she did not recognize the symptoms right away because she said "it looked different...Some looked like welts."

The Health Center referred her to a dermatologist in town her sophomore year, believing her rash might be an allergic reaction. This time, she went straight to the dermatologist. The cream she was given, she said, is toxic, so it can only be used a couple of times.

Usually the first application kills the scabies, but the rash remains for a short time afterward.

"I still have the spots, but they don't itch," she said.

After she reported her situation to the Office of Housing and Residential Life, she was given a new mattress and an offer to spray her room, which she refused.

"They were helpful," she said.

Another senior female who was also infected with scabies this semester believes she may have contracted it before she arrived at the University. The disease usually takes between one and two months to develop, and she was covered with a rash two to three weeks after school started.

Hers was an extreme case, she said

"I had an allergic reaction," she explained. "I had thousands of little red dots all over me."

She also was referred to the dermatologist in town after visiting the Health Center.

Housing and Residential Life also provided this student with a new mattress and pillows, as well as the opportunity to switch rooms. She said that the office was "very cooperative," even though she decided against moving.

Instead she took precautions that she thought might rid her room of the mites.

"I washed everything I had," she said.

James Wiltgen, assistant director of Office of Housing and Residential Life, said that the office does not replace mattresses often because there are reports of scabies are few.

"We have done this before in limited situations, based on need," he said. "It's a really rare thing, at least the request is."

For more information on scabies, see the Science and Technology section on page 9.

Students to present their original papers on Shakespeare

Students from Bucknell and Susquehanna Universities and the University of Scranton will present their original pieces at a student conference on "The Shakespearean Spectacle" hosted by Susquehanna University, located in Selinsgrove.

Theater historian Alan Dessen will introduce the conference with a keynote address, "As You Stage It: A Theater Historian's View" on Friday evening, in the Isaacs Auditorium of Siebert Hall. The conference presentations will begin Saturday at 8:45 a.m. and continue until 4:30 p.m..

Papers will address a number of contemporary concerns in the staging of "the Shakespearean spectacle" in the late 20th Century in panels on such topics as "Renaissance Patriarchy" and "Tragic Death and Comic Sex: Masculinity and Femininity in Shakespeare."

An emphasis will be given to the treatment of Shakespeare on film—from film "classics" like Olivier's *Henry V* to the radical innovations of Baz Luhrmann's current box-office hit, *William Shakespeare's Romeo and Juliet.*

New Chairman of Trustees named

James W. Schubauer '56 was named chairman of the Board of Trustees this year. He majored in civil engineering and received his M.B.A. in 1959 from the University of Michigan. His gift to the University made possible the Gardner Lecture Hall.

Schubauer was on campus this weekend for Trustees Weekend and the kickoff of the University's Capital Campaign.

"Trustees are not selected from a list of past contributors. But once we become trustees, our experience, insight and exposure to Bucknell's exciting mission and potential, our realization of stewardship being an essential part of Bucknell's financial strength, and our sense of obligation to be stewards of this strength results in all trustees, 100 percent, giving to the fullest of our respective means," Schubauer said at the Campaign kickoff dinner-dance, held this past weekend.

PUBLIC SAFETY LOG

November 13, 1996

LARCENY — A University student reported to a Public Safety Officer the theft of a bicycle locked to the Gateway bike rack by unknown person(s). The Investigation is continuing.

THEFT — A University employee reported to a Public Safety Officer that three signs were removed from the exterior of rooms in Olin Science. The investigation is continuing.

November 14, 1996

PROPERTY DAMAGE — A University student reported to a Public Safety Officer that a window in the rear entrance door of Gateway Silberman had been broken. A work order was submitted to repair the glass and the investigation is continuing.

THEFT — Two University students reported to a Public Safety Officer that their cars had been vandalized. While investigating the incidents, a Public Safety Officer discovered two additional cars with damage in the Farm Lot. Two CD stereo systems, compact disks and a disk holder were removed from three of the vehicles. The investigation is continuing.

LARCENY — A University student reported to a Public Safety Officer that unknown person(s) had taken his bicycle from the Smith Hall bike rack. The investigation is continuing.

November 15, 1996

LIQUOR LAWS/UNDERAGE POSSESSION — A Public Safety Officer cited a University student for underage possession of alcohol, when he was observed holding a can of beer at TKE Fraternity.

CRIMINAL MISCHIEF — A University student reported to a Public Safety Officer that unknown person(s) had broken a front door window of Swartz Hall. The investigation is continuing.

November 16, 1996

HARASSMENT BY ADDRESS — A University student reported to a Public Safety Officer that unknown person(s) had placed obscene writing on his door tag. The investigation is continuing.

HARASSMENT BY COMMUNICATION — A University student reported that unknown person(s) had removed a poster from the room door, left a verbal message on the student's answering machine and placed alcohol containers in front of the room door. The investigation is continuing.

ASSIST LOCAL POLICE/LEWISBURG CEMETERY — Three University students were cited for underage consumption of alcohol by Lewisburg Police and a Public Safety Officer when they attempted to run from the officers in the Lewisburg cemetery.

November 17, 1996

UNDERAGE CONSUMPTION/ALCOHOL OVERDOSE/MEDICAL TRANSPORT — A Public Safety Officer and East Buffalo Township Police cited a University student for underage consumption of alcohol after he became ill when leaving LCA Fraternity. The student was transported to Evangelical Hospital Emergency Room for treatment.

ASSIST LOCAL POLICE DEPARTMENT — A Public Safety Officer responded to assist Lewisburg Police when they found an injured University student on South 6th St. The student was transported to the Evangelical Hospital Emergency Room.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm at KDR Fraternity. Unknown person(s) had activated a pull station in the basement. The investigation is continuing.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm activation in Swartz Hall. Unknown person(s) had activated a pull station. The investigation is continuing.

INSTITUTIONAL VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) broke a window on a front door of Swartz Hall and damaged a bulletin board in the hallway. The investigation is continuing.

LARCENY/VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) vandalized a vending machine in Vedder Hall. The investigation is continuing.

November 18, 1996

LARCENY — A University student reported to a Public Safety Officer that a bicycle locked to the Bucknell West bike rack was taken. The investigation is continuing.

LARCENY — A University student reported to a Public Safety Officer that unknown person(s) had taken a bicycle locked to the outside railing at Vedder Hall. The investigation is continuing.

INSTITUTIONAL VANDALISM — A University employee reported to a Public Safety Officer that unknown person(s) damaged five windows with a pellet gun, at Vedder Hall. The investigation is continuing.

November 19, 1996

INFORMATION/FIRE — A Public Safety Officer responded to a fire alarm activation at a Bucknell West Mod. An article of clothing placed over a lamp had been burned. The fire was extinguished without further damage.

INFORMATION/RECOVERED STOLEN VEHICLE — A Public Safety Officer located a stolen vehicle while on routine patrol in the Farm Lot. Northumberland Police responded to investigate the incident.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

News Briefs

National News

ValuJet admits responsibility for oxygen canisters

MIAMI — A ValuJet executive yesterday blamed a maintenance contractor for a crucial mistake that allowed hazardous oxygen-producing canisters to be shipped aboard doomed ValuJet Flight 592 without safety caps.

Under rigorous questioning from federal aviation experts, David Gentry, ValuJet vice president of heavy maintenance, said the airline had ultimate responsibility for the work done by outside contractors on its planes.

Gentry said SabreTech Corp. was at fault for not installing the safety caps, the first of a series of errors that may have resulted in a raging fire aboard the DC-9.

"(SabreTech) would have responsibility," Gentry said on the third day of a National Transportation Safety Board public hearing into the crash of the Flight 592, which plunged into the Florida Everglades on May 11, killing all 110 people aboard.

Russians inadvertently helped FBI in spy case

WASHINGTON — The Russians inadvertently helped catch a CIA officer accused of being a double agent when they asked the FBI for information on terrorism by Chechen separatists earlier this year. Shortly afterward, accused spy Harold Nicholson began searching CIA computers for the information, even though he had no need of the information for his job instructing CIA recruits, the FBI says.

FBI agent Michael Lonergan spelled out the Chechen element of the case in an affidavit. Lonergan said he believed Russian agents, not completely trusting a post-Cold War thaw of relations between the two countries, contacted their spies at the same time they requested official information.

Nicholson's court-appointed attorney, Jonathan Shapiro, said yesterday that his client would plead innocent to charges of conspiracy to commit espionage.

King estate sues CBS over 'dream' speech sales

NEW YORK — One of the century's most memorable speeches has become the subject of a court battle between CBS and the estate of Martin Luther King Jr.

In an attempt to prevent CBS from using the footage from King's "I Have a Dream" speech in a documentary to be sold on videotape, the estate accused the network of copyright infringement. The network, however, said the estate has no right to claim ownership of the footage.

King delivered the speech during the civil rights march on Washington on Aug. 28, 1963, and, according to his estate, registered it with the U.S. Copyright office shortly after. King himself filed a lawsuit to prevent people from selling recorded copies, said Phillip Jones, president of the Atlanta firm that manages the estate.

Rich worry that cash will spoil their children

NEW YORK — Two-thirds of the country's wealthiest parents are afraid their children will be overly materialistic and ignorant of money's value, according to a survey released yesterday. And half fear a cushy lifestyle could sap their kids drive and independence.

Yet many parents appear to undermine their own efforts to avoid the pitfalls of easy money.

More than three-quarters of those questioned in the latest study said their children would travel to Europe by age 18. More than two-thirds planned to give their children cars as soon as they were old enough to drive.

The survey was based on telephone interviews with 151 people who earn at least $200,000 a year or have a net worth of more than $3 million. It has a margin of error of plus or minus 6 percentage points.

World News

New refugee movement into Rwanda reported

RWANDA — Tens of thousands of Hutu refugees were reportedly heading through eastern Zaire into Rwanda yesterday—the possible vanguard of a second mass exodus.

The U.N.'s World Food Program reported "strong indications" that at least 100,000 Hutu refugees still in eastern Zaire were on the move yesterday.

"There are strong indications that a large movement of people from the Bukavu area are heading north towards Goma. We believe there could be more than 100,000," WFP spokeswoman Michele Quintaglie said in Nairobi.

Since Friday, an estimated half-million Rwandan refugees crossed back into their homeland, leading to expectations that a large multinational intervention force will be scaled back or eliminated.

But hundreds of thousands of refugees are still hiding out in the hills of eastern Zaire, aid officials say. "We are doing our best to locate them," said Peter Kessler, spokesman with the U.N. High Commissioner for Refugees.

Low voter turnout for Zambian election

LUSAKA, Zambia — Zambian President Frederick Chiluba headed for a landslide victory yesterday in the southern African country. The disputed election was marked by an opposition boycott and a low turnout.

Chiluba was leading with 76 percent of the 786,583 votes counted by mid-afternoon—enough to give him at least 50 percent of the estimated 1.1 million votes cast overall, even before results from 63 remaining constituencies were counted.

Two groups monitoring the election, however, gave conflicting views of the voting. A Zambian group said the election was neither free nor fair since half of eligible voters were unfairly excluded, but an international group said it found the balloting generally correct.

Former president Kenneth Kaunda, who ruled from independence in 1964 until Chiluba trounced him in Zambia's first free polls in 1991, was barred from contesting the poll by a new law because his parents, from Malawi, were not Zambian.

Taiwan, human rights top U.S.—China talks

BEIJING — Yesterday, China called again on the United States to stop selling arms to Taiwan, warning that the issue of the island that China considers part of its territory is the key to improved relations with Washington.

For his part, U.S. Secretary of State Warren Christopher said he told Beijing leaders that they had blatantly violated international norms on human rights. U.S. officials with Christopher said China was in total disagreement with the United States on this issue—which China has said is an internal matter.

Christopher arrived in China on Tuesday for a three-day visit. He said yesterday's talks, seven hours in all, with President Jiang Zemin, Premier Li Peng and Foreign Minister Qian Qichen covered several topics—nuclear non-proliferation consuming the most time.

Screaming: good for the soul?

TAIPEI, Taiwan — More than 200 people gathered outside a Taipei department store on Sunday to scream at the top of their lungs as part of a stress relief contest staged by an anti-smoking foundation.

"I want to use this screaming competition to show people other ways of releasing pressure," said Yeh Ta-Ching, supervisor of the anti-smoking foundation which organized the contest.

And some participants seemed to find it worthwhile. "I feel very comfortable after screaming," said one.

Another competitor, a woman, felt extremely relaxed about the proceedings—she took home ten thousand Taiwan dollars for registering the highest decibels.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

ALLURE

From page 1

be in a sorority, and financial needs can be met by scholarships offered by each sorority."

Responding to the accusation of racism, Wisor said "Bucknell doesn't have many minorities to begin with. We deal with the population of the campus, given to us by admissions. I think race issues, like alcohol abuse, are wider university issues, not limited to Greek organizations."

Derek Guenther '97, InterFraternity Council president, could not be reached for comment.

A sorority member who wished not to be identified said "The four things addressed by the article are an inaccurate representation of the school's Greek system. First of all, the number of minorities attending Bucknell is small to begin with, and the Greek system reflects these numbers. Also how can single-sex organizations be sexist? In addition, Bucknell, as a private highly selective university, is elitist as a whole. And, even though Greek organizations may not necessarily promote the gaining of knowledge in every single activity they offer, they do have certain scholastic criteria for membership, and awards for high achievers."

Carol Wynperle '99, who is not a member of a sorority, said "I don't really think the Greek system is elitist. The whole idea of fraternities and sororities is to be with people who share something in common with you, just like most of us pick our friends anyway."

She added "People are going to drink at Bucknell anyway. Without fraternities, they'd be forced to go off campus, which would probably lead to more drunk driving accidents."

Lee Gratz '00 said "I think the whole Greek system is really stupid. The fraternities have so much power over social life, because they have alcohol. Here the only social life is drinking, and the only place for people, especially freshmen, to drink for free is at fraternities, so they hold that power over you."

"It seems like fraternities become elite according to how many people they reject from their parties," he added.

Rooke Chapel pulpit filled with new chaplain

BY KARIN DAVIDSON

Bucknellian Staff Writer

The man who is presently filling the pulpit at Rooke Chapel and assuming the associated responsibilities has just been appointed as University Chaplain.

Ian B. Oliver has held the interim position since August as the University searched for a permanent replacement for Alison Boden who left the position in the spring of 1995. "I'm thrilled. I really am. I didn't think I'd get the job. It's an honor personally and it's really going to be a challenge," Oliver said.

Oliver is a Phi Beta Kappa graduate of Amherst College, from where he received numerous awards, among them the Moseley Religion Prize, the Lincoln Lowell Russell Music Prize and the Moses Graduate Fellowship. He attended the University of Chicago Divinity School, where he concentrated in Ministry and Theology.

Oliver came to the University in August after having spent time in India as the Chaplain of Kodaikanal International School, a college-preparatory Christian boarding school. While he was there he directed the school's long-range planning process, headed the Religious Education Department, and founded a peer counseling program.

"It's a great position in terms of the chaplains job—compared to other schools it's a really neat chaplaincy. I've been impressed by Bucknell in the last three months that I've been here," Oliver said.

Prior to his overseas experience, Oliver served as the Chaplain of Kalamazoo college in Michigan from 1983 to 1988.

Oliver's goals for his position are "to try and make Bucknell a place where people can be comfortably religious, where they can integrate spirituality and their academics and where people feel more comfortable being who they are."

The Search Committee, chaired by William Becker, professor of religion, was formed last February.

Student's privileges "booted"

Karin Davidson—The Bucknellian

This Jeep was booted on Vaughn Literature Road.

A University student has found out the hard way that Public Safety is serious about parking regulations on campus.

A white jeep parked outside of the 24-hour study lab on Vaughan Literature Road has been "booted". An apparatus has been attached to its wheel making it impossible to move the vehicle without sustaining damage.

The student was guilty of six or more violations, which paid or unpaid results in a request by Public Safety for the return of his parking decal. Students with suspended parking permission are not allowed to park or drive on campus. Since the student failed to turn in his parking decal after two weeks, he was charged with failure to comply under the student code of conduct.

"We will continue to use [the boot] in the future but only when someone has failed to respond to our correspondence and continues to park on campus," said Vincent DeCerchio, director of Public Safety.

AMMON

fore seen, and interviewing alumni to create the film. The video was shown on a large screen after the speeches in the dining area.

The evening concluded with a superb performance by the Bucknell University Orchestra followed by dancing with the notable Herm Miller Orchestra. Conductor of the Bucknell Orchestra, Christopher Para said, "It's a privilege to be part of the genesis of things that will come for the University."

Some students also attended representing different departments and the entire student body. "I love every minute of it," said Lara Spingler '97. "It's nice getting to meet trustees and other important members of the community," said David Hile '97.

Alexandra Betlyon '71 said, "I had a wonderful time. All these people from different generations say the same thing [about Bucknell]. It was a reaffirming evening. The only way to know Bucknell is to come here."

See photo essay of dinner-dance in the Features section on page 7.

Three University students charged with underage drinking

Joshua D. Watts '00, Alexander Bozic '00 and Matthew Halk '00 were charged with underage drinking by the Lewisburg Police on Sat. night, *The Daily Item* reported yesterday. Spotted in the cemetery on South Seventh Street, the police and public safety officers stopped the students who were allegedly intoxicated.

In an unrelated incident, Roberto A. Lainez '99, faces a charge of underage drinking issued by Lewisburg police. Lainez was treated on Sunday morning at Evangelical Community hospital for an alcohol overdose.

The mites can be contracted through upholstery and close contact with an affected person.

According to those who have had the disease, the tiny mites cause a big itch.

"You just itch all over, and it's worse at night," said one senior woman who is now overcoming the disease.

This student also had scabies her sophomore year, but she did not recognize the symptoms right away because she said "it looked different...Some looked like welts."

The Health Center referred her to a dermatologist in town her sophomore year, believing her rash might be an allergic reaction. This time, she went straight to the dermatologist. The cream she was given, she said, is toxic, so it can only be used a couple of times.

Usually the first application kills the scabies, but the rash remains for a short time afterward.

"I still have the spots, but they don't itch," she said.

After she reported her situation to the Office of Housing and Residential Life, she was given a new mattress and an offer to spray her room, which she refused.

"They were helpful," she said.

Another senior female who was also infected with scabies this semester believes she may have contracted it before she arrived at the University. The disease usually takes between one and two months to develop, and she was covered with a rash two to three weeks after school started.

Hers was an extreme case, she said

"I had an allergic reaction," she explained. "I had thousands of little red dots all over me."

She also was referred to the dermatologist in town after visiting the Health Center.

Housing and Residential Life also provided this student with a new mattress and pillows, as well as the opportunity to switch rooms. She said that the office was "very cooperative," even though she decided against moving.

Instead she took precautions that she thought might rid her room of the mites.

"I washed everything I had," she said.

James Wiltgen, assistant director of Office of Housing and Residential Life, said that the office does not replace mattresses often because there are reports of scabies are few.

"We have done this before in limited situations, based on need," he said. "It's a really rare thing, at least the request is."

For more information on scabies, see the Science and Technology section on page 9.

Students to present their original papers on Shakespeare

Students from Bucknell and Susquehanna Universities and the University of Scranton will present their original pieces at a student conference on "The Shakespearean Spectacle" hosted by Susquehanna University, located in Selinsgrove.

Theater historian Alan Dessen will introduce the conference with a keynote address, "As You Stage It: A Theater Historian's View" on Friday evening, in the Isaacs Auditorium of Siebert Hall. The conference presentations will begin Saturday at 8:45 a.m. and continue until 4:30 p.m..

Papers will address a number of contemporary concerns in the staging of "the Shakespearean spectacle" in the late 20th Century in panels on such topics as "Renaissance Patriarchy" and "Tragic Death and Comic Sex: Masculinity and Femininity in Shakespeare."

An emphasis will be given to the treatment of Shakespeare on film—from film "classics" like Olivier's *Henry V* to the radical innovations of Baz Luhrmann's current box-office hit, *William Shakespeare's Romeo and Juliet.*

New Chairman of Trustees named

James W. Schubauer '56 was named chairman of the Board of Trustees this year. He majored in civil engineering and received his M.B.A. in 1959 from the University of Michigan. His gift to the University made possible the Gardner Lecture Hall.

Schubauer was on campus this weekend for Trustees Weekend and the kickoff of the University's Capital Campaign.

"Trustees are not selected from a list of past contributors. But once we become trustees, our experience, insight and exposure to Bucknell's exciting mission and potential, our realization of stewardship being an essential part of Bucknell's financial strength, and our sense of obligation to be stewards of this strength results in all trustees, 100 percent, giving to the fullest of our respective means," Schubauer said at the Campaign kickoff dinner-dance, held this past weekend.

PUBLIC SAFETY LOG

November 13, 1996

LARCENY — A University student reported to a Public Safety Officer the theft of a bicycle locked to the Gateway bike rack by unknown person(s). The Investigation is continuing.

THEFT — A University employee reported to a Public Safety Officer that three signs were removed from the exterior of rooms in Olin Science. The investigation is continuing.

November 14, 1996

PROPERTY DAMAGE — A University student reported to a Public Safety Officer that a window in the rear entrance door of Gateway Silberman had been broken. A work order was submitted to repair the glass and the investigation is continuing.

THEFT — Two University students reported to a Public Safety Officer that their cars had been vandalized. While investigating the incidents, a Public Safety Officer discovered two additional cars with damage in the Farm Lot. Two CD stereo systems, compact disks and a disk holder were removed from three of the vehicles. The investigation is continuing.

LARCENY — A University student reported to a Public Safety Officer that unknown person(s) had taken his bicycle from the Smith Hall bike rack. The investigation is continuing.

November 15, 1996

LIQUOR LAWS/UNDERAGE POSSESSION — A Public Safety Officer cited a University student for underage possession of alcohol, when he was observed holding a can of beer at TKE Fraternity.

CRIMINAL MISCHIEF — A University student reported to a Public Safety Officer that unknown person(s) had broken a front door window of Swartz Hall. The investigation is continuing.

November 16, 1996

HARASSMENT BY ADDRESS — A University student reported to a Public Safety Officer that unknown person(s) had placed obscene writing on his door tag. The investigation is continuing.

HARASSMENT BY COMMUNICATION — A University student reported that unknown person(s) had removed a poster from the room door, left a verbal message on the student's answering machine and placed alcohol containers in front of the room door. The investigation is continuing.

ASSIST LOCAL POLICE/LEWISBURG CEMETERY — Three University students were cited for underage consumption of alcohol by Lewisburg Police and a Public Safety Officer when they attempted to run from the officers in the Lewisburg cemetery.

November 17, 1996

UNDERAGE CONSUMPTION/ALCOHOL OVERDOSE/MEDICAL TRANSPORT — A Public Safety Officer and East Buffalo Township Police cited a University student for underage consumption of alcohol after he became ill when leaving LCA Fraternity. The student was transported to Evangelical Hospital Emergency Room for treatment.

ASSIST LOCAL POLICE DEPARTMENT — A Public Safety Officer responded to assist Lewisburg Police when they found an injured University student on South 6th St. The student was transported to the Evangelical Hospital Emergency Room.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm at KDR Fraternity. Unknown person(s) had activated a pull station in the basement. The investigation is continuing.

TAMPERING WITH FIRE EQUIPMENT — A Public Safety Officer responded to a fire alarm activation in Swartz Hall. Unknown person(s) had activated a pull station. The investigation is continuing.

INSTITUTIONAL VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) broke a window on a front door of Swartz Hall and damaged a bulletin board in the hallway. The investigation is continuing.

LARCENY/VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) vandalized a vending machine in Vedder Hall. The investigation is continuing.

November 18, 1996

LARCENY — A University student reported to a Public Safety Officer that a bicycle locked to the Bucknell West bike rack was taken. The investigation is continuing.

LARCENY — A University student reported to a Public Safety Officer that unknown person(s) had taken a bicycle locked to the outside railing at Vedder Hall. The investigation is continuing.

INSTITUTIONAL VANDALISM — A University employee reported to a Public Safety Officer that unknown person(s) damaged five windows with a pellet gun, at Vedder Hall. The investigation is continuing.

November 19, 1996

INFORMATION/FIRE — A Public Safety Officer responded to a fire alarm activation at a Bucknell West Mod. An article of clothing placed over a lamp had been burned. The fire was extinguished without further damage.

INFORMATION/RECOVERED STOLEN VEHICLE — A Public Safety Officer located a stolen vehicle while on routine patrol in the Farm Lot. Northumberland Police responded to investigate the incident.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

National News

ValuJet admits responsibility for oxygen canisters

MIAMI — A ValuJet executive yesterday blamed a maintenance contractor for a crucial mistake that allowed hazardous oxygen-producing canisters to be shipped aboard doomed ValuJet Flight 592 without safety caps.

Under rigorous questioning from federal aviation experts, David Gentry, ValuJet vice president of heavy maintenance, said the airline had ultimate responsibility for the work done by outside contractors on its planes.

Gentry said SabreTech Corp. was at fault for not installing the safety caps, the first of a series of errors that may have resulted in a raging fire aboard the DC-9.

"(SabreTech) would have responsibility," Gentry said on the third day of a National Transportation Safety Board public hearing into the crash of the Flight 592, which plunged into the Florida Everglades on May 11, killing all 110 people aboard.

Russians inadvertently helped FBI in spy case

WASHINGTON — The Russians inadvertently helped catch a CIA officer accused of being a double agent when they asked the FBI for information on terrorism by Chechen separatists earlier this year. Shortly afterward, accused spy Harold Nicholson began searching CIA computers for the information, even though he had no need of the information for his job instructing CIA recruits, the FBI says.

FBI agent Michael Lonergan spelled out the Chechen element of the case in an affidavit. Lonergan said he believed Russian agents, not completely trusting a post-Cold War thaw of relations between the two countries, contacted their spies at the same time they requested official information.

Nicholson's court-appointed attorney, Jonathan Shapiro, said yesterday that his client would plead innocent to charges of conspiracy to commit espionage.

King estate sues CBS over 'dream' speech sales

NEW YORK — One of the century's most memorable speeches has become the subject of a court battle between CBS and the estate of Martin Luther King Jr.

In an attempt to prevent CBS from using the footage from King's "I Have a Dream" speech in a documentary to be sold on videotape, the estate accused the network of copyright infringement. The network, however, said the estate has no right to claim ownership of the footage.

King delivered the speech during the civil rights march on Washington on Aug. 28, 1963, and, according to his estate, registered it with the U.S. Copyright office shortly after. King himself filed a lawsuit to prevent people from selling recorded copies, said Phillip Jones, president of the Atlanta firm that manages the estate.

Rich worry that cash will spoil their children

NEW YORK — Two-thirds of the country's wealthiest parents are afraid their children will be overly materialistic and ignorant of money's value, according to a survey released yesterday. And half fear a cushy lifestyle could sap their kids drive and independence.

Yet many parents appear to undermine their own efforts to avoid the pitfalls of easy money.

More than three-quarters of those questioned in the latest study said their children would travel to Europe by age 18. More than two-thirds planned to give their children cars as soon as they were old enough to drive.

The survey was based on telephone interviews with 151 people who earn at least $200,000 a year or have a net worth of more than $3 million. It has a margin of error of plus or minus 6 percentage points.

World News

New refugee movement into Rwanda reported

RWANDA — Tens of thousands of Hutu refugees were reportedly heading through eastern Zaire into Rwanda yesterday—the possible vanguard of a second mass exodus.

The U.N.'s World Food Program reported "strong indications" that at least 100,000 Hutu refugees still in eastern Zaire were on the move yesterday.

"There are strong indications that a large movement of people from the Bukavu area are heading north towards Goma. We believe there could be more than 100,000," WFP spokeswoman Michele Quintaglie said in Nairobi.

Since Friday, an estimated half-million Rwandan refugees crossed back into their homeland, leading to expectations that a large multinational intervention force will be scaled back or eliminated.

But hundreds of thousands of refugees are still hiding out in the hills of eastern Zaire, aid officials say. "We are doing our best to locate them," said Peter Kessler, spokesman with the U.N. High Commissioner for Refugees.

Low voter turnout for Zambian election

LUSAKA, Zambia — Zambian President Frederick Chiluba headed for a landslide victory yesterday in the southern African country. The disputed election was marked by an opposition boycott and a low turnout.

Chiluba was leading with 76 percent of the 786,583 votes counted by mid-afternoon—enough to give him at least 50 percent of the estimated 1.1 million votes cast overall, even before results from 63 remaining constituencies were counted.

Two groups monitoring the election, however, gave conflicting views of the voting. A Zambian group said the election was neither free nor fair since half of eligible voters were unfairly excluded, but an international group said it found the balloting generally correct.

Former president Kenneth Kaunda, who ruled from independence in 1964 until Chiluba trounced him in Zambia's first free polls in 1991, was barred from contesting the poll by a new law because his parents, from Malawi, were not Zambian.

Taiwan, human rights top U.S.—China talks

BEIJING — Yesterday, China called again on the United States to stop selling arms to Taiwan, warning that the issue of the island that China considers part of its territory is the key to improved relations with Washington.

For his part, U.S. Secretary of State Warren Christopher said he told Beijing leaders that they had blatantly violated international norms on human rights. U.S. officials with Christopher said China was in total disagreement with the United States on this issue—which China has said is an internal matter.

Christopher arrived in China on Tuesday for a three-day visit. He said yesterday's talks, seven hours in all, with President Jiang Zemin, Premier Li Peng and Foreign Minister Qian Qichen covered several topics—nuclear non-proliferation consuming the most time.

Screaming: good for the soul?

TAIPEI, Taiwan — More than 200 people gathered outside a Taipei department store on Sunday to scream at the top of their lungs as part of a stress relief contest staged by an anti-smoking foundation.

"I want to use this screaming competition to show people other ways of releasing pressure," said Yeh Ta-Ching, supervisor of the anti-smoking foundation which organized the contest.

And some participants seemed to find it worthwhile. "I feel very comfortable after screaming," said one.

Another competitor, a woman, felt extremely relaxed about the proceedings—she took home ten thousand Taiwan dollars for registering the highest decibels.

ALLURE

From page 1

be in a sorority, and financial needs can be met by scholarships offered by each sorority."

Responding to the accusation of racism, Wisor said "Bucknell doesn't have many minorities to begin with. We deal with the population of the campus, given to us by admissions. I think race issues, like alcohol abuse, are wider university issues, not limited to Greek organizations."

Derek Guenther '97, InterFraternity Council president, could not be reached for comment.

A sorority member who wished not to be identified said "The four things addressed by the article are an inaccurate representation of the school's Greek system. First of all, the number of minorities attending Bucknell is small to begin with, and the Greek system reflects these numbers. Also how can single-sex organizations be sexist? In addition, Bucknell, as a private highly selective university, is elitist as a whole. And, even though Greek organizations may not necessarily promote the gaining of knowledge in every single activity they offer, they do have certain scholastic criteria for membership, and awards for high achievers."

Carol Wynperle '99, who is not a member of a sorority, said "I don't really think the Greek system is elitist. The whole idea of fraternities and sororities is to be with people who share something in common with you, just like most of us pick our friends anyway."

She added "People are going to drink at Bucknell anyway. Without fraternities, they'd be forced to go off campus, which would probably lead to more drunk driving accidents."

Lee Gratz '00 said "I think the whole Greek system is really stupid. The fraternities have so much power over social life, because they have alcohol. Here the only social life is drinking, and the only place for people, especially freshmen, to drink for free is at fraternities, so they hold that power over you."

"It seems like fraternities become elite according to how many people they reject from their parties," he added.

Rooke Chapel pulpit filled with new chaplain

BY KARIN DAVIDSON

Bucknellian Staff Writer

The man who is presently filling the pulpit at Rooke Chapel and assuming the associated responsibilities has just been appointed as University Chaplain.

Ian B. Oliver has held the interim position since August as the University searched for a permanent replacement for Alison Boden who left the position in the spring of 1995. "I'm thrilled. I really am. I didn't think I'd get the job. It's an honor personally and it's really going to be a challenge," Oliver said.

Oliver is a Phi Beta Kappa graduate of Amherst College, from where he received numerous awards, among them the Moseley Religion Prize, the Lincoln Lowell Russell Music Prize and the Moses Graduate Fellowship. He attended the University of Chicago Divinity School, where he concentrated in Ministry and Theology.

Oliver came to the University in August after having spent time in India as the Chaplain of Kodaikanal International School, a college-preparatory Christian boarding school. While he was there he directed the school's long-range planning process, headed the Religious Education Department, and founded a peer counseling program.

"It's a great position in terms of the chaplains job—compared to other schools it's a really neat chaplaincy. I've been impressed by Bucknell in the last three months that I've been here," Oliver said.

Prior to his overseas experience, Oliver served as the Chaplain of Kalamazoo college in Michigan from 1983 to 1988.

Oliver's goals for his position are "to try and make Bucknell a place where people can be comfortably religious, where they can integrate spirituality and their academics and where people feel more comfortable being who they are."

The Search Committee, chaired by William Becker, professor of religion, was formed last February.

Student's privileges "booted"

Karin Davidson—The Bucknellian

This Jeep was booted on Vaughn Literature Road.

A University student has found out the hard way that Public Safety is serious about parking regulations on campus.

A white jeep parked outside of the 24-hour study lab on Vaughan Literature Road has been "booted". An apparatus has been attached to its wheel making it impossible to move the vehicle without sustaining damage.

The student was guilty of six or more violations, which paid or unpaid results in a request by Public Safety for the return of his parking decal. Students with suspended parking permission are not allowed to park or drive on campus. Since the student failed to turn in his parking decal after two weeks, he was charged with failure to comply under the student code of conduct.

"We will continue to use [the boot] in the future but only when someone has failed to respond to our correspondence and continues to park on campus," said Vincent DeCerchio, director of Public Safety.

AMMON

From page 1

fore seen, and interviewing alumni to create the film. The video was shown on a large screen after the speeches in the dining area.

The evening concluded with a superb performance by the Bucknell University Orchestra followed by dancing with the notable Herm Miller Orchestra. Conductor of the Bucknell Orchestra, Christopher Para said, "It's a privilege to be part of the genesis of things that will come for the University."

Some students also attended representing different departments and the entire student body. "I love every minute of it," said Lara Spingler '97. "It's nice getting to meet trustees and other important members of the community," said David Hile '97.

Alexandra Betlyon '71 said, "I had a wonderful time. All these people from different generations say the same thing [about Bucknell]. It was a reaffirming evening. The only way to know Bucknell is to come here."

See photo essay of dinner-dance in the Features section on page 7.

Three University students charged with underage drinking

Joshua D. Watts '00, Alexander Bozic '00 and Matthew Halk '00 were charged with underage drinking by the Lewisburg Police on Sat. night, *The Daily Item* reported yesterday. Spotted in the cemetery on South Seventh Street, the police and public safety officers stopped the students who were allegedly intoxicated.

In an unrelated incident, Roberto A. Lainez '99, faces a charge of underage drinking issued by Lewisburg police. Lainez was treated on Sunday morning at Evangelical Community hospital for an alcohol overdose.

Campaign contributors deserve thanks

Thank you. Thank you. And thank you again to all those involved in the Capital Campaign.

Seventy-three million dollars has already been raised in the quest for $150 million. It is exciting to imagine all the improvements the University will enjoy as a result of this fund-raiser. Students will ultimately be the ones to benefit as the endowment increases and new buildings and facilities are constructed.

Last Saturday evening was one of glamour as guests, decked out in black ties and party dresses, arrived in limousines. But there was more to the evening then fancy desserts, wine and beautiful music. Enthusiastic individuals who really care about our University became a part of the festivities and shared their confidence in Bucknell. Organizers of the Capital Campaign and President Adams and his staff have spent unbelievable amounts of time constructing and carrying out this project and it seems to be paying off—literally.

What better publicity for the University than to see alumni contributing to their alma mater. This should say to students that those who have gone before them are appreciative of the education they have received.

Even though the campaign is still in its early stages and just half way to its goal, the project demonstrates to the campus at large that hard work and perseverance can make even what is considered a reach, attainable.

In an ideal world, an education would be available to anyone willing to dedicate time and energy to the cause. Unfortunately, an education is becoming increasingly more expensive. In order to create an environment conducive to learning and available to a diverse group, money becomes a central issue.

As current Bucknell students, we should be proud that our University has launched this campaign. But feeling proud is not good enough. Students, whether they know it or not, have a part in this Capital Campaign.

Students, it is up to you to convince faculty and administrators that your education is primary during your careers here. You can do this by staying involved in events on campus and maintaining your presence as decisions are made.

Remember who has gone before you and what they have done for your benefit. Strive to be like those persons who have helped to continue Bucknell's success throughout the years, and believe that your enthusiasm, verbal and monetary support will have a positive effect on generations yet to pass through the ranks at Bucknell.

LETTERS

Letter condemning Boy Scouts was misleading

TO THE EDITOR:

The letter written by Professor Thomas R. Mathies that appeared in the Bucknellian of Nov. 7th is based on a misunderstanding of the Boy Scout program and is extremely misleading. He accuses the venerable Boy Scouts of America of practicing discrimination in denying membership to a 13-year-old atheist.

The purpose of the Boy Scouts is to help build self-reliance and moral character into our leaders of tomorrow through the outdoor program. The Boy Scouts of America maintains that no Scout can grow into the best kind of citizen without recognizing an obligation to God and, therefore, recognizes the religious element in his training, but it is absolutely nonsectarian in its attitude towards that religious training. Its policy is that the home and the organization or group with which the Scout is connected shall give definite attention to religious life.

Let me say a few words on behalf of the quest for diversity. While on the one hand Bucknell has a nondiscriminatory policy with respect to admission and employment, it does, on the other hand, permit the existence of student, faculty, and administrative organizations in which the membership is expected to meet certain qualifications.

If a student belongs to a religious club is it understood that he believes and follows the tenets of the faith that the particular club represents. If one wishes to belong to a gay rights group then it is expected that a member would have a same sex orientation or is at least sympathetic to that group's interests. These clubs are not discriminatory in the sense that Professor Mathies uses the term. You can belong to any one of them if you subscribe to their beliefs. Being a Methodist, Roman Catholic, Jew, or atheist should not prevent us from making donations to the Salvation Army to support the good work they do even though we may not subscribe to its religious beliefs. To deny these special interest groups their existence or their means of support is to deny them the freedoms that are guaranteed by the Constitution.

A Boy Scout is defined as one who is trustworthy, loyal, helpful, friendly, courteous, kind, obedient, cheerful, thrifty, brave, clean and reverent. If a young man does not wish to live by the Scout Law, he is not a Scout and he should not force the organization to accept him as one.

The Boy Scouts is a private organization and is not supported by public funds. The support that it receives from the United Way is freely given by those who believe in what the Boy Scout program contributes to our society irrespective of the donor's religious scruples.

Those who do not wish to have their donation channeled to the Boy Scouts can so designate on the United Way checkoff card where they want their donation to be applied. Many of us believe in the good that the Boy Scouts do, and feel that we should not be prevented from making donations to the United Way in support of those causes we espouse.

Liberal arts education goes beyond athletics

TO THE EDITOR:

In response to the recent article on Bucknell's Capital Campaign:

The article states that a portion of the funds raised during the campaign will be used to build a new natatorium, annexed to the field house, which will house a large pool and sports health facilities. *The Bucknellian* also published an extensive article on the natatorium itself. I am disturbed, firstly, that *The Bucknellian* chose to spotlight the new sports facility, and then failed to do more than acknowledge the new music and art building, a much needed and much awaited replacement for the dilapidated building now home for these two departments.

Further, while I understand and very much agree with the need for upgrading the sports and sports health facilities on campus, I am dismayed that the University seems to be playing short shrift to the academic community on campus. The Department of Theatre and Dance has been fighting, with partial success, to raise funds to refurbish the University Theatre, now over 40 years old, with not a single renovation during that time. The University chose to exclude this renovation from the campaign, although extensive renovations are needed to upgrade the safety of the facility.

The Physical Plant came through during the past summer, helping to fund an extensive renovation of the electrical and rigging systems in the theatre (both seriously outdated). However, it was made fairly clear that the University Theatre and the Department of Theatre and Dance were not high on the University's priority list; not only was the renovation not included as part of the Campaign, but the Department was forced to use student safety concerns as a bargaining chip: It became a question of "do we need to fix this now, or can we risk it a little longer?"

Further, with the Sunflower Daycare Center moving out of Tustin Gymnasium, the Department of Theatre and Dance looked forward to claiming the vacant space, in order to utilize it as a space for acting and directing classes and to expand the costume shop facilities. With more groups, like Cap and Dagger's Company!, becoming actively involved in creating theatre, the expanded facilities would provide a much needed improvement on the struggle to claim such limited spaces as the "rug room," the basement classroom in which all students in the acting and directing classes must rehearse their work. However, the administration chose instead to move the Bucknell Outing Club into the space. While I would not debate the worthiness of the Outing Club's existence, I would question the decision to put its needs before those of the academic community. While both may have a valid and verifiable need to utilize the space, it seems to me that it is more fitting to the University's mission to expand the facilities of an academic group before those of an extracurricular one.

My point, in brief, is this: The function of the University, as I understand it, is to provide a liberal arts education. When the University dismisses the concerns of academic departments in favor of other student activities, it appears that this is forgotten. While I would agree that extracurricular activities are an essential part of the "liberal arts" experience, it has always been my understanding that one goes to college to study, first and foremost; the academic departments on this campus are the heart of that goal. The University Theatre continues to await much-needed renovation, and the Department of Theatre and Dance is forced to juggle a nearly impossible calendar in order to balance the use of its spaces; meanwhile, the University plans to build a swimming and sports health complex, and the Outing Club is granted the use of a vast space in Tustin. Where are our priorities?

OPINIONS

"Date rape drug" warrants attention

BY ELLEN MCWHORTER
Bucknellian Staff Writer

My opinion is that you should read this. Because of a recent increase in the number of rapes occurring on the Bucknell campus, information on Rohypnol, "the date rape drug of choice," is now particularly relevant.

Rohypnol ("roofies," "la roche," "rib," "R-2," "rope") is a brand name for flunitrazepam, a potent tranquilizer similar in nature to valium, but approximately ten times stronger. It produces a sedative effect, amnesia, muscle relaxation, slurred speech, hallucinations, extreme disorientation and a slowing of psychomotor responses, and it may be mistaken for drunkenness by an undiscerning eye. Sedation occurs five to 30 minutes after administration, and lasts for several hours.

Rohypnol can be combined with alcohol, marijuana or cocaine, and, because it is odorless, colorless and tasteless, can be easily consumed without suspicion of foul play.

The amnesia-producing effect may prevent users or victims from remembering why he or she took or how he or she received the drug in the first place. This makes thorough police investigations of sexually related offenses involving the drug extremely difficult. When mixed with alcohol or other drugs, Rohypnol may also lead to respiratory depression, aspiration or possibly death.

Clark Staten, director of the Emergency Response and Research Institute, writes that "Both law enforcement and drug counseling services caution that the use of Rohypnol is increasing and that additional quantities of it are being imported across the Mexican border, where it can be obtained by prescription."

The import is being sold in America for as little as $2 to $4 per vial, making it one of the more preferable drugs on college campuses, and particularly in college fraternities. To those who wonder what the significance of this is for Bucknell students—the drug is rumored to be circulating at Penn State.

There and elsewhere, Rohypnol has reportedly been added to beverages at fraternities and college social gatherings, where it is given to female guests in hopes of lowering inhibitions and more easily achieving sexual conquest. Some victims have reported waking up in fraternity houses with no clothes on, finding themselves surrounded by unfamiliar faces and having been sexually assaulted while under the drug's influence.

The danger for Bucknell students does not lie, then, in prepackaged alcohol (or homegrown marijuana for that matter), but in students who consider playing with Rohypnol to be a game.

So, if you plan to drink at the fraternities, go with friends who know you and could tell if you were acting strangely, and do not accept open drinks from anyone, even your friends who may not realize the danger contained in the drink they are offering you.

OPINIONS

Clinton's victory offers a lesson for the Republicans

BY ARGUN ULGEN
Bucknellian Staff Writer

Bill Clinton's easy campaign victory over Bob Dole once again proves that if our economy is stable before election time, the incumbent usually wins. The reasons for Clinton's easy victory are our present economic situation, Dole's lack of political platform and an ever increasing 'gender gap.'

In this year's election, the business cycle was on Bill Clinton's side. Although our economy experienced high unemployment and a large deficit during the early years of the Clinton Administration, our present economic situation is very stable.

We are experiencing low unemployment and inflation, and our budget deficit has been cut to close to $150 billion dollars. Although most economists have yet to explain the reason for the decrease in the budget deficit, the sheer fact that there has been a decrease boosted voters' confidence in Clinton.

Additionally, most voters would not realize these mystery, and only concentrate on our recent successes. Unfortunately for those Republicans who voted for Dole, "recent" just happened to fall near Election Day.

During this election year, Bob Dole was never able to formulate a solid political campaign. In fact, each of the many problems that he tried to address lacked popular support due to the ambiguities of their solutions.

For example, Bob Dole wanted to approach balancing the federal budget and he wanted 15 percent tax decreases across the board. Yet most people (including nationally renowned economists) would realize that such a large decrease in taxes would make it even more difficult to balance the budget.

Dole never presented a clear and concise plan on how he would balance the federal budget. On the other hand, Clinton's targeted tax cuts presented (as well as other ambitious promises, such as savings in Medicare and Medicaid) a more promising "bridge" into the next century.

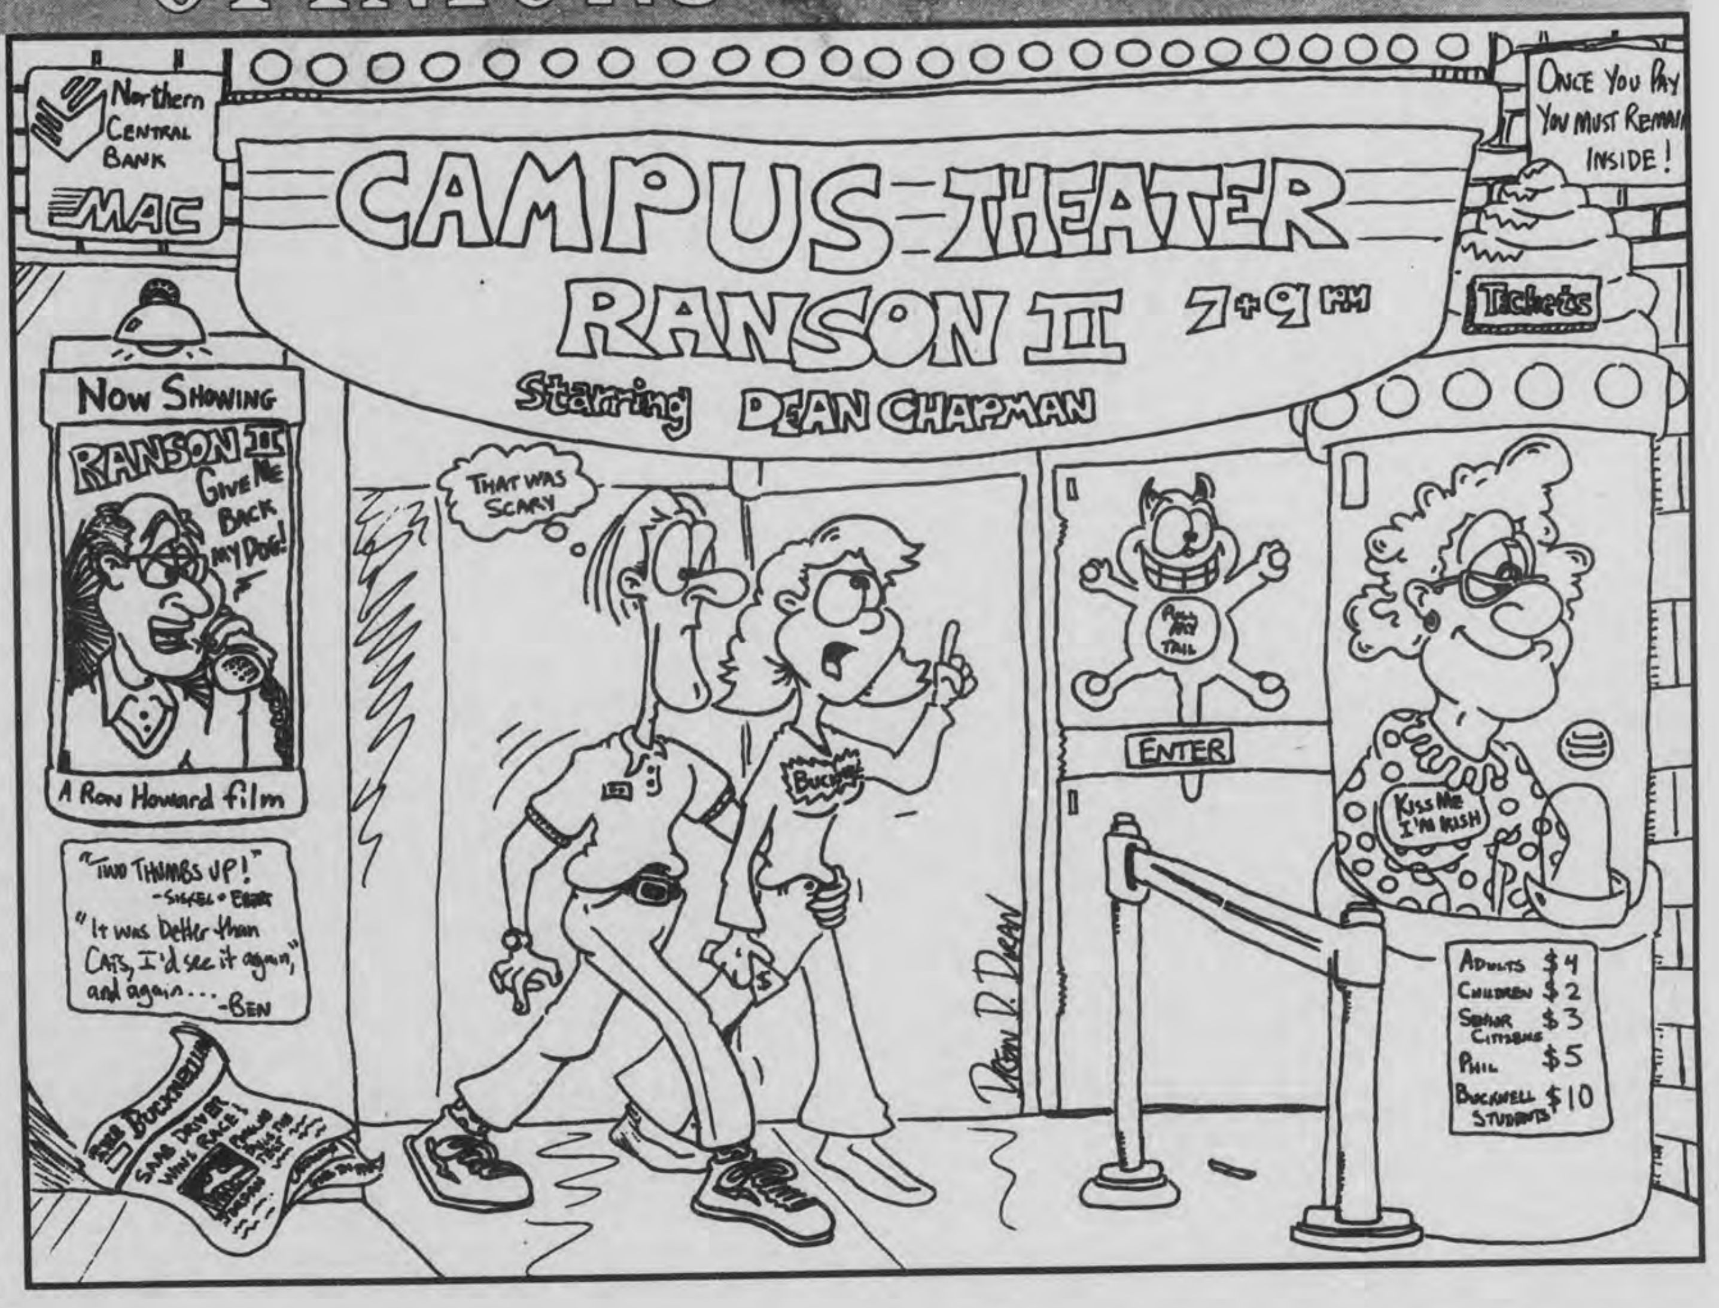
The final key to Clinton's victory deals with the "gender gap." This year, it may have been women who gave Clinton his biggest boost. Fifty-four percent of the women's vote was received by Clinton while Dole only received 38 percent. The reason for such a wide gap is that women saw many Republican policies as too harsh (such as their anti-abortion policy).

Republicans can still boast a somewhat successful election day as they gained three seats in Senate. Yet the GOP has to do some serious revamping if they want to dominate congress in 1998 and raise a solid Republican candidate in the year 2000.

Besides the need for unification within the party, the GOP party also needs to tone down its overly conservative image. In one study, four out of 10 voters believe that the GOP is too conservative. The Republican party also needs to close the gender gap in upcoming elections.

Although Bill Clinton is a reasonably intelligent politician, he is not a strong enough leader to unite Congress. Furthermore, a Republican congress will only serve to hinder the passing of some of Bill Clinton's bills.

It seems that the next four years are essential for the Republican party to build itself a stronger reputation. Otherwise, we may just have another Democratic president in the White House by the year 2000, and possibly a Democratic Congress.



Star athlete deserves student appreciation

BY BRETT TOMLINSON
Bucknellian Staff Writer

Last Saturday, one of the most remarkable athletes in the history of Bucknell had the best game of his career in the midst of the Patriot League title race. I guess that explains why a whopping 3,166 fans showed up to see the big event. I'm referring to last week's football game against Fordham, in which Rich Lemon '97 added his name to the record books in three more categories.

Attendance for the game was the lowest fair-weather figure of the season, with 6,000 fewer fans than the top draw of the season, the Parents Weekend contest against Penn. Granted, the numbers were skewed by Fordham's relatively small following, and the game was not very competitive after the third quarter. Nevertheless, the showing was pitiful.

Lemon deserves more from the student body he's represented with such poise and determination for the past four years. He has broken just about every record for a Bucknell running back, as well as a few league records, but in sports as in life, the numbers don't tell the whole story.

At 5' 8", 160 pounds, one might think Lemon would take a beating against defenders that outweigh him by 100 pounds or more.

In four years, he's been tackled about 1,000 times in games alone, but he's missed only one full game due to injury.

The incredible thing for Lemon is that his success has not gone to his head. In my first year of covering Bucknell football, I've noticed that Lemon is the consummate team player, crediting his line when he does well and comforting them when he struggles.

Even in the midst of his most frustrating season, Lemon has kept his composure, always stressing positives and defending his young offensive line. You do not have to be a football fan to appreciate Lemon's character.

Lemon is also a great role model for athletes at any level. If admissions brochures are accurate, then there are plenty of athletes in the student body, and athletes know what it's like to strive for countless hours to be the best for just one moment. Lemon has done that and more for four years. Sports fans and writers have noticed, but I do not think enough Bucknell students have.

On Saturday, the Bucknell football team will strap on their pads and march onto the field to battle Colgate with the Patriot League title on the line, and for about 15 seniors, it may be the last time they ever play the game they love. For over 3,000 students, it may be their last chance to see a player of Rich Lemon's caliber in a Bucknell uniform. I'm not trying to stir up school spirit, and I don't expect everyone to go crazy over Patriot League football. This is not Penn State by any means. I just think that a great student-athlete deserves a certain amount of respect from his peers.

Admission, as always, is free to students with their Bucknell I.D. and kickoff is at 12:30 p.m., so try to get enough energy to crawl out of bed, put on a sweatshirt, and walk all the way down to the stadium to watch some football. Who knows, it might be fun. I'm sure Rich Lemon would appreciate it.

SpeakOut

How do you feel about having male and female topless dancers perform at Skips?

Jessica Bulvin '00
"They have the right to have dancers there, but I personally wouldn't go."

Chris Monge '99
"I'm not 21, so I really don't care."

Melissa Wockley '97
"I think it's degenerative to the atmosphere of Lewisburg as a historical town, but it's a free country and as long as it doesn't infringe upon my life, it's something that society has said is acceptable."

J.P. McFadden '98
"I'm indifferent; it doesn't bother me and I won't patronize it."

Jesse Jackson's Texaco boycott will hurt the wrong targets

BY CHRIS ELLIS
Bucknellian Staff Writer

Last week, the bigotry and ugliness that has become a way of life in the Texaco oil corporation reached a head. A lawsuit that has been hanging over the heads of the company for almost three years was finally brought to the public spotlight as Jesse Jackson and members of the NAACP urged Americans to boycott the Texaco Corporations for what he called a "toxic atmosphere towards minorities" in the corporation. Unfortunately, Jackson's allegations are true.

Investigations into the hiring and promoting practices of Texaco seemed to prove that the company had been blatantly racist in both its hiring and promoting of minority executives.

These investigations were ignored, however, until findings last month gave actual, audiovisual proof to the fact that Texaco executives thought nothing of belittling minorities both verbally and empirically fueled the fires. In addition, top-ranking corporate officials were heard discussing plans to burn documents that could be incriminating to Texaco's defense in the lawsuit.

Confronted with this evidence, the company had no choice but to relent and settle the lawsuit to the tune of an almost unprecedented $176 million. Still, Jackson insisted that the boycott persist until the company shows tangible evidence of reversing and compensating for its past.

Jackson's boycott of a major corporation is not the first that the NAACP and similar minority groups have organized, nor will it be the last. Emotions and frustrations run high when evidence such as that presented against Texaco is brought into the open, and sometimes it seems as if a boycott is the only answer. The theoretical basis behind a corporate boycott is simple: The only way to a major CEO's ears are though his pocketbook. If you stop buying products, he is more likely to listen. Unfortunately, though, the top-ranking executives of a franchised corporation such as Texaco are rarely the ones to bear the brunt of a boycott's weight.

Texaco, as well as most national service chains that are often targets of boycotts, are franchised to individuals; that is, the corporation as a whole has only a small stake in the actual success or failure of each individual franchise.

Texaco, Inc., as well as most major franchised companies (McDonalds, etc.), receives a large sum of money as a franchise fee, and, in some cases, a varying percentage of the profits. The franchises are tied to the corporation as a whole through means of supply and advertising for the corporation, but are, in reality, independent of each other.

So what happens if a long-term major boycott such as this one works? Eventually, the corporation itself will feel the effects of the boycott—stock prices will go down, smaller profit margins will trickle in and less franchises will be sold. But in the meantime, the big businesses will not suffer—the small businesses will.

"This is just a little guy trying to make a living, not a man sitting in an office disparaging people," said a Texaco customer about Tony Pallito, a small franchise owner in one of the poorest areas of urban Newark, New Jersey, in last Monday's *New York Times*. "I don't care much about the boycott. I just came here to get my car fixed."

This customer's sentiment is being echoed across the nation as Texaco customers come to realize that boycotting the station will barely place a dent in the corporate coffers of Texaco's accused, but will break the small-business man and his employees.

For Pallito and many Texaco franchise owners, the station is the owner's only source of income—and the gas-station ownership market is hardly lucrative. Even a small drop in business could bring tougher times to an owner and his family, and a long-term organized boycott could mean the end of the franchise.

If nothing else, the Texaco boycott could force franchise owners to remove workers from the payroll, allowing the boycott to affect someone even less affluent than the gas station owner; the minimum wage-earning station attendant.

In Pallito's case, this would mean laying off members of an employee base that is comprised almost solely of minorities.

Fortunately, the boycott is not working. Most of Texaco's 14,000 stations nationwide report only a marginal loss in gas and service sales, and some report no decrease or a slight increase in sales during the boycott period.

Surprisingly, the stations in minority-heavy areas are the ones to report the least overall decrease in revenue. This is good news for franchise owners like Pallito and his employees, who are struggling to make a living in a tough inner-city—an environment far removed from Texaco's corporate boardroom.

"You can't judge the entire company by what a few people said," another one of Pallito's customers commented. "He puts his life on the line every day for his station—just by being out there."

EDITORIAL

Campaign contributors deserve thanks

Thank you. Thank you. And thank you again to all those involved in the Capital Campaign.

Seventy-three million dollars has already been raised in the quest for $150 million. It is exciting to imagine all the improvements the University will enjoy as a result of this fund-raiser. Students will ultimately be the ones to benefit as the endowment increases and new buildings and facilities are constructed.

Last Saturday evening was one of glamour as guests, decked out in black ties and party dresses, arrived in limousines. But there was more to the evening then fancy desserts, wine and beautiful music. Enthusiastic individuals who really care about our University became a part of the festivities and shared their confidence in Bucknell. Organizers of the Capital Campaign and President Adams and his staff have spent unbelievable amounts of time constructing and carrying out this project and it seems to be paying off—literally.

What better publicity for the University than to see alumni contributing to their alma mater. This should say to students that those who have gone before them are appreciative of the education they have received.

Even though the campaign is still in its early stages and just half way to its goal, the project demonstrates to the campus at large that hard work and perseverance can make even what is considered a reach, attainable.

In an ideal world, an education would be available to anyone willing to dedicate time and energy to the cause. Unfortunately, an education is becoming increasingly more expensive. In order to create an environment conducive to learning and available to a diverse group, money becomes a central issue.

As current Bucknell students, we should be proud that our University has launched this campaign. But feeling proud is not good enough. Students, whether they know it or not, have a part in this Capital Campaign.

Students, it is up to you to convince faculty and administrators that your education is primary during your careers here. You can do this by staying involved in events on campus and maintaining your presence as decisions are made.

Remember who has gone before you and what they have done for your benefit. Strive to be like those persons who have helped to continue Bucknell's success throughout the years, and believe that your enthusiasm, verbal and monetary support will have a positive effect on generations yet to pass through the ranks at Bucknell.

LETTERS

Letter condemning Boy Scouts was misleading

TO THE EDITOR:

The letter written by Professor Thomas R. Mathies that appeared in the Bucknellian of Nov. 7th is based on a misunderstanding of the Boy Scout program and is extremely misleading. He accuses the venerable Boy Scouts of America of practicing discrimination in denying membership to a 13-year-old atheist.

The purpose of the Boy Scouts is to help build self-reliance and moral character into our leaders of tomorrow through the outdoor program. The Boy Scouts of America maintains that no Scout can grow into the best kind of citizen without recognizing an obligation to God and, therefore, recognizes the religious element in his training, but it is absolutely nonsectarian in its attitude towards that religious training. Its policy is that the home and the organization or group with which the Scout is connected shall give definite attention to religious life.

Let me say a few words on behalf of the quest for diversity. While on the one hand Bucknell has a nondiscriminatory policy with respect to admission and employment, it does, on the other hand, permit the existence of student, faculty, and administrative organizations in which the membership is expected to meet certain qualifications.

If a student belongs to a religious club is it understood that he believes and follows the tenets of the faith that the particular club represents. If one wishes to belong to a gay rights group then it is expected that a member would have a same sex orientation or is at least sympathetic to that group's interests. These clubs are not discriminatory in the sense that Professor Mathies uses the term. You can belong to any one of them if you subscribe to their beliefs. Being a Methodist, Roman Catholic, Jew, or atheist should not prevent us from making donations to the Salvation Army to support the good work they do even though we may not subscribe to its religious beliefs. To deny these special interest groups their existence or their means of support is to deny them the freedoms that are guaranteed by the Constitution.

A Boy Scout is defined as one who is trustworthy, loyal, helpful, friendly, courteous, kind, obedient, cheerful, thrifty, brave, clean and reverent. If a young man does not wish to live by the Scout Law, he is not a Scout and he should not force the organization to accept him as one.

The Boy Scouts is a private organization and is not supported by public funds. The support that it receives from the United Way is freely given by those who believe in what the Boy Scout program contributes to our society irrespective of the donor's religious scruples.

Those who do not wish to have their donation channeled to the Boy Scouts can so designate on the United Way checkoff card where they want their donation to be applied. Many of us believe in the good that the Boy Scouts do, and feel that we should not be prevented from making donations to the United Way in support of those causes we espouse.

Liberal arts education goes beyond athletics

TO THE EDITOR:

In response to the recent article on Bucknell's Capital Campaign:

The article states that a portion of the funds raised during the campaign will be used to build a new natatorium, annexed to the field house, which will house a large pool and sports health facilities. *The Bucknellian* also published an extensive article on the natatorium itself. I am disturbed, firstly, that *The Bucknellian* chose to spotlight the new sports facility, and then failed to do more than acknowledge the new music and art building, a much needed and much awaited replacement for the dilapidated building now home for these two departments.

Further, while I understand and very much agree with the need for upgrading the sports and sports health facilities on campus, I am dismayed that the University seems to be playing short shrift to the academic community on campus. The Department of Theatre and Dance has been fighting, with partial success, to raise funds to refurbish the University Theatre, now over 40 years old, with not a single renovation during that time. The University chose to exclude this renovation from the campaign, although extensive renovations are needed to upgrade the safety of the facility.

The Physical Plant came through during the past summer, helping to fund an extensive renovation of the electrical and rigging systems in the theatre (both seriously outdated). However, it was made fairly clear that the University Theatre and the Department of Theatre and Dance were not high on the University's priority list; not only was the renovation not included as part of the Campaign, but the Department was forced to use student safety concerns as a bargaining chip: It became a question of "do we need to fix this now, or can we risk it a little longer?"

Further, with the Sunflower Daycare Center moving out of Tustin Gymnasium, the Department of Theatre and Dance looked forward to claiming the vacant space, in order to utilize it as a space for acting and directing classes and to expand the costume shop facilities. With more groups, like Cap and Dagger's Company!, becoming actively involved in creating theatre, the expanded facilities would provide a much needed improvement on the struggle to claim such limited spaces as the "rug room," the basement classroom in which all students in the acting and directing classes must rehearse their work. However, the administration chose instead to move the Bucknell Outing Club into the space. While I would not debate the worthiness of the Outing Club's existence, I would question the decision to put its needs before those of the academic community. While both may have a valid and verifiable need to utilize the space, it seems to me that it is more fitting to the University's mission to expand the facilities of an academic group before those of an extracurricular one.

My point, in brief, is this: The function of the University, as I understand it, is to provide a liberal arts education. When the University dismisses the concerns of academic departments in favor of other student activities, it appears that this is forgotten. While I would agree that extracurricular activities are an essential part of the "liberal arts" experience, it has always been my understanding that one goes to college to study, first and foremost; the academic departments on this campus are the heart of that goal. The University Theatre continues to await much-needed renovation, and the Department of Theatre and Dance is forced to juggle a nearly impossible calendar in order to balance the use of its spaces; meanwhile, the University plans to build a swimming and sports health complex, and the Outing Club is granted the use of a vast space in Tustin. Where are our priorities?

OPINIONS

"Date rape drug" warrants attention

BY ELLEN MCWHORTER
Bucknellian Staff Writer

My opinion is that you should read this. Because of a recent increase in the number of rapes occurring on the Bucknell campus, information on Rohypnol, "the date rape drug of choice," is now particularly relevant.

Rohypnol ("roofies," "la roche," "rib," "R-2," "rope") is a brand name for flunitrazepam, a potent tranquilizer similar in nature to valium, but approximately ten times stronger. It produces a sedative effect, amnesia, muscle relaxation, slurred speech, hallucinations, extreme disorientation and a slowing of psychomotor responses, and it may be mistaken for drunkenness by an undiscerning eye. Sedation occurs five to 30 minutes after administration, and lasts for several hours.

Rohypnol can be combined with alcohol, marijuana or cocaine, and, because it is odorless, colorless and tasteless, can be easily consumed without suspicion of foul play.

The amnesia-producing effect may prevent users or victims from remembering why he or she took or how he or she received the drug in the first place. This makes thorough police investigations of sexually related offenses involving the drug extremely difficult. When mixed with alcohol or other drugs, Rohypnol may also lead to respiratory depression, aspiration or possibly death.

Clark Staten, director of the Emergency Response and Research Institute, writes that "Both law enforcement and drug counseling services caution that the use of Rohypnol is increasing and that additional quantities of it are being imported across the Mexican border, where it can be obtained by prescription."

The import is being sold in America for as little as $2 to $4 per vial, making it one of the more preferable drugs on college campuses, and particularly in college fraternities. To those who wonder what the significance of this is for Bucknell students—the drug is rumored to be circulating at Penn State.

There and elsewhere, Rohypnol has reportedly been added to beverages at fraternities and college social gatherings, where it is given to female guests in hopes of lowering inhibitions and more easily achieving sexual conquest. Some victims have reported waking up in fraternity houses with no clothes on, finding themselves surrounded by unfamiliar faces and having been sexually assaulted while under the drug's influence.

The danger for Bucknell students does not lie, then, in prepackaged alcohol (or homegrown marijuana for that matter), but in students who consider playing with Rohypnol to be a game.

So, if you plan to drink at the fraternities, go with friends who know you and could tell if you were acting strangely, and do not accept open drinks from anyone, even your friends who may not realize the danger contained in the drink they are offering you.

Clinton's victory offers a lesson for the Republicans

BY ARGUN ULGEN
Bucknellian Staff Writer

Bill Clinton's easy campaign victory over Bob Dole once again proves that if our economy is stable before election time, the incumbent usually wins. The reasons for Clinton's easy victory are our present economic situation, Dole's lack of political platform and an ever increasing 'gender gap.'

In this year's election, the business cycle was on Bill Clinton's side. Although our economy experienced high unemployment and a large deficit during the early years of the Clinton Administration, our present economic situation is very stable.

We are experiencing low unemployment and inflation, and our budget deficit has been cut to close to $150 billion dollars. Although most economists have yet to explain the reason for the decrease in the budget deficit, the sheer fact that there has been a decrease boosted voters' confidence in Clinton.

Additionally, most voters would not realize these mystery, and only concentrate on our recent successes. Unfortunately for those Republicans who voted for Dole, "recent" just happened to fall near Election Day.

During this election year, Bob Dole was never able to formulate a solid political campaign. In fact, each of the many problems that he tried to address lacked popular support due to the ambiguities of their solutions.

For example, Bob Dole wanted to approach balancing the federal budget and he wanted 15 percent tax decreases across the board. Yet most people (including nationally renowned economists) would realize that such a large decrease in taxes would make it even more difficult to balance the budget.

Dole never presented a clear and concise plan on how he would balance the federal budget. On the other hand, Clinton's targeted tax cuts presented (as well as other ambitious promises, such as savings in Medicare and Medicaid) a more promising "bridge" into the next century.

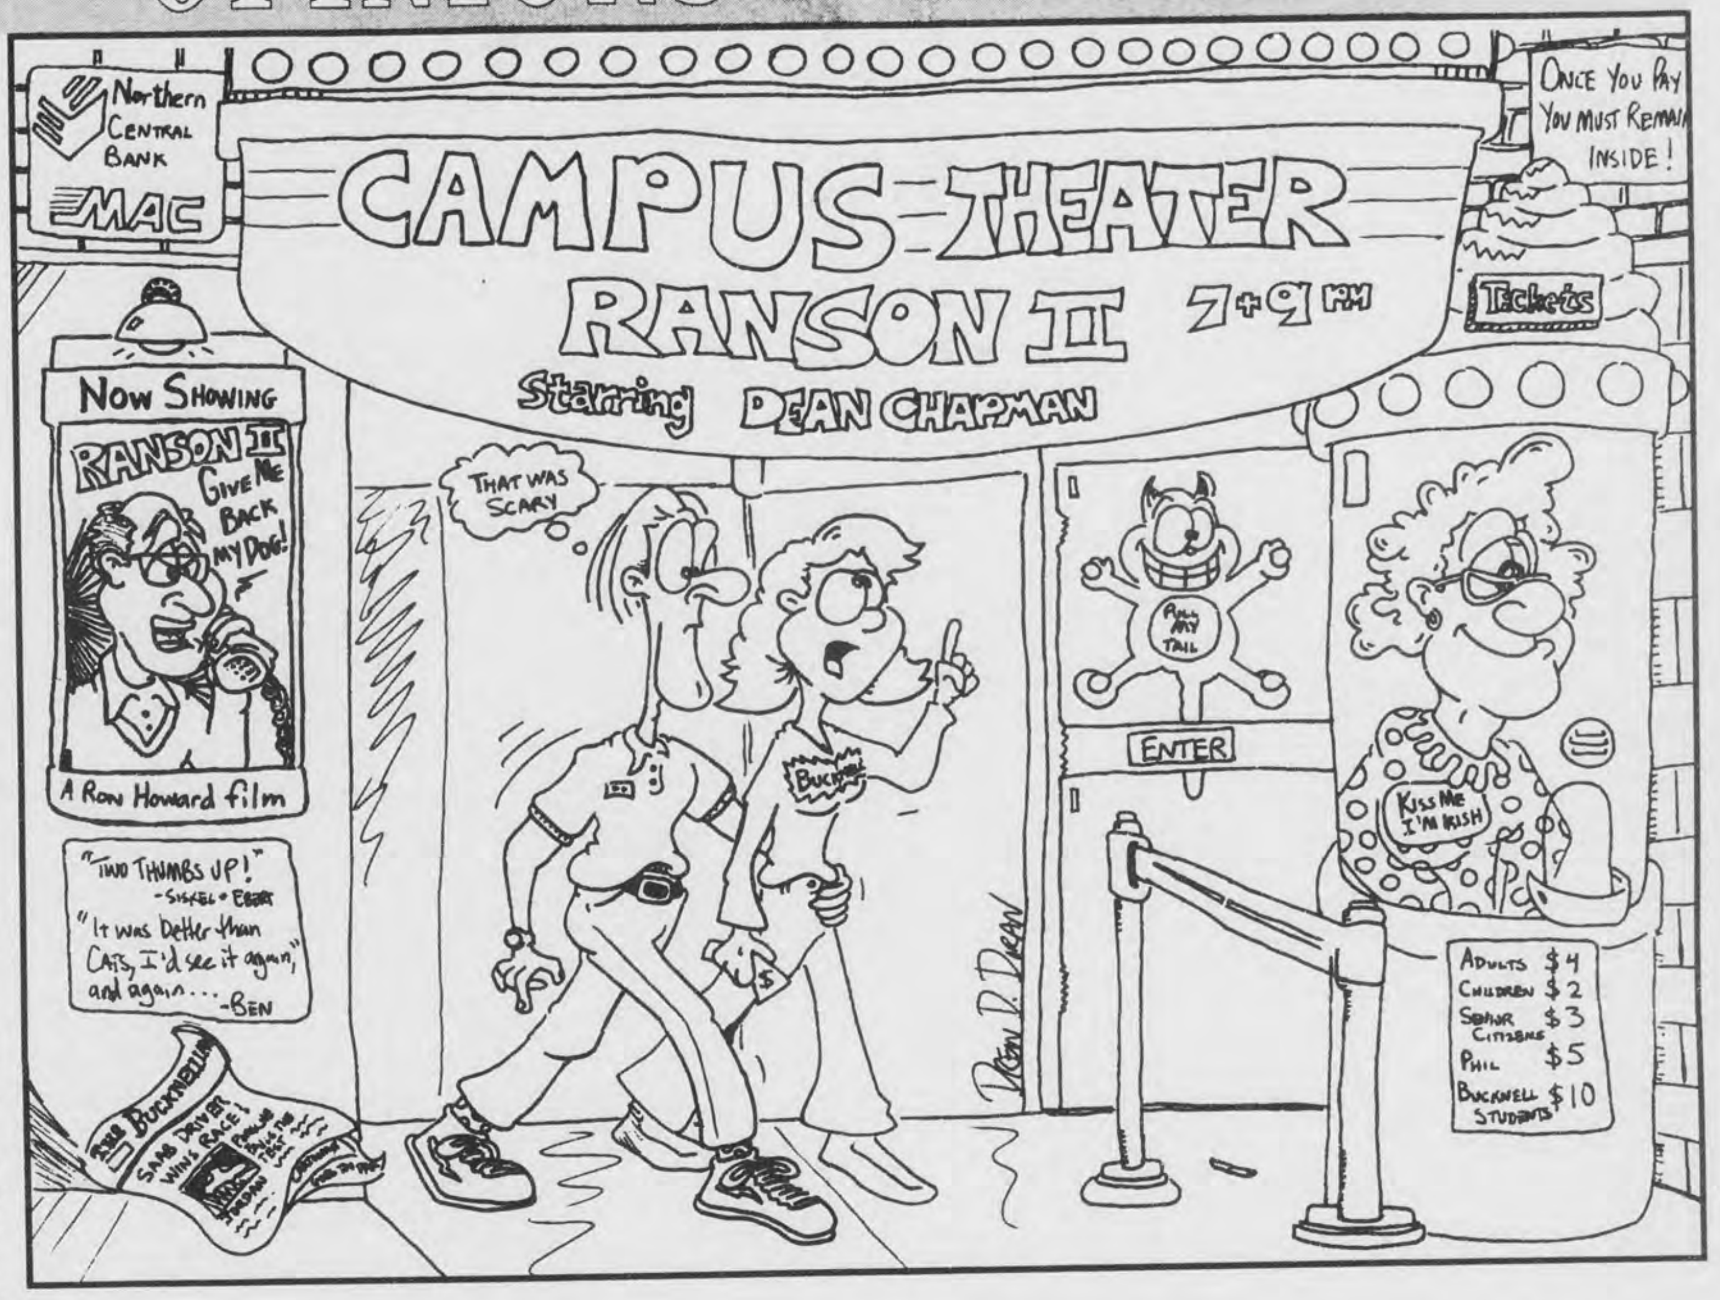
The final key to Clinton's victory deals with the "gender gap." This year, it may have been women who gave Clinton his biggest boost. Fifty-four percent of the women's vote was received by Clinton while Dole only received 38 percent. The reason for such a wide gap is that women saw many Republican policies as too harsh (such as their anti-abortion policy).

Republicans can still boast a somewhat successful election day as they gained three seats in Senate. Yet the GOP has to do some serious revamping if they want to dominate congress in 1998 and raise a solid Republican candidate in the year 2000.

Besides the need for unification within the party, the GOP party also needs to tone down its overly conservative image. In one study, four out of 10 voters believe that the GOP is too conservative. The Republican party also needs to close the gender gap in upcoming elections.

Although Bill Clinton is a reasonably intelligent politician, he is not a strong enough leader to unite Congress. Furthermore, a Republican congress will only serve to hinder the passing of some of Bill Clinton's bills.

It seems that the next four years are essential for the Republican party to build itself a stronger reputation. Otherwise, we may just have another Democratic president in the White House by the year 2000, and possibly a Democratic Congress.



Star athlete deserves student appreciation

BY BRETT TOMLINSON
Bucknellian Staff Writer

Last Saturday, one of the most remarkable athletes in the history of Bucknell had the best game of his career in the midst of the Patriot League title race. I guess that explains why a whopping 3,166 fans showed up to see the big event. I'm referring to last week's football game against Fordham, in which Rich Lemon '97 added his name to the record books in three more categories.

Attendance for the game was the lowest fair-weather figure of the season, with 6,000 fewer fans than the top draw of the season, the Parents Weekend contest against Penn. Granted, the numbers were skewed by Fordham's relatively small following, and the game was not very competitive after the third quarter. Nevertheless, the showing was pitiful.

Lemon deserves more from the student body he's represented with such poise and determination for the past four years. He has broken just about every record for a Bucknell running back, as well as a few league records, but in sports as in life, the numbers don't tell the whole story.

At 5' 8", 160 pounds, one might think Lemon would take a beating against defenders that outweigh him by 100 pounds or more.

In four years, he's been tackled about 1,000 times in games alone, but he's missed only one full game due to injury.

The incredible thing for Lemon is that his success has not gone to his head. In my first year of covering Bucknell football, I've noticed that Lemon is the consummate team player, crediting his line when he does well and comforting them when he struggles.

Even in the midst of his most frustrating season, Lemon has kept his composure, always stressing positives and defending his young offensive line. You do not have to be a football fan to appreciate Lemon's character.

Lemon is also a great role model for athletes at any level. If admissions brochures are accurate, then there are plenty of athletes in the student body, and athletes know what it's like to strive for countless hours to be the best for just one moment. Lemon has done that and more for four years. Sports fans and writers have noticed, but I do not think enough Bucknell students have.

On Saturday, the Bucknell football team will strap on their pads and march onto the field to battle Colgate with the Patriot League title on the line, and for about 15 seniors, it may be the last time they ever play the game they love. For over 3,000 students, it may be their last chance to see a player of Rich Lemon's caliber in a Bucknell uniform. I'm not trying to stir up school spirit, and I don't expect everyone to go crazy over Patriot League football. This is not Penn State by any means. I just think that a great student-athlete deserves a certain amount of respect from his peers.

Admission, as always, is free to students with their Bucknell I.D. and kickoff is at 12:30 p.m., so try to get enough energy to crawl out of bed, put on a sweatshirt, and walk all the way down to the stadium to watch some football. Who knows, it might be fun. I'm sure Rich Lemon would appreciate it.

How do you feel about having male and female topless dancers perform at Skips?

Jessica Bulvin '00
"They have the right to have dancers there, but I personally wouldn't go."

Chris Monge '99
"I'm not 21, so I really don't care."

Melissa Wockley '97
"I think it's degenerative to the atmosphere of Lewisburg as a historical town, but it's a free country and as long as it doesn't infringe upon my life, it's something that society has said is acceptable."

J.P. McFadden '98
"I'm indifferent; it doesn't bother me and I won't patronize it."

Jesse Jackson's Texaco boycott will hurt the wrong targets

BY CHRIS ELLIS
Bucknellian Staff Writer

Last week, the bigotry and ugliness that has become a way of life in the Texaco oil corporation reached a head. A lawsuit that has been hanging over the heads of the company for almost three years was finally brought to the public spotlight as Jesse Jackson and members of the NAACP urged Americans to boycott the Texaco Corporations for what he called a "toxic atmosphere towards minorities" in the corporation. Unfortunately, Jackson's allegations are true.

Investigations into the hiring and promoting practices of Texaco seemed to prove that the company had been blatantly racist in both its hiring and promoting of minority executives.

These investigations were ignored, however, until findings last month gave actual, audiovisual proof to the fact that Texaco executives thought nothing of belittling minorities both verbally and empirically fueled the fires. In addition, top-ranking corporate officials were heard discussing plans to burn documents that could be incriminating to Texaco's defense in the lawsuit.

Confronted with this evidence, the company had no choice but to relent and settle the lawsuit to the tune of an almost unprecedented $176 million. Still, Jackson insisted that the boycott persist until the company shows tangible evidence of reversing and compensating for its past.

Jackson's boycott of a major corporation is not the first that the NAACP and similar minority groups have organized, nor will it be the last. Emotions and frustrations run high when evidence such as that presented against Texaco is brought into the open, and sometimes it seems as if a boycott is the only answer. The theoretical basis behind a corporate boycott is simple: The only way to a major CEO's ears are though his pocketbook. If you stop buying products, he is more likely to listen. Unfortunately, though, the top-ranking executives of a franchised corporation such as Texaco are rarely the ones to bear the brunt of a boycott's weight.

Texaco, as well as most national service chains that are often targets of boycotts, are franchised to individuals; that is, the corporation as a whole has only a small stake in the actual success or failure of each individual franchise.

Texaco, Inc., as well as most major franchised companies (McDonalds, etc.), receives a large sum of money as a franchise fee, and, in some cases, a varying percentage of the profits. The franchises are tied to the corporation as a whole through means of supply and advertising for the corporation, but are, in reality, independent of each other.

So what happens if a long-term major boycott such as this one works? Eventually, the corporation itself will feel the effects of the boycott—stock prices will go down, smaller profit margins will trickle in and less franchises will be sold. But in the meantime, the big businesses will not suffer—the small businesses will.

"This is just a little guy trying to make a living, not a man sitting in an office disparaging people," said a Texaco customer about Tony Pallito, a small franchise owner in one of the poorest areas of urban Newark, New Jersey, in last Monday's *New York Times*. "I don't care much about the boycott. I just came here to get my car fixed."

This customer's sentiment is being echoed across the nation as Texaco customers come to realize that boycotting the station will barely place a dent in the corporate coffers of Texaco's accused, but will break the small-business man and his employees.

For Pallito and many Texaco franchise owners, the station is the owner's only source of income—and the gas-station ownership market is hardly lucrative. Even a small drop in business could bring tougher times to an owner and his family, and a long-term organized boycott could mean the end of the franchise.

If nothing else, the Texaco boycott could force franchise owners to remove workers from the payroll, allowing the boycott to affect someone even less affluent than the gas station owner; the minimum wage-earning station attendant.

In Pallito's case, this would mean laying off members of an employee base that is comprised almost solely of minorities.

Fortunately, the boycott is not working. Most of Texaco's 14,000 stations nationwide report only a marginal loss in gas and service sales, and some report no decrease or a slight increase in sales during the boycott period.

Surprisingly, the stations in minority-heavy areas are the ones to report the least overall decrease in revenue. This is good news for franchise owners like Pallito and his employees, who are struggling to make a living in a tough inner-city—an environment far removed from Texaco's corporate boardroom.

"You can't judge the entire company by what a few people said," another one of Pallito's customers commented. "He puts his life on the line every day for his station—just by being out there."

MAPLE ALMOND BISCOTTI

Infuse your world with a crunch so intense that your teeth may rattle, while escaping from the finicky nature of most cookies. Moistness is a last desire here, as these twice-baked players steal away the necessity of your childhood cookie jar. Laced with cinnamon and toasted almonds, they derive their passion from real maple syrup and their café-esque shape which just screams to be dipped. And chocolate lovers need not panic, as a slinky dipping is always an option.

Ingredients:

3 cups flour
1 T baking powder
1 cup sugar
3 eggs
1/2 cup canola oil
1/2 cup real maple syrup
1 cup toasted sliced almonds
1-2 T cinnamon

1. Toast almonds: lay in a single layer on a baking sheet, bake at 425°; shake tray every few minutes to ensure even browning. Remove from oven, allow to cool completely to instill the crunch. Grind 1/2 cup to as fine as possible without reaching the "almond butter" state. Reserve other 1/2 cup sliced.

2. Whisk together flour and baking soda, set aside.

3. Lightly beat eggs by hand; add sugar and continue to beat until fluffy.

4. Add oil, maple syrup and cinnamon and 1/2 cup of ground almonds, and 1/2 cup sliced almonds.

5. Carefully incorporate flour mixture until dough pulls easily away from bowl. You may need more, depending on the texture... add until you can work with it without excessive stickiness.

6. Knead lightly for a few moments, and halve. Carefully form two logs, about 4 inches wide and 1/2 inch high, patting to obtain a rectangular shape.

7. Bake at 350° for 15 minutes.

8. Remove tray from oven, increasing heat to 375°. Diagonally slice each log into 1/2 inch pieces, at about 45°. Flip cookies onto the "cut" sides. Bake for 5 more minutes.

9. Repeat until each side has been exposed, or until cookies are crisp and golden. If tips begin to burn, return heat to 350°.

The temptation of *biscotti* lies not only in their easy-to-keep texture (store at room temperature, loosely covered), but also in their healthy flavors. The recipe above contains approximately 178 grams of fat, which is only 3.7 per cookie assuming 48 to a batch. Canola oil and almonds are each a piece of the latest "good fats" trend, incorporating only 2/14 grams of saturated fat, not to mention their high status in the Mediterranean dietary pyramid. If you fall prey to the chocolate itch, carefully microwave 1/2 cup of semi-sweet chocolate chips until melted, and dip biscotti sides, flipping to cool. This adds some fat, but may also assuage more dangerous chocolate cravings.

Student marathons through metropolis

BY MELISSA RENZI
Bucknellian Staff Writer

You may have seen him running around town or campus. You may have thought he was doing supplementary training for the cross country team or compensating for a lack of car, but Brad Kerschensteiner '99 was actually training for the New York City Marathon.

On a fold-up lawn chair, amidst shelves of books and a noticeably-gold medal hung over his desk, Kerschensteiner told me the roots of his running career. "I switched sports completely my junior year in high school. I didn't make the cut for varsity soccer, so I went out for the cross country team for the heck of it."

A seemingly appropriate turn of fate, Kerschensteiner laughs recalling his previous thoughts on running. "I used to see the track and cross country guys running and I thought 'that's the last thing I want to do.' When I started cross country I got 'Most Improved Runner.' I ran varsity track for the next four seasons."

"My first major running experience was the end of my senior year. I entered the Columbus Marathon," Kerschensteiner said. He recalls going in with the mindset, "I'm in shape, I'll just give it a shot." His goal was to run about half of the marathon, but he continued to finish all 26 miles.

Kerschensteiner's mother was among the first he saw at the finish line. When she asked him if he ever planned to run another marathon he quickly replied, "No chance!"

Hundreds of miles and a year and a half later, Kerschensteiner managed to train and coach himself in preparation for another marathon. "It's kind of what running is all about. It's sort of a love-hate thing sometimes, but you always come back around," he admits.

While most of us set goals for ourselves that come to life through deadlines with professors, coaches and advisors, this Bucknellian found an inner drive that took him all the way to New York City.

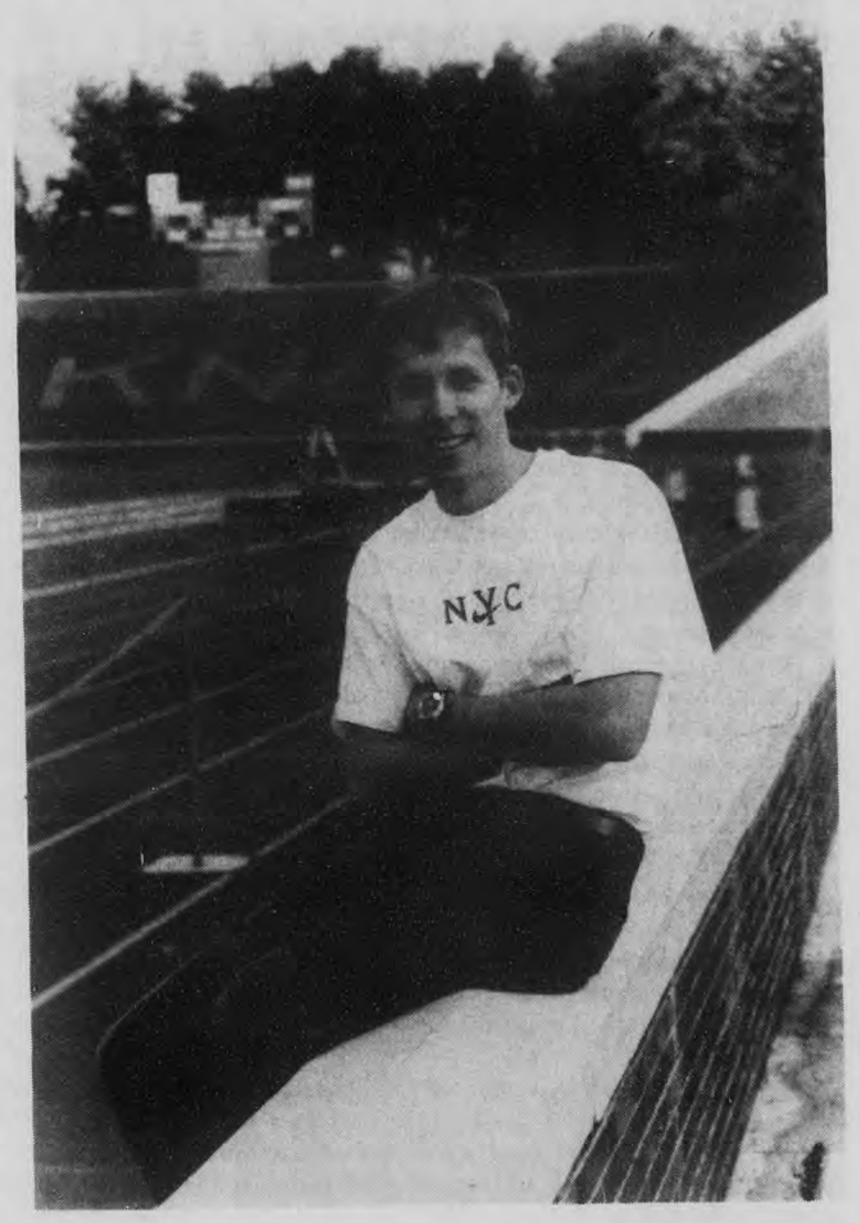
So why isn't Kerschensteiner a member of the University's track or cross country teams? "I was burnt out after my spring track season senior year. Running is a sport where you have to really love it to even think about it. After my freshman year I really missed it [running]. I was out of shape for a year." Could there be a better way to show his love of running than to train for a marathon?

Kerschensteiner and his long-time friend and fellow runner, John Schwartz, a sophomore at Princeton University, decided to strive for the marathon together. "He sort of talked me into it... so we could train together, or at least at the same time," Kerschensteiner said. "It was interesting when we finally met up in New York City. We ran the whole marathon together, from start to finish. It was a good feeling."

Kerschensteiner finds great support and inspiration within his friends. He laughs recalling some of his friends that would drive him five miles away so he could run back to campus.

While Kerschensteiner and I were talking, his friend, Cara Mickelsen '99, stopped by his room. Recognizing the strength that he finds within his friends, I asked Mickelsen for the friend's perspective on his training. "Brad's awesome. I see him running everywhere. Every time I walk around campus I see him running. He runs for like five hours straight."

Putting in 30 to 45 miles a week, Kerschensteiner finds a sort of stress relief in his running. "With all that's going on in my life... running became a good backdrop." He juggles training alongside working towards an English major and pledging the Chi Phi Fraternity.



Cara Mickelsen—The Bucknellian

Brad Kerschensteiner '99 has been running since his junior year of high school. Recently, Kerschensteiner ran the New York Marathon.

With the backdrop of the mountains in Colorado and country roads here in Central Pennsylvania, Kerschensteiner's training atmospheres were worlds apart from that of the city. "I'm so used to running by myself on serene country roads... and then I hopped into a marathon with 30,000 people in New York City. In a sense it's frustrating because running is a very personal thing," Kerschensteiner said.

Completing the marathon in four hours and 23 minutes, one might wonder about Kerschensteiner's next goal. "I'm still trying to talk my dad into doing a father-son marathon."

With the experience of running in the New York City Marathon under his belt, Kerschensteiner was asked if his outlook on himself has changed. He thought for a minute and said, "It's very hard to describe. I became a person more acutely aware of who I am and what I can do."

Alum returns to tackle homophobia

BY STEPHANIE KARDOHELY
Bucknellian Staff Writer

As an undergraduate, Stuart Flavell '81 was told that Bucknell was not the place to stay if he was gay. But Flavell, former president of SAE, vice president of IFC, and writer for *The Bucknellian*, decided it was exactly where he wanted to be. Flavell now returns to the University as advisor to the Office of Lesbian, Gay and Bisexual Concerns.

On a rainy Friday morning Flavell was busy checking his email when I met him in his office in Roberts Hall.

He explained that in addition to working part time at the University he plays an active role in government and community organizations in Hartford, Connecticut. His work in Connecticut is very important to him because, as he describes it, "The things I do in Hartford are very intense." He is part of the mayor's commission for gay and lesbian concerns for the City of Hartford, chairs the Ryan White Title I program to care for AIDS patients and co-chairs another statewide program for AIDS patients.

While Flavell has an active life outside the University, it has played a prominent role in his life. After high school, Flavell traveled to Cali, Colombia with Youth for Understanding. While in Cali, Flavell says, "I kind of figured out that I was gay." He became acquainted with a gay community in Cali. "It was exciting to have some friends outside my host family." Flavell spent a lot of time with people in this community, but he did not yet consider himself gay.

When his living experience in Cali was over, Flavell says, "I came to Bucknell and lived on fourth Trax and did everything that one does at Bucknell." Flavell was an energetic part of the University community. He rushed and was part of a group that restarted SAE. As a freshman he was elected president of SAE and later vice president of IFC. Flavell recalls, "I did all that 'stuff.' I was a real Bucknellian."

He enjoyed life at the University, but describes how he anxiously waited for the feeling that he was gay to go away. "I kept waiting... and it wouldn't go away." As a means of forgetting this feeling he self-medicated with drinking alcohol. In an attempt to meet other people who were going through the same experience, Flavell sought the advice of Psych Services. "I said, you know, I have to do something about this." But in 1979 the best advice they could offer was to change or to find a school with an active gay population. Flavell wanted to do neither.

The University was an isolating place for a gay man in the late 1970s. Flavell says that even today, although the University may not be an openly hostile place for gay and lesbian students, being homosexual or bisexual at the University is still an isolating experience. Many students are often afraid to disclose their sexuality to their closest friends.

After graduating from the University, Flavell returned to his hometown of Hartford, Connecticut where he became an activist in the gay community. He helped to publish a gay and lesbian newspaper, helped organize the Connecticut Gay Pride Festival and fought for passage of the Gay Civil Rights Law in Connecticut. In the spring of 1987 he returned to the University to speak and later worked with the newly founded Gay, Lesbian and Bisexual Alumni Association (GALABI).

Lesbian, gay and bisexual people are very involved at the University, but they are often invisible. "I want to raise the visibility level. We're definitely part of the community and making big contributions here," Flavell said.

In his new role at the University, Flavell has found that one of his greatest assets is that he went to Bucknell. In Hartford, Flavell is an organizer. "I thought that [organizing] would be my strength in this position... but people's favorite part of me is that I went here. That I was very mainstream. I was like everyone else at Bucknell."

Everyone is socialized to be homophobic. "We're raised in a homophobic culture, I want to allow people to be themselves and get on with the business of living. We [men] are run a lot by our fear of being perceived as being queer... we watch the way we walk, the way we talk, who we talk to and what we wear. It's a concern," Flavell said.

Flavell thinks college is an important time to break down the social barriers that keep people from appreciating that each person has something to offer to a community. "This is an incredible four years here, an incredible opportunity to figure out something about who you are and what you are, to think about things that you haven't thought about or wouldn't dare think about before. This is a place where you start to think on your own."

The Office of Lesbian, Gay, and Bisexual Concerns provides personal counseling and fields questions about gay and lesbian issues. Flavell stresses that although he can organize the functions of the office, much of the actual work is done by students as a resource for students. Flavell says that gay and lesbian students need to realize they can be an important resource in helping someone to break through the culture of homophobia. He would like the Office of Lesbian, Gay and Bisexual Concerns to be a place where students can work out their homophobia before they get out into an increasingly diverse workplace.

The Office of Lesbian Gay and Bisexual Concerns is currently working on a project researching gay and lesbian history at the University. The project includes interviewing University Alumni. Flavell recognizes the importance of providing a link between gay and lesbian alumni and the University. "You get really attached to this community over four years. You have no idea how attached you get." The University has played an important role in the lives of these alumni and they would like to give back to it.

In his return to Bucknell, Flavell noted the increase in lesbian and gay alumni communication with the University. Flavell cites the reason for this participation is the links that these alumni are given through the Office of Lesbian, Gay and Bisexual Concerns along with GALABI.

Flavell also wishes to make women feel welcome at the office. Many women help staff the office and Flavell himself is concerned with women's issues. He is trained as a rape counselor and has led the National Conference of Men and Masculinity, an essentially feminist conference.

"The work we're doing here is important. It has lifelong implications for everyone involved. I'd like to cultivate more of an appreciation for others and our unique ways of expression and part of that is about gay and lesbian students," Flavell said.

Flavell was an energetic part of the University community. He rushed and was part of a group that restarted SAE. As a freshman he was elected president of SAE and later vice president of IFC. Flavell recalls, "I did all that 'stuff.' I was a real Bucknellian."

He enjoyed life at the University, but describes how he anxiously waited for the feeling that he was gay to go away. "I kept waiting... and it wouldn't go away." As a means of forgetting this feeling he self-medicated with drinking alcohol. In an attempt to meet other people who were going through the same experience, Flavell sought the advice of Psych Services. "I said, you know, I have to do something about this." But in 1979 the best advice they could offer was to change or to find a school with an active gay population. Flavell wanted to do neither.

The University was an isolating place for a gay man in the late 1970s. Flavell says that even today, although the University may not be an openly hostile place for gay and lesbian students, being homosexual or bisexual at the University is still an isolating experience. Many students are often afraid to disclose their sexuality to their closest friends.

After graduating from the University, Flavell returned to his hometown of Hartford, Connecticut where he became an activist in the gay community. He helped to publish a gay and lesbian newspaper, helped organize the Connecticut Gay Pride Festival and fought for passage of the Gay Civil Rights Law in Connecticut. In the spring of 1987 he returned to the University to speak and later worked with the newly founded Gay, Lesbian and Bisexual Alumni Association (GALABI).

Lesbian, gay and bisexual people are very involved at the University, but they are often invisible. "I want to raise the visibility level. We're definitely part of the community and making big contributions here," Flavell said.

In his new role at the University, Flavell has found that one of his greatest assets is that he went to Bucknell. In Hartford, Flavell is an organizer. "I thought that [organizing] would be my strength in this position... but people's favorite part of me is that I went here. That I was very mainstream. I was like everyone else at Bucknell."

Everyone is socialized to be homophobic. "We're raised in a homophobic culture, I want to allow people to be themselves and get on with the business of living. We [men] are run a lot by our fear of being perceived as being queer... we watch the way we walk, the way we talk, who we talk to and what we wear. It's a concern," Flavell said.

Flavell thinks college is an important time to break down the social barriers that keep people from appreciating that each person has something to offer to a community. "This is an incredible four years here, an incredible opportunity to figure out something about who you are and what you are, to think about things that you haven't thought about or wouldn't dare think about before. This is a place where you start to think on your own."

The Office of Lesbian, Gay, and Bisexual Concerns provides personal counseling and fields questions about gay and lesbian issues. Flavell stresses that although he can organize the functions of the office, much of the actual work is done by students as a resource for students. Flavell says that gay and lesbian students need to realize they can be an important resource in helping someone to break through the culture of homophobia. He would like the Office of Lesbian, Gay and Bisexual Concerns to be a place where students can work out their homophobia before they get out into an increasingly diverse workplace.

The Office of Lesbian Gay and Bisexual Concerns is currently working on a project researching gay and lesbian history at the University. The project includes interviewing University Alumni. Flavell recognizes the importance of providing a link between gay and lesbian alumni and the University. "You get really attached to this community over four years. You have no idea how attached you get." The University has played an important role in the lives of these alumni and they would like to give back to it.

In his return to Bucknell, Flavell noted the increase in lesbian and gay alumni communication with the University. Flavell cites the reason for this participation is the links that these alumni are given through the Office of Lesbian, Gay and Bisexual Concerns along with GALABI.

Flavell also wishes to make women feel welcome at the office. Many women help staff the office and Flavell himself is concerned with women's issues. He is trained as a rape counselor and has led the National Conference of Men and Masculinity, an essentially feminist conference.

"The work we're doing here is important. It has lifelong implications for everyone involved. I'd like to cultivate more of an appreciation for others and our unique ways of expression and part of that is about gay and lesbian students," Flavell said.

Couples dance the night away as the Capital Campaign gets glamorous start

Above left to right: *President Adams; The scrumptious chocolate cream dessert was one of the highlights of the evening enjoyed by all; Lee Idleman '54 leads the audience in a toast; A grand ice sculpture signifying Bucknell's 150 years greeted the guests in the foyer; Harp music played by Elizabeth Etters was in the background as the guests arrived.*

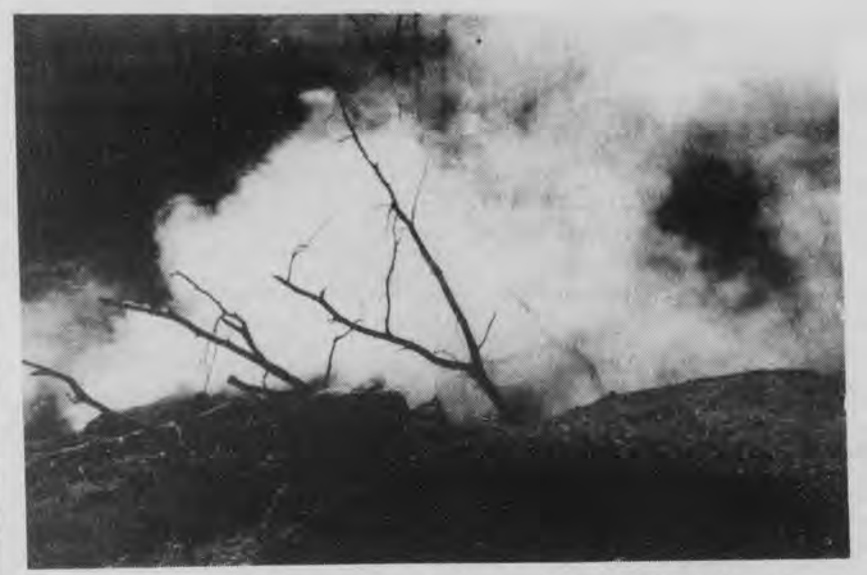
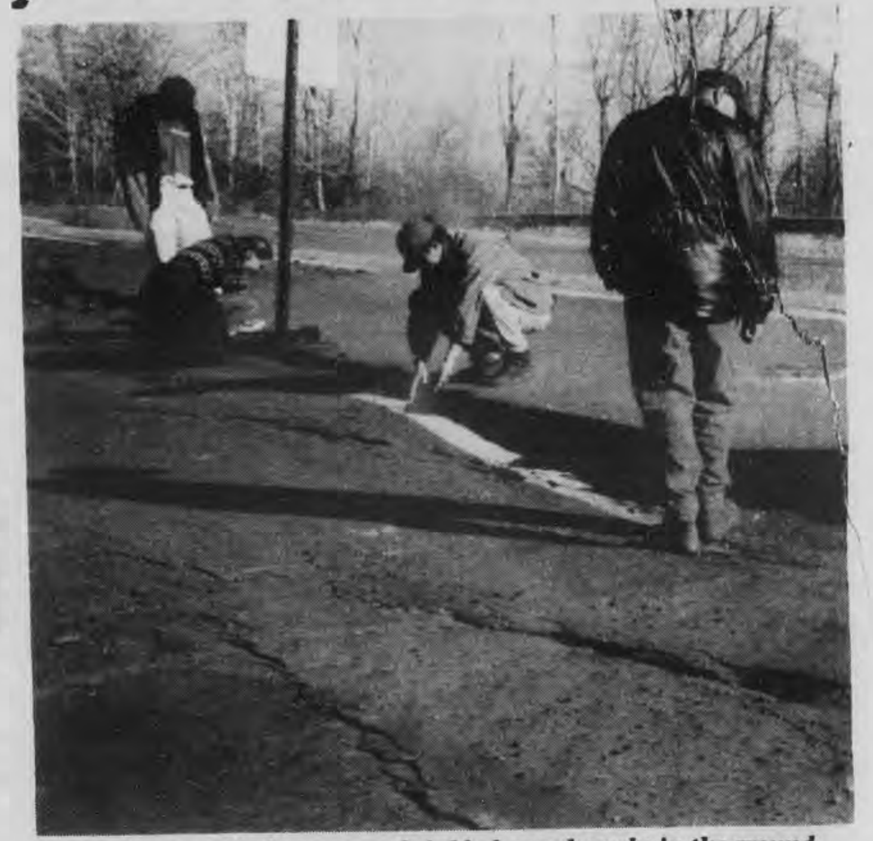
Environmental college examines 35-year old mine fire

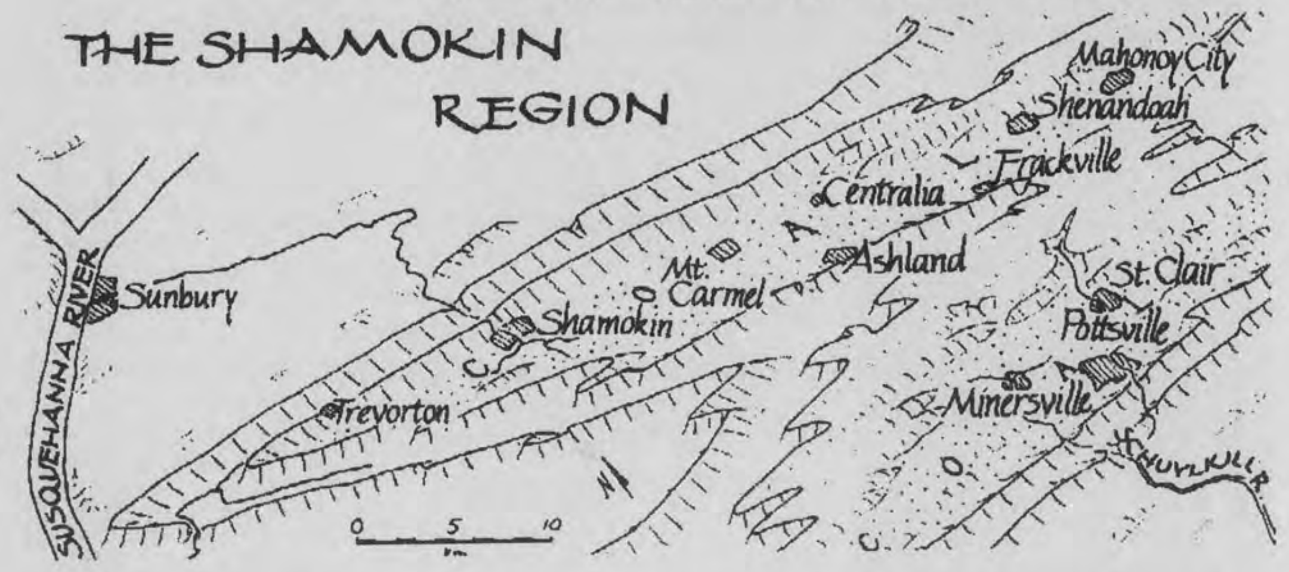
Associate Geography Professor and Director of Environmental Studies Ben Marsh took a group of students from the Environmental Residential College to a variety of coal mines in the area. "I wanted the students to understand resource extraction and the processes that go behind the production of those resources," said Marsh. The group visited the strip mines of Centralia, Mt. Carmel, and Shamokin.



In the small town of Centralia, students witnessed the external evidence of the underground mine fires that have been burning since the 1960s. The once flourishing mining community is now home to only a few families. "The story of these towns is fascinating," said Marsh, "What happened wasn't only to the land but to the community as well." The people remaining in old mining towns are attached to the land. They travel into Harrisburg and other towns for work but hold on to the land that has been home to them for generations.



The underground inferno caused sinkholes and cracks in the ground that present problems to motorists and pedestrians alike. Perhaps even more unbelievable than the event itself, is the lack of attention that the incident received from the local and national authorities. As the fires continue to spread, the possibility of extinguishing them diminishes.



Right: The group of students travelled through Shamokin, Mt. Carmel, and Centralia to the site of the initial underground fire. Potential danger exists as the fire spreads toward the much larger town of Ashland.

Caught in the Web: Interesting food and drink sites

BY CURRAN FILER

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. A lot of it is stupid but not all of it. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category 7MARY3X5CARD: Food and Drink Sites

The Virtual Bar
`http://www.TheVirtualBar.com`

This site is basically a database of over 1700 drink recipes with a few interesting drinking tidbits thrown in. There is a collection of drinking games and some stupid bar tricks, but the real gem is the drink recipe collection. You can search for drinks alphabetically, by drink type, or just tell it what you have in your bar and it will figure out all the drinks you can make.

The KBS Beer Bottle Collection
`http://tuoppi.oulu.fi/kbs/beer`

If you've ever wondered what beer from other countries looks like, this is the site for you. The Kaijonharju Boozing Society of Finland has been collecting pictures of beer bottles from around the world and this is its on-line archive. You can look at the pictures, send in comments and reviews of the beer, or even send them a full bottle of any beer they might be missing and they will put it in the collection. The site has 1000 different bottles in it (Slovakia has 11!).

The YumYum Web Site
`http://www.yumyum.com`

This site has a database of over 10,000 recipes that you can search for free. You choose the category (everything from appetizers, to meats, to beverages) and then search for a specific word in the name of the dish. You can also browse the entire category. YumYum also publishes a Shareware Windows recipe database program called "From Scratch" that you can download so you can keep all these recipes on your own computer.

The Spork Homepage
`http://www.spork.org`

Don't forget your utensils if you are planning a big meal. This site is devoted to that old friend from the middle school cafeteria, the spork. Here you can buy spork clothing and get spork information from around the world. The animation is cool, and there's even AVI movies of people playing with sporks.

The Internet Pizza Server Home Page
`http://www.ecst.csuchico.edu/-pizza`

You've seen virtual flowers and virtual voodoo dolls, but now there's virtual pizza. Choose from meat, veggie, breakfast items, sporting goods, junk food, hardware and other miscellaneous toppings, and have the pizza you make sent to your computer in seconds. You can also download the picture of the pizza. These guys from Chico State have too much free time.

The Unofficial McDonalds Happy Meal Page
`http://www.ionet.net/~saylor/happy.shtml`

If you'd rather not have pizza then try this Happy Meal site. It's got superior graphics, and an archive of all the Happy Meal toys. There are even pictures of the current toys (the Space Jam figures). Apparently, collecting fast food toys is a popular hobby because you can follow the link to the McDonalds Collector's Club and join over 1200 other people who collect Happy Meal stuff.

Jelly Belly On-line
`http://www.jellybelly.com`

Now that we've had dinner we should have some dessert. For those who share Ronald Reagan's taste in candy there is the Jelly Belly jelly bean web site. You can order on-line, learn the history of jelly beans, and take a 3-D cyber tour of the factory. Peruse the art gallery of pictures made entirely out of jelly beans, or get the official list of all 40 Jelly Belly flavors. This site also gives out 500 free samples every day, but it's popular so the samples go fast.

The Ben&Jerry Web Page
`http://www.benjerry.com`

If you'd rather have ice cream, there's the Ben&Jerry's ice cream and sorbet web site. They have a flavor list, and a list of all their "Scoop Shop" franchises. Also, there are games, clothes to buy, and of course, you can order ice cream by mail.

The SPAM Haiku Archive
`http://www.naic.edu/~jcho/spam/sha.html`

If you need some after dinner entertainment this is the place to get it. This site has over 5200 haiku poems about SPAM, that wonder (mystery?) meat. Most are dumb, some are clever, and all are weird. Apparently, people spend a lot of their time writing these things. The poems are also grouped into categories. So if you are looking for haiku about SPAM and love you can find them all at once. There are also SPAM sonnets and SPAM limericks. If you want to write your own you can submit them to the archive and maybe you too can be a SPAM poet.

Music, psychology combines to study memory

BY JAMIE KRAUK
Bucknellian Staff Writer

"As a psychologist, I seek for ways to externalize the internal processes of the mind and brain," said Professor Andrea Halpern of the University's psychology department. Throughout the majority of her career, Halpern has concentrated her research in the area of music and memory.

Recently, Halpern is involved in a number of collaborative efforts in an attempt to answer the question of how individuals are able to remember music.

Research assistant Amy-Beth Hird '98 is helping Halpern with her experimentation. The study involves a computer generated tune which is unfamiliar to all participants. The subjects are asked to repeat the tune by singing it back to the observer. The tune is repeated and sung back until the participants repeat it correctly.

With each presentation of the tune, it is expected that another part will be remembered. The hypothesis is that the rhythm and contour of the song will be the first recalled and then the actual intervals will be remembered. It is this hierarchical patterning that the experimenters are looking for. The experiment also studies the effect of musical training on the results and ability of individuals to remember music.

The collaborative part of the experimental process is one in which Halpern places a particular significance. "We are privileged to be in a position to have such collaborative efforts. It represents the broad connections we have," Halpern said.

Halpern and her student assistant will tape record all of the tunes that the participants sing back to them after each repetition. These will be sent to a scorer at Northwestern University who will then aid the project with his input by scoring each echoed tune. In this manner, it is possible to establish the exact sequence of recall.

Another project in the works of particular interest also deals with recall and the effect that age and training have on the ability to remember music, but it approaches the subject from a different angle. It is a collaboration with a professor of the University of Texas in Dallas.

"One of the advantages of studying musical ability is that there are always various levels of expertise within every age group," Halpern explained. The difference between this study and the previous one is that it involves familiar tunes. It either plays a tune or asks the participant to imagine it. Each tune can be played either on the piano or on the trumpet.

After 30 songs have been heard or imagined, the participant is given a list of tunes and asked for each one whether it was in the experiment. If the answer is yes, the question becomes whether the tune was actually heard or imagined, and whether it was in piano or trumpet.

The results of the experiment have been surprising. Age had an effect on the ability of the participants to remember if they had heard or imagined the tune. Older individuals are more likely to think they actually heard a tune that they imagined. With timbre (instrumental tone) recall, age or musical ability had no apparent effect. All participants found this a difficult task.

In order to utilize a grant that she received from McDonnell-Pew, Halpern is also working with a professional musicologist from Northwestern University on yet another project that examines the patterning of the brain as it functions to remember tunes. The study has also shown that the brain waves show a similar pattern when recalling a tune that was only imagined

The significance of this research is that it enables broader generalizations to be made. "We, myself and my colleagues, are among the first to use music as a means of studying memory," Halpern said. This technique enables scientists to relate the various aspects of the field in an attempt to establish some generalizations.

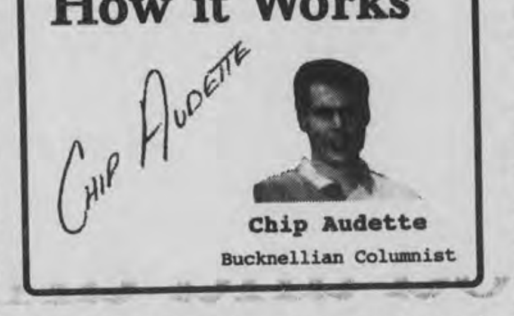
Receiving her doctorate in psychology from Stanford, Halpern considers herself a natural scientist with interests in cognitive neuroscience as well as cognitive psychology. Her quest for an answer to the question of how people remember music has been aided in the last 14 years by her diverse interests. This study has led her into contact with many people from all walks of life and has opened doors for collaboration with many resources.

Beetna Kim—The Bucknellian

Psychology professor Andrea Halpern has dedicated much of her research during her 14 years at the University to the question: How do people remember music?

New computer virus affects word processing files

How it Works



Chip Audette
Bucknellian Columnist

Known by names like *Concept*, *DMV*, and *Nuclear*, there is a new class of computer viruses which infect Microsoft Word files. Unlike other computer viruses which are platform specific, Word macro viruses can affect Macintosh, Windows 3.1, and Windows 95 users alike. Its ability to move and to hide in a Word file, as well as infect just about any type of computer, makes these viruses especially adept at spreading through a computer-dependent campus like Bucknell. While they are usually only an inconvenience, the viruses may become more aggressive as they corrupt data or delete files. This whole class of viruses is so new, however, that effective methods of detection, protection and removal are still unproven.

In general, computer viruses are small computer programs which reproduce themselves while (usually) corrupting or deleting files on your computer. A computer virus will often spread by making a copy of itself onto any floppy disks that are inserted into the computer. Once a disk is infected, the virus can spread to any computer that reads the infected disk.

This new class of viruses, called Word Macro Viruses, are unique to the computer world because they run inside Microsoft Word. These new viruses are written in Word's macro language and operate just like a normal macro. A macro is a program which a user can write to perform some sort of automated task. A Word user, for example, can write a Word macro which would go through a document and create a dropped capital at the beginning of every new chapter just like a fine book. Unlike a normal macro, however, a macro virus is written with a malicious intent.

The way these viruses work, is that they are stored as a macro inside of a Word document. Whenever that file is opened (by double-clicking or opening through Word), Word reads the text in the file, the formatting commands, and any macros which are included. After the file is open, the Word Macro Virus automatically activates and copies itself into a special part of Word known as the Normal template. Once part of the Normal template, it will be activated every time Word is started. From the Normal template, it will also be in a position to spread itself by copying itself into any file which Word opens.

But since these new viruses are *Word* Macro Viruses, they can only run in Word and can only do damage when Word is open. The benefit of this is that only people who use Microsoft Word can be affected. On the downside, a Word Macro Virus can infect any type of computer that runs Word. Previously, IBM viruses could only infect IBMs and Macintosh viruses could only infect Macintoshes. A Word Macro Virus, on the other hand, can equally infect Word for Macintosh, Word for Windows, or Word for Windows 95. The only limitation is that Word Macro Viruses require Word 6.0 or higher.

A symptom of a Word Macro Virus infection is that Word will try to save all files as templates instead of as normal documents. In most cases, this is just an annoyance to the user because it prevents the file from being renamed when using the "Save As" command. Once saved as a template, however, the file is able to spread the virus to new computers.

Another symptom is that under the "Tools" menu item "Macro...", some oddly named macros will be present. Macro names such as "CloseAll", "Autoexec", "AAAZAO", "AAAZFS", and "Payload" could all be indicative of a Word Macro Virus infection. These macros are the actual programs which perform the nasty deeds of the virus. Sometimes, the virus may decide to corrupt your document or delete files from the hard drive. Other times, it may choose to print strange messages on the printer. Mostly, though, it does nothing and, therefore, goes unnoticed as it spreads from computer to computer.

Protecting oneself from these viruses is a difficult issue. Most general virus protection programs are beginning to look for Word Macro Viruses, but their reliability and effectiveness are untested. Another method of protection is to write your own macro which will stop all macros (both good and bad) from executing automatically. This method is certain to stop any macro virus from infecting your machine, but most people are unfamiliar with creating their own macros.

A third method is to use a pre-made suite of protective macros. One such suite is called Scanprot and it is beginning to be deployed in the public computer labs. Scanprot is a set of macros which becomes part of Word and automatically cleans files which are infected with certain macro viruses. It also blocks all automatically executing macros (like any unknown viruses which might have passed through the cleaning stage) from activating.

In general, protection is difficult to achieve. If your documents are currently un-infected, a simple way to protect yourself is to use the "Save As" option to save your documents in file format such as Word for Windows 2.0 or Word for Macintosh 5.1. Neither of these formats can transmit macro viruses so, while this may not be the most elegant solution, your documents will always stay "clean". If your documents are already infected, however, it is best to simply go to the Computer Center Help Desk and ask for help.

Probable infestation of scabies high with students

BY MITCH STEWART

Scabies, a skin disease caused by an almost invisible organism, is a common disorder among students because of the environment in which they live, and the contractibility of the scabies mite.

Anyone can acquire scabies because it is highly contagious. Scabies often spreads among students rapidly due to their close contact with each other. Roommates and sexual partners, as well as casual acquaintances, are all likely candidates for the spread of an infestation.

Scabies usually spreads by direct contact with another person who is infested. Even a handshake can result in scabies being transmitted to another person. Exchanging clothing and sharing a bed is also a means of spreading scabies.

Fortunately, the scabies mite does not "jump" from one person to another, and does not live long in clothing or bed sheets.

When someone first acquires scabies, the male and female mite will mate on the skin surface. The female then uses her jaws and forelegs to burrow underneath the skin where she lays one to three eggs daily. In a few days, the eggs hatch, and the larvae travel to the surface of the skin.

When the female mites reach maturity, they mate and begin the cycle again. Eventually, one can see grayish-white zigzag burrows just below the skin, which are a tell-tale sign that someone is infested with scabies.

Another symptom of scabies is a red itchy rash, usually in the area infested with the mite. However, there have been cases where the whole body has reacted to the scabies infestation and a rash can appear on the whole body.

Fortunately, there is a simple cure for scabies. Because scabies is caused by an insect, any insecticide agent, such as DDT, can be used to remove the infestation.

However, because DDT is hazardous to your health, other less hazardous agents have been found and can be prescribed by a doctor.

Treatment is so effective that the actual scabies mite can be gone within 24 hours, but the itch may remain for two or three weeks.

Music, psychology combines to study memory

By Jamie Krauk
Bucknellian Staff Writer

"As a psychologist, I seek for ways to externalize the internal processes of the mind and brain," said Professor Andrea Halpern of the University's psychology department. Throughout the majority of her career, Halpern has concentrated her research in the area of music and memory.

Recently, Halpern is involved in a number of collaborative efforts in an attempt to answer the question of how individuals are able to remember music.

Research assistant Amy-Beth Hird '98 is helping Halpern with her experimentation. The study involves a computer generated tune which is unfamiliar to all participants. The subjects are asked to repeat the tune by singing it back to the observer. The tune is repeated and sung back until the participants repeat it correctly.

With each presentation of the tune, it is expected that another part will be remembered. The hypothesis is that the rhythm and contour of the song will be the first recalled and then the actual intervals will be remembered. It is this hierarchical patterning that the experimenters are looking for. The experiment also studies the effect of musical training on the results and ability of individuals to remember music.

The collaborative part of the experimental process is one in which Halpern places a particular significance. "We are privileged to be in a position to have such collaborative efforts. It represents the broad connections we have," Halpern said.

Halpern and her student assistant will tape record all of the tunes that the participants sing back to them after each repetition. These will be sent to a scorer at Northwestern University who will then aid the project with his input by scoring each echoed tune. In this manner, it is possible to establish the exact sequence of recall.

Another project in the works of particular interest also deals with recall and the effect that age and training have on the ability to remember music, but it approaches the subject from a different angle. It is a collaboration with a professor of the University of Texas in Dallas.

"One of the advantages of studying musical ability is that there are always various levels of expertise within every age group," Halpern explained. The difference between this study and the previous one is that it involves familiar tunes. It either plays a tune or asks the participant to imagine it. Each tune can be played either on the piano or on the trumpet.

After 30 songs have been heard or imagined, the participant is given a list of tunes and asked for each one whether it was in the experiment. If the answer is yes, the question becomes whether the tune was actually heard or imagined, and whether it was in piano or trumpet.

The results of the experiment have been surprising. Age had an effect on the ability of the participants to remember if they had heard or imagined the tune. Older individuals are more likely to think they actually heard a tune that they imagined. With timbre (instrumental tone) recall, age or musical ability had no apparent effect. All participants found this a difficult task.

In order to utilize a grant that she received from McDonnell-Pew, Halpern is also working with a professional musicologist from Northwestern University on yet another project that examines the patterning of the brain as it functions to remember tunes. The study has also shown that the brain waves show a similar pattern when recalling a tune that was only imagined

The significance of this research is that it enables broader generalizations to be made. "We, myself and my colleagues, are among the first to use music as a means of studying memory," Halpern said. This technique enables scientists to relate the various aspects of the field in an attempt to establish some generalizations.

Receiving her doctorate in psychology from Stanford, Halpern considers herself a natural scientist with interests in cognitive neuroscience as well as cognitive psychology. Her quest for an answer to the question of how people remember music has been aided in the last 14 years by her diverse interests. This study has led her into contact with many people from all walks of life and has opened doors for collaboration with many resources.

Beetna Kim—The Bucknellian

Psychology professor Andrea Halpern has dedicated much of her research during her 14 years at the University to the question: How do people remember music?

New computer virus affects word processing files

How it Works

Chip Audette

Chip Audette
Bucknellian Columnist

Known by names like *Concept*, *DMV*, and *Nuclear*, there is a new class of computer viruses which infect Microsoft Word files. Unlike other computer viruses which are platform specific, Word macro viruses can affect Macintosh, Windows 3.1, and Windows 95 users alike. Its ability to move and to hide in a Word file, as well as infect just about any type of computer, makes these viruses especially adept at spreading through a computer-dependent campus like Bucknell. While they are usually only an inconvenience, the viruses may become more aggressive as they corrupt data or delete files. This whole class of viruses is so new, however, that effective methods of detection, protection and removal are still unproven.

In general, computer viruses are small computer programs which reproduce themselves while (usually) corrupting or deleting files on your computer. A computer virus will often spread by making a copy of itself onto any floppy disks that are inserted into the computer. Once a disk is infected, the virus can spread to any computer that reads the infected disk.

This new class of viruses, called Word Macro Viruses, are unique to the computer world because they run inside Microsoft Word. These new viruses are written in Word's macro language and operate just like a normal macro. A macro is a program which a user can write to perform some sort of automated task. A Word user, for example, can write a Word macro which would go through a document and create a dropped capital at the beginning of every new chapter just like a fine book. Unlike a normal macro, however, a macro virus is written with a malicious intent.

The way these viruses work, is that they are stored as a macro inside of a Word document. Whenever that file is opened (by double-clicking or opening through Word), Word reads the text in the file, the formatting commands, and any macros which are included. After the file is open, the Word Macro Virus automatically activates and copies itself into a special part of Word known as the Normal template. Once part of the Normal template, it will be activated every time Word is started. From the Normal template, it will also be in a position to spread itself by copying itself into any file which Word opens.

But since these new viruses are *Word* Macro Viruses, they can only run in Word and can only do damage when Word is open. The benefit of this is that only people who use Microsoft Word can be affected. On the downside, a Word Macro Virus can infect any type of computer that runs Word. Previously, IBM viruses could only infect IBMs and Macintosh viruses could only infect Macintoshes. A Word Macro Virus, on the other hand, can equally infect Word for Macintosh, Word for Windows, or Word for Windows 95. The only limitation is that Word Macro Viruses require Word 6.0 or higher.

A symptom of a Word Macro Virus infection is that Word will try to save all files as templates instead of as normal documents. In most cases, this is just an annoyance to the user because it prevents the file from being renamed when using the "Save As" command. Once saved as a template, however, the file is able to spread the virus to new computers.

Another symptom is that under the "Tools" menu item "Macro...", some oddly named macros will be present. Macro names such as "CloseAll", "Autoexec", "AAAZAO", "AAAZFS", and "Payload" could all be indicative of a Word Macro Virus infection. These macros are the actual programs which perform the nasty deeds of the virus. Sometimes, the virus may decide to corrupt your document or delete files from the hard drive. Other times, it may choose to print strange messages on the printer. Mostly, though, it does nothing and, therefore, goes unnoticed as it spreads from computer to computer.

Protecting oneself from these viruses is a difficult issue. Most general virus protection programs are beginning to look for Word Macro Viruses, but their reliability and effectiveness are untested. Another method of protection is to write your own macro which will stop all macros (both good and bad) from executing automatically. This method is certain to stop any macro virus from infecting your machine, but most people are unfamiliar with creating their own macros.

A third method is to use a pre-made suite of protective macros. One such suite is called Scanprot and it is beginning to be deployed in the public computer labs. Scanprot is a set of macros which becomes part of Word and automatically cleans files which are infected with certain macro viruses. It also blocks all automatically executing macros (like any unknown viruses which might have passed through the cleaning stage) from activating.

In general, protection is difficult to achieve. If your documents are currently un-infected, a simple way to protect yourself is to use the "Save As" option to save your documents in file format such as Word for Windows 2.0 or Word for Macintosh 5.1. Neither of these formats can transmit macro viruses so, while this may not be the most elegant solution, your documents will always stay "clean". If your documents are already infected, however, it is best to simply go to the Computer Center Help Desk and ask for help.

Probable infestation of scabies high with students

By Mitch Stewart

Scabies, a skin disease caused by an almost invisible organism, is a common disorder among students because of the environment in which they live, and the contractibility of the scabies mite.

Anyone can acquire scabies because it is highly contagious. Scabies often spreads among students rapidly due to their close contact with each other. Roommates and sexual partners, as well as casual acquaintances, are all likely candidates for the spread of an infestation.

Scabies usually spreads by direct contact with another person who is infested. Even a handshake can result in scabies being transmitted to another person. Exchanging clothing and sharing a bed is also a means of spreading scabies.

Fortunately, the scabies mite does not "jump" from one person to another, and does not live long in clothing or bed sheets.

When someone first acquires scabies, the male and female mite will mate on the skin surface. The female then uses her jaws and forelegs to burrow underneath the skin where she lays one to three eggs daily. In a few days, the eggs hatch, and the larvae travel to the surface of the skin.

When the female mites reach maturity, they mate and begin the cycle again. Eventually, one can see grayish-white zigzag burrows just below the skin, which are a tell-tale sign that someone is infested with scabies.

Another symptom of scabies is a red itchy rash, usually in the area infested with the mite. However, there have been cases where the whole body has reacted to the scabies infestation and a rash can appear on the whole body.

Fortunately, there is a simple cure for scabies. Because scabies is caused by an insect, any insecticide agent, such as DDT, can be used to remove the infestation.

However, because DDT is hazardous to your health, other less hazardous agents have been found and can be prescribed by a doctor.

Treatment is so effective that the actual scabies mite can be gone within 24 hours, but the itch may remain for two or three weeks.

Immortalized Christy Mathewson: from Bucknell to baseball to Broadway

BY DAVID CARPENTER
Bucknellian Staff Writer

Immortalized forever in the Baseball Hall of Fame, Christy Mathewson, who is the greatest and most well known alum of the University, is now the subject of a one man show in New York City, entitled "Matty : An Evening With Christy Mathewson," which stars Eddie Frierson.

Christy Mathewson led an extraordinary life. Although he never graduated from the University, he remains the school's most famous alum. He played for the New York Giants and has been called the greatest pitcher of his era. An original member of the Baseball Hall of Fame and a World War I veteran, he also was a children's book writer before his death from tuberculosis in 1925.

On September 30, 1989 the Bucknell and Lewisburg communities gathered for the rededication of what is now called Christy Mathewson Memorial Stadium. The stadium, which was beginning to fall apart, was given a facelift and a new name. An excerpt from the program of that day gives a little history and pride of Mathewson: "A football star at Bucknell before joining major league baseball, Mathewson epitomized the scholar-athlete model encouraged by Bucknell and the colonial league. 'As an A student and a superior athlete, Matty pioneered what we refer to today as the scholar athlete model, that balance between academics and spots that makes for a well rounded educational experience and opportunity for personal growth,' said Bucknell President Gary Sojka."

This excerpt displays that reverend attitude that the University has towards Mathewson. It does not go undeserved.

'Matty' gained his initial athletic fame as the fullback, punter and drop kicker on the Bucknell Football team from 1898-1900. He was even president of the Bucknell class of 1902 until his baseball career called him away. He is remembered for the 1905 world series against the Philadelphia Athletics, when he tossed three shutouts in as many appearances. This record stands to this day.

He is also remembered not just for his prowess in the sport, but his gentleman like manner.

"Mathewson did more than any other man for the game of baseball; he made it respectable. Mathewson's reputation as a gentleman rivaled his fame as a pitcher," says the program from the rededication ceremony. It goes on to say, "He wrote five children's books, written between 1910 and 1917, they are in the style of literature popular with young readers. Combined action packed baseball stories with themes included to spark the Mathewson sense of morality in the youth of the day."

Now Frierson has arrived to portray Mathewson in this one-man play. Frierson had a combined baseball/theater scholarship to UCLA and was an ardent fan of the sport since childhood. When searching for a character to write a one man show about, he came across the figure of Christy Mathewson. This idea sparked years of research that led him from the Baseball Hall of Fame in Cooperstown, New York, to the Archives in the Bertrand Library. While here at the University, he became acquainted with Doris Dysinger, head of University Archives, and Brad Tufts, associate director of athletics.

Before its current incarnation, the school brought Frierson to perform the show for the 1989 rededication ceremony. Now after seven years and many drafts later, the show is in New York.

"When Eddie Frierson first wrote the show he had eight and a half hours of material," Tufts commented. "He could redo the show depending on the audience. When he was here a few years ago, he focused on Matty's life here at Bucknell. The current version of the show is about his growing up and hardships in life and losing a brother to suicide. The show now is more oriented around baseball."

"[When] I first saw the show, Eddie was performing it at Keystone College." Tufts said, "It was significant because before it was a college it was Keystone academy, where Christy went to high school."

Eddie Frierson has been performing this show for many years and its engagement in New York is running out with November 30 being the last performance date.

Directed by Kerrigan Mahan and performed at the Lamb's Theater in Manhattan, the show promises to be an informative and personal view of the University's and baseball's greatest. For information about the play call (212) 997-1780. Reservations can be made through telecharge at (212) 239-6200.

Christy Mathewson is our greatest and most well known alum, proudly portrayed in "Matty"

Based on the life and writings of Mathewson, playwright and actor Eddie Frierson combines aspects of Christy's life with anecdotes about the life in baseball

> *Mathewson epitomized the scholar-athlete model encouraged by Bucknell.*

A night of musical love stories to be performed by Opera Company

BY SHETAL MITHANI
Bucknellian Staff Writer

Be "transported into a night of love and laughter," said senior Susan Minsavage '97, one of the students in the opera company.

The Bucknell Opera Company is performing scenes from two operettas: "Tales of Hoffman" by Jacques Offenbach and "Gypsy Baron" by Johann Strauss. They are also performing the selection "Epilogue for an Evening of Opera" by William Cutter.

"Two of the scenes we are performing are love stories, but they are also silly and funny," Minsavage said, while adding, "I have been with the opera company for four years now, and we have never held a production like this. Performing comic roles is definitely a challenge."

Dr. Catherine Payn started the Bucknell Opera Company seven years ago. In addition to being the director of the company, Payn also chooses the pieces the company performs.

"She [Payn] is a wonderful woman. She's always open to student suggestions. She's supportive and builds a creative atmosphere for us," Minsavage said.

Megan Allen '97, who has been a part of the company for three years, enjoys the contrast of the pieces the company performs. Minsavage agrees, saying, "I like the diversity of the music; we go from traditional to contemporary music. So we're exposed to all types of opera style."

The company holds its auditions every semester or every other semester. Once a student auditions for the company and makes it, he or she does not have to audition again.

According to Minsavage, anyone can audition and the company encourages all students to do so.

"Students should just come out and see the performance. It'll be a fun night and the admission is free," Minsavage said.

According to Allen, opera may not be for everyone, but everyone should try it once.

"People don't even have to like it [opera], they just need to appreciate it," Allen said.

The performance takes place tomorrow night at 8 p.m. in the Weis Center.

Brian Winant—The Bucknellian

Opera selections were rehearsed in order to bring a delightful night of music and laughter to campus

Brian Winant—The Bucknellian

Students met the challenge of presenting contrasting musical styles

Theater students demonstrate their talents as they direct and act in variety of one- act plays

The student actors gain hands-on experience in other aspects of performance

BY ROBIN REITZES
Bucknellian Staff Writer

"You never realize, until you are the director how much energy you need to turn on the actors. Nothing can prepare you for the job like actual hands on experience," said Karen Forgione '99.

Students from the Theatre 240 class will be directing one act-plays as part of their lab requirement. The plays will take place from Friday Nov. 22nd to Tuesday Dec. 10.

"The students were required to chose plays only within the realistic genre," said Bob Gainer, professor of theater.

Perfect by Mary Gallagher and directed by Colin Ward '99 will be performed on Nov. 22 *Suppressed Desires* by Susan Glastell will be directed by Suzi Esser '99 on Nov. 22. The Dec. 4 performance will be *The Problem* by A. R. Gurney Jr. and directed by Sandie Pisieczko '00 and *Valentine Fairy* by Ernest Thompson will be directed by Melanie Taylor '99. Forgione will be directing *In the Presence of Nothing* by Kenneth Urban '96 on Dec. 10.

"Kenneth Urban graduated from Bucknell in the class of '96. He wrote this one act specifically for this class so it could be produced," said Prof. Gainer.

Forgione chose Urban's work because, "This particular play was real to me."

The student directors held auditions for actors. "The Department of Theatre advertised the events and anyone could audition," according to Forgione.

All the directors have acted before. "To be a good director it is important to understand all aspects of performing," said Forgione. She added "it is good to know how to work on stage as well as behind the scenes. "

Acting and directing are two different things. Nevertheless the two come hand-in-hand as Forgione is quite aware of, "Being the director is a very sensitive position. You do not want to become a dictator yet you want things to be a certain way."

For many of the student directors this is their first time directing. The one acts are being performed in the Tustin Studio Theater. Tickets will be $5 each and $4 for senior citizens.

Caara Mickelsen—The Bucknelllian

Students chose plays within realistic genres and directed them to fulfill laboratory requirements for theater classes. It was very important for them to understand aspects of the stage as well as behind the scenes in order to become familiar with directing.

> *"You never realize, until you are the director how much energy you need to turn on the actors. Nothing can prepare you for the job like actual hands on experience."*

Not just a "face in the crowd" at Seventh Street Cafe's literary reading

Organized to generate interest for University publications, a night of poetry and prose will be held with musical interludes

BY ANNE PUTNAM
Bucknellian Staff Writer

On Saturday night, the lights will dim, the coffee will flow, and the action will begin as 20 poets read their works and a musical group serenades those who pack into the 7th Street Cafe for the opening night of the Exposed art show.

"A Reading of Poetry and Prose" sponsored by The Stadler Center for Poetry, The Giving Voice and Red Wheelbarrow will be held on the same evening as opening of the Exposed art show. The reading has been organized by Richard Dionne '96, a graduate research assistant at the Stadler Center. He has invited all to participate by saying, "Are you a writer? Do you like your work? Good. Care to share?" This invitation was transmitted to the student body over email and fortunately the show's success seems imminent.

Additional response came from the creative writing classes and staff poets.

There will also be "an open mike for the spur of the moment" said Dionne, to generate audience participation. Dionne hopes with the informal option, this venue will continue the reading into the early morning hours.

The reading is a relatively new event for the University campus. It was organized to generate interest for the Red Wheelbarrow and The Giving Voice, two of the University's literary magazines. In addition, the event should pique student interest and get people involved. Dionne's goal is to "pump energy toward the Red Wheelbarrow and creative writing courses."

The format for this evening will be laid out with a program listing the names of the readers. The evening is to begin with the poetry reading and in between the readings, a band will provide musical improvisational interludes by the organizers of the University Messenger. The student acting/performance group company will be present to read monologues and introduce a poetry game that will get the audience involved.

Complimenting the poetry reading, the Exposed art club will be displaying student pieces in the cafe for campus exhibition. This club started with visual art in mind; the name "Exposed" was chosen at the club's founding by vote.

Dawn Lonsinger '98 started the show and has been fundamental in organizing two events last year and a show earlier this semester. The five members in Exposed meet once a week and have been selecting submitted work as a result of publicity about the art show generated through flyers and requests in art classes.

In Saturday's show, Lonsinger hopes to be "crossing boundaries" with slides, performance art and professor participation. Dionne had suggested this option to Lonsinger who in turn seized upon the opportunity to create an evening of artistic expression.

One of the art pieces on exhibit is a painting of France done by Carrie Stafford, a senior art and art history major. An actual photo set the image to print before Stafford represented her inspiration on canvas.

Another featured artist is Katie Jones '98, the treasurer of Exposed, who will have additional pieces on display. Exposed is also hoping Jones will provide her culinary expertise to create refreshments for the show.

The opportunity to see and hear the talent of the campus, will begin at 8 p.m. in the 7th Street Cafe on Saturday.

Movie Review

BY CHRIS NICHOLS
Bucknellian Staff Columnist

William Shakespeare's Romeo and Juliet ★★★★½
Starring Claire Danes and Leonardo DiCaprio
Directed by Baz Luhrmann

Well it's official, you will either love this movie or hate it. I thought it was excellent. I wouldn't call myself a fan of Shakespeare at all (in fact I'm an English minor shying away from him...), but I have read "Romeo and Juliet." Of course it's been 7 years since I've done it, but I will rely on my memory from my freshman year in high school and hope that it's sufficient. I was really impressed by the way in which Luhrmann was able to present the story in a modern context because there is the potential to really destroy what Shakespeare went to great trouble to craft so well. If Romeo had ever uttered the words: "Juliet, you're just so damn hot," I think I would have left the theater. But that's not at all the case. As far as I could tell the movie was adapted using the play that was written 399 years ago as the script. I'm sure that there were changes made, but I'm not up on my literature enough to be a critic of that. That the original text was used isn't half as impressive as the fact that when it's presented, it's believable. You believe that these might be the words uttered by a love struck Romeo.

Now on to the actual movie... It's set in a modern setting, a town aptly called Verona Beach. The Montagues and Capulets are still the same old warring families that we know, though now they are warring corporations. Verona Beach is overseen by Prince Captain who flies around in a helicopter. I have to be careful when describing elements of the film because to hear them out of context will probably discredit my review. I never thought I would be amused at choir boys singing "When Doves Cry," but it all fits the world that Luhrmann creates. I highly recommend this movie to anyone going out. It is a little heavy, as should be expected. From my observations too, it appeals more to younger audiences (around 20 years old), but I would encourage anyone to go see it.

Battle of the Bands returns with competition and music

BATTLES From page 1

Why an all campus picnic? "After the Gala, people said they wished there were more all campus events. So I thought that an informal, all-campus event would be a great way to close the Sesquicentennial celebration. This will be a place for faculty, staff, administrators, the Lewisburg community and students to come together to say farewell to our [the University's] birthday," said Johnson.

At 7 p.m., the Battle of the Bands will begin and will last until about midnight. According to Mike Somers '98, philanthropy chair of Phi Kappa Psi, five bands will be competing for title of best band; four are from the University and one is from Wesleyan University.

Rachel Doebber—The Bucknellian

Godammit is one of the many bands scheduled to compete for money and fame in this year's Battle of the Bands at Phi Kappa Psi.

Somers was contacted by Johnson to organize the Battle of the Bands since he had organized the event for last semester for Phi Psi to raise money for their national philanthropy, Happy Kidney Function.

"Battle of the Bands has been a Bucknell tradition for a long time so I thought it was only appropriate to have one at one of the closing ceremonies," said Johnson.

Somers had advertised for Battle of the Bands by sending out an all-campus email, putting an announcement in What's Happening, displaying two banners in the Langone Center and putting up many posters and fliers around campus.

Somers got responses from seven bands, from both the University and outside groups, some who played for last semester's Battle of the Bands and some new bands who sent in audition tapes. "We [Phi Psi Philanthropy committee] listened to the tapes. We took 4 Bucknell bands and one outside band from Wesleyan University."

According to Somers, "All the guys playing are really excited. [They] perhaps may not get another experience to play again at an event of such magnitude with great equipment."

The equipment being used which is the same equipment that Bob Dylan used at the Gala is being provided by Gilnet company and will be set up on two stages. There will be a ten minute intermission between each band to allow the next band to setup.

Godammit is one of the University bands that will be performing. Matt Rhodes '97 on guitar, Aditya Jogkelar '98 on guitar and percussion, Alex Necochea '98 also on guitar, 'Smitty' Brendan Smith '97 on bass and Joel Mack '98, percussion, said they decided to play for Battle of the Bands because it was "an opportunity to play and win money."

Led Zepplin is formed by members Joel Mack '98, vocals, Dan Daskivich '99, guitar, Billy Skorupski 'SP, guitar, and a drummer from Penn State will play all Led Zepplin music. Why Led Zepplin? "Because they are one of the greatest bands. They experimented with variety of styles of music. Each player is the best musician at their instrument," said Mack.

Grooove, formed of all first year students, will play half cover songs and half of their own music is written by Fritz Wenzler '00 and Wes Torres'00. Members include Wenzler on guitar and vocals, Matt Scheidt '00 on hand percussion and vocals, Jamin Prossedo '00 on guitar, Torres on bass and Dug Welty '00 on drums. Grooove play songs from the Grateful Dead, Violent Femmes, From Good Homes and Charlie Parker. When asked why they decided to play for the Battle of the Bands, Torres said, "To help raise money [for the Happy Kidney Function]."

The last University band is 5 Lb. Fly which will be playing alternative music from such cover bands as Bush and Silver Chair as well as nine of their own songs from their not yet released album, *Whole New Creature*. Members John Zenarchick '00, drums, Bloomsburg sophomores Mike Zimmerman, vocals and Joe Tomaschick, bass, Southern Columbia high school student Andy Wojtowicz, guitar and Damian Fanella, guitar, all grew up near each other Zenarchick said.

Zenarchick added, "We wanted to play for Battle of the Bands because we wanted more exposure to the college scene, being that we have mostly played at private parties."

According to Somers, a panel of at least 10 judges formed up of prominent people in the University community including professors, deans and Bucknell Student Government representatives, will decide which band is the best band.

> *"It is the first incident where a Greek organization is involved in a University function of this magnitude. I hope this sets the precedent where other fraternities and sororities can become involved."*
> *—Mike Somers '98*
> *Philanthropy chair of Phi Kappa Psi*

Somers is especially enthusiastic about tomorrow night because it is "the first incident where a Greek organization is involved in a University function of this magnitude. I hope this sets the precedent where other fraternities and sororities can become involved."

Somers agreed with Johnson when she said, "It has been a lot of work with little time to put everything together. Despite a small budget and the limited amount of time, things are coming together excellently. Everyone has been very supportive of this all campus picnic/Battle of the Bands."

The all-campus picnic starts at 5 p.m. tomorrow night in the fieldhouse and will run until 7 p.m, at which time the Battle of the Bands will begin, lasting until midnight. The Phi Psi Kidney Foundation will be recognized for Phi Psi's efforts.

Bucknell star has career day against Fordham; Bison will vie for title vs. Colgate

BY BRETT TOMLINSON
Bucknellian Staff Writer

When a player of Rich Lemon's caliber has a career day, it is truly a momentous occasion, and on Saturday, Lemon treated a feeble crowd of 3,166 to one of the most remarkable performances of his storied career.

Lemon rushed for a school-record 229 yards, scored a career-high four touchdowns, tied a 65-year-old record for touchdowns at Bucknell, and became the Patriot League's all-time leader in all-purpose yards. And he didn't even play in the fourth quarter!

Bucknell cruised to a 51-17 victory over Fordham, dominating the Rams on both sides of the ball and keeping their Patriot League title hopes alive.

The Bison offense showed dramatic improvement from the 23-7 thrashing against Lafayette, racking up 264 first half yards. Quarterback Jim Fox '97 was sharp, completing 12 of 18 passes, but Lemon's effort stole the spotlight.

In his typical unselfish style, Lemon credited his offensive line for the record breaking game. "I told them at the beginning of the year that for every 200 yard game, I owe them dinner, so this one's going to cost me," Lemon said.

"One of the things that makes great running backs great is that they understand that it takes people up front and they share that credit and make those people feel important, and Richie's been able to do that," Coach Tom Gadd said.

On the sidelines, Gadd was pleased to see his senior star finally get a chance to shine after a frustrating season. "It was fun to watch him," Gadd said. "On a couple of those touchdown runs, I was

Bucknell looks to stop Vena's hot streak

BY LUKE DAVID AND JOHN SIRIS
Bucknellian Staff Writers

In the 10-year history of the Patriot League only Holy Cross Lafayette and Lehigh have won a football championship. The winner of this week's Colgate-Bucknell game, however, will become the new kid on the block, joining the ranks of Patriot League Champions.

Expect to see a serious battle at Christy Mathewson Stadium this weekend, as Colgate (6-4, 3-1) brings the number one rushing, scoring and total yards offense in the league to line up against a Bucknell team that is number one in rushing, scoring and total yards defense. Colgate has won six consecutive games including victories over Lafayette, Fordham, and Lehigh, while Bucknell is coming off their own impressive thrashing of Fordham.

The Red Raiders versatile freshman quarterback, Ryan Vena, is 6-0 as a starter and can put the ball in the end zone on foot or in the air. He has thrown for nine touchdowns and rushed for five, while completing 65 percent of his passes for almost 200 yards a game. Vena's targets include sophomore wideout Corey Hill, a dangerous return man who has also caught 45 passes for 727 yards and eight touchdowns, and senior tight end Chris Young, another threat who has grabbed 32 balls this season.

Despite the Red Raiders potent air attack, the strength of their offense rides on the shoulders of senior running back Anthony Caravetta (5'10", 198). So far this season, Caravetta has rushed for 1062 yards and scored eight touchdowns while averaging an impressive 5.6 yards per carry.

Colgate's 4-3 defense centers around senior linebacker Adam Sofran, a physical presence who has amassed 135 tackles, 3.5 sacks and 3 interceptions this year. Sofran is ably backed by strong safety Jamal Patterson (90 tackles, 2 int.) and the rest of the Red Raider defense.

But you can throw the statistics out the window on Saturday because these guys are playing for the League crown. The Bucknell offense has made its long awaited return and Rich Lemon '97 is back on track just in time for the 1996 season finale. Colgate is a formidable opponent who will be looking to avenge last season's heartbreaking 21-14 overtime loss to the Bison in Hamilton.

For the first time ever, the Patriot League title will be decided at Bucknell. If Bucknell students can improve on the usual not-so-close to capacity crowd that frequents the stadium, home field could turn out to be a big advantage for the Bison. No matter what the attendance is, however, you can bet on the fact that the players, especially the seniors, will give all they have for something that will last forever: A Championship.

Brad Kerchensteiner—The Bucknellian

Brandon Little '97 and the Bison defense will have to contain Colgate freshman quarterback Ryan Vena on Saturday.

Volleyball takes early exit vs. Navy

BY JACOB LIPMAN
Bucknellian Staff Writer

The Bucknell women's volleyball team had its season abruptly ended this past weekend at the Patriot League Tournament. Navy defeated the Bison by a score of 17-15, 15-4, 9-15, 15-9 in one semifinal match, while Colgate swept by Lehigh in the other semifinal match.

For Colgate, it was their sixth appearance in the title game in the seven-year existence of the Patriot League. It was Navy's first appearance in the championship match. The Colgate Red Raiders emerged victoriously against Navy, and in doing so, claimed the Patriot League Championship for the second straight year.

The first game of the Bucknell-Navy match began slowly. A series of seven sideouts took place before each team scored. Neither team could break away from the other and the game remained a tightly fought battle throughout. With the score 9-9, Bucknell managed to open up a three point lead.

Jonah Half—The Bucknellian

Jen Post '00 and the Bison fell in four games in the semifinal round.

Navy quickly brought it within one at 12-11, and soon moved ahead. Though the Bison tied it up, the Midshipmen came away with the victory in the first game.

Navy's momentum after stealing game one from Bucknell, helped them to cruise to an early 6-0 lead in the second game. The Midshipmen never relinquished that lead and easily won game two, as they pushed the Bison to the brink of elimination.

Bucknell regrouped from their horrid performance in the previous game, and played much closer to their true abilities in the third game. During one stretch, the Bison scored eight straight points. They then held on to win the game, momentarily staving off elimination.

The fourth game began much like the second, as Navy helped themselves to a 5-0 lead. The Bison were able to get on the scoreboard and then racked up seven of the next nine points to tie the game at 7-7. However, Navy came up with the big plays towards the end of the game, enabling them to pull off the upset of the Bison.

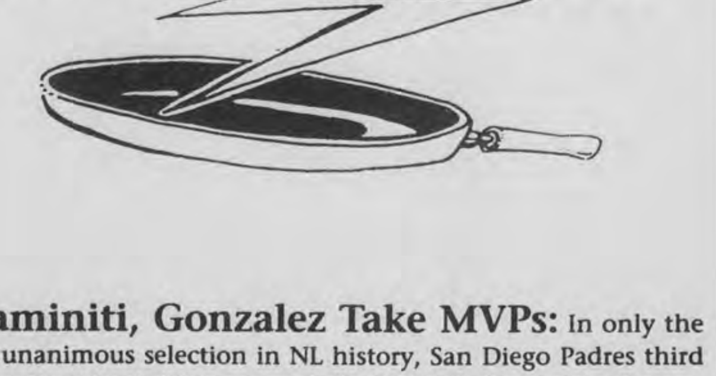
Melissa Wharton '98 led the Bison with 13 kills and Susie Teitsworth '98 added nine kills. Teitsworth also contributed a team-high 17 digs. Emily Pomeroy '99 had 13 digs in the loss.

Later that evening at the tournament banquet, the All-Patriot League teams were announced. Wharton and Teitsworth were both selected to the All-Patriot League's first team, while Pomeroy garnered a selection to the All-Patriot League's second team.

Wharton led the Patriot League with 4.19 kills per game as well as an outstanding .406 hitting percentage. She is ranked nationally in hitting percentage and in block average, for which she averaged 1.64 total blocks per game. Teitsworth, one of the best defensive players in the Patriot League, led the league in service aces and was second in digs. Pomeroy was second for Bucknell in kills and took great strides in the defensive aspect of her game this season.

Bucknell concluded the season with an 18-12 record, their fourth straight winning season.

Flash in the Pan



Caminiti, Gonzalez Take MVPs: In only the fourth unanimous selection in NL history, San Diego Padres third baseman Ken Caminiti was named the NL MVP. Caminiti, who earlier won his second consecutive gold glove, became the first Padre ever to win the MVP. L.A. Dodgers catcher Mike Piazza finished a distant second in the voting. In a considerably closer vote, Texas Rangers slugger Juan Gonzalez edged Seattle Mariners phenom Alex Rodriguez by two votes in the second closest vote in MVP history. Rodriguez won the award despite missing 28 games during the regular season. Albert Belle also fared well, finishing a close third place. Both Caminiti and Gonzalez were instrumental in their respective clubs taking surprise division titles.

Belle Bolts Tribe: Renowned slugger and troublemaker Albert Belle, the most prolific hitter in baseball over the past five seasons, left the Cleveland Indians to join divisional rival Chicago White Sox for a five-year, 55 million dollar deal. The move was prompted after the Indians traded for Giants slugger Matt Williams, and then pulled a five-year, 40 million dollar deal off the table. Belle will now hit fourth behind two-time MVP Frank Thomas, to form the most dangerous one-two combo since Mickey Mantle and Roger Maris.

Holtz Resigns: Lou Holtz, the second most prolific coach in Notre Dame history, announced Tuesday that he will resign as head coach of the Fighting Irish after the season. Holtz has coached Notre Dame since 1986, racking up 99 victories, six short of the esteemed Knute Rockne, including a national title in 1988. Rumors are circulating that Holtz is primed to take over for struggling Minnesota Viking's head man Dennis Green after this season. Possible successors to Holtz include Northwestern's Gary Barnett, LSU's Gerry Dinardo, Wisconsin's Barry Alvarez, and Notre Dame defensive coordinator Bob Davie.

Broncos, Cowboys Gain Momentum: The Denver Broncos continued their romp through the NFL this weekend, dismantling the New England Patriots, who had been riding a six-game winning streak, 34-8. The victory puts the Broncos at 10-1, two games better than anyone else in the NFL. In the NFC, the Cowboys, seemingly in trouble two weeks ago, completed a sweep of the NFC's top two teams by defeating the Green Bay Packers behind the leg of Chris Boniol, who tied an NFL record with seven field goals in the 21-6 victory. The victory puts the Cowboys only one game behind the division leading Washington Redskins, who improved to 8-3 with an upset victory over the Philadelphia Eagles this past weekend.

Caught With His Pants Down: Former Pittsburgh Pirates second baseman Jose "Chico" Lind was pulled over by the police yesterday for suspicion of drunk driving. Upon search of the car the police found a gram of cocaine, numerous beer cans, and Lind with no pants on.

Battle of the Bands returns with competition and music

BATTLES From page 1

Why an all campus picnic? "After the Gala, people said they wished there were more all campus events. So I thought that an informal, all-campus event would be a great way to close the Sesquicentennial celebration. This will be a place for faculty, staff, administrators, the Lewisburg community and students to come together to say farewell to our [the University's] birthday," said Johnson.

Rachel Doebber—The Bucknellian

Godammit is one of the many bands scheduled to compete for money and fame in this year's Battle of the Bands at Phi Kappa Psi.

At 7 p.m., the Battle of the Bands will begin and will last until about midnight. According to Mike Somers '98, philanthropy chair of Phi Kappa Psi, five bands will be competing for title of best band; four are from the University and one is from Wesleyan University.

Somers was contacted by Johnson to organize the Battle of the Bands since he had organized the event for last semester for Phi Psi to raise money for their national philanthropy, Happy Kidney Function.

"Battle of the Bands has been a Bucknell tradition for a long time so I thought it was only appropriate to have one at one of the closing ceremonies," said Johnson.

Somers had advertised for Battle of the Bands by sending out an all-campus email, putting an announcement in What's Happening, displaying two banners in the Langone Center and putting up many posters and fliers around campus.

Somers got responses from seven bands, from both the University and outside groups, some who played for last semester's Battle of the Bands and some new bands who sent in audition tapes. "We [Phi Psi Philanthropy committee] listened to the tapes. We took 4 Bucknell bands and one outside band from Wesleyan University."

According to Somers, "All the guys playing are really excited. [They] perhaps may not get another experience to play again at an event of such magnitude with great equipment."

The equipment being used which is the same equipment that Bob Dylan used at the Gala is being provided by Gilnet company and will be set up on two stages. There will be a ten minute intermission between each band to allow the next band to setup.

Godammit is one of the University bands that will be performing. Matt Rhodes '97 on guitar, Aditya Jogkelar '98 on guitar and percussion, Alex Necochea '98 also on guitar, 'Smitty' Brendan Smith '97 on bass and Joel Mack '98, percussion, said they decided to play for Battle of the Bands because it was "an opportunity to play and win money."

Led Zepplin is formed by members Joel Mack '98, vocals, Dan Daskivich '99, guitar, Billy Skorupski 'SP, guitar, and a drummer from Penn State will play all Led Zepplin music. Why Led Zepplin? "Because they are one of the greatest bands. They experimented with variety of styles of music. Each player is the best musician at their instrument," said Mack.

Grooove, formed of all first year students, will play half cover songs and half of their own music is written by Fritz Wenzler '00 and Wes Torres'00. Members include Wenzler on guitar and vocals, Matt Scheidt '00 on hand percussion and vocals, Jamin Prossedo '00 on guitar, Torres on bass and Dug Welty '00 on drums. Grooove play songs from the Grateful Dead, Violent Femmes, From Good Homes and Charlie Parker. When asked why they decided to play for the Battle of the Bands, Torres said, "To help raise money [for the Happy Kidney Function]."

The last University band is 5 Lb. Fly which will be playing alternative music from such cover bands as Bush and Silver Chair as well as nine of their own songs from their not yet released album, *Whole New Creature*. Members John Zenarchick '00, drums, Bloomsburg sophomores Mike Zimmerman, vocals and Joe Tomaschick, bass, Southern Columbia high school student Andy Wojtowicz, guitar and Damian Fanella, guitar, all grew up near each other Zenarchick said.

Zenarchick added, "We wanted to play for Battle of the Bands because we wanted more exposure to the college scene, being that we have mostly played at private parties."

According to Somers, a panel of at least 10 judges formed up of prominent people in the University community including professors, deans and Bucknell Student Government representatives, will decide which band is the best band.

Somers is especially enthusiastic about tomorrow night because it is "the first incident where a Greek organization is involved in a University function of this magnitude. I hope this sets the precedent where other fraternities and sororities can become involved."

Somers agreed with Johnson when she said, "It has been a lot of work with little time to put everything together. Despite a small budget and the limited amount of time, things are coming together excellently. Everyone has been very supportive of this all campus picnic/Battle of the Bands."

The all-campus picnic starts at 5 p.m. tomorrow night in the fieldhouse and will run until 7 p.m, at which time the Battle of the Bands will begin, lasting until midnight. The Phi Psi Kidney Foundation will be recognized for Phi Psi's efforts.

Volleyball takes early exit vs. Navy

BY JACOB LIPMAN
Bucknellian Staff Writer

The Bucknell women's volleyball team had its season abruptly ended this past weekend at the Patriot League Tournament. Navy defeated the Bison by a score of 17-15, 15-4, 9-15, 15-9 in one semifinal match, while Colgate swept by Lehigh in the other semifinal match.

For Colgate, it was their sixth appearance in the title game in the seven-year existence of the Patriot League. It was Navy's first appearance in the championship match. The Colgate Red Raiders emerged victoriously against Navy, and in doing so, claimed the Patriot League Championship for the second straight year.

The first game of the Bucknell-Navy match began slowly. A series of seven sideouts took place before each team scored. Neither team could break away from the other and the game remained a tightly fought battle throughout. With the score 9-9, Bucknell managed to open up a three point lead. Navy quickly brought it within one at 12-11, and soon moved ahead. Though the Bison tied it up, the Midshipmen came away with the victory in the first game.

Navy's momentum after stealing game one from Bucknell, helped them to cruise to an early 6-0 lead in the second game. The Midshipmen never relinquished that lead and easily won game two, as they pushed the Bison to the brink of elimination.

Bucknell regrouped from their horrid performance in the previous game, and played much closer to their true abilities in the third game. During one stretch, the Bison scored eight straight points. They then held on to win the game, momentarily staving off elimination.

The fourth game began much like the second, as Navy helped themselves to a 5-0 lead. The Bison were able to get on the scoreboard and then racked up seven of the next nine points to tie the game at 7-7. However, Navy came up with the big plays towards the end of the game, enabling them to pull off the upset of the Bison.

Melissa Wharton '98 led the Bison with 13 kills and Susie Teitsworth '98 added nine kills. Teitsworth also contributed a team-high 17 digs. Emily Pomeroy '99 had 13 digs in the loss.

Later that evening at the tournament banquet, the All-Patriot League teams were announced. Wharton and Teitsworth were both selected to the All-Patriot League's first team, while Pomeroy garnered a selection to the All-Patriot League's second team.

Wharton led the Patriot League with 4.19 kills per game as well as an outstanding .406 hitting percentage. She is ranked nationally in hitting percentage and in block average, for which she averaged 1.64 total blocks per game. Teitsworth, one of the best defensive players in the Patriot League, led the league in service aces and was second in digs. Pomeroy was second for Bucknell in kills and took great strides in the defensive aspect of her game this season.

Bucknell concluded the season with an 18-12 record, their fourth straight winning season.

Jonah Half—The Bucknellian

Jen Post '00 and the Bison fell in four games in the semifinal round.

Flash in the Pan

Caminiti, Gonzalez Take MVPs: In only the fourth unanimous selection in NL history, San Diego Padres third baseman Ken Caminiti was named the NL MVP. The move was prompted after the Indians traded for Giants slugger Matt Williams, and then pulled a five-year, 40 million dollar deal off the table. Belle will now hit fourth behind two-time MVP Frank Thomas, to form the most dangerous one-two combo since Mickey Mantle and Roger Maris.

Holtz Resigns: Lou Holtz, the second most prolific coach in Notre Dame history, announced Tuesday that he will resign as head coach of the Fighting Irish after the season. Holtz has coached Notre Dame since 1986, racking up 99 victories, six short of the esteemed Knute Rockne, including a national title in 1988. Rumors are circulating that Holtz is primed to take over for struggling Minnesota Viking's head man Dennis Green after this season. Possible successors to Holtz include Northwestern's Gary Barnett, LSU's Gerry Dinardo, Wisconsin's Barry Alvarez, and Notre Dame defensive coordinator Bob Davie.

Broncos, Cowboys Gain Momentum: The Denver Broncos continued their romp through the NFL this weekend, dismantling the New England Patriots, who had been riding a six-game winning streak, 34-8. The victory puts the Broncos at 10-1, two games better than anyone else in the NFL. In the NFC, the Cowboys, seemingly in trouble two weeks ago, completed a sweep of the NFC's top two teams by defeating the Green Bay Packers behind the leg of Chris Boniol, who tied an NFL record with seven field goals in the 21-6 victory. The victory puts the Cowboys only one game behind the division leading Washington Redskins, who improved to 8-3 with an upset victory over the Philadelphia Eagles this past weekend.

Caught With His Pants Down: Former Pittsburgh Pirates second baseman Jose "Chico" Lind was pulled over by the police yesterday for suspicion of drunk driving. Upon search of the car the police found a gram of cocaine, numerous beer cans, and Lind with no pants on.

Cross Country finishes season with respectable showings against powers

By Chris Ellis
Bucknellian Staff Writer

The Bucknell men's cross-country team closed out its season this week by competing in the IC4A team championships held at Franklin Field Park in Boston. The event, which featured 37 of the top teams from all along the Eastern seaboard, as well as elite individual runners from other schools, represented a test unlike any other the team had faced.

Bucknell was unable to compete with nationally-ranked teams for the overall victory, but finished a respectable 16th in the field.

"This meet is a qualifier for the national championships, so it's obviously going to be an incredible test," Head Coach Art Gulden said in the week before the race. "I feel our team belongs there, though, and that we can compete very well."

Villanova, with 139 overall points, ran away with the overall victory. Bucknell's 280 point-16th place finish placed them far behind Patriot league rival Army's third-place standing, but ahead of Lehigh's 35th-place result. The Bison also outdistanced nationally-respected teams from Boston College (21st), Syracuse (24th), and Pittsburgh (32nd).

Army's Dan Brown earned the overall individual title with a time of 29:28, and Wally Dietrich '99 led the Bucknell contingent with a 54th-place finish in the 251-member field, recording an impressive time of 30:25. Matt Kodak '99, who had been Bucknell's top finisher in every meet this year, had to settle for a second on the team, and 65th overall, with a time of 30:42. Senior Dave Granger's 31:00 time also placed him in the individual top 100 (89th).

The women's team competed in the ECAC Championships also held at Boston's Franklin Field Park that same weekend. The ECAC Championship, while not of the same caliber as the mens' IC4A championships, also featured runners and teams from the entire east coast. The women's squad powered its way to a surprising third-place overall finish in the 27-team meet, placing just behind Lafayette and meet winner Boston University.

Julie Swietzer '99 finished seventh in the race, just 30 seconds behind Boston University's Noreen O'Brien. Annie Hamlin '99 (10th), Pamela Richardson '99 (23rd), Mandy McTavish '98 (31st) and Julie Shafer '97 (32nd) helped pace the Bison to the team bronze.

The championships ended the cross-country regular season for Bucknell, a season marked by positive results and learning experiences.

"We've improved a little bit in every meet this year," Gulden said. "The progress we made from the beginning of the season to this point is just phenomenal. This certainly bodes well for our future."

SPORTS

Elliot rides to Olympic dream

By Chris Ellis
Bucknellian Staff Writer

Sports Feature

A National Junior Championship? A birth in the World Championships? A trip to Sydney, Austrailia and the 2000 Olympic Games? It's all in a day's work for Bucknell equestrian John Elliot.

Elliot, a sophomore who is one of the 40 members of Bucknell's coed equestrian team, sees all of the above goals as very much within reach. He has been riding competitively since his sisters introduced him to the sport at the age of eight, and has won more than his share of championship hardware. But Elliot insists that the sheer enjoyment of competition is what has kept him going through almost 12 years of riding.

"It was a lot of fun when I started, and it's still a lot of fun now," Elliot said. "I started doing well at lower levels of competition, so I really wanted to move up through the ranks."

And move up he has. In addition to competing in the 12 shows that Bucknell enters annually, Elliot has ridden on an individual basis throughout all of the United States and Canada.

Elliot's list of achievements seems never-ending: A second-place finish at the North American Young Riders championship; two appearances at the United States national championships, a show entered primarily by professionals; a North American Junior Olympic Championship, where he competed against the best amateurs from across the continent. But for Elliot, the real work is just beginning.

Elliot will take a leave from Bucknell during the second semester of this year in order to train competitively in Kentucky, one of the nation's equestrian hotbeds. By leaving the snowy conditions of the Pennsylvania winter, Elliot hopes to improve his skills to make the pursuit of his ultimate goal, the 2000 Olympics, that much easier.

"With the weather in the winter up here, you can't really train with the horses all that much," Elliot explained. "There are also more professionals down south to test me."

After spending his winter in Kentucky, Elliot will enter the National Championships once again, this time with a very good chance of finishing well enough to qualify for the world championships to be held this summer in Dublin, Ireland. And then?

"I think that Sydney is a realistic goal," Elliot said. "My qualifying is contingent on a lot of things—training, my performance at meets— but it's definitely a realistic goal."

Cara Mickelsen—The Bucknellian
Equestrian rider Jon Elliot '99 plans to take the spring semester off to train.

This summer, Elliot was selected by the national championship committee as the most promising Young Rider at the American National Championships. This distinction means that Elliot, in the opinion of Olympic coaches, shows the most promise to compete successfully on an international level. It also gives him the opportunity to attend training camps with Olympic coaches, paves the way for training grants from the United States Olympic team, and helps facilitate his rise through the national ranks.

A semester's work of intense training is waiting for Elliot in Kentucky, and that will be followed by years of competition in meets all across the United States and the world, competition that will take place in relative obscurity. But Elliot will endure it all, both for the love of his sport, and for the pursuit of an athlete's ultimate goal.

FOOTBALL

From Page 13

amazed, just to see him accelerate and break loose."

Lemon has rushed for over 100 yards 28 times in his Bucknell career, which puts him one 100-yard game away from tying the Division I-AA record, held by Kenny Gamble of Colgate and Frank Hawkins of Nevada.

This week's season finale against Colgate will be Lemon's last chance to tie the record, but the game has more important implications for Lemon and the rest of the Bison seniors who are looking to win Bucknell's first Patriot League football title.

"If we can win next week and get a piece of this championship or even win it outright, it will be a great boost for these kids and for this football program," said Gadd.

Gadd's defense could be the key to Bucknell's title hopes. In the past seven games, the defense has given up only 17 points in the first half.

Bucknell leads the Patriot League in team defense despite suffering through the season with an injury-plagued linebacker corps. Wally Hurdley '98, who started eight games at inside linebacker, is out for the season with a torn ACL. Michael Haggerty '97 suffered his second concussion of the year against Lafayette and has played only three games in his senior year. Backup Jason Bowman '99 missed last week's game with an injured forearm.

The injury bug has given a few players a chance to step into the spotlight for the Bison. Steve Burman '00, the younger brother of Ed Burman '96, a former All-American defensive end for the Bison, got his first start on Saturday and responded with three tackles and a sack.

Brandon Little '97 is making a case for this year's defensive player of the year honors since moving from outside to inside linebacker. Little added another six tackles and a sack to his team-leading totals against Fordham.

Bucknell's special teams came up big on Saturday, as they have for most of the season. The Bison have blocked six punts, recovered two punts for touchdowns, returned a blocked field goal for a touchdown, returned a kick for a touchdown and returned a punt for a touchdown.

One of the wildest special team scores of the year happened late in the first half on Saturday. With less than a minute left in the second quarter, Fordham drove to within the Bison 10-yard line and had a chance to close Bucknell's lead to 11. The defense held the Rams to a field goal attempt, which was blocked by Erich Muzi '99.

Fordham holder Harry Cantrell picked up the ball, but George Howanitz '97 and Little jarred the ball loose, allowing Jack Boyle '97 to pick the ball up and sprint 86 yards for a touchdown. The play shifted the momentum of the game, allowing Bucknell to put the finishing touches on their dominating win in the third quarter.

Josh LaBrec '99 pounced on a third quarter blocked punt in the end zone for the latest special teams touchdown and the first score of his career.

The Bison will need a win this week against Colgate to guarantee a share of the Patriot League crown, and a loss by Lafayette to either Lehigh or Fordham would make the winner of the Bucknell-Colgate game the outright league champion. Kickoff at Christy Mathewson Memorial Stadium is at 12:30 p.m.

Swimmers top Hoyas

By Erica Friedlander
Bucknellian Staff Writer

The Bucknell men's and women's swim teams hosted a dual meet this weekend against Georgetown. The Bison were able to surpass the highly touted team from Georgetown, as the men triumphed 134-105, and the women completed the sweep with a 125-111 victory.

The men's team came out strong, capturing first place in the first event of the afternoon. The 400 meter medley relay, swam by Scott Woodworth '98, Vadim Turkoglu '98, Ethan Buckley '97 and Chris Hill '00 showed Bucknell's ability to dominate and desire to win. Co-captain Buckley displayed his tremendous athletic ability by bringing Bucknell two more first place wins in both the 200 free and the 200 fly.

In addition, Alex Johnson '99 showed his talents as a sprinter in the 50 free where he captured another first place for Bucknell. His time of 22.11 beat out the second place contender by more than one second.

Later in the meet, the Bucknell men's team continued its string of first place wins with Antonio Lannes '98, swimming a 49.02 in the 100 free. The Bison men finished up the meet with an outstanding swim in the 400 free relay. The relay, swam by Lannes, Hill, Fitzpatrick '00, and Johnson placed first with a time of 3:16.94. The relay's win brought the Bucknell team to a final score of 134 points.

The women's meet, also against the Hoyas, was once again, full of surprises. Kate Wood '00 showed the true strength and ability of the Bucknell team by breaking her own records which she had set the previous weekend.

Wood began the meet powerfully by swimming the 1000 free in an astounding 10:33.93. Later in the meet, Wood demonstrated her capabilities by breaking her win record in the 200 fly by completing the event in a 2:07.85. This broke her original record by several tenths of a second.

Again, in the 500 free, Wood broke the standing record by swimming a 5:08.78, winning her the first place by more than 15 seconds. "She's a machine," says co-captain Jay O'Neil, '97. "She is an incredible swimmer and she's brought lots of life to the team."

Nicole Brandemarti '00 also scored two wins for the women's squad, helping them to pull away from the Georgetown team. Her first win came in the 50 free in which she showed her talents in the sprint, winning in a mere 25.50 seconds. Brandemarti also prevailed later in the meet, beating out the competition in the 100 free.

Co-captain Jen Meyers '98 also played a major part in the Bison victory. Being one of the school's top backstrokers, it was not surprising that Meyers was easily able to capture the win in the 200 back, swimming the event in a 2:10.41. She also swam one leg on the winning 400 free relay team.

Along with Jessica Klotz '98, Andrea Stanley '97, and Brandemarti, Meyers solidified Bucknell's lead and brought the team to victory. Georgetown ended the meet with 111 points, which could not compare to the Bison's 125 points.

Next weekend, Bucknell's men's and women's swim teams will face Holy Cross in their final meet prior to Thanksgiving.

Cross Country finishes season with respectable showings against powers

By Chris Ellis
Bucknellian Staff Writer

The Bucknell men's cross-country team closed out its season this week by competing in the IC4A team championships held at Franklin Field Park in Boston. The event, which featured 37 of the top teams from all along the Eastern seaboard, as well as elite individual runners from other schools, represented a test unlike any other the team had faced.

Bucknell was unable to compete with nationally-ranked teams for the overall victory, but finished a respectable 16th in the field.

"This meet is a qualifier for the national championships, so it's obviously going to be an incredible test," Head Coach Art Gulden said in the week before the race. "I feel our team belongs there, though, and that we can compete very well."

Villanova, with 139 overall points, ran away with the overall victory. Bucknell's 280 point-16th place finish placed them far behind Patriot league rival Army's third-place standing, but ahead of Lehigh's 35th-place result. The Bison also outdistanced nationally-respected teams from Boston College (21st), Syracuse (24th), and Pittsburgh (32nd).

Army's Dan Brown earned the overall individual title with a time of 29:28, and Wally Dietrich '99 led the Bucknell contingent with a 54th-place finish in the 251-member field, recording an impressive time of 30:25. Matt Kodak '99, who had been Bucknell's top finisher in every meet this year, had to settle for a second on the team, and 65th overall, with a time of 30:42. Senior Dave Granger's 31:00 time also placed him in the individual top 100 (89th).

The women's team competed in the ECAC Championships also held at Boston's Franklin Field Park that same weekend. The ECAC Championship, while not of the same caliber as the mens' IC4A championships, also featured runners and teams from the entire east coast. The women's squad powered its way to a surprising third-place overall finish in the 27-team meet, placing just behind Lafayette and meet winner Boston University.

Julie Swietzer '99 finished seventh in the race, just 30 seconds behind Boston University's Noreen O'Brien. Annie Hamlin '99 (10th), Pamela Richardson '99 (23rd), Mandy McTavish '98 (31st) and Julie Shafer '97 (32nd) helped pace the Bison to the team bronze.

The championships ended the cross-country regular season for Bucknell, a season marked by positive results and learning experiences.

"We've improved a little bit in every meet this year," Gulden said. "The progress we made from the beginning of the season to this point is just phenomenal. This certainly bodes well for our future."

SPORTS

Elliot rides to Olympic dream

By Chris Ellis
Bucknellian Staff Writer

Sports Feature

A National Junior Championship? A birth in the World Championships? A trip to Sydney, Austrailia and the 2000 Olympic Games? It's all in a day's work for Bucknell equestrian John Elliot.

Elliot, a sophomore who is one of the 40 members of Bucknell's coed equestrian team, sees all of the above goals as very much within reach. He has been riding competitively since his sisters introduced him to the sport at the age of eight, and has won more than his share of championship hardware. But Elliot insists that the sheer enjoyment of competition is what has kept him going through almost 12 years of riding.

"It was a lot of fun when I started, and it's still a lot of fun now," Elliot said. "I started doing well at lower levels of competition, so I really wanted to move up through the ranks."

And move up he has. In addition to competing in the 12 shows that Bucknell enters annually, Elliot has ridden on an individual basis throughout all of the United States and Canada.

Elliot's list of achievements seems never-ending: A second-place finish at the North American Young Riders championship; two appearances at the United States national championships, a show entered primarily by professionals; a North American Junior Olympic Championship, where he competed against the best amateurs from across the continent. But for Elliot, the real work is just beginning.

Elliot will take a leave from Bucknell during the second semester of this year in order to train competitively in Kentucky, one of the nation's equestrian hotbeds. By leaving the snowy conditions of the Pennsylvania winter, Elliot hopes to improve his skills to make the pursuit of his ultimate goal, the 2000 Olympics, that much easier.

"With the weather in the winter up here, you can't really train with the horses all that much," Elliot explained. "There are also more professionals down south to test me."

After spending his winter in Kentucky, Elliot will enter the National Championships once again, this time with a very good chance of finishing well enough to qualify for the world championships to be held this summer in Dublin, Ireland. And then?

"I think that Sydney is a realistic goal," Elliot said. "My qualifying is contingent on a lot of things—training, my performance at meets— but it's definitely a realistic goal."

Cara Mickelsen—The Bucknellian

Equestrian rider Jon Elliot '99 plans to take the spring semester off to train.

This summer, Elliot was selected by the national championship committee as the most promising Young Rider at the American National Championships. This distinction means that Elliot, in the opinion of Olympic coaches, shows the most promise to compete successfully on an international level. It also gives him the opportunity to attend training camps with Olympic coaches, paves the way for training grants from the United States Olympic team, and helps facilitate his rise through the national ranks.

A semester's work of intense training is waiting for Elliot in Kentucky, and that will be followed by years of competition in meets all across the United States and the world, competition that will take place in relative obscurity. But Elliot will endure it all, both for the love of his sport, and for the pursuit of an athlete's ultimate goal.

Swimmers top Hoyas

By Erica Friedlander
Bucknellian Staff Writer

The Bucknell men's and women's swim teams hosted a dual meet this weekend against Georgetown. The Bison were able to surpass the highly touted team from Georgetown, as the men triumphed 134-105, and the women completed the sweep with a 125-111 victory.

The men's team came out strong, capturing first place in the first event of the afternoon. The 400 meter medley relay, swam by Scott Woodworth '98, Vadim Turkoglu '98, Ethan Buckley '97 and Chris Hill '00 showed Bucknell's ability to dominate and desire to win. Co-captain Buckley displayed his tremendous athletic ability by bringing Bucknell two more first place wins in both the 200 free and the 200 fly.

In addition, Alex Johnson '99 showed his talents as a sprinter in the 50 free where he captured another first place for Bucknell. His time of 22.11 beat out the second place contender by more than one second.

Later in the meet, the Bucknell men's team continued its string of first place wins with Antonio Lannes '98, swimming a 49.02 in the 100 free. The Bison men finished up the meet with an outstanding swim in the 400 free relay. The relay, swam by Lannes, Hill, Fitzpatrick '00, and Johnson placed first with a time of 3:16.94. The relay's win brought the Bucknell team to a final score of 134 points.

The women's meet, also against the Hoyas, was once again, full of surprises. Kate Wood '00 showed the true strength and ability of the Bucknell team by breaking her own records which she had set the previous weekend.

Wood began the meet powerfully by swimming the 1000 free in an astounding 10:33.93. Later in the meet, Wood demonstrated her capabilities by breaking her win record in the 200 fly by completing the event in a 2:07.85. This broke her original record by several tenths of a second.

Again, in the 500 free, Wood broke the standing record by swimming a 5:08.78, winning her the first place by more than 15 seconds. "She's a machine," says co-captain Jay O'Neil, '97. "She is an incredible swimmer and she's brought lots of life to the team."

Nicole Brandemarti '00 also scored two wins for the women's squad, helping them to pull away from the Georgetown team. Her first win came in the 50 free in which she showed her talents in the sprint, winning in a mere 25.50 seconds. Brandemarti also prevailed later in the meet, beating out the competition in the 100 free.

Co-captain Jen Meyers '98 also played a major part in the Bison victory. Being one of the school's top backstrokers, it was not surprising that Meyers was easily able to capture the win in the 200 back, swimming the event in a 2:10.41. She also swam one leg on the winning 400 free relay team.

Along with Jessica Klotz '98, Andrea Stanley '97, and Brandemarti, Meyers solidified Bucknell's lead and brought the team to victory. Georgetown ended the meet with 111 points, which could not compare to the Bison's 125 points.

Next weekend, Bucknell's men's and women's swim teams will face Holy Cross in their final meet prior to Thanksgiving.

FOOTBALL

From Page 13

amazed, just to see him accelerate and break loose."

Lemon has rushed for over 100 yards 28 times in his Bucknell career, which puts him one 100-yard game away from tying the Division I-AA record, held by Kenny Gamble of Colgate and Frank Hawkins of Nevada.

This week's season finale against Colgate will be Lemon's last chance to tie the record, but the game has more important implications for Lemon and the rest of the Bison seniors who are looking to win Bucknell's first Patriot League football title.

"If we can win next week and get a piece of this championship or even win it outright, it will be a great boost for these kids and for this football program," said Gadd.

Gadd's defense could be the key to Bucknell's title hopes. In the past seven games, the defense has given up only 17 points in the first half.

Bucknell leads the Patriot League in team defense despite suffering through the season with an injury-plagued linebacker corps. Wally Hurdley '98, who started eight games at inside linebacker, is out for the season with a torn ACL. Michael Haggerty '97 suffered his second concussion of the year against Lafayette and has played only three games in his senior year. Backup Jason Bowman '99 missed last week's game with an injured forearm.

The injury bug has given a few players a chance to step into the spotlight for the Bison. Steve Burman '00, the younger brother of Ed Burman '96, a former All-American defensive end for the Bison, got his first start on Saturday and responded with three tackles and a sack.

Brandon Little '97 is making a case for this year's defensive player of the year honors since moving from outside to inside linebacker. Little added another six tackles and a sack to his team-leading totals against Fordham.

Bucknell's special teams came up big on Saturday, as they have for most of the season. The Bison have blocked six punts, recovered two punts for touchdowns, returned a blocked field goal for a touchdown, returned a kick for a touchdown and returned a punt for a touchdown.

One of the wildest special team scores of the year happened late in the first half on Saturday. With less than a minute left in the second quarter, Fordham drove to within the Bison 10-yard line and had a chance to close Bucknell's lead to 11. The defense held the Rams to a field goal attempt, which was blocked by Erich Muzi '99.

Fordham holder Harry Cantrell picked up the ball, but George Howanitz '97 and Little jarred the ball loose, allowing Jack Boyle '97 to pick the ball up and sprint 86 yards for a touchdown. The play shifted the momentum of the game, allowing Bucknell to put the finishing touches on their dominating win in the third quarter.

Josh LaBrec '99 pounced on a third quarter blocked punt in the end zone for the latest special teams touchdown and the first score of his career.

The Bison will need a win this week against Colgate to guarantee a share of the Patriot League crown, and a loss by Lafayette to either Lehigh or Fordham would make the winner of the Bucknell-Colgate game the outright league champion. Kickoff at Christy Mathewson Memorial Stadium is at 12:30 p.m.

News Analysis

Perry and Hartzell share views on the state of the league

BY E.J. CRAWFORD
Bucknellian Staff Writer

The Patriot League was founded years ago, much in the image of the Ivy League, as a bastion of academics in which the student-athlete was actually more of a student than an athlete and in which students were to receive scholarships only on the basis of need.

But recently things have changed, as Holy Cross has asked the Patriot League to allow them scholarships for basketball, and who knows what to follow. But why should Bucknell agree to this? Why does Holy Cross even need scholarships? And most importantly, what is to become of the Patriot League?

To find these answers I recently spoke with Ron Perry, the athletic director of Holy Cross, as well as Rick Hartzell, Bucknell's director of athletics, to ask the reasoning behind the proposal for scholarships, as well as the possible fall out from the request.

In a lengthy interview with Perry, he clearly laid out his plans for Holy Cross as well as the rest of the Patriot League, most emphatically stating "I think this is for the good of the League."

"That's a crock," Hartzell replied. They are doing what they're doing for the good of Holy Cross!"

Also during the interview, Perry noted many times that "we're not looking to add in any other sports," and stressed that "the biggest stumbling block in other schools joining the Patriot League is men's and women's basketball [and] the only chance to expanding is in offering basketball scholarships."

> *"I think [scholarships] are for the good of the League."*
> *—Ron Perry*
> *Holy Cross Athletic Director*

This is a sentiment that Hartzell, who does not support the Holy Cross venture, could not deny, stating that the "only way for the League to expand is to give scholarships."

Possible additions mentioned by Perry and Hartzell included such programs as Richmond and Boston University, as well as the addition of William & Mary to all but football.

However, this is where the agreements between the two athletic directors end, as another main reason Perry wants to give scholarships is to "improve the competition in our League (as far as basketball), which has gone down every year." Hartzell vehemently disagreed with this point, saying "the League has never been better, particularly with the strength of Colgate and Adonal Foyle."

Despite Hartzell's claims, the evidence is hard to overlook. The Patriot League is ranked dead last among the 33 conferences in Division I basketball, and unlike its fellow need-based Ivy League, has never advanced a school past the first round of the NCAA tournament. In fact, since the David Robinson-led Navy Midshipmen, the Patriot League has been a traditional tournament doormat for the likes of Kentucky and North Carolina.

So what is to become of the Patriot League, and, in particular, Bucknell? The presidents of the League will meet next week to decide that fate, and most likely will vote to allow basketball scholarships into the League, for, as Hartzell said "We need to do whatever we can to keep the Patriot League together... without the Patriot league, we're playing Juniata and Allentown College."

Although Hartzell did not seem totally opposed to scholarships if given across the board, he did say that he is "not crazy about going away from the need-based scholarships," and firmly stated that "if basketball players are the only ones getting merit-based scholarships, then I'm 100% opposed."

But it does appear as if Holy Cross will receive their scholarships, and there is little possibility of Bucknell opening scholarships to all sports, arts and academic pursuits.

Another problem could arise in that certain League schools will start to give scholarships, thus causing an unlevel playing field in which Bucknell would be left at a disadvantage. Said Hartzell: "I'd prefer that we all play under the same rules," but when I brought up the problem of Holy Cross gaining an advantage to Perry, he simply stated "We don't want to be alone in this venture."

> *"That's a crock... They're doing what they're doing for the good of Holy Cross."*
> *—Rick Hartzell*
> *Bucknell Athletic Director*

But will Holy Cross be alone? Army and Navy already hold a slight edge with their system, and there is a question about Colgate and Lehigh joining Holy Cross; that would be death to Bucknell and Lafayette who, "intend to stay where they are, without a doubt," Hartzell said.

As of now, Colgate has stated that it wishes to remain a need-based institution, but with its recent success in basketball, has received some pressure from alumni to add scholarships.

In addition, Lehigh already gives scholarships for wrestling, and Hartzell deemed it as "the wildcard," as its giving scholarships would significantly weaken Bucknell's stance and could lead to the eventual break up of the League.

"What we've done now is bought ourselves some time... the issue will come up again in two years," Hartzell said.

As for Holy Cross, Perry said that "we have no intention of leaving the League," but did not hesitate to mention that "Holy Cross is a very desirable entity to other Leagues."

Bucknell only wishes that it could say the same.

Is saving the league worth sacrificing the integrity of Bucknell?

BY WAYNE BAKER
Guest Columnist

Bucknell is an institution of higher learning, one of the best of its kind in the nation. But you have to wonder if the collective intelligence of the school's athletic and administrative officials has been on brain lock in recent weeks.

News has filtered out that Holy Cross wants to be given permission by the Patriot League to give scholarships again in men's and women's basketball.

For those who don't remember, the Patriot League, and its antecedent, the Colonial League, were formed as a league of colleges in the East that agreed not to give athletic scholarships any more.

The competitors from Bucknell, Colgate, Lehigh, Fordham, Lafayette, Army, Navy and, yes, Holy Cross, were to be "academically representative of their class," with only need-based scholarships offered.

Well, not any more. The Holy Cross proposal has apparently drawn the backing of Bucknell and several other Patriot League schools.

It's unacceptable. It's far worse than the ill-advised decision to award the top-seed to the all-important Patriot men's basketball tournament on the basis of a mere coin flip when Bucknell and Colgate finished tied for the regular season title.

If Holy Cross doesn't want to play by the rules laid down, they should be allowed to leave.

Bucknell has been admirable because, even before it joined the Patriot League, it did things the right way. It has achieved the best graduation rate among all Division I football and basketball schools in recent years.

Now, if the Holy Cross plan is adopted, it won't take long for the Crusaders to run roughshod over the league. Just look at how they dominated in the first few years in football as their final classes of athletic scholarship players used up their eligibility.

What you'll have in short order is Holy Cross as an overwhelming favorite for the league's hoops tournament titles and the one bid it gets for the NCAA men's and women's basketball tournaments.

Everyone else, including the hard working players and coaches under Pat Flannery and Juliene Simpson of Bucknell's hoops teams, will be battling for second.

If the Patriot League has to break up, let it. If the league has to grovel to Holy Cross, we're sure Bucknell could find some like-minded schools, or maybe join another league (remember when Bucknell was in the East Coast Conference? It included both public and private schools of comparable sizes and philosophies).

Just off the top of our head, Bucknell could consider joining the America East Conference (the old North Atlantic Conference, where ex-ECC members Delaware and Drexel went), or the Northeast Conference, where ex-ECC member Rider now resides.

While we don't favor this option, another course would be for Bucknell and the other schools to say to Holy Cross, "All right, you want athletic scholarships, we all get them." As our colleague Charlie Lentz reported in Friday's story about the plan, Army and Navy already give out aid, as all students at both academies get government-paid educations in exchange for a military commitment of at least five years.

Then, of course, the Patriot League spin doctors will have to rewrite all that glowing language in their press guides and news releases about the league's principles.

Other than keeping the league together for a place to play, we see no reason why Bucknell should be part of any concessions to Holy Cross.

Principles used to mean something at Bucknell; we hope they still do.

Otherwise, the only thing that we can think is that misguided individuals at Bucknell, including Athletic Director Rick Hartzell and President William Adams, have taken the wrong road.

Flannery and Simpson are justifiably concerned. Hartzell was quoted as saying last week, "It will be an advantage for Holy Cross. The disadvantage is losing the Patriot League."

Yo, Rick. You're saying Bucknell is willing to accept a Pyrrhic victory, a "win" for the league, but a triumph of little or no value at all.

Hartzell and Adams are on the verge of compromising Bucknell athletics for the wrongheaded reason of staying in a league that may not be worth saving after all.

Wayne Baker is a reporter for The Daily Item. *He has covered several Patriot League sports and has done numerous commentaries on Bucknell athletics.*

Leveling the playing field: A Modest Proposal

BY ROBERT E. STREETER
Guest Columnist

As an admirer of the Patriot League, both for the quality of its play and the importance of its principles, I have been following with interest and concern the discussion touched off by the probable decision of the College of the Holy Cross to recruit basketball players with financial aid based on criteria other than economic need.

This prospective shift in policy by one member presents the Patriot League with a daunting challenge. Can it preserve its integrity and its competitiveness while accommodating the aspirations of Holy Cross to attract more talented and presumably taller players? Can the rest of the league manage to live with this major change proposed by the Crusaders?

The gravity of the crisis has driven me to persistent, almost reckless, rumination on the specific methods to defuse the disruptive potential of this dilemma. I know that in a few weeks the intellectual firepower of the Patriot League, represented by the assembled presidents, will be aimed at this problem. What follows is a disinterested observer's effort to point out promising pathways to compromise which will preserve the league.

First, let me acknowledge some sympathy with Holy Cross's yearning to put the strongest possible team on the floor. (I am old enough to have seen Bob Cousy, perhaps the Crusaders' most celebrated athletic alumnus, work his wonders for the Boston Celtics against one of the Chicago Bulls' predecessors— the Stags or the Zephyrs.) At the same time I understand the diffidence of the rest of the Patriot League about competing against an opponent able to draw its players from a deeper pool of proficiency than the others are licensed to angle in.

How, then, to maintain a decent level of balance between the Massachusetts meritocracy and the egalitarian regimes which make up the rest of the league? Perhaps it would be possible to tinker with the structure of the game to promote competitiveness. For example, Holy Cross might be permitted to have only four players on the court against the opponent's five. Or Holy Cross could use five player's against six for the opposition. A less stringent variation of this reduction of personnel might be to borrow from ice hockey the practice of banishing from the floor for the period of five minutes, without permitting substitution, a Holy Cross player committing a foul.

One of the most imaginative ideas for altering the internal structure of the game was suggested to me, not surprisingly, by a friend who is both a poet and a keen analyst of basketball. He proposed that the hoop toward which Holy Cross shoots should be significantly less capacious than the one toward which the opposition directs its shots. These structural suggestions have great merit, but I confess that I am something of a traditionalist in these matters, and therefore I am fearful lest some of these improvements would impair the flow of the game as it sprang full-grown from the forehead of Dr. James Naismith more than a century ago. After all, the encyclopedia tells us that 12 of the 13 rules promulgated by Dr. Naismith still control the basic action of the sport.

Let me turn, then, to less cumbersome and more direct remedy. Why not follow the examples of golf, with its system of handicaps in informal matches, and of horse racing, with its variable weight allowances? Each Patriot League team facing the tipoff against Holy Cross might be granted a bonus of, say, 15 points. Or, if it prefers, it can start the game on even terms, and invoke the 15-point handicap as it may be needed later in the contest, Perhaps it might be possible to "bank" the handicap, or a portion of it, for use in a second game later in the season. I would permit Holy Cross to avoid the imposition of this penalty by reducing the number of specially-assisted players in its lineup. Thus, if three of the five players in the floor are what used to be called "walk-ons," the amount of the handicap bestowed on the opponent would be reduced by 60 percent, from 15 points to a mere six.

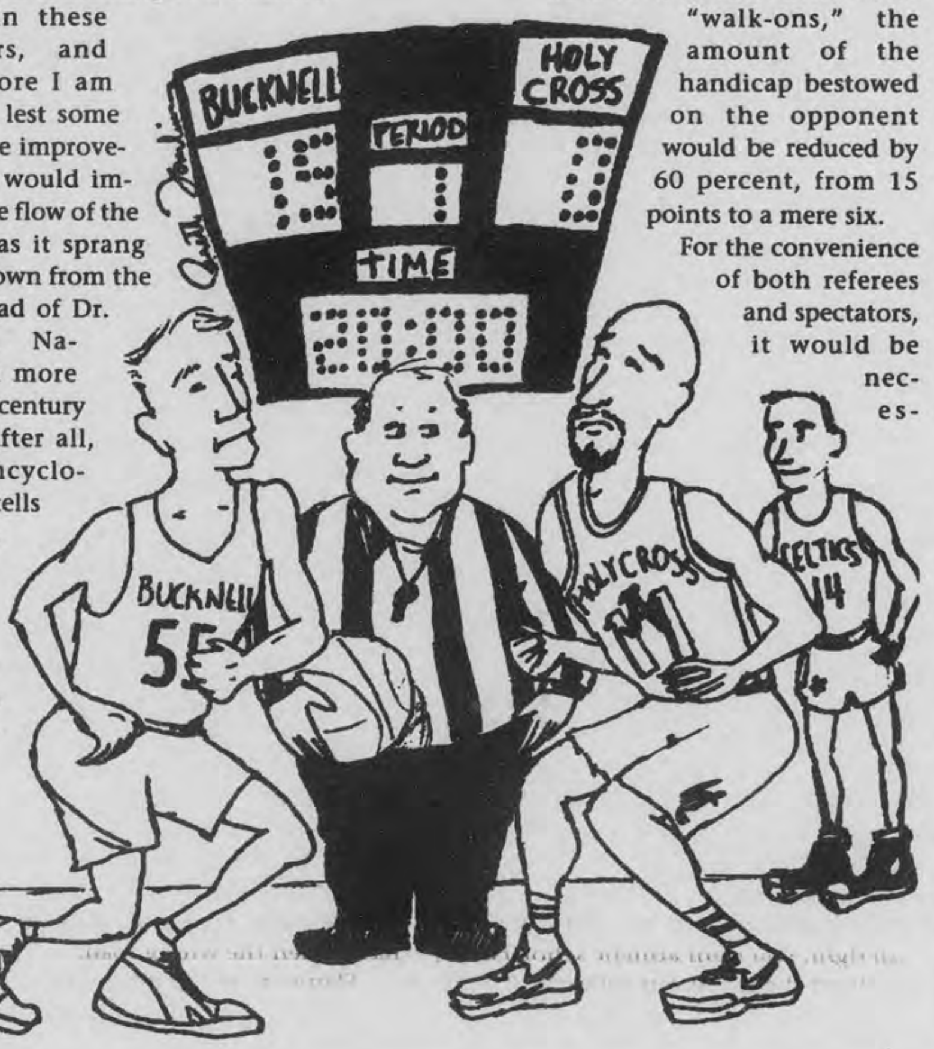
For the convenience of both referees and spectators, it would be necessary for the Holy Cross uniforms to distinguish between the two kinds of players. It would be sufficient, I think, if the tunics of those receiving athletic assistance were emblazoned with the scarlet letter A.

An additional advantage of this handicap system is that it would generate a fresh set of intriguing statistics, and, as we all know, competitive sport flourishes through the proliferation of new numbers for the spectator to master.

Finally, the careful reader will have noted that in reviewing these suggested remedies I have not thought it necessary to address one argument raised by some critics of the Patriot League's current procedures. This is the complaint that the two service academies offer full financial aid to all athletes. But this generous support is given to all students in the academies: there is no special premium for athletic prowess. Thus, the benevolent care the academies extend to all their charges is irrelevant to our particular inquiry.

As the 19th-century statesman Lord Melbourne once remarked concerning the award of the most prestigious honor in Great Britain, "The great thing about the Order of the Garter is that there is no damned merit in it." Indeed, the universality of the academies' financial support has sometimes worked against achieving athletic excellence. I recall that in the early years of the Air Force Academy, the institution's basketball program languished because of an admissions requirement that all students posses a physique capable of being inserted into the cockpit of a fighter plane— no seven-foot centers need apply.

I appreciate the hospitality of your columns for these musings, and hope that they may assist the deliberations of the wise folk who will soon be pondering this high matter.



Robert E. Streeter '38 is an emeritus trustee at Bucknell and a former Dean of the College of Arts and Sciences at the University of Chicago. An avid sports fan and active writer, Mr. Streeter served as an editor for The Bucknellian *during his college years.*

The Patriot League :

Philosophy and Membership

Founded on the principles of admitting athletes who are academically representative of their class, awarding scholarships based on documented financial need, and maintaining presidential control of athletics, the Patriot League began as a football conference in 1986, and expanded to include 22 sports in 1990...

Organization and Leadership

With institution presidents in control of league policy, the Patriot League has taken a bold, innovative step that many believe has been long overdue in collegiate athletics. In fact, this league has demonstrated that athletics can be successfully aligned within the overall educational mission of a university while still producing student-athletes of the highest caliber...

News Analysis

Perry and Hartzell share views on the state of the league

BY E.J. CRAWFORD
Bucknellian Staff Writer

The Patriot League was founded years ago, much in the image of the Ivy League, as a bastion of academics in which the student-athlete was actually more of a student than an athlete and in which students were to receive scholarships only on the basis of need.

But recently things have changed, as Holy Cross has asked the Patriot League to allow them scholarships for basketball, and who knows what to follow. But why should Bucknell agree to this? Why does Holy Cross even need scholarships? And most importantly, what is to become of the Patriot League?

To find these answers I recently spoke with Ron Perry, the athletic director of Holy Cross, as well as Rick Hartzell, Bucknell's director of athletics, to ask the reasoning behind the proposal for scholarships, as well as the possible fall out from the request.

In a lengthy interview with Perry, he clearly laid out his plans for Holy Cross as well as the rest of the Patriot League, most emphatically stating "I think this is for the good of the League."

"That's a crock," Hartzell replied. They are doing what they're doing for the good of Holy Cross!"

Also during the interview, Perry noted many times that "we're not looking to add in any other sports," and stressed that "the biggest stumbling block in other schools joining the Patriot League is men's and women's basketball [and] the only chance to expanding is in offering basketball scholarships."

> *"I think [scholarships] are for the good of the League."*
> *—Ron Perry*
> *Holy Cross Athletic Director*

This is a sentiment that Hartzell, who does not support the Holy Cross venture, could not deny, stating that the "only way for the League to expand is to give scholarships."

Possible additions mentioned by Perry and Hartzell included such programs as Richmond and Boston University, as well as the addition of William & Mary to all but football.

However, this is where the agreements between the two athletic directors end, as another main reason Perry wants to give scholarships is to "improve the competition in our League (as far as basketball), which has gone down every year." Hartzell vehemently disagreed with this point, saying "the League has never been better, particularly with the strength of Colgate and Adonal Foyle."

Despite Hartzell's claims, the evidence is hard to overlook. The Patriot League is ranked dead last among the 33 conferences in Division I basketball, and unlike its fellow need-based Ivy League, has never advanced a school past the first round of the NCAA tournament. In fact, since the David Robinson-led Navy Midshipmen, the Patriot League has been a traditional tournament doormat for the likes of Kentucky and North Carolina.

So what is to become of the Patriot League, and, in particular, Bucknell? The presidents of the League will meet next week to decide that fate, and most likely will vote to allow basketball scholarships into the League, for, as Hartzell said "We need to do whatever we can to keep the Patriot League together... without the Patriot league, we're playing Juniata and Allentown College."

Although Hartzell did not seem totally opposed to scholarships if given across the board, he did say that he is "not crazy about going away from the need-based scholarships," and firmly stated that "if basketball players are the only ones getting merit-based scholarships, then I'm 100% opposed."

But it does appear as if Holy Cross will receive their scholarships, and there is little possibility of Bucknell opening scholarships to all sports, arts and academic pursuits.

> *"That's a crock... They're doing what they're doing for the good of Holy Cross."*
> *—Rick Hartzell*
> *Bucknell Athletic Director*

Another problem could arise in that certain League schools will start to give scholarships, thus causing an unlevel playing field in which Bucknell would be left at a disadvantage. Said Hartzell: "I'd prefer that we all play under the same rules," but when I brought up the problem of Holy Cross gaining an advantage to Perry, he simply stated "We don't want to be alone in this venture."

But will Holy Cross be alone? Army and Navy already hold a slight edge with their system, and there is a question about Colgate and Lehigh joining Holy Cross; that would be death to Bucknell and Lafayette who, "intend to stay where they are, without a doubt," Hartzell said.

As of now, Colgate has stated that it wishes to remain a need-based institution, but with its recent success in basketball, has received some pressure from alumni to add scholarships.

In addition, Lehigh already gives scholarships for wrestling, and Hartzell deemed it as "the wildcard," as its giving scholarships would significantly weaken Bucknell's stance and could lead to the eventual break up of the League.

"What we've done now is bought ourselves some time... the issue will come up again in two years," Hartzell said.

As for Holy Cross, Perry said that "we have no intention of leaving the League," but did not hesitate to mention that "Holy Cross is a very desirable entity to other Leagues."

Bucknell only wishes that it could say the same.

Is saving the league worth sacrificing the integrity of Bucknell?

BY WAYNE BAKER
Guest Columnist

Bucknell is an institution of higher learning, one of the best of its kind in the nation. But you have to wonder if the collective intelligence of the school's athletic and administrative officials has been on brain lock in recent weeks.

News has filtered out that Holy Cross wants to be given permission by the Patriot League to give scholarships again in men's and women's basketball.

For those who don't remember, the Patriot League, and its antecedent, the Colonial League, were formed as a league of colleges in the East that agreed not to give athletic scholarships any more.

The competitors from Bucknell, Colgate, Lehigh, Fordham, Lafayette, Army, Navy and, yes, Holy Cross, were to be "academically representative of their class," with only need-based scholarships offered.

Well, not any more. The Holy Cross proposal has apparently drawn the backing of Bucknell and several other Patriot League schools.

It's unacceptable. It's far worse than the ill-advised decision to award the top-seed to the all-important Patriot men's basketball tournament on the basis of a mere coin flip when Bucknell and Colgate finished tied for the regular season title.

If Holy Cross doesn't want to play by the rules laid down, they should be allowed to leave.

Bucknell has been admirable because, even before it joined the Patriot League, it did things the right way. It has achieved the best graduation rate among all Division I football and basketball schools in recent years.

Now, if the Holy Cross plan is adopted, it won't take long for the Crusaders to run roughshod over the league. Just look at how they dominated in the first few years in football as their final classes of athletic scholarship players used up their eligibility.

What you'll have in short order is Holy Cross as an overwhelming favorite for the league's hoops tournament titles and the one bid it gets for the NCAA men's and women's basketball tournaments.

Everyone else, including the hard working players and coaches under Pat Flannery and Juliene Simpson of Bucknell's hoops teams, will be battling for second.

If the Patriot League has to break up, let it. If the league has to grovel to Holy Cross, we're sure Bucknell could find some like-minded schools, or maybe join another league (remember when Bucknell was in the East Coast Conference? It included both public and private schools of comparable sizes and philosophies).

Just off the top of our head, Bucknell could consider joining the America East Conference (the old North Atlantic Conference, where ex-ECC members Delaware and Drexel went), or the Northeast Conference, where ex-ECC member Rider now resides.

While we don't favor this option, another course would be for Bucknell and the other schools to say to Holy Cross, "All right, you want athletic scholarships, we all get them." As our colleague Charlie Lentz reported in Friday's story about the plan, Army and Navy already give out aid, as all students at both academies get government-paid educations in exchange for a military commitment of at least five years.

Then, of course, the Patriot League spin doctors will have to rewrite all that glowing language in their press guides and news releases about the league's principles.

Other than keeping the league together for a place to play, we see no reason why Bucknell should be part of any concessions to Holy Cross.

Principles used to mean something at Bucknell; we hope they still do.

Otherwise, the only thing that we can think is that misguided individuals at Bucknell, including Athletic Director Rick Hartzell and President William Adams, have taken the wrong road.

Flannery and Simpson are justifiably concerned. Hartzell was quoted as saying last week, "It will be an advantage for Holy Cross. The disadvantage is losing the Patriot League."

Yo, Rick. You're saying Bucknell is willing to accept a Pyrrhic victory, a "win" for the league, but a triumph of little or no value at all.

Hartzell and Adams are on the verge of compromising Bucknell athletics for the wrongheaded reason of staying in a league that may not be worth saving after all.

Leveling the playing field: A Modest Proposal

BY ROBERT E. STREETER
Guest Columnist

As an admirer of the Patriot League, both for the quality of its play and the importance of its principles, I have been following with interest and concern the discussion touched off by the probable decision of the College of the Holy Cross to recruit basketball players with financial aid based on criteria other than economic need.

This prospective shift in policy by one member presents the Patriot League with a daunting challenge. Can it preserve its integrity and its competitiveness while accommodating the aspirations of Holy Cross to attract more talented and presumably taller players? Can the rest of the league manage to live with this major change proposed by the Crusaders?

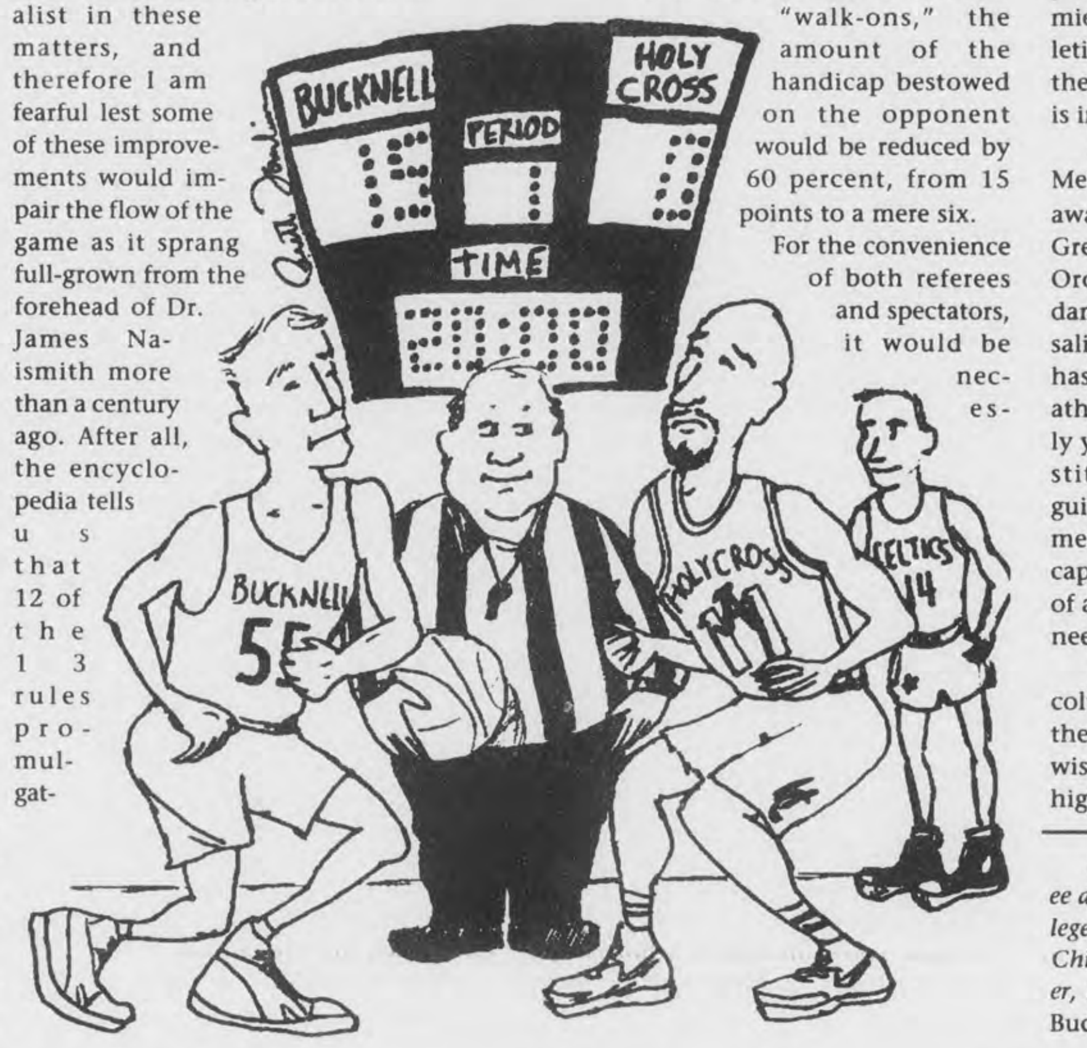
The gravity of the crisis has driven me to persistent, almost reckless, rumination on the specific methods to defuse the disruptive potential of this dilemma. I know that in a few weeks the intellectual firepower of the Patriot League, represented by the assembled presidents, will be aimed at this problem. What follows is a disinterested observer's effort to point out promising pathways to compromise which will preserve the league.

First, let me acknowledge some sympathy with Holy Cross's yearning to put the strongest possible team on the floor. (I am old enough to have seen Bob Cousy, perhaps the Crusaders' most celebrated athletic alumnus, work his wonders for the Boston Celtics against one of the Chicago Bulls' predecessors— the Stags or the Zephyrs.) At the same time I understand the diffidence of the rest of the Patriot League about competing against an opponent able to draw its players from a deeper pool of proficiency than the others are licensed to angle in.

How, then, to maintain a decent level of balance between the Massachusetts meritocracy and the egalitarian regimes which make up the rest of the league? Perhaps it would be possible to tinker with the structure of the game to promote competitiveness. For example, Holy Cross might be permitted to have only four players on the court against the opponent's five. Or Holy Cross could use five player's against six for the opposition. A less stringent variation of this reduction of personnel might be to borrow from ice hockey the practice of banishing from the floor for the period of five minutes, without permitting substitution, a Holy Cross player committing a foul.

One of the most imaginative ideas for altering the internal structure of the game was suggested to me, not surprisingly, by a friend who is both a poet and a keen analyst of basketball. He proposed that the hoop toward which Holy Cross shoots should be significantly less capacious than the one toward which the opposition directs its shots. These structural suggestions have great merit, but I confess that I am something of a traditionalist in these matters, and therefore I am fearful lest some of these improvements would impair the flow of the game as it sprang full-grown from the forehead of Dr. James Naismith more than a century ago. After all, the encyclopedia tells us that 12 of the 13 rules promulgated by Dr. Naismith still control the basic action of the sport.

Let me turn, then, to less cumbersome and more direct remedy. Why not follow the examples of golf, with its system of handicaps in informal matches, and of horse racing, with its variable weight allowances? Each Patriot League team facing the tipoff against Holy Cross might be granted a bonus of, say, 15 points. Or, if it prefers, it can start the game on even terms, and invoke the 15-point handicap as it may be needed later in the contest, Perhaps it might be possible to "bank" the handicap, or a portion of it, for use in a second game later in the season. I would permit Holy Cross to avoid the imposition of this penalty by reducing the number of specially-assisted players in its lineup. Thus, if three of the five players in the floor are what used to be called "walk-ons," the amount of the handicap bestowed on the opponent would be reduced by 60 percent, from 15 points to a mere six.



For the convenience of both referees and spectators, it would be necessary for the Holy Cross uniforms to distinguish between the two kinds of players. It would be sufficient, I think, if the tunics of those receiving athletic assistance were emblazoned with the scarlet letter A.

An additional advantage of this handicap system is that it would generate a fresh set of intriguing statistics, and, as we all know, competitive sport flourishes through the proliferation of new numbers for the spectator to master.

Finally, the careful reader will have noted that in reviewing these suggested remedies I have not thought it necessary to address one argument raised by some critics of the Patriot League's current procedures. This is the complaint that the two service academies offer full financial aid to all athletes. But this generous support is given to all students in the academies: there is no special premium for athletic prowess. Thus, the benevolent care the academies extend to all their charges is irrelevant to our particular inquiry.

As the 19th-century statesman Lord Melbourne once remarked concerning the award of the most prestigious honor in Great Britain, "The great thing about the Order of the Garter is that there is no damned merit in it." Indeed, the universality of the academies' financial support has sometimes worked against achieving athletic excellence. I recall that in the early years of the Air Force Academy, the institution's basketball program languished because of an admissions requirement that all students posses a physique capable of being inserted into the cockpit of a fighter plane— no seven-foot centers need apply.

I appreciate the hospitality of your columns for these musings, and hope that they may assist the deliberations of the wise folk who will soon be pondering this high matter.

Robert E. Streeter '38 is an emeritus trustee at Bucknell and a former Dean of the College of Arts and Sciences at the University of Chicago. An avid sports fan and active writer, Mr. Streeter served as an editor for The Bucknellian *during his college years.*

The Patriot League :

Philosophy and Membership

Founded on the principles of admitting athletes who are academically representative of their class, awarding scholarships based on documented financial need, and maintaining presidential control of athletics, the Patriot League began as a football conference in 1986, and expanded to include 22 sports in 1990...

Organization and Leadership

With institution presidents in control of league policy, the Patriot League has taken a bold, innovative step that many believe has been long overdue in collegiate athletics. In fact, this league has demonstrated that athletics can be successfully aligned within the overall educational mission of a university while still producing student-athletes of the highest caliber...

SPORTS

Holyfield saves sport from criminal and the con-man

Commentary

E.J. Crawford
Sports Co-Editor

I realize that Tyson-Holyfield happened well over a week ago, but I simply have too much to say to forget about it. Last Saturday, two very historic events took place—Evander Holyfield saved boxing, and Mike Tyson lost his place in history. I know what you're thinking: aren't I overdoing it a little bit? Well, not at all, let's just look at the facts:

Professional boxing (and don't talk to me about bantamweights, because we all know it's the heavyweight title that everyone pays attention to) has been in an utter state of disarray since Riddick Bowe dropped the WBA title in the trash. Bringing back a thug like Tyson and a slimeball like Don King did nothing to help it. (By the way, you know those little troll dolls that you stick on pencils and mess up there hair when you spin the pencil?, tell me those weren't designed after Don King!). But I digress; back to the story of the convict, Tyson, and the con man, King. King and Tyson built Tyson's comeback up to ridiculous proportions, and then set the Harlem thug up with a series of punchless wimps that could not knock over a weeble doll (you know, "weebles wobble but they don't fall down"). Although I have to admit that I had a lot of fun with Peter McNeeley, the rest of Tyson's punching bags were nothing more than puppet champions set up by Don King as slaughter for Tyson's kill.

But then came along Evander Holyfield, the quiet Atlanta man with a heart twice as big as King's hair.

Last Saturday, Holyfield stepped into the ring with a purpose, and fought the most beautiful and well-disciplined fights I have ever seen at the heavyweight level. And in taking the title, Holyfield once again restored hope to the heavyweight division, in addition to matching the great Muhammad Ali as the only three-time heavyweight champion. Unlike Tyson, Holyfield is a well disciplined fighter, a hard working, no-nonsense kind of fighter that the public loves to embrace. Holyfield has the respect of the total community, both boxing and fans. Holyfield gives an air of respectability that has been lost somewhere between Riddick Bowe's indifference and George Foreman's waist line. In addition, his victory helps to ease the pain of Tyson's creampuff fights, and of that nasty Bowe-Andrew Golata brawl. Much as I said about Stefan Edberg, Holyfield is a gentleman, one long overdue in the sport of boxing.

But before I get too mushy, let me get back to Tyson. I'll start by saying that I do have a bit of a prejudice—I hate Mike Tyson, and think that his religion, sensitive side, etc. is a load of crap that puts him in the company of such esteemed low-life as Michael Irvin and Mark (the great white American dope) Gaustineau. (By the way, Gaustineau, the now boxer, recently lost in a second round knockout to former Notre Dame star Alonzo Highsmith; oh how the mighty have fallen). But yet I digress again.

In fighting a boxer of Holyfield's caliber, Mike Tyson had the opportunity to prove himself a real and legitimate boxer, as well as prove that he was the same maniacal presence that dominated boxing before Buster Douglas and a certain beauty pageant. But on Saturday the whole world saw nothing more than a trained killer that was befuddled against a true boxer with heart and an iron jaw. And instead of battling like a champion, Tyson futilely swung at Holyfield, forgoing any tactics in hopes of a knockout. The knockout did not happen. What did happen is that the better boxer won. Holyfield went toe-to-toe and simply outsmarted Tyson (not that that is a very difficult task) by fighting a smart defensive fight, and using his reach advantage to keep Tyson off balance.

No longer can Tyson be mentioned with the great Ali, or, in my mind, a Joe Frazier or Jack Dempsey, because he lacks the heart of a champion, the brains of a champion, and the drive of a champion. Tyson learned the lesson that is taught to kids everywhere—you can't accomplish much with just you fists. A real champion is the one with a good head and a big heart; much like the head and heart of the courageous warrior Evander Holyfield.

Hoopsters open with high hopes

By Chris Ellis
Bucknellian Staff Writer

Number of returning starters: Zero. Number of returning double-digit scorers: Zero. Number of total upperclassmen on the 16-man roster: Five.

The internal obstacles facing Coach Pat Flannery's men's basketball team are daunting, and a Patriot League that appears tougher than it has been in years only compounds the problem. Will the 1996-97 season be a rebuilding year? Probably. A learning experience? Most definitely. But a wasted season? Don't count on it.

With an impressive group of tri-captains and a six-man recruiting class that is one of Bucknell's best in recent memory, even a repeat of last year's 17-11 season could be a disappointment.

"I fully expect to be in the thick of things as league play unfolds," Flannery said. "I wouldn't make a comment like that if I didn't mean it."

Even with an entirely new starting lineup, Flannery has plenty of reasons to be optimistic about the upcoming season. Foremost among those reasons is starting point guard J.R. Holden '98. Holden, who averaged 7.4 points per game last year and leads all returning players in points, minutes, steals, and assists, will be the player Bucknell will rely on to key its run at a Patriot League Championship.

"Last year, he came in off the bench and always gave us the energy we needed, but this year, we'll depend on him to run the show," Flannery said of the 6'1" junior. "You need to have someone like him on his game to have a successful basketball program."

Holden, who scored 17 points and attempted a team-high 22 field goals in a 96-79 exhibition loss to the DC Explorers, will be forced to change his style of play based on opposing defense schemes, of which he will be the primary focus. Holden is one of the league's premier three-point shooters, and has the potential to be one of its biggest scorers as well, but his play in other facets of the game will go a long way in determining Bucknell's success this year.

"Other teams will definitely be keying on him... He's going to have to change his style of play every game," Flannery said. "Whether it's scoring, defensive pressure, or passing, J.R. will always have to be on top of all aspects of his game."

Holden will be teamed in the Bucknell backcourt with senior captain Gordon Mboya. Mboya, whose 100 rebounds lead all returners, will be looked upon to provide an offensive spark this year.

"I really think that we have the best backcourt in the conference," Flannery said. "Those guys will be the mainstays of this club."

Bucknell's third captain, senior center Tom Welch, will start at center, but aside from the three captainships, the Bucknell roster is wide-open.

Forward Martin Gilliard '99, who shot 61 percent from the field last year, figures to get a share of the team's starts, as does freshman forward Dan Bowen. Bowen, a 6'8" recruit from New Hampshire State Champion Central High School, will team with Welch to give Bucknell solid height underneath.

Also figuring to receive a share of quality minutes this year are guard Dan Ash '99, who will be used to spell Holden, guard Brian Muckle '00, who averaged five steals per game in high school, forward Max Wetzel '99, forward Dyrika Cameron '00, and 6'11" center Tom Hauser '99. Flannery is quick to point out, though, that no fewer than 13 players will have a chance to compete for quality time.

"We're going to have some tough choices to make," Flannery said. "We have at least two or three (starting) spots up for grabs."

Colgate again will go into the season as the favorite to win the Patriot League and make a return trip to the NCAA tournament. The Red Raiders return center Adonal Foyle, last year's Patriot League player of the year, to their roster.

Navy, who returns nine lettermen from last year, and Holy Cross, who returns 10, are also considered contenders in the wide-open Patriot League.

But don't count Bucknell out, either. On paper, the Bison seem to have the size, speed and quickness to compete with the league's best, and the enthusiasm Flannery has noticed in practice has been equally encouraging. The only thing Bucknell is lacking is experience. That inexperience showed in the sloppy 17-point loss to the AAU Explorers, a game in which the Bison committed 19 turnovers. But the rawness of his younger players is something Flannery feels his team can overcome. The team will definitely be learning, and will also be in the process of rebuilding for the next three seasons. But that building doesn't necessarily have to come at the expense of the 96-97 campaign.

"From the minute we arrived on campus, the commitment and enthusiasm has been as good as I've seen it anywhere," Flannery said. "As long as our older guys stay patient, the younger ones will come around, and I know we'll be competitive with anyone."

Bucknell opens its regular season schedule this Saturday at home vs. Robert Morris. Game time is 7:30 p.m.

Eric Shortz—The Bucknellian
Tom Hauser '99 looks to add bulk to an inexperienced front court.

Eric Shortz—The Bucknellian
Tri-captain Tom Welch '97 is one of only five upperclassmen on the 16-man Bison roster. The team opens its season Saturday.

Club Sport Report — Men's Rugby Recap

Rugby advances to regionals

Male ruggers fall to eventual champion Salisbury State, lose chance at first championship

By Christian Franco
Bucknellian Team Correspondent

This year the men's rugby team advanced further than any Bucknell rugby team ever has. The team's monumental season included wins over tough squads like Franklin and Marshall, Gettysburg, Albright, and The Virginia Military Institute.

After two tough playoff victories, the All Blacks earned an invitation to represent Eastern Pennsylvania in the Mid-Atlantic Rugby Football Union (MARFU) regional championships, with the winner advancing to the national rugby championships in Cherry Blossom, D.C.

The ruggers played exceptionally well this past weekend in Princeton, but lost their chance for a shot at the national championship when they fell in a close contest to perennial powerhouse Salisbury State. Salisbury eventually went on to clinch the MARFU championship.

The All Blacks look to build on this championship level experience next year as they only lose four seniors. Such players include offensive powerhouse and inside-center Galeal Zino '97, who was the team's leading scorer, as he alone managed to score half of the teams total points during this season. The All Blacks also lose Tim Spino '97, who made spectacular runs all season, including a record 98-yard try score against Salisbury State.

The All Blacks will miss wing back Christian Franco '97, who was a team leader all season. He was one of Bucknell's top defensive players who loved to make big hits on opponents and always played 80 minutes of rock solid rugby.

Bucknell's other loss is in the pack, wing forward Pete Dalena '97. Dalena was also a team leader and was among Bucknell's best pack players—always running, tackling and rucking with skill and authority. All four seniors were league all-star selections.

Despite these losses, Bucknell rugby shows a great deal of promise for the season to come. The Bucknell All Blacks return 11 out of 15 starters which include team captain Roddy "Fabio" Copeland '98, as well as tough pack players like all-star wing forward Terry Childers '98, Michael Toth '98, Tom Dwyer '98, Brian Bradford '99, along with Joe Bridy '98.

The backs return two excellent players in the always dangerous Dave Mir '99 and hard-hitting Brad McLaughlin '98.

Bucknell will start preparing for next year's fall season this spring as they look forward to playing a tough spring schedule. The Bucknell All Blacks hope to build on this year's experience and come next fall, ready to take matters one step further by advancing to nationals.

Fast Fact:
The '96 squad advanced to regionals for the first time in over 10 years

Sports Trivia Quiz

1. On Monday night, Chris Boniol tied two other NFL kickers with 7 field goals in a game. Name the other two kickers.
2. Name the first ever NL player to win the MVP unanimously.
3. Who is the only NBA rookie to accumulate 1,000 points, 500 rebounds, 250 assists, 150 blocks, and 75 steals in a single season?
4. Who is the only coach in Notre Dame history with more career victories than Lou Holtz?
5. Name the only two players in NCAA division I history to rush for over 2,000 yards and average more than 200 yards a game.

Answers:

1. Jim Bakkem and Rich Karlis 2. Orlando Cepeda 3. Chris Webber 4. Knute Rockne 5. Barry Sanders and Marcus Allen

BSG approves proposal for greater RA compensation

BY BETH MARTIN
Bucknellian Staff Writer

Bucknell Student Government's proposal to further compensate Resident Assistants is currently being considered by the President's office and the Office of Housing and Residential Life. Presently, RAs receive a free room. The proposal will also give them a 15 percent discount at the University's bookstore and staff parking privileges .

Brooke Warehime '97, BSG President, said he began to research what compensation Bucknell's frame-of-reference schools offer their RAs, after several Bucknell RAs and other students working with the Office of Housing and Residential life suggested that Bucknell was not giving its RAs as many benefits as similar universities.

In addition, Warehime was interested because the University was pressed to extend the RA position to current sophomores last year, when not enough juniors and seniors were interested.

Warehime offered BSG the compensation proposal last spring, and it passed unanimously.

BSG then presented the proposal to the Committee on Complimentary Affairs, comprised of several students, faculty and administrators. CCA also passed the motion and recommended that even more privileges be given to RAs.

According to Warehime, the proposal is now "out of BSG's hands, to be decided by the President's staff and Res Life." If passed, the compensation proposal could take effect next year.

The President's Office and The Office of Housing and Residential Life were unavailable for comment.

Warehime said, though he feels that "much more could and should be done for Bucknell's RAs," he only included bookstore and parking privileges in his proposal, because they are most likely to meet the financial resources of the Office of Housing and Residential Life. Extended parking privileges would cost the University nothing, and "the bookstore does not make much revenue from the kinds of things RAs buy," he said.

Not surprisingly, the RA staff is in favor of additional compensation.

An RA who wished not to be identified said, "It's pretty much understood that no current RA would recommend taking on the position. It's not at all worth it. They expect so much of us at this school and give us so little."

Katie Dunn '98, an RA in Bucknell West, said "We definitely don't get enough. It seems like Res Life and everybody doesn't understand how much we do. There were lots of things in our contract that didn't sound as bad as they actually are when you do them."

"I thought that I would meet a lot of people

Roy Baker fills new Assistant Dean of Students position

BY KATHRYN WRIGHTSON
BUCKNELLIAN STAFF WRITER

The new assistant dean of students, Roy Baker, comes to the University from Rutgers University, where he spent four months in an administrative position and "hated it."

"As soon as I came to Bucknell for my first interview I drove into this town and I immediately felt, 'Wow, this is where I really belong, in a smaller environment,'" Baker said.

"I like to live in small towns and when I saw the University... I just immediately feel in love with the place and I was really pleased when I was invited back for a second interview because I knew there might be a chance for me to work at Bucknell."

"Bucknell has an incredible reputation, and it's a fine opportunity for me. I'm very happy to be here," Baker said.

Baker's primary responsibility as a dean of students will be to work with the Greek system.

"I have a strong background in student affairs, particularly in several areas that impact this position: obviously Greek life. I have served in a similar capacity, being responsible for Greeks, at four or five other schools, and I've also been a Director of Housing and Residential Life," Baker said.

Student victims have internal and external judicial options

Local DA informs students of external options

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Students victimized by sexual assault can rest assured that Peter Johnson, the Union County District Attorney will be a confidant if they chose to talk to him about a potential case, he said in a recent interview.

Concerned about sexual assault on campus, he wants to educate the community about the "external" legal proceedings that victims can pursue, in addition to any internal proceedings.

"I want to foster a process that will let people speak out," Johnson said.

He said that the process of "treating these cases seriously and consistently," needs to begin immediately.

He added that this process will begin to build a road to a better place—"a place where people who get assaulted feel OK about coming in here and hav-

Student Judicial System addresses criminal actions

BY REBECCA KLINGER
Bucknellian Staff Writer

With this semester's allegations of hazing against Phi Gamma Delta, the rise in reported sexual assaults and other such incidents on campus, the University Judicial Board and the Sexual Assault Board have received their fair share of publicity.

These two internal campus organizations are designed, as the student handbook states, to "assure that standards of social responsibility and accountability to the community are maintained."

Not only does the student justice system deal with University regulations, it often punishes criminal actions as well. And while it does not pretend to be a substitute for the public courts, the campus judicial system is often the only one to hear the case.

Before the judicial board was created three years ago, disciplinary decisions were made on an individual basis by an appointed person. The purpose of the board is to remove this burden from one person for

Flu season is upon us

BY JAMIE KRAUK
Bucknellian Staff Writer

Influenza, commonly known as the flu, is a respiratory infection caused by viruses. It is often accompanied by fever, chills, headache, dry cough and muscle aches. Illness caused by flu may last as long as a week or more. Recovery is usually complete but possible complications include pneumonia and death.

A common problem with the flu is that many people often mistake it for a cold and they do not seek treatment as quickly as they should. Colds can be caused by any of a variety of 150-200 viruses, but influenza is caused by only a few.

The major difference between the flu and a cold is the severity of the symptoms, which have a faster onset with the flu. A cold is not normally accompanied by a fever, while the flu can cause a fever as high as 103°.

Flu is also accompanied by pain and aches in joints and muscles.

The flu virus attacks the lining of the respiratory tract. It enters the body either by direct or

FIJI suspension lifted

Judicial Board Hearing finds fraternity not responsible for hazing allegation

BY KARIN DAVIDSON
Bucknellian Staff Writer

The suspension of the Delta chapter of the Phi Gamma Delta Fraternity was lifted last Monday after a University Judicial Board hearing.

The fraternity was found not responsible for the charges of hazing and disorderly conduct.

The fraternity's activities and operations were suspended in accordance with the Student Judicial System and Code of Conduct as a consequence of the chapter's alleged involvement in a hazing incident on Nov. 7, barring its semesterly philanthropy.

"I'm completely disgusted on the way the University goes about placing fraternities on suspension when only hearing one side of the story. Because of this, the community lost over a thousand dollars in donations that would have been made to Lewisburg Little League," said Jonathon Kagan '97, president of Phi Gamma Delta Fraternity.

Espresso and juice bar opens

By Kathryn Ardinger
Bucknellian Staff Writer

The name of her new espresso and juice shop "Zoinks," comes from the Scooby Doo cartoon, owner Laura Michalak explained. When scared, Scooby Doo and Shaggy would yell "Zoinks!"

Michalak said that coffee is an eye-opener and that when people see the place, they too might be inclined to say Zoinks.

"We have textured walls, stained glass windows, ambient lighting and Victorian furniture. Basically it's very eclectic—a homey atmosphere," Michalak said.

Zoinks, located on Market Street, had its grand-opening on Nov. 23. It has a full espresso bar and fresh squeezed juice bar, including orange, grapefruit, carrot, celery, beet, cranberry and grape juices. All but the cranberry and grape juices are squeezed at Zoinks. They get those two juices and some of their baked goods from Walnut Acres, a local organic farm.

Michalak added that they also have birch beer on tap and free popcorn.

Students try to reweave *Tapestry*

By Tracy Thiffault
Bucknellian Staff Writer

The recent increase in sexual assaults on campus has spurred the promotion of women's rights.

Tapestry was a biannual literary magazine published several years ago that contained creative reports, stories, poems, and artwork focusing on feminine issues. It was open to the entire campus and was supported and partially funded by the Women's Resource Center.

Tapestry first appeared in 1990 and ran for two years publishing four editions, but when the editors graduated, no one was available to take over.

Dana Bozich '98, Meredith Gee '98, Sarah Kaczor '98, and Meghan Langford '99 want to publish Tapestry once again. They feel there is not enough women's unity on campus, especially with the recent occurrences.

According to Gee, there is a gap between men and women on campus, which no one is dealing with.

Kaczor says there are a lot of feminists on campus, but they don't realize it. This will be a way for them to express themselves, literally.

Tapestry will also advocate healthy living, eating right as well as the positive image of women on campus. If they get enough support, the women would distribute flyers to advocate feminist events around campus.

The magazine would continue in the same spirit as the original issues.

Cynthia Hogue, assistant professor of English has agreed to be the advisor. Rich Dionne, GR, will assist with the formatting and organization of the magazine.

The organization is still looking for additional student involvement. A meeting for interested students will be held next week.

If efforts are successful, Tapestry will be published once again next semester and will be distributed in the Langone Center.

BAKER
From page 1

"I felt like it was a good institutional fit for me because I had not only the Greek life experience, the housing and residential life experience, but the general student affairs experience that would give me the opportunity to interact with students who are not Greek here," he said.

Baker assumed his position on Nov. 18 and has found his position, "very good so far, exactly what I expected. Everyone has been extremely cooperative. I've met most of the sorority presidents and many of the fraternity presidents at this point."

"I'm trying to learn as much as I can to get a solid feel for where the Greek system is and in what direction students would like to see it go. I think after a period of time I may begin to initiate a few programs that I believe might assist in the advance of the system as a whole," Baker said.

Baker said he does not have definite plans for the Greek system.

"I think the worst thing a person like myself could do is to walk in with some definite ideas of what I want to accomplish because I don't know what has been attempted here and what has actually happened and I really can't tell you much about exactly where we are at this point in time in the Greek life system."

"I need to learn. Once I get a handle on that, at that point I will sit down with IFC and Panhel and the presidents of all the organizations and we will decide in what direction we want to go and how we're going to get there."

"The Greek life program is very, very strong here and it's moving in the right direction," he said.

Baker sees his role as assistant dean to be, "a facilitator in fostering the development of the Greek system at Bucknell. With the clear understanding that the system has made major strides since the late '80's and it's on a solid foundation right now, I think now it's time to take it a couple steps farther."

"I firmly believe that my role here is to be a facilitator and educator and to help students who assume leadership roles in organizations to be successful, because truly they're the ones who do all the hard work."

Baker said, "I'm the advocate for the students in the system. I'm also an advocate for the University. My major role is to help both of those organizations, the Greek system and the University, blend so that the Greek organizations fully understand their responsibilities to the University.'

Baker extends these responsibilities to all students. He said, "Students who come to Bucknell are Bucknellians before they become Greek and just because you start wearing letters on your chest doesn't mean you're not a Bucknellian and also doesn't mean you don't have a responsibility to your University—and sometimes we forget that."

Prints in Cafe cause stir among student artists

The three prints by Bradley Shoemaker which currently hang in the Seventh Street Cafe have become a focus of contention recently. A student petition is in progress to have them taken down and replaced with student art work.

The student art collective, Exposed, began a petition at the poetry reading on Nov. 23 to have the prints permanently removed from the Cafe. The idea is that in place of the prints, student art work could be hung on a rotating basis.

Currently, in order for the prints to be taken off the wall, an $80 fee must be paid.

Exposed will have the petition in the L.C. Mall this Saturday. Approximately 160 signatures have been collected.

Judicial Board Results

A senior male was charged by the director of Public Safety for allegedly initiating a fight at a fraternity that involved several students. The charges also alleged this student pushed or shoved a former student into a porch column, causing a head laceration which required treatment at Evangelical Hospital.

After considerable discussion, the CJB Panel, by 6-0 vote, found the student not responsible for either charge. The Panel concluded that in the absence of testimony from a witness who actually saw the assault or the victim of the alleged assault, there was insufficient evidence to find the senior male responsible as charged.

The director of Public Safety charged a fraternity with the possession use of controlled substances, hazing and permitting minors to possess and consume alcohol as a result of a written statement submitted by a former member who described incidents that occurred during the Spring 1994 and Fall 1995 semesters. Pictures, copied by a duplicating machine, showing incidents of the alleged violations were also submitted by the former member.

The CJB Panel, by 7-0 vote, found the fraternity not responsible for any of the violations charged. The Panel concluded that in the absence of testimony from the former member who submitted the statement or any of those pictured in photographs who may have been subject to or a participant in illegal activities and the absence of anyone to testify to the validity of the photographs, the evidence presented was hearsay and could not be substantiated.

A sophomore female permitted a non student acquaintance to roll and smoke a joint of marijuana in her residence hall room. The student acknowledged she "tried once to smoke" the joint. The smoke from the joint activated the fire alarm at which time she and the non student left her room through a window.

Student placed on disciplinary probation through June 1, 1997. The student is required to prepare a five-page paper related to the incident and required to complete ten hours of University Service. If the student applies to live off campus during 1997-8, this incident will be reviewed by the Off Campus Living Review Board to determine her eligibility.

A junior male was found by Public Safety, sitting on the porch of his fraternity, cleaning his paintball gun. The student acknowledged responsibility indicating he was unaware that a paintball gun was prohibited on campus, but acknowledged it was his responsibility to know that fact. He acknowledged that he used poor judgment and had no intention of using the device on campus.

The Student was placed on disciplinary probation through Dec. 22, 1996. He is also required to prepare a five-page paper related to the incident. If he should apply to live off campus during 1997-98, this incident will be reviewed by the Off Campus Living Review Board to determine his eligibility.

PUBLIC SAFETY LOG

November 23, 1996

LIQUOR LAW-UNDERAGE CONSUMPTION — A Public Safety Officer cited a University student for underage consumption in a residence hall. The student was transported to Evangelical Hospital Emergency room for treatment.

LIQUOR LAW/UNDERAGE CONSUMPTION — A Public Safety Officer cited a University student for underage consumption in a residence hall. The investigation is continuing.

November 24, 1996

VANDALISM — Unknown person(s) broke the side view mirror on the Public Safety vehicle while it was parked in the Observatory lot.

TWFE/DISCHARGED FIRE EXTINGUISHER(S) — Public Safety Officers responded to a fire alarm activation at Vedder Hall and determined that unknown person(s) had discharged two fire extinguishers. The investigation is continuing

TAMPERING WITH FIRE EQUIPMENT — Public Safety Officers responded to Phi Kappa Psi Fraternity for a fire alarm activation and found that unknown person(s) had removed a fire extinguisher from its holder. The investigation is continuing.

TRESPASSING — A University student reported to Public Safety Officers that unknown person(s) had entered her residence in Vedder Hall. Nothing was found missing and the investigation is continuing.

RECOVERED PROPERTY/CAR STEREO — A University student reported finding a car stereo at the rear of Martin House to Public Safety. Public Safety is presently storing the property.

SUSPICIOUS PERSON — A University student reported to Public Safety that a suspicious male had been seen on the porch of a Bucknell West Mod. A search of the area met with negative results.

November 25, 1996

COLLISION/HIT & RUN — A University student reported to Public Safety that his vehicle had been damaged while parked in the Gateway Lot. The investigation is continuing.

November 26, 1996

IMPROPER USE OF PARKING DECAL — A University employee observed his decal in a student vehicle parked on Lit Road. Public Safety cited the student operator.

SUSPICIOUS PERSON/POSSIBLE TRANSIENT — A University student reported to Public Safety observing a suspicious female in Vedder Hall and the Freshman Quad area. The local police were alerted and a search was made of the area.

November 27, 1996

LARCENY/THEFT — A University employee reported to Public Safety that unknown person(s) removed the carpet from the rear entrance of Taylor Hall. The investigation is continuing.

November 28, 1996

INFORMATION — A female, matching the description of the suspicious person reported on November 26 was present at the Public Safety office. The Lewisburg Police responded to assist the woman.

COLLISION/NO INJURY — A visitor reported to Public Safety that his vehicle slid on ice and collided with a sign at the intersection of Moore Ave and Dent Drive. The Physical Plant was informed of the damage.

UNIVERSITY PROPERTY DAMAGE — While on routine patrol a Public Safety officer observed a damaged sign at the Weis Center 15 minute parking area. The investigation is continuing.

December 1, 1996

VANDALISM — While on routine patrol, a Public Safety officer discovered that unknown person(s) had broken a pane of glass in the front door of Swartz A-Wing. The investigation is continuing.

December 2, 1996

TAMPERING WITH FIRE EQUIPMENT — Public Safety responded to a fire alarm activation at Kappa Delta Rho Fraternity and determined that unknown person(s) had activated a pull station. The investigation is continuing.

December 3, 1996

HARASSMENT BY COMMUNICATION — A University student reported to Public Safety having received numerous harassing phone calls at a Harris Hall residence. The investigation is continuing.

FORGERY/THEFT — A University student admitted to Public Safety of having purchased an answering machine at Wal-Mart while using a false name.

INFORMATION — A University student reported to Public Safety that a vehicle was observed operating in a reckless manner on Fraternity Road. The license check and a routine check of the area met with negative results.

INFORMATION — A University student reported to Public Safety a possible marijuana violation in Vedder Hall. The report could not be confirmed.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Bucknell News Brief

Mark Padilla, associate professor of classics, was appointed to serve as the associate dean of faculty. Padilla will serve in the position for a three-year term, 1997-2000, running from Aug.15 to June 15 of each of the three academic years. Padilla will assume his position as associate dean on a part-time basis in the Spring of 1997. Deborah Abowitz, associate dean of arts and sciences, is serving as the acting associate dean of faculty.

National News

Hawaiian judge upholds same-sex marriages

HONOLULU — On Tuesday a Hawaiian state court upheld the right of same-sex couples to legally wed five years after a gay couple first filed suit against the state for denying them a marriage license.

The ruling makes Hawaii the first state to recognize that gay and lesbian couples are entitled to the same privileges as heterosexual married couples.

In his ruling, Judge Kevin Chang found that the Hawaiian state government had failed to establish a "compelling state interest" to justify the prohibition against same-sex marriages, said Dan Foley, a lawyer for three same-sex couples who sued the state.

Joe Melillo and Patrick Lagon joined two lesbian couples in filing suit against Hawaii in 1991. All three couples were denied marriage licenses by the state. They say that the state's refusal to let them marry amounts to gender discrimination, violating the state constitution's Equal Rights Amendment.

Cowlings testimony contradicts Simpson

SANTA MONICA, California — On the witness stand Tuesday, O.J. Simpson's longtime friend Al "A.C." Cowlings called Simpson his closest and dearest friend, then contradicted the sports hero's civil trial testimony.

Cowlings reluctantly admitted he had taken Nicole Brown Simpson, then married to the former football star, to the hospital after a fight with her husband on New Year's Eve 1989 and that she told him Simpson hit her. Simpson eventually pleaded no contest to spousal battery.

Simpson's former teammate testified he was called to the house and took Nicole to the hospital that night, because he feared she had suffered a concussion.

Cowlings' testimony differed from an account he gave during a pretrial deposition. In it, Cowlings said he saw Nicole's bruises the morning after the incident, and was concerned enough to ask her if she wanted to go to the hospital.

Rejection seen for English-only measure

WASHINGTON — An Arizona law that would require state employees to speak only English while conducting official business appears in trouble at the Supreme Court. Because of technicalities, the justices seemed to indicate during oral arguments on the issue yesterday that they would reject an attempt to reinstate the English-only law.

The technicalities include the fact that the state government of Arizona is no longer defending the English-only law. In addition, the state employee who first challenged the law no longer works for the state.

In an hour-long argument session, the justices ignored the constitutional issue before them: whether states can make English their official language and require that most government actions be taken in English.

Instead, all of the justices' questions to lawyers focused on procedural hurdles that must be cleared before any constitutional ruling is possible. The court's decision is expected by July.

Tree lit: New York makes holidays official

NEW YORK — New York's holiday season officially began with a rush of lights Tuesday at the 64th annual lighting of the Rockefeller Center Christmas tree.

Thousands of people watched organizers turn on about 26,000 lights decorating the 77-year-old, 90-foot spruce. Until November, the tree graced a woman's back yard in Armonk, New York.

Joe Torre, manager of the world champion New York Yankees, flipped the light switch with help from some lucky children and David Rockefeller, chairman of the board of Rockefeller Center Properties.

Singers Michael Bolton and Gladys Knight, The Rockettes and Brooklyn's James Hall and Worship and Praise Choir were among those performing at the hour-long ceremony. Rockefeller Center began the ceremony in 1933 when the tree was covered with a relatively modest 700 lights.

Troops, police patrol Paris in wake of bomb

PARIS — Hundreds of soldiers and police patrolled the streets of Paris with machine guns yesterday in a return of last year's anti-terrorism measures. The heightened security was put in place after a bomb transformed a crowded commuter train car into a burned-out wreck Tuesday, reviving memories of similar attacks in France last year.

Thousands of law enforcement personnel were on duty at train stations, airports and other public places in Paris. Across France, border controls were stepped up and security was tightened in major cities.

Tuesday's bomb killed two people — a man and a woman — leaving about 80 others wounded or in shock.

The bombing was much like deadly blasts last year claimed by Algerian Muslim militants. No one has claimed responsibility for Tuesday's bomb, which consisted of a 29-pound gas canister packed with gunpowder and four-inch nails.

Britain mulls change to common European currency

LONDON — The pound sterling is as British as Big Ben or the changing of the guard at Buckingham Palace. It has been the currency of the realm since the 13th century. But it will be a thing of the past if Britain participates in Europe's planned common currency.

With a decision on whether to join the European Monetary Union only a year away, Britain is growing increasingly nervous over the prospect of losing a cherished symbol of sovereignty.

The Queen's reassuring image would not be banished entirely from the EMU monetary system; participating countries will be allowed to design one side of the new 'Euro' coin. But Anglo distrust abounds over a currency whose strength does not flow from Britain and her time-tested government.

Euroskeptics on the street are mirrored in the Houses of Parliament. British politicians say they plan to sit on the sidelines and observe the action on Europe's political battlefield before trading in the treasured pound for the euro.

Doctors: Mother Teresa may never be as active

CALCUTTA, India — Doctors treating Mother Teresa said Tuesday that the Nobel Peace Prize winner famed for her work with the poor may take a long time to recover from heart surgery and she may never be as active as before.

Dr. Tarun Praharaj said the 86-year-old Roman Catholic missionary would go back to work at her Missionaries of Charity religious order once her heart and "other parameters" were declared satisfactory.

"But she will not be very, very active this time because we have to keep an eye on her health and monitor her parameters from time to time," he said. "She will not be as active as before."

Despite a series of health problems, including three heart surgeries in five years, Mother Teresa had kept up a seemingly tireless pace in her religious order and had traveled widely before her latest illness.

Art student vomits on 'stale' masterpieces

TORONTO — A Canadian art student says he can't stomach some of the art world's masterpieces. So, he is on a mission to publicly vomit on at least three of the paintings — each time regurgitating in a primary color.

Jubal Brown of Ontario College of Art and Design fortified himself with blue gelatin and cake icing on November 2 before vomiting on "Composition in Red, White and Blue" by Piet Mondrian at New York's Museum of Modern Art. He spewed red on Raoul Dufy's "Harbour at le Havre" at the Art Gallery of Ontario in May. He plans to gush yellow on an as-yet unannounced target.

The 22-year-old student, who shaves his eyebrows and has a pierced lower lip, said in an interview that the paintings are "stale, obedient, lifeless crusts." His intention: "To destroy art, to liberate individuals and living creatures from its banal, oppressive representation."

He claims he needed no inducement to vomit on the Dutch master's work in New York, which he called a typically geometric canvas. "I found its lifelessness threatening and it made me sick."

The Bucknellian announces spring staff

The spring 1997 editorial staff for *The Bucknellian* has been appointed.

Karin Davidson '97 and Rebecca Klinger '97 will be continuing on as the editors-in-chief for another semester.

Stephanie Bierly '97 will remain the business manager and Derek Rethwisch '99 will continue as the assistant business manager.

Rob Boyce '99 and Kathryn Ardinger '97 will be the news editors. Ardinger, who served as the assistant news editor during the fall semester, will be replacing Kathryn Wrightson '98, who will be studying in Florence, Italy for the semester. Beth Martin '99 will be taking over as the assistant news editor.

Todd Zeranski, '99 will be replacing Nicole Maestri '97 as opinions editor, while Rachel Doebber '98 and Laura Vaccaro '99 will remain the arts and entertainment editors.

Melissa Renzi '98 will continue as a features editor and will be joined by Jeremy Flick '98, who is replacing Aimee Ferris '98.

E.J. Crawford '99 and Brett Tomlinson '99 are staying on as sports editors, while Jacob Lipman '98 will remain the sports statistician.

Mitch Stewart '99 will be remaining as the science and technology editor, along with new co-editor Tracy Thiffault '00 who will be replacing Jaime Krauk '98.

Jonah Half '00 will come aboard as darkroom manager.

Alison Dugan '99 will continue as the production manager. Curran Filer '99 will remain as the Advertising representative for national ads, while Sarah Gilfillan '99 and Deborah Jancek '99 are continuing as the advertising representatives for local ads.

Heather Sutton '00 and Charles Ehrenfried '00 will continue to do the advertising design. Amy Millindorf '99 is remaining on as the head copy editor.

Joe Croney '00 will be taking over as online editor for Jason Krywicki '99, who will be continuing as the system's manager. Jon Kratz '98 has replaced Darren Hansen '98 as the circulation manager.

Drew Doran '98 will stay on as the graphic artist and Mark Bussler '98 will continue as the art editor.

Katherine Wheatcroft will serve as the advisor to *The Bucknellian* for one last semester. Wheatcroft plans to retire in the spring.

Public Safety to begin bike patrol next semester

Eric Bloem
Bucknellian Staff Writer

Beginning next semester, Public Safety officers will be patrolling around campus on a new set of wheels. The University has implemented a new patrol system using bicycles as part of the present car patrol system.

Vincent DeCerchio, director of Public Safety, said "there are a number of reasons for the bicycle patrol." The University hopes that the patrol "will employ better campus coverage."

The bicycle patrol will enable officers to go places that they have previously not been able to go on foot or in a vehicle. DeCerchio stated that the bike patrol will help to institute a "more personal approach to our interaction with students."

Public Safety sees the program to be more environmentally conscious than a standard car patrol system.

The bicycle patrol system is a fairly new concept to law enforcement. DeCerchio said "the bike program is used by a lot of police departments and progressive universities in all climates and environments." Recently, it has become popular in major cities.

Public Safety's test program will only have one bicycle patrol which will operate on second and third shifts, from 3 p.m. to 7 a.m. on different days and weekends. In addition, there will always be at least one other officer on duty at the same time with a patrol car.

DeCerchio maintains that Public Safety's major goal will be to continue to have "the quickest response possible." DeCerchio said that at this time it is difficult to tell how the bike patrol will fair. "We will have to see how the bicycle patrol responds and compares to the response with the car."

Sergeant Jon Weaver, who will be the bicycle patrolman, said that he has "no worries about being able to get places on time." For the past few weeks, Weaver has been testing out the bicycle system. He said that "most people don't even know I'm there, which is another good concept. People don't know I'm coming."

Weaver sees the bicycle patrol as a "happy medium between foot patrol and being in a car." For the most part, the bicycle patrol will concentrate on covering dorm and bicycle areas, as well as parking lots. Weaver said that so far, student response to the program has been good.

In order to implement the bicycle system, Weaver had to participate in a four-day class coordinated by the International Police Mountain Bike Association. The program included both a classroom session as well as a maneuvering session. Weaver said that he learned a lot about bicycling though the course.

"There are a lot of little things that you pick up that you never thought of," he said. The University has purchased a mountain bike equipped with both low and high-beam lights, powered by an attached battery pack. It also has a first-aid kit.

The University plans to run the bicycle patrol program for two semesters, with the intention of making it a permanent program.

RA
From page 1

through the position, and maybe even help some students. But there's really nothing rewarding about the position. I feel that I haven't assisted anyone like I was led to believe," she continued.

Students had varying opinions on extending RA compensation to include bookstore discounts and staff parking privileges.

"RAs should definitely receive extended benefits. They have such a big responsibility. They have to put up with all of the problematic situations, and are generally not respected," Amy Yule '99 said.

John Carey '99 said, "Since there are enough people to fill the positions, I see no reason to give them more compensation. If less people apply to be RAs in the future, then Res Life should offer more incentives. Yet, the benefits being considered are not by any means unreasonable."

Faculty passes motion on athletic scholarships; takes stance

By Kathryn Ardinger
Bucknellian Staff Writer

The faculty voted in Monday's meeting to support a motion that opposes any change in the University's policy on granting aid on the basis of athletic merit. This motion was prompted by Holy Cross' threat to secede from the Patriot League if it were not allowed to start granting athletic-based aid for basketball.

The motion voted on by the faculty stated: "The implementation of grants in aid to athletes on the basis of athletic merit rather than demonstrated need poses an unacceptable risk to the academic integrity of the institution, and to its financial stability. The Faculty therefore opposes any such change in policy. The Faculty recognizes the importance of the Patriot League's commitment to putting academic priorities first in athletic policy, and supports the efforts of the majority of presidents to sustain a viable league."

President Adams said that there has been a collective effort by the presidents to save the Patriot League. The motion to grant Holy Cross an exception to give aid on the basis of athletic merit for basketball was made with reluctance, Adams said at the faculty meeting.

Espresso and juice bar opens

BY KATHRYN ARDINGER

Bucknellian Staff Writer

The name of her new espresso and juice shop "Zoinks," comes from the Scooby Doo cartoon, owner Laura Michalak explained. When scared, Scooby Doo and Shaggy would yell "Zoinks!"

Michalak said that coffee is an eye-opener and that when people see the place, they too might be inclined to say Zoinks.

"We have textured walls, stained glass windows, ambient lighting and Victorian furniture. Basically it's very eclectic—a homey atmosphere," Michalak said.

Zoinks, located on Market Street, had its grand-opening on Nov. 23. It has a full espresso bar and fresh squeezed juice bar, including orange, grapefruit, carrot, celery, beet, cranberry and grape juices. All but the cranberry and grape juices are squeezed at Zoinks. They get those two juices and some of their baked goods from Walnut Acres, a local organic farm.

Michalak added that they also have birch beer on tap and free popcorn.

Students try to reweave *Tapestry*

BY TRACY THIFFAULT

Bucknellian Staff Writer

The recent increase in sexual assaults on campus has spurred the promotion of women's rights.

Tapestry was a biannual literary magazine published several years ago that contained creative reports, stories, poems, and artwork focusing on feminine issues. It was open to the entire campus and was supported and partially funded by the Women's Resource Center.

Tapestry first appeared in 1990 and ran for two years publishing four editions, but when the editors graduated, no one was available to take over.

Dana Bozich '98, Meredith Gee '98, Sarah Kaczor '98, and Meghan Langford '99 want to publish Tapestry once again. They feel there is not enough women's unity on campus, especially with the recent occurrences.

According to Gee, there is a gap between men and women on campus, which no one is dealing with.

Kaczor says there are a lot of feminists on campus, but they don't realize it. This will be a way for them to express themselves, literally.

Tapestry will also advocate healthy living, eating right as well as the positive image of women on campus. If they get enough support, the women would distribute flyers to advocate feminist events around campus.

The magazine would continue in the same spirit as the original issues.

Cynthia Hogue, assistant professor of English has agreed to be the advisor. Rich Dionne, GR, will assist with the formatting and organization of the magazine.

The organization is still looking for additional student involvement. A meeting for interested students will be held next week.

If efforts are successful, Tapestry will be published once again next semester and will be distributed in the Langone Center.

BAKER

From page 1

"I felt like it was a good institutional fit for me because I had not only the Greek life experience, the housing and residential life experience, but the general student affairs experience that would give me the opportunity to interact with students who are not Greek here," he said.

Baker assumed his position on Nov. 18 and has found his position, "very good so far, exactly what I expected. Everyone has been extremely cooperative. I've met most of the sorority presidents and many of the fraternity presidents at this point."

"I'm trying to learn as much as I can to get a solid feel for where the Greek system is and in what direction students would like to see it go. I think after a period of time I may begin to initiate a few programs that I believe might assist in the advance of the system as a whole," Baker said.

Baker said he does not have definite plans for the Greek system.

"I think the worst thing a person like myself could do is to walk in with some definite ideas of what I want to accomplish because I don't know what has been attempted here and what has actually happened and I really can't tell you much about exactly where we are at this point in time in the Greek life system."

"I need to learn. Once I get a handle on that, at that point I will sit down with IFC and Panhel and the presidents of all the organizations and we will decide in what direction we want to go and how we're going to get there."

"The Greek life program is very, very strong here and it's moving in the right direction," he said.

Baker sees his role as assistant dean to be, "a facilitator in fostering the development of the Greek system at Bucknell. With the clear understanding that the system has made major strides since the late '80's and it's on a solid foundation right now, I think now it's time to take it a couple steps farther."

"I firmly believe that my role here is to be a facilitator and educator and to help students who assume leadership roles in organizations to be successful, because truly they're the ones who do all the hard work."

Baker said, "I'm the advocate for the students in the system. I'm also an advocate for the University. My major role is to help both of those organizations, the Greek system and the University, blend so that the Greek organizations fully understand their responsibilities to the University.'

Baker extends these responsibilities to all students. He said, "Students who come to Bucknell are Bucknellians before they become Greek and just because you start wearing letters on your chest doesn't mean you're not a Bucknellian and also doesn't mean you don't have a responsibility to your University—and sometimes we forget that."

Prints in Cafe cause stir among student artists

The three prints by Bradley Shoemaker which currently hang in the Seventh Street Cafe have become a focus of contention recently. A student petition is in progress to have them taken down and replaced with student art work.

The student art collective, Exposed, began a petition at the poetry reading on Nov. 23 to have the prints permanently removed from the Cafe. The idea is that in place of the prints, student art work could be hung on a rotating basis.

Currently, in order for the prints to be taken off the wall, an $80 fee must be paid.

Exposed will have the petition in the L.C. Mall this Saturday. Approximately 160 signatures have been collected.

Judicial Board Results

A senior male was charged by the director of Public Safety for allegedly initiating a fight at a fraternity that involved several students. The charges also alleged this student pushed or shoved a former student into a porch column, causing a head laceration which required treatment at Evangelical Hospital.

After considerable discussion, the CJB Panel, by 6-0 vote, found the student not responsible for either charge. The Panel concluded that in the absence of testimony from a witness who actually saw the assault or the victim of the alleged assault, there was insufficient evidence to find the senior male responsible as charged.

The director of Public Safety charged a fraternity with the possession use of controlled substances, hazing and permitting minors to possess and consume alcohol as a result of a written statement submitted by a former member who described incidents that occurred during the Spring 1994 and Fall 1995 semesters. Pictures, copied by a duplicating machine, showing incidents of the alleged violations were also submitted by the former member.

The CJB Panel, by 7-0 vote, found the fraternity not responsible for any of the violations charged. The Panel concluded that in the absence of testimony from the former member who submitted the statement or any of those pictured in photographs who may have been subject to or a participant in illegal activities and the absence of anyone to testify to the validity of the photographs, the evidence presented was hearsay and could not be substantiated.

A sophomore female permitted a non student acquaintance to roll and smoke a joint of marijuana in her residence hall room. The student acknowledged she "tried once to smoke" the joint. The smoke from the joint activated the fire alarm at which time she and the non student left her room through a window.

Student placed on disciplinary probation through June 1, 1997. The student is required to prepare a five-page paper related to the incident and required to complete ten hours of University Service. If the student applies to live off campus during 1997-8, this incident will be reviewed by the Off Campus Living Review Board to determine her eligibility.

A junior male was found by Public Safety, sitting on the porch of his fraternity, cleaning his paintball gun. The student acknowledged responsibility indicating he was unaware that a paintball gun was prohibited on campus, but acknowledged it was his responsibility to know that fact. He acknowledged that he used poor judgment and had no intention of using the device on campus.

The Student was placed on disciplinary probation through Dec. 22, 1996. He is also required to prepare a five-page paper related to the incident. If he should apply to live off campus during 1997-98, this incident will be reviewed by the Off Campus Living Review Board to determine his eligibility.

PUBLIC SAFETY LOG

November 23, 1996

LIQUOR LAW-UNDERAGE CONSUMPTION — A Public Safety Officer cited a University student for underage consumption in a residence hall. The student was transported to Evangelical Hospital Emergency room for treatment.

LIQUOR LAW/UNDERAGE CONSUMPTION — A Public Safety Officer cited a University student for underage consumption in a residence hall. The investigation is continuing.

November 24, 1996

VANDALISM — Unknown person(s) broke the side view mirror on the Public Safety vehicle while it was parked in the Observatory lot.

TWFE/DISCHARGED FIRE EXTINGUISHER(S) — Public Safety Officers responded to a fire alarm activation at Vedder Hall and determined that unknown person(s) had discharged two fire extinguishers. The investigation is continuing

TAMPERING WITH FIRE EQUIPMENT — Public Safety Officers responded to Phi Kappa Psi Fraternity for a fire alarm activation and found that unknown person(s) had removed a fire extinguisher from its holder. The investigation is continuing.

TRESPASSING — A University student reported to Public Safety Officers that unknown person(s) had entered her residence in Vedder Hall. Nothing was found missing and the investigation is continuing.

RECOVERED PROPERTY/CAR STEREO — A University student reported finding a car stereo at the rear of Martin House to Public Safety. Public Safety is presently storing the property.

SUSPICIOUS PERSON — A University student reported to Public Safety that a suspicious male had been seen on the porch of a Bucknell West Mod. A search of the area met with negative results.

November 25, 1996

COLLISION/HIT & RUN — A University student reported to Public Safety that his vehicle had been damaged while parked in the Gateway Lot. The investigation is continuing.

November 26, 1996

IMPROPER USE OF PARKING DECAL — A University employee observed his decal in a student vehicle parked on Lit Road. Public Safety cited the student operator.

SUSPICIOUS PERSON/POSSIBLE TRANSIENT — A University student reported to Public Safety observing a suspicious female in Vedder Hall and the Freshman Quad area. The local police were alerted and a search was made of the area.

November 27, 1996

LARCENY/THEFT — A University employee reported to Public Safety that unknown person(s) removed the carpet from the rear entrance of Taylor Hall. The investigation is continuing.

November 28, 1996

INFORMATION — A female, matching the description of the suspicious person reported on November 26 was present at the Public Safety office. The Lewisburg Police responded to assist the woman.

COLLISION/NO INJURY — A visitor reported to Public Safety that his vehicle slid on ice and collided with a sign at the intersection of Moore Ave and Dent Drive. The Physical Plant was informed of the damage.

UNIVERSITY PROPERTY DAMAGE — While on routine patrol a Public Safety officer observed a damaged sign at the Weis Center 15 minute parking area. The investigation is continuing.

December 1, 1996

VANDALISM — While on routine patrol, a Public Safety officer discovered that unknown person(s) had broken a pane of glass in the front door of Swartz A-Wing. The investigation is continuing.

December 2, 1996

TAMPERING WITH FIRE EQUIPMENT — Public Safety responded to a fire alarm activation at Kappa Delta Rho Fraternity and determined that unknown person(s) had activated a pull station. The investigation is continuing.

December 3, 1996

HARASSMENT BY COMMUNICATION — A University student reported to Public Safety having received numerous harassing phone calls at a Harris Hall residence. The investigation is continuing.

FORGERY/THEFT — A University student admitted to Public Safety of having purchased an answering machine at Wal-Mart while using a false name.

INFORMATION — A University student reported to Public Safety that a vehicle was observed operating in a reckless manner on Fraternity Road. The license check and a routine check of the area met with negative results.

INFORMATION — A University student reported to Public Safety a possible marijuana violation in Vedder Hall. The report could not be confirmed.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Bucknell News Brief

Mark Padilla, associate professor of classics, was appointed to serve as the associate dean of faculty. Padilla will serve in the position for a three-year term, 1997-2000, running from Aug.15 to June 15 of each of the three academic years. Padilla will assume his position as associate dean on a part-time basis in the Spring of 1997. Deborah Abowitz, associate dean of arts and sciences, is serving as the acting associate dean of faculty.

Hawaiian judge upholds same-sex marriages

HONOLULU — On Tuesday a Hawaiian state court upheld the right of same-sex couples to legally wed five years after a gay couple first filed suit against the state for denying them a marriage license.

The ruling makes Hawaii the first state to recognize that gay and lesbian couples are entitled to the same privileges as heterosexual married couples.

In his ruling, Judge Kevin Chang found that the Hawaiian state government had failed to establish a "compelling state interest" to justify the prohibition against same-sex marriages, said Dan Foley, a lawyer for three same-sex couples who sued the state.

Joe Melillo and Patrick Lagon joined two lesbian couples in filing suit against Hawaii in 1991. All three couples were denied marriage licenses by the state. They say that the state's refusal to let them marry amounts to gender discrimination, violating the state constitution's Equal Rights Amendment.

Cowlings testimony contradicts Simpson

SANTA MONICA, California — On the witness stand Tuesday, O.J. Simpson's longtime friend Al "A.C." Cowlings called Simpson his closest and dearest friend, then contradicted the sports hero's civil trial testimony.

Cowlings reluctantly admitted he had taken Nicole Brown Simpson, then married to the former football star, to the hospital after a fight with her husband on New Year's Eve 1989 and that she told him Simpson hit her. Simpson eventually pleaded no contest to spousal battery.

Simpson's former teammate testified he was called to the house and took Nicole to the hospital that night, because he feared she had suffered a concussion.

Cowlings' testimony differed from an account he gave during a pretrial deposition. In it, Cowlings said he saw Nicole's bruises the morning after the incident, and was concerned enough to ask her if she wanted to go to the hospital.

Rejection seen for English-only measure

WASHINGTON — An Arizona law that would require state employees to speak only English while conducting official business appears in trouble at the Supreme Court. Because of technicalities, the justices seemed to indicate during oral arguments on the issue yesterday that they would reject an attempt to reinstate the English-only law.

The technicalities include the fact that the state government of Arizona is no longer defending the English-only law. In addition, the state employee who first challenged the law no longer works for the state.

In an hour-long argument session, the justices ignored the constitutional issue before them: whether states can make English their official language and require that most government actions be taken in English.

Instead, all of the justices' questions to lawyers focused on procedural hurdles that must be cleared before any constitutional ruling is possible. The court's decision is expected by July.

Tree lit: New York makes holidays official

NEW YORK — New York's holiday season officially began with a rush of lights Tuesday at the 64th annual lighting of the Rockefeller Center Christmas tree.

Thousands of people watched organizers turn on about 26,000 lights decorating the 77-year-old, 90-foot spruce. Until November, the tree graced a woman's back yard in Armonk, New York.

Joe Torre, manager of the world champion New York Yankees, flipped the light switch with help from some lucky children and David Rockefeller, chairman of the board of Rockefeller Center Properties.

Singers Michael Bolton and Gladys Knight, The Rockettes and Brooklyn's James Hall and Worship and Praise Choir were among those performing at the hour-long ceremony. Rockefeller Center began the ceremony in 1933 when the tree was covered with a relatively modest 700 lights.

The Bucknellian announces spring staff

The spring 1997 editorial staff for *The Bucknellian* has been appointed.

Karin Davidson '97 and Rebecca Klinger '97 will be continuing on as the editors-in-chief for another semester.

Stephanie Bierly '97 will remain the business manager and Derek Rethwisch '99 will continue as the assistant business manager.

Rob Boyce '99 and Kathryn Ardinger '97 will be the news editors. Ardinger, who served as the assistant news editor during the fall semester, will be replacing Kathryn Wrightson '98, who will be studying in Florence, Italy for the semester. Beth Martin '99 will be taking over as the assistant news editor.

Todd Zeranski, '99 will be replacing Nicole Maestri '97 as opinions editor, while Rachel Doebber '98 and Laura Vaccaro '99 will remain the arts and entertainment editors.

Melissa Renzi '98 will continue as a features editor and will be joined by Jeremy Flick '98, who is replacing Aimee Ferris '98.

E.J. Crawford '99 and Brett Tomlinson '99 are staying on as sports editors, while Jacob Lipman '98 will remain the sports statistician.

Mitch Stewart '99 will be remaining as the science and technology editor, along with new co-editor Tracy Thiffault '00 who will be replacing Jaime Krauk '98.

Jonah Half '00 will come aboard as darkroom manager.

Alison Dugan '99 will continue as the production manager. Curran Filer '99 will remain as the Advertising representative for national ads, while Sarah Gilfillan '99 and Deborah Jancek '99 are continuing as the advertising representatives for local ads.

Heather Sutton '00 and Charles Ehrenfried '00 will continue to do the advertising design. Amy Millindorf '99 is remaining on as the head copy editor.

Joe Croney '00 will be taking over as online editor for Jason Krywicki '99, who will be continuing as the system's manager. Jon Kratz '98 has replaced Darren Hansen '98 as the circulation manager.

Drew Doran '98 will stay on as the graphic artist and Mark Bussler '98 will continue as the art editor.

Katherine Wheatcroft will serve as the advisor to *The Bucknellian* for one last semester. Wheatcroft plans to retire in the spring.

Public Safety to begin bike patrol next semester

ERIC BLOEM

Bucknellian Staff Writer

Beginning next semester, Public Safety officers will be patrolling around campus on a new set of wheels. The University has implemented a new patrol system using bicycles as part of the present car patrol system.

Vincent DeCerchio, director of Public Safety, said "there are a number of reasons for the bicycle patrol." The University hopes that the patrol "will employ better campus coverage."

The bicycle patrol will enable officers to go places that they have previously not been able to go on foot or in a vehicle. DeCerchio stated that the bike patrol will help to institute a "more personal approach to our interaction with students."

Public Safety sees the program to be more environmentally conscious than a standard car patrol system.

The bicycle patrol system is a fairly new concept to law enforcement. DeCerchio said "the bike program is used by a lot of police departments and progressive universities in all climates and environments." Recently, it has become popular in major cities.

Public Safety's test program will only have one bicycle patrol which will operate on second and third shifts, from 3 p.m. to 7 a.m. on different days and weekends. In addition, there will always be at least one other officer on duty at the same time with a patrol car.

DeCerchio maintains that Public Safety's major goal will be to continue to have "the quickest response possible." DeCerchio said that at this time it is difficult to tell how the bike patrol will fair. "We will have to see how the bicycle patrol responds and compares to the response with the car."

Sergeant Jon Weaver, who will be the bicycle patrolman, said that he has "no worries about being able to get places on time." For the past few weeks, Weaver has been testing out the bicycle system. He said that "most people don't even know I'm there, which is another good concept. People don't know I'm coming."

Weaver sees the bicycle patrol as a "happy medium between foot patrol and being in a car." For the most part, the bicycle patrol will concentrate on covering dorm and bicycle areas, as well as parking lots. Weaver said that so far, student response to the program has been good.

In order to implement the bicycle system, Weaver had to participate in a four-day class coordinated by the International Police Mountain Bike Association. The program included both a classroom session as well as a maneuvering session. Weaver said that he learned a lot about bicycling though the course.

"There are a lot of little things that you pick up that you never thought of," he said. The University has purchased a mountain bike equipped with both low and high-beam lights, powered by an attached battery pack. It also has a first-aid kit.

The University plans to run the bicycle patrol program for two semesters, with the intention of making it a permanent program.

RA

From page 1

through the position, and maybe even help some students. But there's really nothing rewarding about the position. I feel that I haven't assisted anyone like I was led to believe," she continued.

Students had varying opinions on extending RA compensation to include bookstore discounts and staff parking privileges.

"RAs should definitely receive extended benefits. They have such a big responsibility. They have to put up with all of the problematic situations, and are generally not respected," Amy Yule '99 said.

John Carey '99 said, "Since there are enough people to fill the positions, I see no reason to give them more compensation. If less people apply to be RAs in the future, then Res Life should offer more incentives. Yet, the benefits being considered are not by any means unreasonable."

Faculty passes motion on athletic scholarships; takes stance

BY KATHRYN ARDINGER

Bucknellian Staff Writer

The faculty voted in Monday's meeting to support a motion that opposes any change in the University's policy on granting aid on the basis of athletic merit. This motion was prompted by Holy Cross' threat to secede from the Patriot League if it were not allowed to start granting athletic-based aid for basketball.

The motion voted on by the faculty stated: "The implementation of grants in aid to athletes on the basis of athletic merit rather than demonstrated need poses an unacceptable risk to the academic integrity of the institution, and to its financial stability. The Faculty therefore opposes any such change in policy. The Faculty recognizes the importance of the Patriot League's commitment to putting academic priorities first in athletic policy, and supports the efforts of the majority of presidents to sustain a viable league."

President Adams said that there has been a collective effort by the presidents to save the Patriot League. The motion to grant Holy Cross an exception to give aid on the basis of athletic merit for basketball was made with reluctance, Adams said at the faculty meeting.

DA

From page 1

ing their day in court" instead of being overwhelmed with fear, misunderstanding, humiliation and fears of social ostracization

While sending the message out to victims that they can meet with him to discuss a potential case, Johnson stressed that he would never bring a case against someone, unless the victim wanted to. "I will not file a rape case if the victim, the main witness in the case, does not want to prosecute. I will not do that, period, no questions asked, no exceptions, no choices," Johnson emphasized.

He added that if he is unable to prove beyond a reasonable doubt that the sexual assault occurred, he will not bring a case either.

He explained that the process can be confidential. If a victim wants to discuss a case with him, he said, "I'll take as long as I need to educate them as to the system and to assess the facts of their case." If a victim chooses to come into his office to talk about a case and decides not to prosecute, Johnson emphasized that their discussion will remain confidential and doesn't go anywhere.

If, however, a victim does choose to prosecute, it won't remain confidential because the case will be subject to public hearings.

Johnson made a distinction between actual legal proceedings which he called the "external process," and the University's administrative judicial board process, which he referred to as the "internal process."

"The big advantage [of using the external process] is that it is a real world result for a real and serious problem. It's called respecting yourself, building your self-esteem, being able to finish something... with the proper result and move on with your life."

Johnson said that every sexual assault case that he has gone through, has been a "cathartic process for the person involved."

"It turns out to be something positive, notwithstanding the outcome of the trial. It becomes an emboldening process because [the victims] do something" by standing up and saying I'm not going to take this, he said.

"Out here we don't think it's OK for somebody to take and touch somebody's body when they don't give you consent to do that. It is an act more violative than any I can think of short of taking somebody's life," Johnson said.

The most serious penalty the University judicial board can pass down on a student is expulsion. In the external system, a judge follows sentencing guidelines that are published. The maximum penalty in the Commonwealth of Pennsylvania for a person convicted of rape, a first degree felony, is 20 years.

Speaking about the University's "internal system" and the "external system" Johnson said, "You can't compare the two systems because they have separate focuses. One of them is an academic world and one of them is the real world."

Johnson considers the attitude that it is OK to touch or grab a woman to be a prelude to sexual assault. He urged that students need to get involved and condemn this "attitude" in general, and create a preventative measure against sexual assault.

"If there is going to be any real change on campus about sexual assault people have to be educated and their thought process changed about what goes on," he said.

Johnson explain that the legal system is not a preventive measure; the law steps in after the act has been committed.

He said that the only way in which the legal system was preventative was that a person may think twice before committing a crime, if it is has been publicized that someone who was convicted of rape received serious consequences.

JUDICIAL

From page 1

more serious crimes, as well as to provide a judicial system specific to the needs of a University community.

"We're a community within ourselves... We're also an educational institution," said Gerald Commerford, associate dean of students and judicial administrator, adding that the combination of these two factors results in the board having both educational and punitive goals. For example, he said a student found responsible for breaking a University rule might be given an educational project and a remitted suspension.

If a person's behavior negatively affects a certain community, "the community should decide" the repercussions, Commerford said.

External and Internal Judicial Systems

The University's judicial system is not modeled after the criminal court system, even though it often deals with alleged crimes that are prosecutable within the local courts.

Within the campus system, the alleged perpetrator or victim is not allowed representation, witnesses are not forced to attend the hearings, the proceedings are exempt from public scrutiny and there is only a preponderance of evidence required rather than a belief "beyond a reasonable doubt" to find the alleged perpetrator responsible for his or her actions.

If criminal charges are filed externally, the records and proceedings are available for public review and the punishments are more strict, ranging from fines to jail time.

The most serious punishment that can be delivered by the University's judicial system is permanent expulsion.

When a crime is committed that involves University students, whether the location of the action is on or off campus, the victim has the opportunity to file both internal and external charges.

The University has a "zero tolerance policy" for certain actions (such as use of controlled substances) where it considers itself the victim and automatically files criminal charges externally as well as internally. Most student victims choose to bring their case only before the judicial board or the sexual assault board, Commerford said.

Public Safety has the option to file internal charges within the University if the local police file charges against a student for criminal activities off campus. However, the local authorities can not prosecute an on-campus crime in the public courts unless a police officer witnessed the event firsthand or the victim agrees to press charges.

Even though they often don't take advantage of them, student victims are made aware of their options.

"Public Safety explains to students what their options are," Commerford said.

In fact, Vincent DeCerchio, director of public safety, said that "we encourage [students] to file criminal charges" as well as internal charges.

Commerford said that students tend to keep the charges within the University because of the potential "embarrassment involved" for both the victim and the alleged perpetrator. The victim does not want to "mar" the alleged perpetrator, he said, and in cases like sexual assault, the victim may only agree to press charges behind closed doors.

"Currently the system guarantees confidentiality" he explained.

The process seems to work, Commerford said, because "we don't see very many repeats."

The Buckley Debate

While the judicial board may be able to recognize the success of the system, other members of the campus community can not do so quite as easily. The results of the cases are published in *The Bucknellian* and *What's Happening*, but the hearings and the records resulting from the hearings are closed.

"The University has chosen to keep these private," Commerford said.

Holding closed proceedings is one of the biggest differences between the internal and external judicial systems.

Elias Abelson, general counsel, said that the Family Educational Rights and Privacy Act of 1974, commonly known as the Buckley Amendment, prevents the University from opening the judicial board hearings to the public.

The Buckley Amendment mandates that schools must have a student's permission to release his or her "education records." Abelson said that the judicial board records are a part of the "education records," and if released without permission, the school's federal funding may be cut.

A 1992 amendment to Buckley says that "education records" do not include "records maintained by a law enforcement unit of the educational agency or institution that were created by that law enforcement unit for the purpose of law enforcement."

Student press law advocates and other supporters of Buckley say that campus judicial systems are law enforcement agencies of their colleges and universities. This interpretation would make the hearings and records open to the public.

But Abelson claimed that the judicial board is not a law enforcement agency of the University, and the resulting records and hearings are still protected by Buckley.

"We can't do anything to enforce the law here," he said.

Abelson also argued that losing the confidentiality of the proceedings would discourage victims from coming forward with charges.

"We have found that protecting the privacy of students involved in the process encourages students to participate and to provide full disclosure," he said.

According to Commerford, this semester administrators have briefly discussed whether or not the hearings should be open. He said the confidentiality factor would be eliminated, but the community as a whole would benefit.

"The community would have more knowledge," Commerford said, and the impact would probably be great.

Simply publishing the results of the hearings has caused a "phenomenal" decrease in the number of fire alarms activated in the first year residence halls, he said.

Open hearings would not only make the community more aware of potential consequences, but it would also foster more trust in the system, proponents say. In addition, they argue that public scrutiny would help to ensure fair treatment by providing a check that is now missing.

The Student Judicial System

•According to the student handbook, the "University's student judicial system is organized and administered so as to assure that the standards of social responsibility and accountability to the community are maintained and that students themselves assume a central role in this endeavor."

•Charges can be filed to Gerald Commerford, associate dean of students and judicial administrator, by the victim and Vincent DeCerchio, director of public safety, separately or in conjunction with one another.

•There are two category of offenses.

Category I offenses, which Commerford distinguished as those offenses which are an "affront to the entire community," are heard before the judicial board. This category includes computer tampering, disorderly conduct, use of a controlled substance and hazing.

Category II offenses such as underage drinking have an individual meeting with an administrative hearing officer.

If the charges include both Category I and Category II offenses, such as an assault by a minor who has consumed alcohol, the case will appear before the judicial board.

•If it is appropriate for the charges, a judicial board hearing must occur within ten school days after charges are filed.

•The judicial board consists of four students, one administrator and two faculty. Three panels of 13 to 14 people rotate to fill the judicial board positions for each case.

•Commerford is present as the judicial administrator at each case to make sure the process runs smoothly. He does not have a vote in determining the responsibility of the alleged perpetrator.

•Members are elected to the board by their peers—the faculty is elected by the faculty, the administrator by the administrative forum and the students by Bucknell Student Government. Each member serves a two-year term, with half of the board turning over every year.

•The Sexual Assault Board is drawn from the members of the judicial board and has the same format, but it is a separate body from the judicial board. There is no rotation pattern established. The same seven board members are present for every case.

•Training for the newly elected judicial board members is the first week of the second semester and involves presentations by Commerford, Richard Chapman, dean of students, Elias Abelson, general counsel, and Kari Conrad, director of Housing and Residential Life. Members of the sexual assault board receive additional training, which includes presentations by representatives from psychological services and Janice Butler, director of the Women's Resource Center.

B.U. ranked 14th in study abroad

Bucknell was ranked 14th in the number of students studying abroad in 1994-5 among U.S. institutions offering Bachelors degrees, according to the Dec. 6 issue of the Chronicle of Higher Education.

Two-hundred and thirty Bucknell students studied abroad during 1994-5, which was 6.2 percent of total enrollment.

Lewisburg Chief dies

After a months-long battle with cancer, Lewisburg Police Chief Donald L. Heiter, 68, died on Monday in his home.

In accordance with the request of Lewisburg Mayor Michael Molesevich, all flags at public buildings, parks, institutions and private industries in Union, Snyder, Montour and Northumberland counties hung draped at half-staff on Tuesday.

"I know of no person who has given so much to his family, his country and his community," said Molesevich in a *Daily Item* interview.

Heiter had been with the Lewisburg Police Department since January of 1971. Previously he had served on both the Sunbury and Northumberland County Police Departments.

Heiter's funeral will be held at Rooke Chapel on Saturday at 10 a.m. Rev. Scott Zimmerer of Christ Evangelical Lutheran Church in Lewisburg will conduct the service.

BSG posts election results

The results of the Bucknell Student Government elections are as follows: Tracy Gray '99 — President, Mathew Bauer '99 — Vice President for Operations, Heather Murphy '98 — Vice President for Administration and Michelle McAllister '99 — Vice President for Finance.

These individuals will begin their year's term next semester.

Increased RA compensation would lead to benefits for both students and the University

They're mentors for first-year students. They help you with roommate problems and other conflicts. All are on call 24 hours. They are responsible for making sure University regulations are followed, even if those breaking the rules are friends and peers.

While some students don't give them enough credit, resident assistants do a lot. There are RAs who do not fulfill their duties, but many go way beyond the requirements. First-year RAs especially carry a huge load on their shoulders, as they are largely responsible for their residents' transition into college and for the creation of a supportive and comfortable hall atmosphere. Upper-class RAs must deal with the conflict of being a peer as well as sort of a "police" for their residents.

It's a job not many of us would want, no matter how much it paid. And it turns out that students who are presently RAs are probably not doing it for the money.

Resident assistants at Bucknell are only compensated with room, which amounts to about $2000 for 24-hours, seven-days-a-week job. That's it. No board, no tuition cuts, nothing.

By not giving RAs pay that is equal to the job, the University is not fully recognizing or respecting the work that they do.

It's no wonder, then, that some resident assistants shirk their responsibilities. If an employee doesn't feel respected, he or she is not going to perform his or her best. All RAs will be more willing to work harder if they feel appreciated, whether they took the job for the money or not.

More compensation would give RAs some reassurance that they are indeed necessary and invaluable. It would also draw a larger applicant pool to the positions, allowing for a more stringent selection process and ensuring that quality people will continue to become resident assistants.

If administrators would compare the University to frame-of-reference schools, they would discover that our resident assistants receive far less compensation. The University is always trying to stay competitive with frame-of-reference schools when it comes to endowment, athletic success and academic reputation. Why should RA compensation be any different?

Giving resident assistants special parking privileges only makes sense. In the case of certain emergencies such as a sick resident, an RA could act faster if his or her car was nearby.

Offering both room and board to resident assistants would also be a step in the right direction. These benefits are the norm as evident by the frame-of-reference schools.

It is time for the University to give back a little assistance to the students who help it.

LETTERS

Athletic scholarships do not pose a threat if academic integrity is maintained

TO THE EDITOR:

I am an alumnus who played basketball (class of '86) at Bucknell, and I am puzzled by the opinions expressed by the articles last week on the attempts by Holy Cross to implement scholarships.

During the time that I was at Bucknell, we were part of the East Coast Conference. Though Bucknell did not give scholarships, other schools in the conference did (Rider, Towson State, Drexel, St. Joe's, Temple, et al). Nonetheless, Bucknell won two regular season titles during the time I was there including the 24-5 1984 team. Upon our move to the Colonial/Patriot League, Bucknell still was able to win league championships, even while Holy Cross had scholarship athletes on their team. We can compete, and I have full confidence in Pat Flannery to compete if this were the situation today.

BUT, I personally believe that Bucknell should follow Holy Cross and probably Lehigh and give scholarships, as long as the academic integrity is maintained. Keeping the integrity of the University is important to all who care about Bucknell, but there is a pride associated with athletic competence as well.

Scholarships, in and of themselves, are not evil. I have confidence in the fact that Coach Flannery (an alumnus of Bucknell) and his staff will recruit scholar athletes who will maintain the Bucknell tradition both on the court and in the classroom. If Bucknell decides to give scholarships, I for one will support the decision.

As a sidenote, E.J. Crawford's article has a factual mistake. When Navy and David Robinson were challenging for the national championship, they were members of the Colonial Athletic Association (along with American, William and Mary, et al), not a member of the Colonial/Patriot League.

KEVIN R. BLACKWELL '86

Is recycling in danger of becoming outmoded?

TO THE EDITOR:

Recent changes in the dormitory recycling policies have prompted my concern regarding the recycling issue. My concern regards both the priorities of the staff making the cuts and the overall response of the students affected by the cuts. Could recycling gradually become an outmoded trend of the past at Bucknell?

Authorities have addressed the issue, presenting conflicting reasons for the cuts. One (obvious) concern is that the bins cause a fire hazard and that our personal safety will be compromised as we all madly rush out of the building, and pile up on each other in a frenzy into the bales of newspaper. Other reported motivations prompting the bin removal have been staff cuts, staff training issues, and budget cuts.

Although the rationale motivating and prioritizing the removal of the recycling bins is of great concern, of greater concern to me is student indifference and unwillingness to acclimate to the new conditions. Giving a cursory glance at any trash bin "littered" with newspapers and glistening bottles and cans confirms any doubt that recycling is on the decline in the dormitories. Apparently, lack of concern for recycling increases proportionally with flights of stairs one must travel to bring the recyclables to their destination. That cozy feeling that comes with "doing our part" comes a little bit easier when the bins are more accessible. The root of the problem, then, is student motivation. Students need not necessarily feel compassionate about their duties, but at least partially responsible and motivated as an individual to do one's part.

Bins on the corridors present a compromise between indifference and responsibility. Whether the University is wavering on the edge of bankruptcy, genuinely concerned about our fire safety, or simply cutting their supposed losses, the irrationally prioritized cuts may reflect an overall inherent disregard for recycling. Even if the bins are returned to the corridors, until we can collectively appreciate or at least acknowledge our individual responsibility, the underlying recycling problem remains unsolved.

ANNE HALGREN '97

OPINIONS

Bucknell's recycling policy is failing its customers

Students deserve the services for which they are paying, including the service of recycling

BY NICOLLE SPRAGUE

I recently finished reading a book by Michael Hammer and James Champy entitled "Re-engineering the Corporation: A Manifesto for Business Revolution." The purpose of the book is to outline ways in which businesses need to change in order to be competitive in the global market of the 21st century. Particular emphasis was given to the idea of centering business around the customer since, without customers there would be no business.

I cite this work because I've been frustrated lately with Bucknell's lack of attention in some areas to servicing the customer. Bucknell, after all, is a business. And as students who pay close to $28,000 per year in tuition and other fees, we are the customers. If Bucknell wishes to continue to compete in today's market, it's my impression that utmost priority should be given to serving its students.

In returning to Bucknell this semester, I noticed a lot of cuts in services that were made such as requiring direct deposits of employee checks, no longer giving out mailing labels at the post office and other little things which were special services to the customer.

I could name other inconveniences, but I would like to focus on one in particular that has infuriated me this entire semester as I have sat through Residential Hall Council (RHC) meetings and have been told that the issue has not yet been dealt with.

For those who are not informed (and I may not have my facts completely straight because students were not consulted about these changes before they occurred) the recycling bins which used to be located in the basement of each residential hall have been removed.

Members of the physical plant organization figured out that by removing these bins, $20,000 per year could be saved. So they decided to remove the bins and expect that students should bring their recycling outside to bins usually located in inconvenient places behind the dorms. At my particular dorm, Trax, the area where the bins are located is not lit and is pitch dark at night.

The location of the outside bins, however, is not the issue. The issue in my mind is that students (the customers) were not consulted or even advised that these changes were going to occur and furthermore, serving students did not seem to be a concern when the changes were made. Many students are upset about the changes especially because recycling has decreased substantially since the residential hall bins were removed.

A proposal to bring back the recycling in the dorms has been written by RHA and addressed to President Adams. I was told at the RHC meeting that the proposal was sent in late October. However, we have not heard any response on this issue. We have been bringing the issue up at meetings and with physical plant since the beginning of the semester and no action has been made. As a customer, I am frustrated.

It is my opinion that Bucknell, as a learning institution, should be setting an example and making recycling a priority. If cuts in physical plant were so necessary than I feel that cuts in such things as grounds-keeping should be made long before cuts in recycling.

It is a well-known fact that landfills around the country are filling up faster than we can find space for them, which makes recycling a necessity. It is the right thing to do.

The argument set by physical plant is that students should learn responsibility and take out their own recycling as they would in the real world.

Well that's fine, but in the real world, I will not be paying TWENTY EIGHT THOUSAND DOLLARS every year to live.

This argument by physical plant is another example of minimal attention given to serving the customer.

Physical plant has recently "granted" students the option of taking recycling into their own hands and starting programs on individual halls. This would require a student on each hall to be in charge of bringing out the recycling every week and making sure the bins do not overflow. If the bins start to overflow, physical plant will take away the hall's recycling "privileges." This practice of individual hall recycling was in place about six years ago and failed within a few years because students weren't able to keep the system going.

It is my opinion that this process should not be a student responsibility. Furthermore, the system has been tried before and *doesn't work*. If recycling and environmental awareness was a priority at Bucknell, this would not even be an issue.

Since the outside bins are often inaccessible and inconvenient, much less recycling is occurring this year than last. Bucknell students are paying enough money in tuition that we are entitled to the small service of recycling bins located in the residential halls.

If Bucknell cannot look at this issue from a humanitarian standpoint, then they should start looking at it from a business standpoint because by not serving the customer, Bucknell will not be able to remain competitive in today's market.

DA

From page 1

ing their day in court" instead of being overwhelmed with fear, misunderstanding, humiliation and fears of social ostracization

While sending the message out to victims that they can meet with him to discuss a potential case, Johnson stressed that he would never bring a case against someone, unless the victim wanted to. "I will not file a rape case if the victim, the main witness in the case, does not want to prosecute. I will not do that, period, no questions asked, no exceptions, no choices," Johnson emphasized.

He added that if he is unable to prove beyond a reasonable doubt that the sexual assault occurred, he will not bring a case either.

He explained that the process can be confidential. If a victim wants to discuss a case with him, he said, "I'll take as long as I need to educate them as to the system and to assess the facts of their case." If a victim chooses to come into his office to talk about a case and decides not to prosecute, Johnson emphasized that their discussion will remain confidential and doesn't go anywhere.

If, however, a victim does choose to prosecute, it won't remain confidential because the case will be subject to public hearings.

Johnson made a distinction between actual legal proceedings which he called the "external process," and the University's administrative judicial board process, which he referred to as the "internal process."

"The big advantage [of using the external process] is that it is a real world result for a real and serious problem. It's called respecting yourself, building your self-esteem, being able to finish something... with the proper result and move on with your life."

Johnson said that every sexual assault case that he has gone through, has been a "cathartic process for the person involved."

"It turns out to be something positive, notwithstanding the outcome of the trial. It becomes an emboldening process because [the victims] do something" by standing up and saying I'm not going to take this, he said.

"Out here we don't think it's OK for somebody to take and touch somebody's body when they don't give you consent to do that. It is an act more violative than any I can think of short of taking somebody's life," Johnson said.

The most serious penalty the University judicial board can pass down on a student is expulsion. In the external system, a judge follows sentencing guidelines that are published. The maximum penalty in the Commonwealth of Pennsylvania for a person convicted of rape, a first degree felony, is 20 years.

Speaking about the University's "internal system" and the "external system" Johnson said, "You can't compare the two systems because they have separate focuses. One of them is an academic world and one of them is the real world."

Johnson considers the attitude that it is OK to touch or grab a woman to be a prelude to sexual assault. He urged that students need to get involved and condemn this "attitude" in general, and create a preventative measure against sexual assault.

"If there is going to be any real change on campus about sexual assault people have to be educated and their thought process changed about what goes on," he said.

Johnson explain that the legal system is not a preventive measure; the law steps in after the act has been committed.

He said that the only way in which the legal system was preventative was that a person may think twice before committing a crime, if it is has been publicized that someone who was convicted of rape received serious consequences.

JUDICIAL

From page 1

more serious crimes, as well as to provide a judicial system specific to the needs of a University community.

"We're a community within ourselves... We're also an educational institution," said Gerald Commerford, associate dean of students and judicial administrator, adding that the combination of these two factors results in the board having both educational and punitive goals. For example, he said a student found responsible for breaking a University rule might be given an educational project and a remitted suspension.

If a person's behavior negatively affects a certain community, "the community should decide" the repercussions, Commerford said.

External and Internal Judicial Systems

The University's judicial system is not modeled after the criminal court system, even though it often deals with alleged crimes that are prosecutable within the local courts.

Within the campus system, the alleged perpetrator or victim is not allowed representation, witnesses are not forced to attend the hearings, the proceedings are exempt from public scrutiny and there is only a preponderance of evidence required rather than a belief "beyond a reasonable doubt" to find the alleged perpetrator responsible for his or her actions.

If criminal charges are filed externally, the records and proceedings are available for public review and the punishments are more strict, ranging from fines to jail time.

The most serious punishment that can be delivered by the University's judicial system is permanent expulsion.

When a crime is committed that involves University students, whether the location of the action is on or off campus, the victim has the opportunity to file both internal and external charges.

The University has a "zero tolerance policy" for certain actions (such as use of controlled substances) where it considers itself the victim and automatically files criminal charges externally as well as internally. Most student victims choose to bring their case only before the judicial board or the sexual assault board, Commerford said.

Public Safety has the option to file internal charges within the University if the local police file charges against a student for criminal activities off campus. However, the local authorities can not prosecute an on-campus crime in the public courts unless a police officer witnessed the event firsthand or the victim agrees to press charges.

Even though they often don't take advantage of them, student victims are made aware of their options.

"Public Safety explains to students what their options are," Commerford said.

In fact, Vincent DeCerchio, director of public safety, said that "we encourage [students] to file criminal charges" as well as internal charges.

Commerford said that students tend to keep the charges within the University because of the potential "embarrassment involved" for both the victim and the alleged perpetrator. The victim does not want to "mar" the alleged perpetrator, he said, and in cases like sexual assault, the victim may only agree to press charges behind closed doors.

"Currently the system guarantees confidentiality" he explained.

The process seems to work, Commerford said, because "we don't see very many repeats."

The Buckley Debate

While the judicial board may be able to recognize the success of the system, other members of the campus community can not do so quite as easily. The results of the cases are published in *The Bucknellian* and *What's Happening*, but the hearings and the records resulting from the hearings are closed.

"The University has chosen to keep these private," Commerford said.

Holding closed proceedings is one of the biggest differences between the internal and external judicial systems.

Elias Abelson, general counsel, said that the Family Educational Rights and Privacy Act of 1974, commonly known as the Buckley Amendment, prevents the University from opening the judicial board hearings to the public.

The Buckley Amendment mandates that schools must have a student's permission to release his or her "education records." Abelson said that the judicial board records are a part of the "education records," and if released without permission, the school's federal funding may be cut.

A 1992 amendment to Buckley says that "education records" do not include "records maintained by a law enforcement unit of the educational agency or institution that were created by that law enforcement unit for the purpose of law enforcement."

Student press law advocates and other supporters of Buckley say that campus judicial systems are law enforcement agencies of their colleges and universities. This interpretation would make the hearings and records open to the public.

But Abelson claimed that the judicial board is not a law enforcement agency of the University, and the resulting records and hearings are still protected by Buckley.

"We can't do anything to enforce the law here," he said.

Abelson also argued that losing the confidentiality of the proceedings would discourage victims from coming forward with charges.

"We have found that protecting the privacy of students involved in the process encourages students to participate and to provide full disclosure," he said.

According to Commerford, this semester administrators have briefly discussed whether or not the hearings should be open. He said the confidentiality factor would be eliminated, but the community as a whole would benefit.

"The community would have more knowledge," Commerford said, and the impact would probably be great.

Simply publishing the results of the hearings has caused a "phenomenal" decrease in the number of fire alarms activated in the first year residence halls, he said.

Open hearings would not only make the community more aware of potential consequences, but it would also foster more trust in the system, proponents say. In addition, they argue that public scrutiny would help to ensure fair treatment by providing a check that is now missing.

The Student Judicial System

•According to the student handbook, the "University's student judicial system is organized and administered so as to assure that the standards of social responsibility and accountability to the community are maintained and that students themselves assume a central role in this endeavor."

•Charges can be filed to Gerald Commerford, associate dean of students and judicial administrator, by the victim and Vincent DeCerchio, director of public safety, separately or in conjunction with one another.

•There are two category of offenses.

Category I offenses, which Commerford distinguished as those offenses which are an "affront to the entire community," are heard before the judicial board. This category includes computer tampering, disorderly conduct, use of a controlled substance and hazing.

Category II offenses such as underage drinking have an individual meeting with an administrative hearing officer.

If the charges include both Category I and Category II offenses, such as an assault by a minor who has consumed alcohol, the case will appear before the judicial board.

•If it is appropriate for the charges, a judicial board hearing must occur within ten school days after charges are filed.

•The judicial board consists of four students, one administrator and two faculty. Three panels of 13 to 14 people rotate to fill the judicial board positions for each case.

•Commerford is present as the judicial administrator at each case to make sure the process runs smoothly. He does not have a vote in determining the responsibility of the alleged perpetrator.

•Members are elected to the board by their peers—the faculty is elected by the faculty, the administrator by the administrative forum and the students by Bucknell Student Government. Each member serves a two-year term, with half of the board turning over every year.

•The Sexual Assault Board is drawn from the members of the judicial board and has the same format, but it is a separate body from the judicial board. There is no rotation pattern established. The same seven board members are present for every case.

•Training for the newly elected judicial board members is the first week of the second semester and involves presentations by Commerford, Richard Chapman, dean of students, Elias Abelson, general counsel, and Kari Conrad, director of Housing and Residential Life. Members of the sexual assault board receive additional training, which includes presentations by representatives from psychological services and Janice Butler, director of the Women's Resource Center.

B.U. ranked 14th in study abroad

Bucknell was ranked 14th in the number of students studying abroad in 1994-5 among U.S. institutions offering Bachelors degrees, according to the Dec. 6 issue of the Chronicle of Higher Education.

Two-hundred and thirty Bucknell students studied abroad during 1994-5, which was 6.2 percent of total enrollment.

Lewisburg Chief dies

After a months-long battle with cancer, Lewisburg Police Chief Donald L. Heiter, 68, died on Monday in his home.

In accordance with the request of Lewisburg Mayor Michael Molesevich, all flags at public buildings, parks, institutions and private industries in Union, Snyder, Montour and Northumberland counties hung draped at half-staff on Tuesday.

"I know of no person who has given so much to his family, his country and his community," said Molesevich in a *Daily Item* interview.

Heiter had been with the Lewisburg Police Department since January of 1971. Previously he had served on both the Sunbury and Northumberland County Police Departments.

Heiter's funeral will be held at Rooke Chapel on Saturday at 10 a.m. Rev. Scott Zimmerer of Christ Evangelical Lutheran Church in Lewisburg will conduct the service.

BSG posts election results

The results of the Bucknell Student Government elections are as follows: Tracy Gray '99 — President, Mathew Bauer '99 — Vice President for Operations, Heather Murphy '98 — Vice President for Administration and Michelle McAllister '99 — Vice President for Finance.

These individuals will begin their year's term next semester.

Increased RA compensation would lead to benefits for both students and the University

They're mentors for first-year students. They help you with roommate problems and other conflicts. All are on call 24 hours. They are responsible for making sure University regulations are followed, even if those breaking the rules are friends and peers.

While some students don't give them enough credit, resident assistants do a lot. There are RAs who do not fulfill their duties, but many go way beyond the requirements. First-year RAs especially carry a huge load on their shoulders, as they are largely responsible for their residents' transition into college and for the creation of a supportive and comfortable hall atmosphere. Upper-class RAs must deal with the conflict of being a peer as well as sort of a "police" for their residents.

It's a job not many of us would want, no matter how much it paid. And it turns out that students who are presently RAs are probably not doing it for the money.

Resident assistants at Bucknell are only compensated with room, which amounts to about $2000 for 24-hours, seven-days-a-week job. That's it. No board, no tuition cuts, nothing.

By not giving RAs pay that is equal to the job, the University is not fully recognizing or respecting the work that they do.

It's no wonder, then, that some resident assistants shirk their responsibilities. If an employee doesn't feel respected, he or she is not going to perform his or her best. All RAs will be more willing to work harder if they feel appreciated, whether they took the job for the money or not.

More compensation would give RAs some reassurance that they are indeed necessary and invaluable. It would also draw a larger applicant pool to the positions, allowing for a more stringent selection process and ensuring that quality people will continue to become resident assistants.

If administrators would compare the University to frame-of-reference schools, they would discover that our resident assistants receive far less compensation. The University is always trying to stay competitive with frame-of-reference schools when it comes to endowment, athletic success and academic reputation. Why should RA compensation be any different?

Giving resident assistants special parking privileges only makes sense. In the case of certain emergencies such as a sick resident, an RA could act faster if his or her car was nearby.

Offering both room and board to resident assistants would also be a step in the right direction. These benefits are the norm as evident by the frame-of-reference schools.

It is time for the University to give back a little assistance to the students who help it.

LETTERS

Athletic scholarships do not pose a threat if academic integrity is maintained

TO THE EDITOR:

I am an alumnus who played basketball (class of '86) at Bucknell, and I am puzzled by the opinions expressed by the articles last week on the attempts by Holy Cross to implement scholarships.

During the time that I was at Bucknell, we were part of the East Coast Conference. Though Bucknell did not give scholarships, other schools in the conference did (Rider, Towson State, Drexel, St. Joe's, Temple, et al). Nonetheless, Bucknell won two regular season titles during the time I was there including the 24-5 1984 team. Upon our move to the Colonial/Patriot League, Bucknell still was able to win league championships, even while Holy Cross had scholarship athletes on their team. We can compete, and I have full confidence in Pat Flannery to compete if this were the situation today.

BUT, I personally believe that Bucknell should follow Holy Cross and probably Lehigh and give scholarships, as long as the academic integrity is maintained. Keeping the integrity of the University is important to all who care about Bucknell, but there is a pride associated with athletic competence as well.

Scholarships, in and of themselves, are not evil. I have confidence in the fact that Coach Flannery (an alumnus of Bucknell) and his staff will recruit scholar athletes who will maintain the Bucknell tradition both on the court and in the classroom. If Bucknell decides to give scholarships, I for one will support the decision.

As a sidenote, E.J. Crawford's article has a factual mistake. When Navy and David Robinson were challenging for the national championship, they were members of the Colonial Athletic Association (along with American, William and Mary, et al), not a member of the Colonial/Patriot League.

KEVIN R. BLACKWELL '86

Is recycling in danger of becoming outmoded?

TO THE EDITOR:

Recent changes in the dormitory recycling policies have prompted my concern regarding the recycling issue. My concern regards both the priorities of the staff making the cuts and the overall response of the students affected by the cuts. Could recycling gradually become an outmoded trend of the past at Bucknell?

Authorities have addressed the issue, presenting conflicting reasons for the cuts. One (obvious) concern is that the bins cause a fire hazard and that our personal safety will be compromised as we all madly rush out of the building, and pile up on each other in a frenzy into the bales of newspaper. Other reported motivations prompting the bin removal have been staff cuts, staff training issues, and budget cuts.

Although the rationale motivating and prioritizing the removal of the recycling bins is of great concern, of greater concern to me is student indifference and unwillingness to acclimate to the new conditions. Giving a cursory glance at any trash bin "littered" with newspapers and glistening bottles and cans confirms any doubt that recycling is on the decline in the dormitories. Apparently, lack of concern for recycling increases proportionally with flights of stairs one must travel to bring the recyclables to their destination. That cozy feeling that comes with "doing our part" comes a little bit easier when the bins are more accessible. The root of the problem, then, is student motivation. Students need not necessarily feel compassionate about their duties, but at least partially responsible and motivated as an individual to do one's part.

Bins on the corridors present a compromise between indifference and responsibility. Whether the University is wavering on the edge of bankruptcy, genuinely concerned about our fire safety, or simply cutting their supposed losses, the irrationally prioritized cuts may reflect an overall inherent disregard for recycling. Even if the bins are returned to the corridors, until we can collectively appreciate or at least acknowledge our individual responsibility, the underlying recycling problem remains unsolved.

ANNE HALGREN '97

OPINIONS

Bucknell's recycling policy is failing its customers

Students deserve the services for which they are paying, including the service of recycling

BY NICOLLE SPRAGUE

I recently finished reading a book by Michael Hammer and James Champy entitled "Re-engineering the Corporation: A Manifesto for Business Revolution." The purpose of the book is to outline ways in which businesses need to change in order to be competitive in the global market of the 21st century. Particular emphasis was given to the idea of centering business around the customer since, without customers there would be no business.

I cite this work because I've been frustrated lately with Bucknell's lack of attention in some areas to servicing the customer. Bucknell, after all, is a business. And as students who pay close to $28,000 per year in tuition and other fees, we are the customers. If Bucknell wishes to continue to compete in today's market, it's my impression that utmost priority should be given to serving its students.

In returning to Bucknell this semester, I noticed a lot of cuts in services that were made such as requiring direct deposits of employee checks, no longer giving out mailing labels at the post office and other little things which were special services to the customer.

I could name other inconveniences, but I would like to focus on one in particular that has infuriated me this entire semester as I have sat through Residential Hall Council (RHC) meetings and have been told that the issue has not yet been dealt with.

For those who are not informed (and I may not have my facts completely straight because students were not consulted about these changes before they occurred) the recycling bins which used to be located in the basement of each residential hall have been removed.

Members of the physical plant organization figured out that by removing these bins, $20,000 per year could be saved. So they decided to remove the bins and expect that students should bring their recycling outside to bins usually located in inconvenient places behind the dorms. At my particular dorm, Trax, the area where the bins are located is not lit and is pitch dark at night.

The location of the outside bins, however, is not the issue. The issue in my mind is that students (the customers) were not consulted or even advised that these changes were going to occur and furthermore, serving students did not seem to be a concern when the changes were made. Many students are upset about the changes especially because recycling has decreased substantially since the residential hall bins were removed.

A proposal to bring back the recycling in the dorms has been written by RHA and addressed to President Adams. I was told at the RHC meeting that the proposal was sent in late October. However, we have not heard any response on this issue. We have been bringing the issue up at meetings and with physical plant since the beginning of the semester and no action has been made. As a customer, I am frustrated.

It is my opinion that Bucknell, as a learning institution, should be setting an example and making recycling a priority. If cuts in physical plant were so necessary than I feel that cuts in such things as grounds-keeping should be made long before cuts in recycling.

It is a well-known fact that landfills around the country are filling up faster than we can find space for them, which makes recycling a necessity. It is the right thing to do.

The argument set by physical plant is that students should learn responsibility and take out their own recycling as they would in the real world.

Well that's fine, but in the real world, I will not be paying TWENTY EIGHT THOUSAND DOLLARS every year to live.

This argument by physical plant is another example of minimal attention given to serving the customer.

Physical plant has recently "granted" students the option of taking recycling into their own hands and starting programs on individual halls. This would require a student on each hall to be in charge of bringing out the recycling every week and making sure the bins do not overflow. If the bins start to overflow, physical plant will take away the hall's recycling "privileges." This practice of individual hall recycling was in place about six years ago and failed within a few years because students weren't able to keep the system going.

It is my opinion that this process should not be a student responsibility. Furthermore, the system has been tried before and *doesn't work*. If recycling and environmental awareness was a priority at Bucknell, this would not even be an issue.

Since the outside bins are often inaccessible and inconvenient, much less recycling is occurring this year than last. Bucknell students are paying enough money in tuition that we are entitled to the small service of recycling bins located in the residential halls.

If Bucknell cannot look at this issue from a humanitarian standpoint, then they should start looking at it from a business standpoint because by not serving the customer, Bucknell will not be able to remain competitive in today's market.

Who is responsible for ensuring that a college education remains affordable for everyone?

By Nicole Maestri
Bucknellian Staff Writer

A college education. Today we are all told we will go nowhere without one. It's the key to our future success as individuals and without it, we will never get ahead, never have a better life than our parents had and never attain the luxuries of life that we feel we need. But this college education, this necessity for success, is only available to those who can afford it.

The cost of college continues to steadily creep upward. Tuition when I entered Bucknell in September of 1993 was $17,620. Now, my senior year, tuition is $20,230. This figure does not include room, board and books which add on a few thousand more dollars, and it does not factor in any of the other expenses that we naturally incur as students, such as travel to and from Bucknell.

With a year of college easily costing more than many people's yearly salary, especially at a private institution, how can everyone possibly be expected to be able to afford a college education? According to a recent *Bucknell World* article, many of us simply cannot. Bucknell provides financial aid to 36 percent of this year's student body and when other forms of assistance such as federal and state loans are taken into account, the percentage of students receiving aid rises to 60. The majority of students at Bucknell are not affording this college education—they are receiving financial assistance to fund their college education.

So then the question needs to be asked: Whose responsibility is it to make sure everyone can receive a college education? Who is responsible for making sure that those 60 percent will receive the financial aid that they need? Whose job is it to make sure every high school senior currently searching for the college of their choice can do so based on the school's merits and not its price tag? We must ask ourselves where that responsibility lies.

Does this responsibility lie with the President? Now that Clinton has won the election, is he going to stick to his campaign promise of making 14 years of school—high school plus two years of higher education—the norm? Or was that just a campaign promise?

Or does the responsibility lie with the Federal Government? Should larger federal programs be established to supplement current federal aid that is being given to needy students? Does the Government need to allocate more of our tax dollars towards financial aid for college-bound students?

Could the responsibility lie at the state level? Should states be required to allow every in-state resident with sufficient academic skills acceptance into state schools, regardless of their financial background?

Perhaps our nation's private sector needs to take more responsibility. They are the ones who are searching for educated, skilled college graduates to fill their job openings. Should they be making larger and more consistent contributions to public and private universities which they expect will produce the caliber of student they are seeking to employ?

Maybe it is the responsibility of each individual college and university's administration to ensure everyone can afford a college education. To any student accepted, should they guarantee that student will be able to afford four years of school at that particular institution? Or should the administration raise tuition to increase the amount of money it can allocate to aid and force those students who do not qualify for aid to foot the bill for the others? Or should schools launch massive capital campaigns to increase the amount of dollars the school can hand out to its students?

But possibly the responsibility lies with each one of us as students, as individuals who are currently having the chance to receive this coveted college education. We are acquiring that vital college education which will give us skills to compete successfully in the "real world." Bucknell students are being given an extra boost, a type of safety net to protect us from failure in the job market and in our lives. Now that we are taken care of, are we going to blindly turn our backs on the ones who will come after us, assuming that if somehow we could find the means to afford a college education, so can they?

It is obvious this problem of responsibility raises a number of questions and it is even easier to pass off this responsibility. We can pass it off to the President, the Government, the states, the private sector, the administration. But in truth, we all need to take responsibility.

The cost of a college education keeps rising—look at Bucknell's yearly tuition increases—and what is anyone doing to stop it? Bucknell has no plans to stop its yearly tuition increase and neither do other institutions.

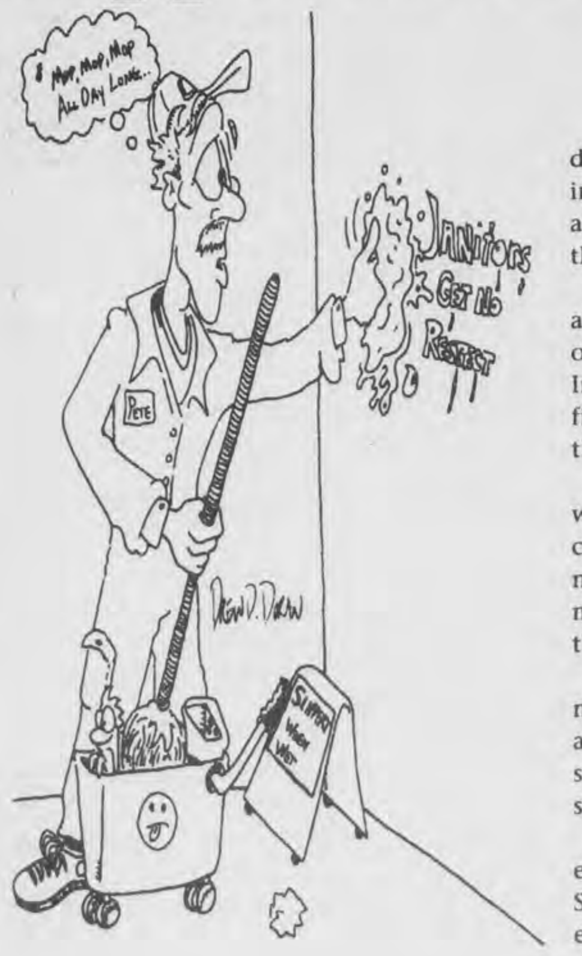
It is time to stop looking the other way, time to stop foolishly believing someone out there is going to fix this problem because sadly, "they" haven't and "they" probably never will. This responsibility will continually be passed off because no one wants it or wishes to make it a priority.

Education is not the President's top priority; the Government and the states constantly cry broke; the private sector is too far removed; and the administrations are left holding the burden. We, the students of today and the hopeful leaders of tomorrow, are the ones who are inheriting this responsibility.

Without asking for it or even wanting it, we have inherited the responsibility to make sure that those who come after us will have the same chances we have had to receive a college education.

It is up to us, no matter where we might end up or what we decide to do, to realize the importance of ensuring that higher education does not become a privilege for the few, but a right for all who wish to receive one.

Support staff deserves more support



By Ellen McWhorter
Bucknellian Staff Writer

On almost every visit to the Bison, I witness at least one pretentious college student act in a disgustingly inhumane manner toward the Bison staff. I have heard rude comments and seemingly unfounded accusations, but I most often see (and hear) unnecessarily inflated, egotistical attitudes. The problem does not lie solely within the parameters of the Bison. I have observed the same disrespect toward the custodians and cafeteria workers as well.

Because of the general emphasis on being "proper" here at Bucknell (that is, dress up to go to all classes and don't forget to put on a big smile), one might be inclined to expect to see an array of exquisite manners, the results of the instruction of this country's finest "polishing" schools. Instead, however, the opposite is true. Somewhere, for some reason, many of Bucknell's "refined" students have developed a holier-than-thou attitude, which commonly manifests itself in their treatment of the Bucknell Staff.

It is not strictly what IS spoken to the staff that I take offense to, but, more importantly, it is what is UNspoken. Often, when I see a staff member, whether he or she be a Bison worker or a cleaning person, speak to a student, the student will blatantly ignore the speaker, as if the staff member is not really a person at all. If witnessing a scene such as this was a rare occurrence, I might be able to write it off as someone being in a bad mood, or having a sore throat or something (a sore throat being the only truly acceptable excuse I can think of), but the fact is, it's not.

There is a definite trend toward rudeness on this campus, at least in regards to the staff members, and quite simply, there is no justification for it. The services which the staff provide are privileges and should be treated as such. It is not the god-given right of every Bucknell student to have some mute servant be at his or her beck and call, and certainly the staff members should not be asked to, nor should they be expected to do their jobs in this manner.

I am not advocating feigned "thank-you's" on the part of the students. I am questioning the extent to which some of us realize the importance of the services that the Bucknell Staff provide. Surely, once we recognize the indispensability of their work, the thank-you's will be genuine, even on the occasional day from hell that everyone invariably has.

Corporate king makers are wearing aluminum crowns

By Allison Price
Bucknellian Staff Writer

Recently at the National Conference of Catholic Bishops, the hierarchy of the Catholic Church reaffirmed their "Catholic Framework for Economic Life." The same document caused a storm in the 1980s, as it openly clashed with the then-new framework of a conviction-free, unrestrained free market put forth by the Reagan Administration.

The framework for the 1990s reaffirmed that as economic life must be subject to moral principles, people have rights to such basic necessities as food, shelter, education, health care, and a safe environment, as well as the right to just wages, safe working conditions, productive work and unionization. The document also reaffirmed government's essential role in insuring all of these provisions. Along with the declaration of rights, the bishops released a corresponding set of duties—to work, provide for one's family and contribute to society.

In the 1980s, the dark side to all of this was the document released by prominent Catholic lay people and many Republicans which was supported by a high-profile Catholic financier meant to counter the bishops' statement.

Does anyone truly realize what they were countering, what they were raising their objections against? The recent *New York Times* that ran the article detailing the reaffirmation, was riddled with ads for businesses. One for Dreyfus proclaimed, "In Life, You Are Either A Pawn Or A King. It's Good To Be King." Definitely.

These are the glossy promises and rewards, and Americans believe in these outcomes. It is essential that these rewards be real in order for the integrity of the U.S. and its economic system to be maintained. Therefore, as the ideals the National Conference of Catholic Bishops put forth come with a corresponding set of responsibilities, the king-makers must bear responsibilities of their own. Businesses are not above the law or even reproach.

Face it: Businesses pull many strings. Texaco Corporation is consumed by what may well prove to be the most profound, costly and disgusting case of racism in corporate America, but the "powers that be" immediately toss out the idea that those Americans who are sickened by the thought of spending any money on Texaco products are in the wrong.

They can manipulate boycotts into excuses for layoffs, or just scare the hell out of workers in the process. According to Texaco, how dare "they" (who, by the way, pay for corporate salaries) not come around and consume like good little citizens after a round of public relation dancing. One positive development in the wake of the Texaco atrocity is that many American citizens are outraged in the face of ugly evidence that confirms many's worst fears. It is not just hysterical conspiracy theory - it is on tape.

On tape are Texaco officials tossing around words that can't be dismissed under the guise of political correctness gone amok and the same officials plotting to destroy evidence. Can you imagine the public's reaction to the same accusations being lodged against a corporate giant without that kind of empirical evidence, or even what never gets caught on tape?

Also in the news is the case involving the Avis corporation wherein locations refused African American customers on a whim. A class action lawsuit has been filed against Avis. However, how do we confront what occurs at all rental locations or even the rot in people's hearts and minds which impacts judgment?

These are all crises in faith of one kind or another not solely belonging to the bishops—crises in business, politics, government and ultimately human goodness. The need for conspiracy theory has become a vast coping mechanism to make this all just a bit easier—explaining the inexplicable. As the American bishops and theologians everywhere strive to give a face to whatever we each conceive as God, the myriad of breakdowns in terms of economic justice work to illustrate the face of evil as well.

In an age of cynicism, it seems to have grown obvious that we must reject cynicism in terms of accepting the human capacity for evil as well as good. There is responsibility even in the inexplicable.

Accept Hillary for who she is, a woman of the 1990s

By Nora Daniels
Bucknellian Staff Writer

Bill and Hillary Clinton have been in the White House for four years, and recently were reelected to spend four more there, so it's time for America to accept Hillary for who she is, a woman of the 1990s.

Granted, Hillary Clinton is not like some First Ladies of the past, but Bill is not like some presidents of the past, either. She doesn't wear pearls or preside over a hoard of grandchildren like Barbara Bush did, and her husband has won a second term of office, unlike Barbara's husband George.

Hillary has been active in everything from healthcare to welfare, despite criticism from Democrats and Republicans alike. She has spoken out on women's issues in China and been the object of legal scrutiny over real estate, yet she continues to hold her head high and with utmost confidence. Even inflammatory bumper stickers, like one that read "Impeach Hillary" have not fazed the First Lady of the 1990s.

Don't forget, though, that Hillary also knows how to keep silent. She supports her husband, and is careful to not overstep her bounds, while being herself: an educated woman of the 1990s. Hillary knows how to express herself in a number of different ways: as a woman, as a wife, as a mother, as a citizen, as a person. Indeed, she says what she means, and she knows when to say what she wants heard.

And yet she is bashed, criticized and scoffed at repeatedly by her fellow Americans. Men and women alike complain about her power, her confidence and even her hairstyles. The public has decided that they can live with Bill Clinton as President for another term, yet the Hillary-booing continues.

What does America want, a quiet, subservient First Wife? Or how about one who is uninvolved and apathetic? Those roles are not what America is, or at least what it should be. This country is home of free speech, equality and mutual respect.

Shouldn't Hillary Clinton, as the First Lady, but also as a woman, a wife, a mother, a citizen and a person receive what we all believe in? Yes, she's of the 1990s, but so are all of us.

Debating the state of Bucknell's Greek System:

"Kappa Kappa Glamma" unfairly attacks the Greek System and perpetuates its stereotypes

By Beth Haggerty
Bucknellian Staff Writer

In the wake of the controversial article "Kappa Kappa Glamma," which ran in the November issue of *Allure* magazine, Greek communities on campuses all over the country are once again being forced to defend themselves.

Trying to dispel the myths that so often perpetuate fraternity and sorority life is not an easy task, as any Greek can tell you. If only those who so harshly criticize the system would take a broader look at it, I am sure their opinions would change.

The article focused on sorority rush at the College of William and Mary, but did contain one very damaging statement toward our very own Bucknell University. Author Bob Ickes writes "The faculty at Bucknell University in Lewisburg, Pennsylvania, recently decided to disband all sororities and fraternities, citing their racism, sexism, elitism, and anti-intellectualism."

The article does not mention the fact that the Greek system is still alive and well at Bucknell nor does it give examples to explain the alleged racism, anti-intellectualism, etc. I could spend the rest of this article attacking this "vote" which will never come to fruition, but instead, I will focus on the positive aspects of Greek life and why sororities are not places where, as Ickes says, women are "stupid, vain, frigid, [and] prepping for first-wives clubs." For it is these kinds of stereotypes that keep the Greeks in ancient times.

But for those who believe that the Greek system should be abandoned, I ask them to look around at the world. Nothing is perfect. And yes, even the Greek system has its flaws. But does this mean that for every group, club, and institution that has some flaw, we must remove it from society? Well, then we will be getting rid of the public education system, modern medicine, and even the government. They all have some sort of problem. But as with the Greek system, these institutions do provide positive aspects that cannot be ignored.

One of the most commonly expressed sentiments about the Greek system is that members of fraternities and sororities form lifelong bonds of friendship that will never be broken. Anyone involved will tell you that this is undeniably true, and after all, that is what one of the main goals of a social organization should be.

But beyond this, the Greek system offers valuable opportunities for leadership which students, especially women, would probably not have without the Greeks. Additionally, fraternities and sororities all have charities, or philanthropies, that they work hard to raise funds for during each year.

Even Ickes concedes that "over the past five years, as much as $250,000 [has been raised] for a variety of worthy causes" at William and Mary.

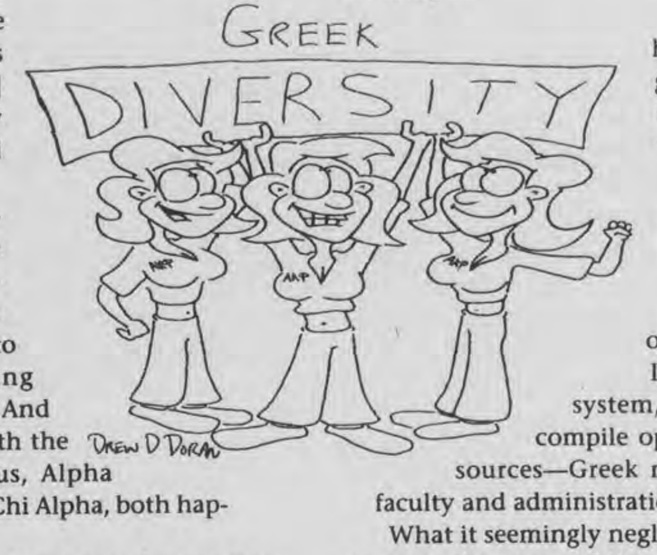
As for the "anti-intellectualism," Greeks have certain minimum academic requirements that they must fulfill in order to remain in good standing with their organizations. And the two organizations with the highest GPAs on campus, Alpha Chi Omega and Lambda Chi Alpha, both happen to be Greek.

Finally, being Greek allows you the opportunity to meet people you might otherwise never have known and gives you the valuable chance to make connections and network for your future career, which is ever important in today's increasingly competitive job market.

Lastly, just as athletic teams and academic clubs have requirements for membership, so do fraternities and sororities. Except that you'll never make the basketball team by being "nice" and "fun to hang out with." Fraternities and sororities are a place where you are liked simply for being you, not for what your special skills and talents include and what you can do for others with them, which does make it different from other organizations... it makes it more accepting.

To all first-year students and anyone else interested, please read "Kappa Kappa Glamma" in *Allure* magazine. Ickes paints a picture of stupid, vain girls only interested in money.

You will see precisely what sorority life is NOT about. Then go out and meet some women on this campus who are Greek, and you will see that they are anything but this archaic stereotype but instead are bright, enthusiastic, career-oriented women who are racing for their futures.



Bucknell World *article glosses over true state of Greek System; ignores those not directly involved*

By Thomas Nguyen
Bucknellian Staff Writer

"A model system for other colleges to emulate... Light years ahead of everyone else," says the recent issue of *Bucknell World* regarding the Greek system on campus.

Until now, my policy has always been to avoid getting publicly mixed up in the internal politics of the Bucknell bubble.

But after reading the publication praising Bucknell's Greek system, I felt compelled to make an exception just this once.

In defense of the Greek system, the article managed to compile opinions from a variety of sources—Greek members, Greek alumni, faculty and administration.

What it seemingly neglected to consider, however, were the views of those students outside of the Greek organizations who are nonetheless very much affected by it.

As one of these students, I'd like offer my position regarding Bucknell's existing Greek system. In its ugliest form, the system directly goes against the objectives central to this institution—to offer students a conducive environment for intellectual growth and academic success. Bucknell's Greek system is unquestionably the greatest agent for conformity on campus, and is elitist and sexist to the core.

There were two issues addressed in the article that I would like to elaborate upon.

One of these issues is alcohol use on campus. It is true that fraternity parties can no longer provide alcohol, and that students are permitted to bring their own, limited to six beers a piece. Special areas should be marked off for students 21 and over, who must provide identification and wear a special wristband to drink.

The article conveys these regulations explicitly. However, it failed to mention whether or not records show that fraternities are consistently complying with these regulations.

I've talked to a number of students who frequent the fraternities, all of whom say that rarely are these rules ever followed completely. I had an underage friend divulge to me that she goes to the fraternities because the alcohol there is free. (So much for the wristbands.)

Taking such accounts into consideration, one must question whether or not the self-policing Greek Monitoring Teams are really affective.

But is any of this really shocking? Am I revealing things not already common knowledge to the vast majority of the student population?

University regulations aside, consider for a moment last year's House Party Weekend. Being on campus those few days offers one a unique perspective on the alcohol abuse problem at this university and the role of the Greek system in contributing to its existence.

It is somewhat amusing to see hundreds of students walking to and from the fraternity houses and across campus carrying their stylish mugs of alcohol and to be there when your hall-mates return to the dorm drenched from head to toe with beer. This is the portrait of the Greek system as a great medium for alcohol abuse.

There is also the issue of the Greek system being, as someone put it, "too white" and not diverse enough. There are those who claim that the small number of minority students within the Greek system is merely representative of the small minority student population. Joyce Bylander offered other possible contributing factors.

"They (minority students) already feel their numbers are small, and there's a sense of dilution, a sense that they won't have time for minority organizations too... I have had black students say that once they've joined a fraternity or sorority they feel cut off from the black student community because that community feels like they've sold out."

I agree with Dean Bylander that such things contribute to the small number of minority students who decide to become Greek. But there is another significant reason why I, as a minority student myself, have no interest in joining Bucknell's Greek system.

For me personally, joining a Greek fraternity would result in a conflict of interests. There are certain aspects of Greek culture that will forever remain forever foreign to me. And to be completely honest, as a minority student, I would find it hypocritical to associate with an organization which in its selection discriminates on the basis of sex, and physical appearance.

U. S. News' number game can't measure quality of education

By Amy Younggren
Bucknellian Staff Writer

In a recent edition of *U.S. News & World Report*, Bucknell University was rated 31st when compared to the Nation's Top Liberal Arts Schools in the country. Bucknell's Engineering program was also ranked fifth in the nation as compared to all other schools without Ph.D. programs. Much controversy has currently been raised as to the validity of these surveys despite their consistent use throughout the past 10 years. Critics of the *U.S. News* survey complain that "they give a false sense of precision, unfairly comparing one college to another in a way more suitable for comparing computers or other consumer products." The concern here is that colleges and universities are making decisions regarding their institution in order to improve ratings, regardless of whether or not this is to the students' best interest.

In my opinion, the real reason to be concerned as to the effectiveness of these surveys in helping students and families choose the best college for their undergraduate experience is that the ratings only measure intangible facts and statistics which should only be used as a starting point for perspectives. The real deciding factor for most of us came from a gut feeling we had when we set foot on our dream campus, or when we had an experience with a current student or professor that made us feel that we found a place where we would fit in.

The numbers game that *U.S. News* plays to finally land the ratings which influence students and their families all across the country are based on statistical facts and information which have little to do with the actual quality of education that one receives at each particular university.

The position of *U.S. News* is that information regarding the purchase of simple household appliances is freely available and therefore information about colleges should also be readily available. It is true that the financial commitment to a college or university is much more serious than that of a simple household appliance. That is one reason these tests are somewhat misleading. The information for these surveys is collected in a way that limits the potential of each school as a whole. The tests focus the added scores of six different categories: Selectivity, Faculty Resources, Financial Resources, Retention, Value Added and Alumni giving. The Value Added score is determined by taking the average SAT or ACT score of its students and comparing this to its educational expenditures per student. This process seems to exclude so many important factors that are vital to choosing an environment and a college that will be home for at least four years.

The other issue for many universities is that they don't want people making decisions regarding where they wish to go to school based on these reports. Five of the universities that *U.S. News* requested information from, denied them this solicitation. However, this proved to be no solution because *U.S. News* used many of its other sources to acquire the information needed to follow through with the ratings of these schools. They contacted the U.S. Department of Education, the American Association of University Professors, the Council for Aid to Education, and the NCAA. Obviously, there is no way for universities to dodge *U.S. News* in order to be excluded from these ratings. Therefore, whether or not they seem fair or reasonable, these tests seem to be something that are here to stay and something which universities will have to find means to contend with.

...information regarding the purchase of simple household appliances is freely available and therefore information about colleges should also be readily available.

Election editorial lacked in-depth analysis of BSG candidates

By Toby Anderson
Bucknellian Staff Writer

Well, what did you think of the elections? No, not Clinton and Dole, I mean BSG elections. Oh, you didn't realize we had elections? I'm sorry, I guess it was a silly question. However, in spite of the fact that most of you reading this probably don't even know we had elections, candidate debates, or other election-related events, I will, of course tell you my opinion of them.

One of the first publicity events was the *Bucknellian's* BSG Elections Special and editorial. In order to get an idea of what level of analysis the *Bucknellian* applied to the candidates' positions, it is necessary to compare it with last year's Election coverage. The actual candidate page wasn't much different, but the editorial was vastly different.

Last year the staff of the *Bucknellian* asked in-depth questions about the experience, knowledge, and platforms of the candidates. The editorial was very critical of every single candidate for every position, much in the tradition of good journalism. It takes a critical and cynical eye for the facts to enlighten the community about choices they need to make. This doesn't mean that after a good editorial, people who are enlightened will vote for the candidate endorsed; it means that the readers will walk away from that editorial not only informed of the positive aspects of the candidates, in general terms and relative to each other, but also of the NEGATIVE aspects of those candidates. Pointing out deficiencies in a candidate or his or her position does not mean mudslinging, it is just being critical. That is where this year's election editorial was sorely deficient.

I have nothing against the *Bucknellian* or any of its staff, I am in fact a part of it. However, I have a big problem with its editorial. It lacked any in-depth analysis of the candidates' knowledge, experience, or platforms.

The editorial failed to discover the most basic and simple fact that only ONE of the candidates for ANY position was up to date (had read it in the last year) on the CONSTITUTION (the basic governing document of BSG). Only one other had ever read the whole constitution before at all, even though she wasn't familiar enough with it to answer some basic questions. That is a sorry statement for the investigative work of the editorial's authors.

Furthermore, the experience of many of the candidates' was severely lacking, a fact that was lightly glossed over by the editorial. The lack of experience was made clear mainly by the fact that the candidates that had to compete for their positions had little to no familiarity with the positions they were running for. This was uncovered by the incisive questions asked by the old BSG officers at the candidates' debate, and the candidates inability to answer those questions in anything other than general and superficial terms.

The lack of any identifiable agenda, or platform for any of the candidates other than the presidential candidate, is sad. It is amazing how easily we let people take control of a $400,000 budget without having a clue as to what they plan to do with that budget. None of the candidates, other than Tracey Gray and Matt Bauer had one specific idea of what they would implement, if elected. Even the most visionless politicians have to have some publicized idea of what they are going to do if elected. That's the least we demand from our public officials. If we are each contributing $120/year to that $400,000 budget then we should demand at least that as well. How could an election editorial fail to cover this glaring flaw in the candidates' positions?

Many of these facts were uncovered during the candidates' debate, held the night before the elections. All it took was about 15 minutes to think up some barely thought provoking questions, and all of the above was discovered. Amazing what some critical journalism can accomplish, isn't it?

It is fortunate that we have an experienced president at the helm. His upbeat attitude and determination to implement change is refreshing and long overdue. After working with him for a year I can say that he would have definitely been the best candidate for the job, even if he had an opponent. (Although, the fact that he didn't have an opponent is another sad comment on our awareness of our governing body.) The other elected officers may not have the experience or knowledge that would best enable them to fulfill their duties, but they have a lot of potential to excel at the jobs they are taking over. However, their success is reliant upon their willingness to work with the old officers to make up for their lack of knowledge and experience. As for the lack of a platform, the BSG officers should spend some time over break brainstorming about things to accomplish during their brief year in office.

I just want to reiterate that this opinions piece is in no way a personal attack on any of the editors or candidates. I know most of them and I like them all. I am just offering a dissenting, and critical (if harsh) opinion.

Caught in the Web: Holiday and shopping sites

BY CURRAN FILER
Bucknellian Staff Columnist

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. A lot of it is stupid but not all of it. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category 4465CALLME4465: Shopping and Holiday sites

¡happy 3 holidays!

Happy 3 Holidays!!!!
`http://www.harpercollins.com/kids/holi.htm`

This site is run by the nice people at Harper-Collins publishing. It provides us with an overview of the three biggest, end of the year, cultural holidays. It leaves out celebrations of the new year however. But as far as Hanukkah, Christmas, and Kwanzaa it does pretty well. The summaries seem pretty complete, and there's even an audio clip from a book, a list of other appropriate Harper-Collins books, and a recipe for each holiday. If you want to know something about a holiday you don't really know this is a good start.

Santa's Castle
`http://www.santascastle.com/`

I thought this was a cheesy little Christmas site, but it had a few nice extras. There are gifts that you can order, which I gather is the whole point of the site. But the more interesting feature is the "letter from Santa" which you can order for a loved one... presumably a young relative or child.

The Hanukkah Homeboy Rap Song
`http://home.earthlink.net/~higent/hhlyrics.html`

This strange little page is simply the lyrics to a Hanukkah rap by Doc Mo Shé. Obviously this person feels strongly about Hanukkah! Even though I'm not Jewish, I found myself getting into it a little bit, but I didn't really understand all the references. If you do understand all the words, you might find it kind of cute.

KWANZAA
Information
Center

The Kwanzaa Information Center
`http://www.melanet.com/melanet/kwanzaa/`

If you want a better, more in depth explanation of Kwanzaa this site seems to have it. It includes the purpose of Kwanzaa, background, symbols, and activities. There was a lot I didn't know, and I thought it was pretty interesting. Kwanzaa is a very interesting holiday which doesn't get the kind of exposure it deserves, so visit this site soon.

The Cool Gift Homepage
`http://www.coolgift.com/`

If you've ever wanted your picture on a plate, this place will do it for you. In fact, they will put it on a big golf ball, or a ceramic soccer ball, or even a vase. Very classy!

Dynamic Designs Homepage
`http://www.mugs-n-more.com/`

Another place that puts your picture on a gift, but this place will do t-shirts, and key rings. And if you need a really special, personalized gift, made just for that special someone, Dynamic Designs will create made to order poems of any kind for you. But, I don't know how good they are at it.

Let's Glow!
Gifts that Glow Catalog

Paradigm Enterprises Homepage
`http://www.smartnet.net/~inmanc/index.html`

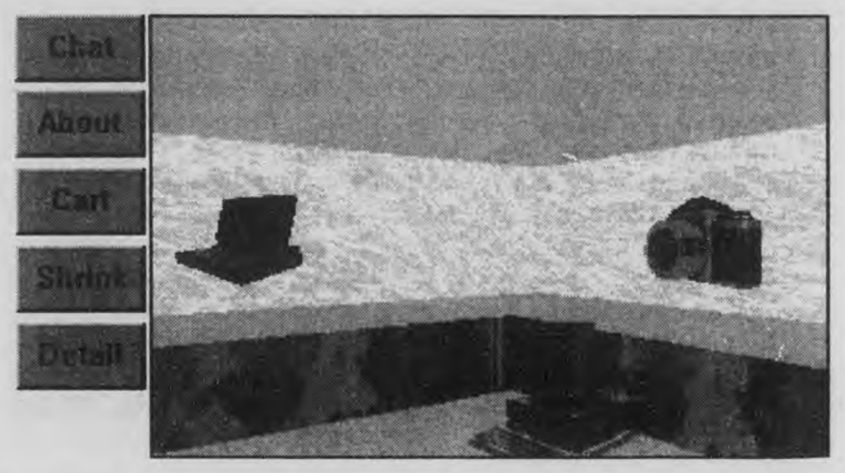
This company sells only gifts that glow in the dark, and this is their web site. You can browse their online catalog of glow in the dark items. Everything from things to stick on your wall, to glow in the dark squid, to a 10-inch glow in the dark Virgin Mary statue.

iQVC SHOP

Unfortunately, all the free yo-yos are gone.

The iQVC Homepage
`http://www.qvc.com/`

Do you like to order stuff from QVC, the home shopping network, but you don't have enough time to watch TV? iQVC may be the answer. The is the online version of the home shopping channel. They sell all kinds of things, from jewelry, to kitchen appliances, to cheesy Christmas figurines. It's just like the TV channel, except there aren't any time limits!



As you walk around in the 3D Mall, you can enter shops and look at the products. If you want more information on a particular item, all you have to do is click on that item and a web page will load telling you the price and some more information.

The 3dMall
`http://www.3dmall.com/`

If you don't like the crowds in the malls during the holiday season, you can walk around in the 3D Mall shopping for the gifts you need. The 3d Mall is basically like any other mall, you walk into stores, look at the products, and if you like what you see, you can throw it in your "cart" and order everything when you are finished. Unfortunately, it requires a one megabyte Plug-In for Netscape 3.0, you can't view this site with any other browser. By the way, it's impossible to shoplift from this mall.

University receives Dupont Merck grant

The University's chemistry department has received a grant of $9,000 from the DuPont Merck Pharmaceutical Company. It will be used in support of Bucknell's summer master of arts program for high school chemistry teachers.

Chair of the chemistry department Hans Veening views the program as an opportunity for high school teachers to gain first hand experience with chemistry.

"A goal is to help the teachers see themselves as chemists who teach at the high school level rather than as teachers who happen to teach chemistry," Veening said.

The program was initiated in 1993. It is comprised of three summers of work including graduate courses in organic, physical and analytical chemistry, research under a faculty mentor, and a thesis.

Seven local teachers have participated so far.

James Poechmann of Williamsport High School graduated in January 1996. Five other teachers are in the process of writing their theses. These teachers include Kristen Bechtel of Gettysburg High School, Leslie Hepler of Millersburg High School, Frederick Leuschner of Central Dauphin High School, Deborah Slattery of Danville Area High School, and John Traver of Line Mountain High School.

The array is simply an addition table with the numbers bordering the table removed. The method for selecting five numbers from the array ensures that each number bordering the original table is added in once, so the magic total is the sum of these 10 numbers, 84.

Make your own version of the square. It can be smaller, or larger. The skill comes in trying to make all the numbers in the array different without the numbers becoming too large. Can you devise a 5 x 5 square with these properties where the magic total is less than 84?

Professor shows versatility with physics, law degree

BY ALISON DUGAN
Bucknellian Staff Writer

Not many people have the ability to claim both a Ph.D. in physics as well as a degree in law, but Steven Becker, associate professor of physics, is one of them.

Majoring in mathematics and physics, Becker obtained his undergraduate degree from Miami University in Ohio and later attended graduate school at Rutgers University.

Becker began his teaching career at the University in 1969. Choosing Bucknell because of its reputation as a "good, small liberal arts school," Becker was able to focus on teaching rather than research.

Although focusing mainly on teaching, Becker also does research as a theoretical physicist. Defining his work as "making up theories," the only equipment that Becker uses is "a pad and a pen," he said.

Becker recently published an article concerning the theoretical effects of containment on a single atom when confined to a small cavity. An experimental physicist would then carry out the experiment to see if the predictions were correct.

In addition to his ventures within the realm of teaching, three years ago Becker decided to tackle law school. Describing himself as "always being interested in law, even since I was very young," Becker has been active in the Lewisburg Prison Project for 20 years.

The Lewisburg Prison Project is a prisoners' rights organization that assists inmates in issues of confinement at the federal penitentiary. Many of these cases involve representation at parole hearings, problems with litigation and penitentiary officials.

Becker also received experience working on criminal cases with friends, but because he was not a lawyer, he was not allowed to speak in court. He felt that it was "too frustrating" to remain silent in the courtroom, so Becker decided that the best way to remedy the situation was to enter law school.

For three years, Becker attended classes on weeknights and Saturdays at Widener University in Philadelphia while maintaining a full time teaching position at the University.

Interning for the public defender's office in Snyder and Union counties, Becker gained valuable experience in criminal defense.

Although he knew that he would become a criminal defense lawyer, Becker also interned at the district attorney's office in Union county. He wanted to gain first-hand experience of how, as he puts it, "the bad guys" operate. Becker sought to get as much experience under his belt as possible.

Passing the bar exam in November, Becker now works as a part-time public defender in Union county. Working mainly with criminal cases and civil litigations, he appears in court about one day a week.

Becker chose criminal representation in an effort to better protect the rights of individuals in society. He feels that in order to protect these rights, "the weakest members of society, which are essentially those accused of crimes" must also be protected. In this manner it is possible to ensure the rights of everyone.

So that he will be able to gain more experience and have more time available to practice law, Becker will be on reduced teaching time for the next three semesters at the University.

When asked what his plans entail for the future beyond that, he admits that he's not quite sure.

Jonah Half—The Bucknellian

Steven Becker, associate professor of physics, has a Ph.D in physics and a law degree. He works both as a physicist and a public defender

With the onset of winter, influenza vaccine is suggested

FLU From page 1

indirect contact. Direct contact usually includes infected people sneezing or coughing into the air and spreading the virus that way.

Indirect contact comes when infected people use towels, telephones, and other items that can house the flu virus. Other people touch these items after the infected individuals and contract the virus that way.

Winter is an especially bad time for the flu. Resistance is down because of the many other illnesses, and cold, dry air helps to perpetuate the virus. Low humidity dries out respiratory passages, increasing susceptibility to the flu virus. One precaution is to use a cool humidifier to keep the relative humidity indoors at a maximum.

During the height of flu season it is recommended to wash hands as often as possible and avoid sharing cups and other items involving close contact. College students suffer a high risk since housing involves a large number of people living in close contact with each other.

A good key to preventing the flu is to keep resistance high through a healthy diet. Well balanced meals consisting of extra fruits and juices help to keep the body moist. Enough rest is also a key to prevention. If possible, avoid stress because it too lowers resistance.

Don't do anything that will damage the respiratory passages and further decrease resistance to virus attack. Smoking is a particular hazard.

As part of a plan for prevention, flu shots are available at the University's Student Health Center. The vaccine does not cause the flu because the injection is made from the dead virus that causes the illness.

Administration of the dead virus lets the body produce antibodies to the virus without the adverse effects that are caused from a live virus.

There are possible complications with the virus however. Most people suffer no harmful side effects of the vaccine but they can experience tenderness at the injection site for a few days. Fever, chills, headache, and muscle aches are also common for the first 48 hours after injection.

There are other, more severe side effects that are rare but possible. Such possibilities include an illness known as Guillain-Barre syndrome, which entails temporary and sometimes permanent paralysis.

Precaution should be taken before administration of the flu vaccine is given. Children under the age of three should be taken to a physician before receiving the vaccine.

Those with specific allergies to eggs or chicken should seek the advice of a physician regarding alternatives to the vaccine. The vaccine is an inactivated virus that is grown in a fertilized hen's egg. For this reason, those with egg allergy should not be vaccinated.

In addition, elderly people or those with a fever or other illness should seek doctoral advice before administration as well.

All reactions should be reported to a doctor.

Each vaccine only protects against a few viruses. As viruses change, the vaccine is rendered ineffective. New vaccines are always being developed.

Once a vaccine is administered, it takes about 2 weeks to become effective but it lasts for less than a year. Since the virus is constantly changing and the vaccine lasts for less than a year, it is necessary to get an annual vaccination.

One important thing to remember about the flu vaccine is that it doesn't work for everyone. Sometimes it only prevents severe cases of the flu.

There is no known cure for the flu, but research is being done to find more effective methods of flu treatment and prevention. In addition, research continues on the origin, structure , and function of viruses.

Pro Pinball
by Interplay

Pro Pinball is the most realistic pinball game I have ever played. It has SVGA graphics and decent sound. Its biggest fault is that for the $40 it costs, you only get one table. Nice game for the student with a little time between classes.

Pros: Best pinball game ever, great graphics, good sound, easy to sit down and play for a few minutes

Cons: Only one table for the price

Rating: 75% For forty dollars, I want some variety.

Monty Python - The Quest for the Holy Grail
by 7th Level

If you are a Monty Python fan than this game is a must. The entire game is a confusing plethora of Monty Python humor. Burn the witch, battle the black knight, and spank the virgin are few of the sub games that come with it. The CD also contains never before performed King Brian the Wild Scene as well as lots of movie clips. If you aren't a die-hard Monty Python fan then be careful. The Quest for the Holy Grail will make your head hurt.

Pros: Dripping with Monty Python humor, fun little sub-games, lots of sound, and movie clips

Cons: Dripping with Monty Python humor (the weak beware), confusing if you don't understand the humor

Rating: 80% You have to be a big Python fan to enjoy this one.

Brain Teasers

A Kind Of Magic

Choose any number from the array, say 39. Now choose a second number not in the same row or column as the first, say 24. Next choose a third number in a different row or column from those already chosen, say 10. Choose a fourth number, again in a different row or column from those already chosen, say 8. This leaves only one number, 3, in a row or column not already used. The five numbers chosen add up to 84. Now the fascinating property of this array of numbers is that, no matter how you make your five choices, following the same rules, their total will always be 84.

Try it for yourself then try to explain why it works!

Caught in the Web: Holiday and shopping sites

By Curran Filer
Bucknellian Staff Columnist

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. A lot of it is stupid but not all of it. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category 4465CALLME4465: Shopping and Holiday sites

¡happy 3 holidays!

Happy 3 Holidays!!!!
`http://www.harpercollins.com/kids/holi.htm`

This site is run by the nice people at Harper-Collins publishing. It provides us with an overview of the three biggest, end of the year, cultural holidays. It leaves out celebrations of the new year however. But as far as Hanukkah, Christmas, and Kwanzaa it does pretty well. The summaries seem pretty complete, and there's even an audio clip from a book, a list of other appropriate Harper-Collins books, and a recipe for each holiday. If you want to know something about a holiday you don't really know this is a good start.

Santa's Castle
`http://www.santascastle.com/`

I thought this was a cheesy little Christmas site, but it had a few nice extras. There are gifts that you can order, which I gather is the whole point of the site. But the more interesting feature is the "letter from Santa" which you can order for a loved one... presumably a young relative or child.

The Hanukkah Homeboy Rap Song
`http://home.earthlink.net/~higent/hhlyrics.html`

This strange little page is simply the lyrics to a Hanukkah rap by Doc Mo Shé. Obviously this person feels strongly about Hanukkah! Even though I'm not Jewish, I found myself getting into it a little bit, but I didn't really understand all the references. If you do understand all the words, you might find it kind of cute.

KWANZAA
Information
Center

The Kwanzaa Information Center
`http://www.melanet.com/melanet/kwanzaa/`

If you want a better, more in depth explanation of Kwanzaa this site seems to have it. It includes the purpose of Kwanzaa, background, symbols, and activities. There was a lot I didn't know, and I thought it was pretty interesting. Kwanzaa is a very interesting holiday which doesn't get the kind of exposure it deserves, so visit this site soon.

The Cool Gift Homepage
`http://www.coolgift.com/`

If you've ever wanted your picture on a plate, this place will do it for you. In fact, they will put it on a big golf ball, or a ceramic soccer ball, or even a vase. Very classy!

Dynamic Designs Homepage
`http://www.mugs-n-more.com/`

Another place that puts your picture on a gift, but this place will do t-shirts, and key rings. And if you need a really special, personalized gift, made just for that special someone, Dynamic Designs will create made to order poems of any kind for you. But, I don't know how good they are at it.

Let's Glow! Gifts that Glow Catalog

Paradigm Enterprises Homepage
`http://www.smartnet.net/~inmanc/index.html`

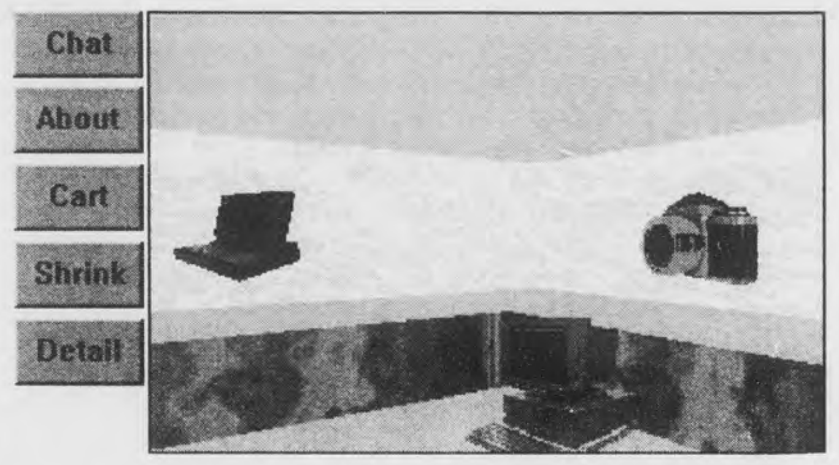
This company sells only gifts that glow in the dark, and this is their web site. You can browse their online catalog of glow in the dark items. Everything from things to stick on your wall, to glow in the dark squid, to a 10-inch glow in the dark Virgin Mary statue.

iQVC SHOP

Unfortunately, all the free yo-yos are gone.

The iQVC Homepage
`http://www.qvc.com/`

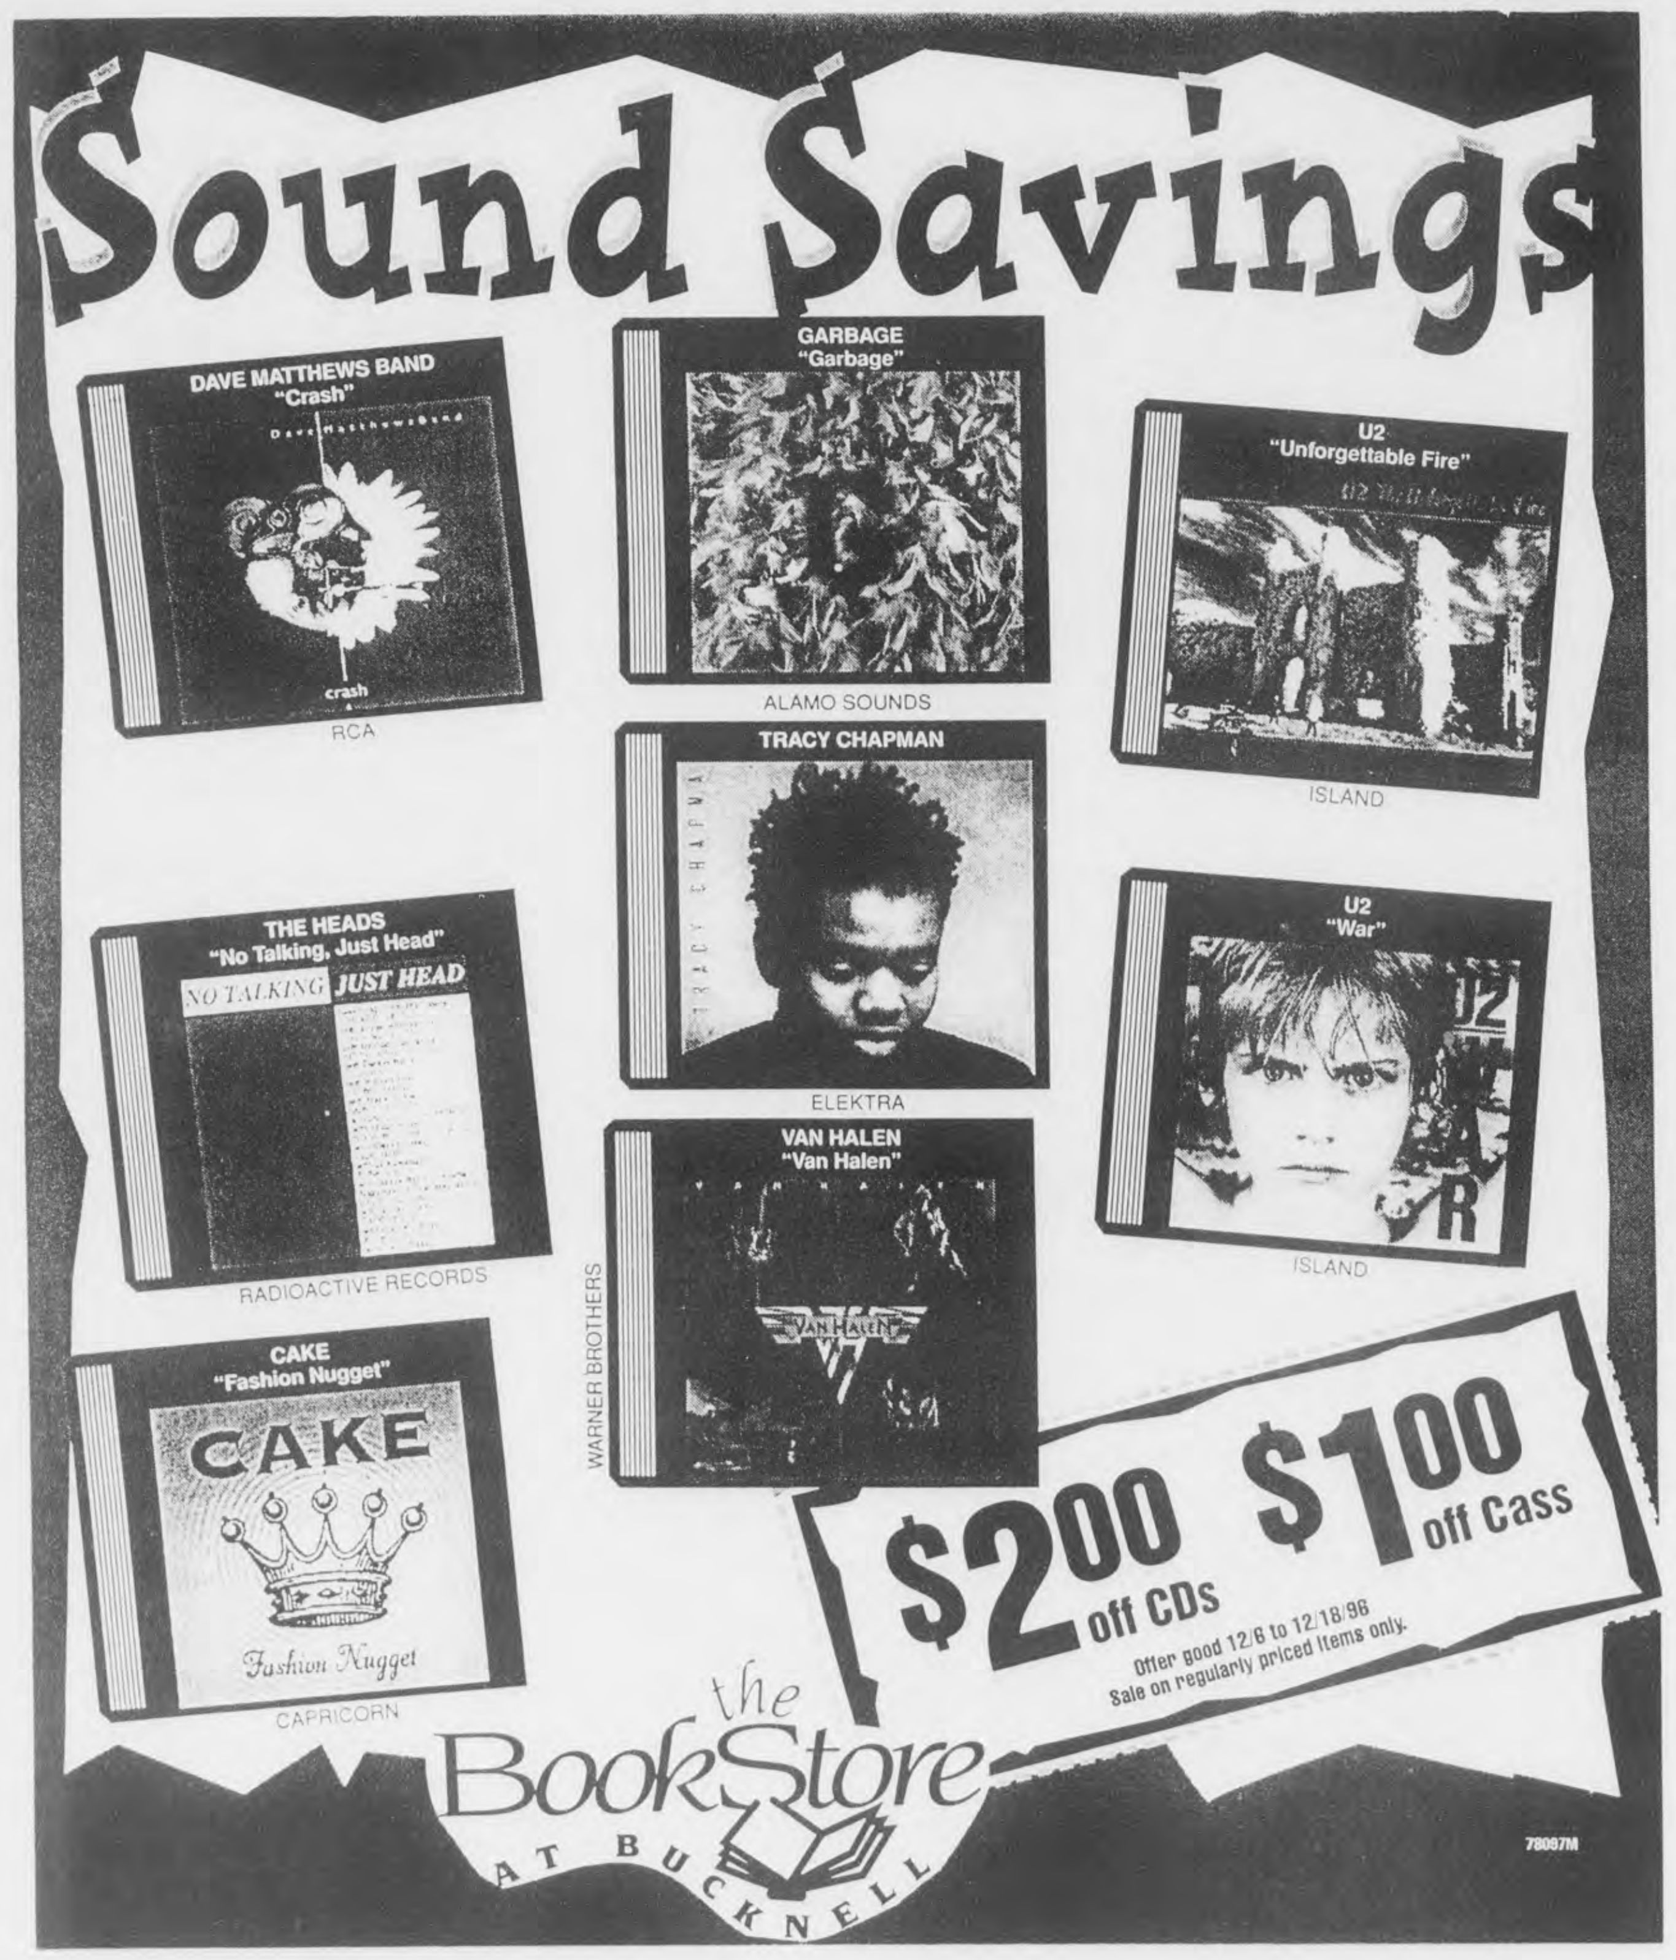
Do you like to order stuff from QVC, the home shopping network, but you don't have enough time to watch TV? iQVC may be the answer. The is the online version of the home shopping channel. They sell all kinds of things, from jewelry, to kitchen appliances, to cheesy Christmas figurines. It's just like the TV channel, except there aren't any time limits!



As you walk around in the 3D Mall, you can enter shops and look at the products. If you want more information on a particular item, all you have to do is click on that item and a web page will load telling you the price and some more information.

The 3dMall
`http://www.3dmall.com/`

If you don't like the crowds in the malls during the holiday season, you can walk around in the 3D Mall shopping for the gifts you need. The 3d Mall is basically like any other mall, you walk into stores, look at the products, and if you like what you see, you can throw it in your "cart" and order everything when you are finished. Unfortunately, it requires a one megabyte Plug-In for Netscape 3.0, you can't view this site with any other browser. By the way, it's impossible to shoplift from this mall.



University receives Dupont Merck grant

The University's chemistry department has received a grant of $9,000 from the DuPont Merck Pharmaceutical Company. It will be used in support of Bucknell's summer master of arts program for high school chemistry teachers.

Chair of the chemistry department Hans Veening views the program as an opportunity for high school teachers to gain first hand experience with chemistry.

"A goal is to help the teachers see themselves as chemists who teach at the high school level rather than as teachers who happen to teach chemistry," Veening said.

The program was initiated in 1993. It is comprised of three summers of work including graduate courses in organic, physical and analytical chemistry, research under a faculty mentor, and a thesis.

Seven local teachers have participated so far.

James Poechmann of Williamsport High School graduated in January 1996. Five other teachers are in the process of writing their theses. These teachers include Kristen Bechtel of Gettysburg High School, Leslie Hepler of Millersburg High School, Frederick Leuschner of Central Dauphin High School, Deborah Slattery of Danville Area High School, and John Traver of Line Mountain High School.

Holiday music and a candlelight celebration arrives

This long standing tradition brings the sense of the Christmas season along with international music and Bible readings

BY ANNE PUTNAM

Bucknellian Staff Writer

What is the one thing that most Bucknellians associate with at Christmas time? That's right, Candlelight Services are upon us.

To add to the flavor of this year's program, Dr. William A. Payn, Director of Choral Studies has added an international twist on the Christmas music. French, Puerto Rican, and Spanish melodies, among others will be performed at the service. A special highlight includes a percussion ensemble for African Noel featuring four sixth grade boys of the Greenwood Friends School.

Although some new cultural pieces will be performed, this year's performance does not divert from long standing tradition. Payn includes an original, Variations on "Mit Freuden Zart," in the prelude followed by the processional march of the choir. Also included in the standard ceremony are readings from the Bible given by faculty and student participants. The Candlelight Service is part of the ongoing chapel program as Reverend Ian B. Oliver, University Chaplain, will assist the service.

The campus candlelight service marks the beginning of the enchanting Christmas season

Cara Mickelsen—The Bucknellian

Payn directs the Rooke Chapel Bell Choir during one of their rehearsals for the Candlelight Services

The end to this spectacular event is the "ringing in of Christmas." This tradition uses over 30 ringers who surround the chapel to welcome in the holiday season.

Veteran Candlelight performer Matt Jesick'98 highlighted the importance of the ceremony as the "official start of the Bucknell Christmas season."

This year's changes are subtle in that new music will be introduced and a larger choir is to perform. David Zettlemoyer'97 added the most moving aspect of the ceremony is the singing of Silent Night by candlelight. And Liz Asti'00 cannot help but be excited to participate for her first year as all admit that the ceremony sets the mood for the holiday season.

Approximately forty years ago, William McRae founded the Rooke Chapel Choir and began the Candlelight Service of Lessons and Carols. His involvement was only with the choir and later, he created music ensembles.

Payn began his involvement in the services in 1982 and started each Candlelight Service with just the Rooke Chapel Choir which has always been the traditional start. The following year he introduced a new ensemble to the University, the bell choir. Under his direction, the bell choir has been included in the Candlelight Services for the 13 years since their inception in 1983.

The Candlelight Services became so popular among students that the Rooke Chapel could not accommodate the growing numbers. Thus, yearly services have increased to three in order to avoid the overcrowded aisles from the abundant demand.

The first performance is on Friday, Dec. 6 at 7:30 p.m. Additional services are being held on Sunday Dec. 8 and Tuesday Dec. 10 to ring in the Christmas season. All ticket holders should know that the doors will open at 6:45 until a 7:15 cut off. Please bring non-perishable food donations if you are attending so that the items can be used to contribute to the area's needy.

Kristin Feldner—The Bucknellian

The Concert Chorale sets a delightful melodic mood by candlelight

Orchestra to perform an evening of wonderful music

The Bucknell Orchestra will perform several selections including: Beethoven's Overture to the Opera Fidelio, Rimsky-Korsakiv's Mlada Suite, selections from West Side Story by Leonard Bernstein and Britten's Serenade for tenor, horn and strings on Saturday, December 7 at 8 p.m. in the Weis Center

Dance Company graces the stage performing to celebrate the Sesquicentennial

DAVID CARPENTER

Bucknellian Staff Writer

Bringing together choreographers from across the country, a new lighting system with almost two hundred new lights, and a special piece in honor of Bucknell's Sesquicentennial celebration, the Bucknell Dance Company graces the University Theatre's stage, in Coleman Hall, with their fall dance performance on Friday and Saturday, December 6 and 7 at 8:00 p.m.

This year the Dance Company has incorporated important events happening on campus into their performance this weekend. One of them is the focus semester on the Hispanic World. Two choreographers were brought in to direct dance pieces that reflected that area of study. Funded by the Bucknell Association for the Arts, guest performers Allyson Green and Marlon Barrios Solano were here on campus earlier this semester to help instruct students. Danna Frangione, Director of Dance Technique and Theory, was instrumental in bringing these talented people to campus. "They were only here for a week." Ms. Frangione remarked. "They went to all the classes and taught in their specialties and during that time, they set a piece for this performance." The focus semester, according to Frangione, gives the school access to primary artists working in the world today.

Green, originally from El Paso Texas, received a BFA from Washington University in New York. Her choreography has been presented in many countries outside of the U.S. Marlon Solano is psychologist from Venezuela who also teaches dance workshops in New York.

Also working with the Dance Company this semester is choreographer and dancer Karen Shiel. She is replacing the regular faculty member, Er-Dong Hu, who is on leave this semester. "Karen was chosen from a national search." Frangione said "She brings with her specialty in pointe work ballet, modern pointe work and techo." Shiel received her B.S. in Ballet Performance from the University of California at Irvine and has danced professionally for the Ballet Theatre of Boston.

Dancers Jennifer Gordon '98 and Kristy Kuhn '00 rehearse "Now in this Hour," a piece in honor of the Sesquicentennial celebration

The second important aspect of the performance is that the Bucknell Dance Company is celebrating in this performance is a special piece that has been commissioned for the Sesquicentennial celebration. With the help of the Department of Theatre and Dance, Bucknell Student Government, The Bucknell Association of the Arts and the Sesquicentennial Committee, a famous Alumni of Bucknell, Danny Buraczeski '70 was chosen to choreograph a piece with music from another famous Alum, Robert Lowery.

Lowery was the valedictorian of the class of 1854, when the school was still called the University of Lewisburg. Lowery gained his fame as a hymn writer. He copyrighted nearly 500 hundred hymns including the well known song, Shall We Gather at the River. Now with the arrangement of some of Lowery's hymns by William Boswell, a faculty member here at the University, Buraczeski challenges his dancers to look their best.

> *"We all work together as a collective as facilitators. We create an environment that makes everybody feel free to contribute."*
> *—Danna Frangione*
> *Director of Dance Technique and Theory*

Dancing is not the entire event at this performance. Set to the tune of a song by Tori Amos, The Department of Theatre and Dance is taking the opportunity to show off the new lights and lighting system that has just been added this year. The light show is designed by Ted Ozimek who is this year's Assistant Technical Director for the theatre. "The new lights are more efficient," Ozimek said. "They are brighter using less power which is important because we can use more because we use less power." The light hang for this show is 263 lights. This the most that ever has been hung in the University Theatre. "We are doing it to demonstrate the level of professionalism that we can now achieve in the department," Ozimek says.

According to Frangione, "Dance Company here at Bucknell is unique. In most colleges there are usually two companies. The faculty and students here have combined them. We each have our own function." This gives the University's company a special way of producing its performances. "We all work together as a collective as facilitators. We create an environment that makes everybody feel free to contribute." Frangione adds that when she first came to Bucknell in 1987, the Dance Company already existed, and things were similar to how they run today, "The company was student run. Auditions and rehearsals still are the same as they ran 10 years ago. Students officers still choose which students are admitted to the company, and student choreographers decide who gets into the pieces. The faculty does not have a vote. My role was to develop the good things that were already here." Frangione was hired and became a member of the Dance Company like any other student, but with a few special qualities. "What a teacher got them was access and facilities. The students need a teacher to start a curriculum and be able to get money from the school to expand. The talent and the drive was already here." This choreographer and dancer does not stay exclusively at the University. She works here while school is in session; in the summer, she travels to Asia where she works with a performing arts high school.

With a safer, newer lighting system, three pieces that have been choreographed by visiting artists will demonstrate the strength and talent that's characteristic in the Dance Company.

Mandy Walker '99, Kristy Kuhn '00 (back), Kristin Dite '97 (front), and Carla Christy '98 perform "Structural Paralysis."

The performance this weekend promises a mix of student, faculty, alumnus and professionally directed pieces along with an amazing light show.

The Dance Company performance will start at 8 p.m. on Friday and Saturday, December 6 and 7 in Coleman Hall Theater. Tickets are $5.

Movie Reviews

BY CHRIS NICHOLS
BUCKNELLIAN STAFF COLUMNIST

Star Trek: First Contact ****
Starring Patrick Stewart, Brent Spiner, James Cromwell, Michael Dorn, Alice Krige and Jonathan Frakes
Directed by Jonathan Frakes

In this latest installment of the Star Trek movies (# 8 for those of you who have lost count) the most frightening enemy the cast of the Star Trek: The Next Generation has had to face is once again making its way toward Earth. Building on, but not dependent on episodes from the TV series, *ST: First Contact* is not only interesting to old fans of the show but also the 'fair weather fan' who's been interested in the series without endless dedication. Likewise, if you've never made it to a Star Trek film, now might be a good time to start. The script is effective in delivering a good story with lots of interesting sub-plots. What remains so interesting about Star Trek is that it's not simply a "science fiction" story but also, a film. In order to be successful, it must look at humans and human nature. In *ST: FC* humans are faced with the possibility of losing all that it means to be human to the Borg, an intergalactic locust, that uses each new species it encounters as a resource for new technology and natural resource. The Borg overpowers its prey technologically and using the bodies of its victims for new 'soldiers.' The actors perform excellently in their roles that they had a couple of seasons to perfect. I found the plotline that was taking place on earth to be less interesting than the one up in space aboard the new sleek Enterprise. I was a little disappointed to see the Prime Directive so quickly abandoned, I mean really, it's one thing when Kirk does it in pursuit of a woman (See *ST IV: The Voyage Home*), but they could have tried a little harder in this movie. It's good to see though that without the characters of the old movies, quality Star Trek can continue on the big screen.

Mars Attacks! **** (in Theaters on December 13th)
Starring Jack Nicholson (x2), Annette Bening, Martin Short, Piers Brosnan, Tom Jones
Directed by Tim Burton

Let's face it, a movie based on a card series (Topps "Mars Attacks!" cards I think were out in the 60s, definitely re-released a couple of years ago) is arguably as silly as basing a movie on a song, or even a "gasp!" a video game. But if anyone can pull it off, Tim Burton is the man. (Didn't he managed to convert a comic into a mildly successful film, wasn't it called Batman or something?). Anyway, this is a darn good movie. With some really interesting effects combining real people with cartoonish Computer Generated Characters (the aliens) courtesy of Industrial Light and Magic, the movie works well as a comedy. Still this movie sort of defies explanation. It seems sci-fi like, but its really much more of a comedy. We've seen many movies with aliens invading, but this one definitely gives it a different twist. Almost like going back and watching one of those cheesy horror movies (see *The Blob* (1958)), this movie functions as a comedy. The aliens attack and the audience laughs. But the goal is still to get rid of them. Hands down this movie features one of the most original and hilarious solutions to alien invasion that I've ever seen. By then end of the movie, you'll definitely feel entertained if not enlightened on the most important question at hand: "Is there intelligent life on Earth."

Cooking with Katie

HOLIDAY KISSES

Tromping amidst the crunch of a snow-kissed slope, with blue spruce offering those "dare to sled" obstacles, the thought of cookies and hot chocolate enters ones chilled, childhood-seeking mind. With the twinkle of candles and white lights illustrating the charm of the holiday spirit, comes the comfort of chocolate indulgences. There's nothing like a day intimate with your "flying saucer" and the frozen December landscape, trembling, as a shrill wintry wind whips its word on your festive red cheeks. And when the day ends, and mittens and wool hats are replaced by flannels and fleece, cookie time arrives. These sweethearts are reminiscent of my sledding days, their intensity derived from the Hershey's Kiss that crowns their glory.

Ingredients:

- 1/2 cup sugar
- 1/2 cup packed brown sugar
- 1/2 cup creamy peanut butter
- 1/2 cup butter
- 1/2 cup shortening
- 1 egg
- 1 1/2 cup flour
- 1/2 t baking soda
- 1/2 t baking powder
- sugar
- Hershey's Kisses

1. Cream butter and shortening with sugars and peanut butter.
2. Beat in egg.
3. Sift together flour, baking soda and baking powder, and stir into above.
4. Shape into 1 inch balls, rolling in sugar.
5. Bake at 375° for 8-10 minutes, or until golden brown but still soft.
6. Immediately press one KISS into each cookie, allowing to cool completely.

KISS cookies may be stored for several days in airtight cookie tins, although nothing compares to immediate munching. The intensity of chocolate and holiday sweetness collide here to suggest an indulgence worthy of that extra frolic through snowflake woods.

Hanukkah: It's legal to light candles now

By Ari-David Brown

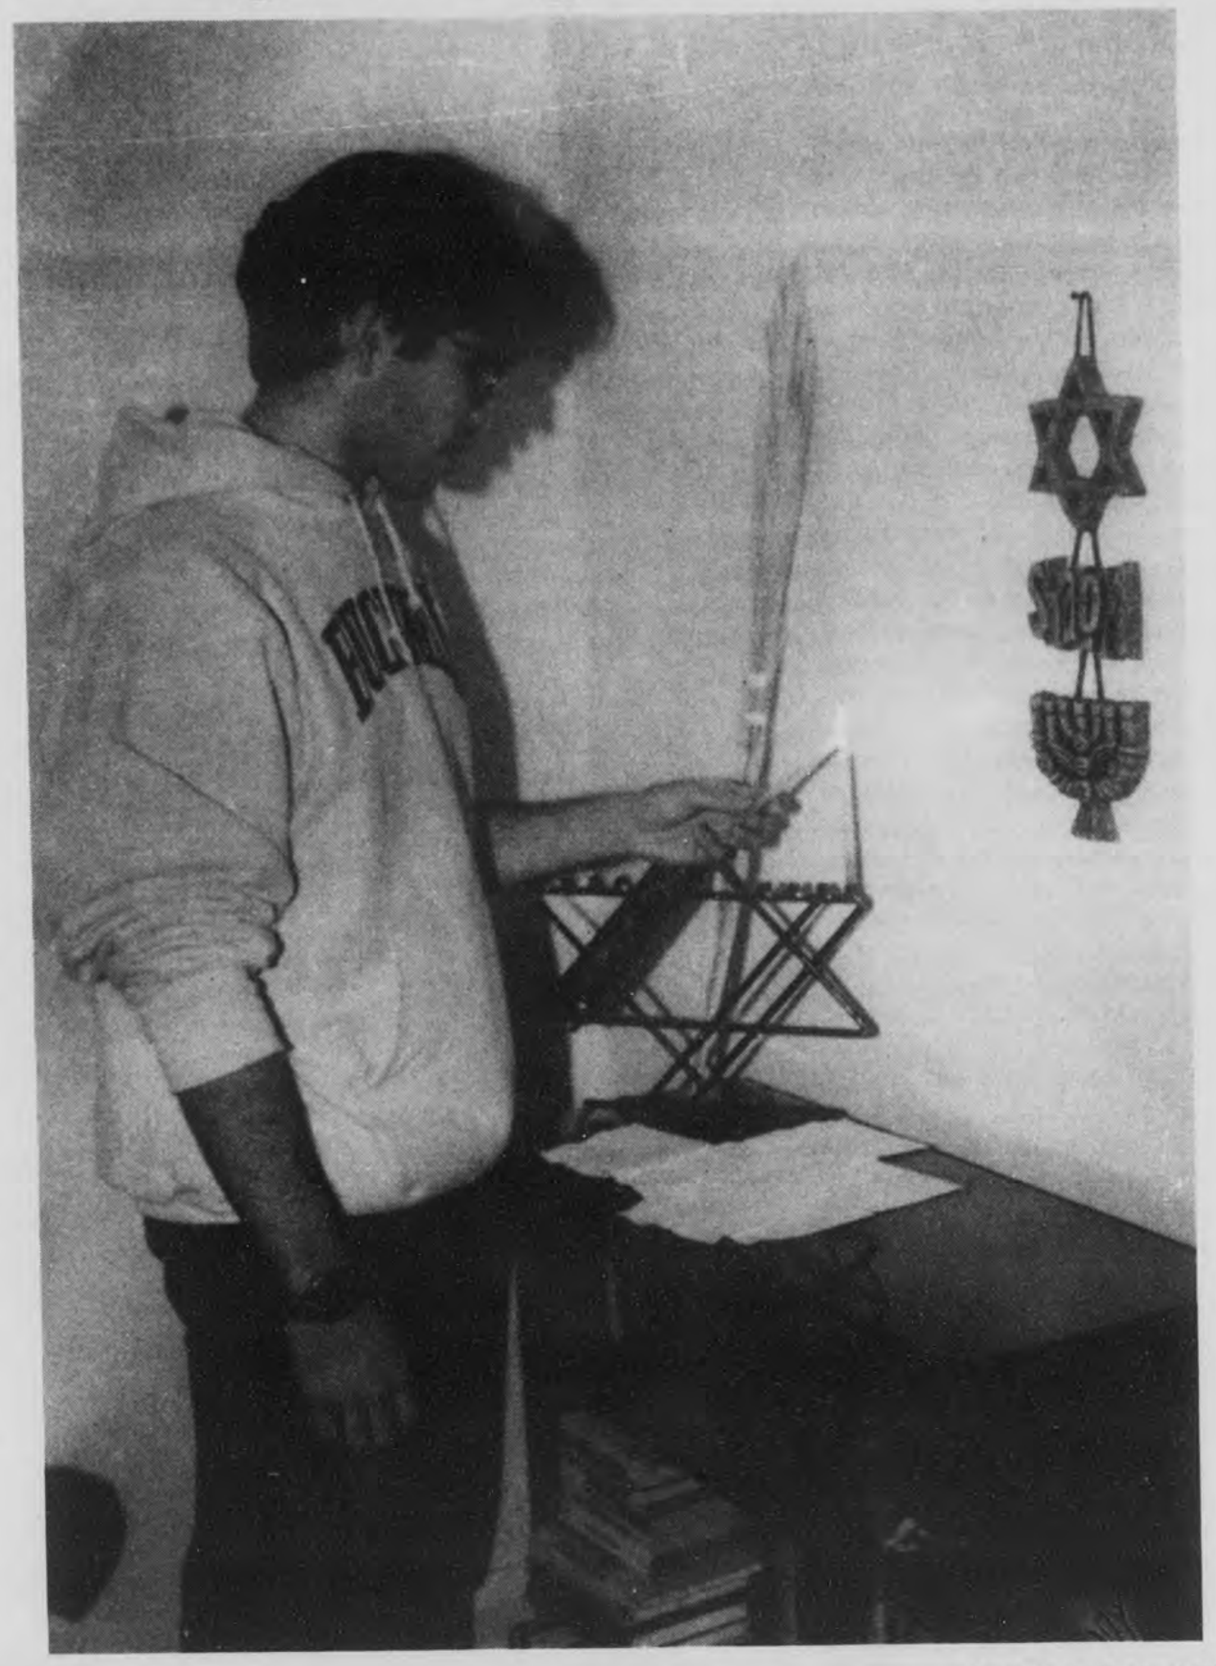
This Thursday night marks the first day of the most familiar Jewish holiday to Americans, Hanukkah.

Hillel, the Jewish student organization on campus, is celebrating Hanukkah by having a candle-lighting each of the eight nights at a different location. The events will begin with a party on Thursday, Dec. 5 in Smith 300 at 7 p.m.

Hanukkah is the holiday which celebrates the beginning of the winter and the faith and determination in people to survive in a harsh world. It originated around 300 b.c.e. during the Greek invasion of Judea. It is said that there was only one day's worth of oil to light candles in the temple. By some sort of "miracle," however, the oil lasted seven days, and the Israelites succeeded in driving out the Greeks.

Hanukkah has recently taken on a more commercialized meaning, being a Jewish equivalent of Christmas. As a result, many people, especially in the US, know about Hanukkah.

Many students probably recognize some symbols associated with Hanukkah. The *menorah* is a candelabra with seven candles for the seven days of the holiday. The *sevivon*, also know as a *draydle* (the Yiddish equivalent), is a spinning-top. It has four sides which represent the four seasons. *Sevivons* are used to play games during Hanukkah.



Right: Mike Walters '00 lights one of eight candles in celebration of Hanukkah. Hillel is sponsoring a candle-lighting ceremony beginning on Thursday in Smith 300 at 7 p.m.

Jonah Half—The Bucknellian

Budget holiday gifts for creative types

By Ted Burnes

Bucknellian Staff Writer

So, you're starting to get a little worried about your holiday shopping.

With exams rearing their ugly head and the stress of the season, you just don't have the time to trek to the nearest mall and deal with the crowds and the hassle. And with no declining balance left and only a dime to your name, you're not exactly financially stable this time of year either. Not to mention all the people you have to buy for: your friends from home, your family, and you really wanted to give a gift to that special someone.

Starting to stress yet? Don't fret, my fellow Bucknellians. Here are some great gift ideas that are sure to bring smiles to your friends and a sigh of relief from your wallet:

BE CREATIVE AT THE CRAFT CENTER!

The 7th Street Craft Center, located behind the Cafe in the Niche, is the perfect solution to your gift-giving stress.

"A lot of students bring home gifts that they've made; parents love them," says Molly Ross, the director of the Craft Center, whose been working there for 25 years.

At the Center, you can purchase already-made jewelry, candles, or pottery, or make things yourselves. A small clay bowl costs only about $1.00 to make, and jewelry can be made with beads for as low as $2.00 a pair. This is inexpensive compared to how much you'd pay in a department store.

Candles can be made in all shapes and sizes. Ross showed a variety of candles that can be made, including a cone-shaped candle with multi-colored wax!

And, just in time for the holiday season, the Center will be having a Craft Fair. The fair will run on Friday, December 6, from 1-5 and Saturday, December 7, from 11-5; hundreds of hand-made crafts will be sold for great prices. The Craft Center is a great way to give an inexpensive gift from the heart. 7th Street Craft Center Hours: Monday-Thursday 11-5 and 6:30-10, Friday 1-5, Saturday 11-5. **AVERAGE COST: $2.50**

GIVE A MEMORY THEY'LL ALWAYS CHERISH!

If you're short on cash, consider giving something small yet personal.

Friends and family love framed pictures, photo collages, or home-made photo albums. Find a snapshot of you and some friends and blow up the picture at the Bookstore's photo center. Many recent photo envelopes from the Bookstore have coupons for free enlargements.

The Bookstore, as well as many shops in Lewisburg, have inexpensive frames in all sizes, including collage frames that hold anywhere from three to 13 pictures.

A shopkeeper in Lewisburg gave a few helpful hints in framing. "Picture frames are relatively inexpensive. For the best buy, try getting a wooden frame instead of plastic, and use pictures with good lighting. The use of a caption and colored construction paper make a collage stand out more. Don't be afraid to go wild and be creative."

Using pictures, poetic words, and some creativity, you can create a gift that your friends and family will like forever. **AVERAGE COST: $6.50**

USE YOUR LOCATION TO YOUR ADVANTAGE!

The Susquehanna Valley is full of little towns with thrift shops and refugee stores. If you or a friend have a car, take a short trip and hit the shops.

Shops like Salvation Army and Goodwill are chock full of inexpensive jewelry, glassware, small furniture, and clothing... just buy them and clean them a little bit! Some soap and water works magic on even the grimiest objects, making them look like they came from a snazzy department store.

An old Waterford Crystal vase was marked down to $16.50 at Salvation Army. After cleaning it, it looked like new. A similar vase was seen at Hecht's Department Store for $49.95! **AVERAGE COST: $10.50**

GIVE THE GIFT OF YOUR TALENTS!

Having trouble deciding what to give your parents or your brothers or sisters this holiday? Give them yourself!

Think of chores and tasks you can do for your family, and make "coupons" using paper and markers. Maybe you can baby-sit, cook a meal, wash a car, take a younger sibling to the mall, clean the garage, or go grocery shopping.

For each coupon, simply write: "This coupon entitles the beholder to_______"; then decorate the coupon; one way to decorate is to make each coupon look like a dollar. Maybe they'll thank you for all the time and money you're saving them! **AVERAGE COST: $2.00**

These are just some ideas to get your holiday season started—whether you just have one gift to give or a whole family to shop for, creativity can substitute for cash this time of year. Don't forget that the Bookstore has a lot of great gifts as well, and can get you started on some of the activities listed above. Good luck, and have a great holiday!

Christkindl Market celebrates Christmas in the old German way

By Micah Schweizer

Bucknellian Staff Columnist

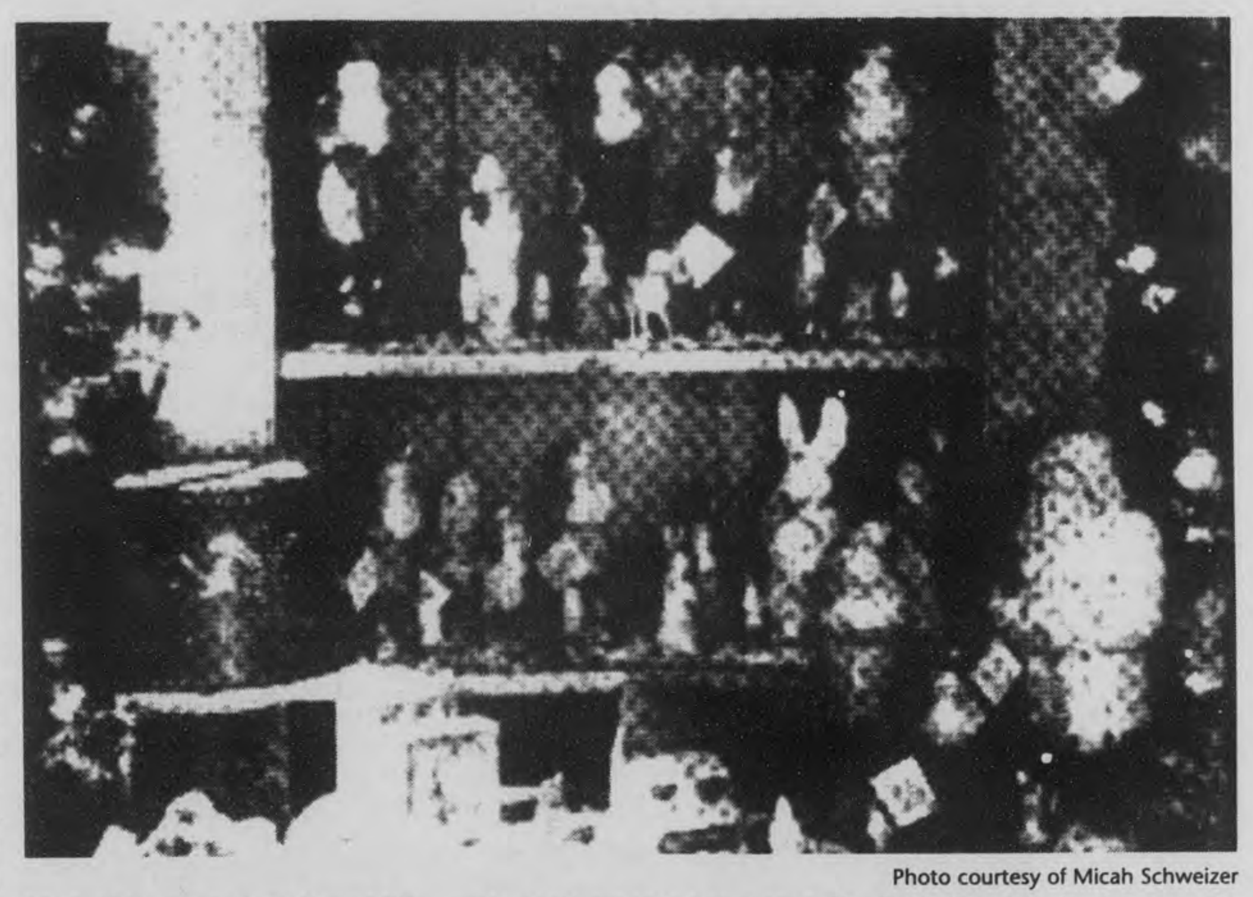

Photo courtesy of Micah Schweizer

For a chance to escape the end of semester crunch and to experience the German heritage of this area, consider a visit to Mifflinburg's Christkindl Market.

Dating back to over six centuries ago, the first holiday market was held in Munich, Germany. Mifflinburg's own Christkindl Market, modeled after the world-famous Christmas market in Nürnberg, Germany, offers a wide variety of German influenced food and crafts.

Entertainment has been expanded for this eighth annual market, with acts varying from juggling to brass ensembles to chamber music to the University's own Silhouettes and Two Past Midnight.

The specially constructed Christmas village, home to the outdoor crafts, sights, and food, is located on the 400 block of Market Street between 4th and 5th Streets, one block south of Route 45. Some notable sights in this miniature village are life-size German nutcrackers and a 30-foot-tall Christmas pyramid which presents a rotating Christmas scene powered by a candle driven fan.

In years gone by I remember having also seen Christmas stable scenes complete with live animals. Unfortunately, some of the animals don't get into the theatrical spirit and end up taxing the actors herding abilities, but it does serve to bring a smile to onlookers' faces.

This year, festivities won't be limited only to the out of doors, but will also take place in nearby churches, giving visitors a chance to get out of the cold and enjoy some music or a meal.

The Christkindl Market will be held Thursday, Dec. 5 through Saturday, Dec. 7 at the following times: Thursday 5 p.m. to 9 p.m., Friday from 1 p.m. to 9 p.m., and Saturday from 10 a.m. to 7:30 p.m. These three days are packed with entertainment, guaranteeing a visitor to a show of one kind or another, while crafts, food, and cold air are available at all times.

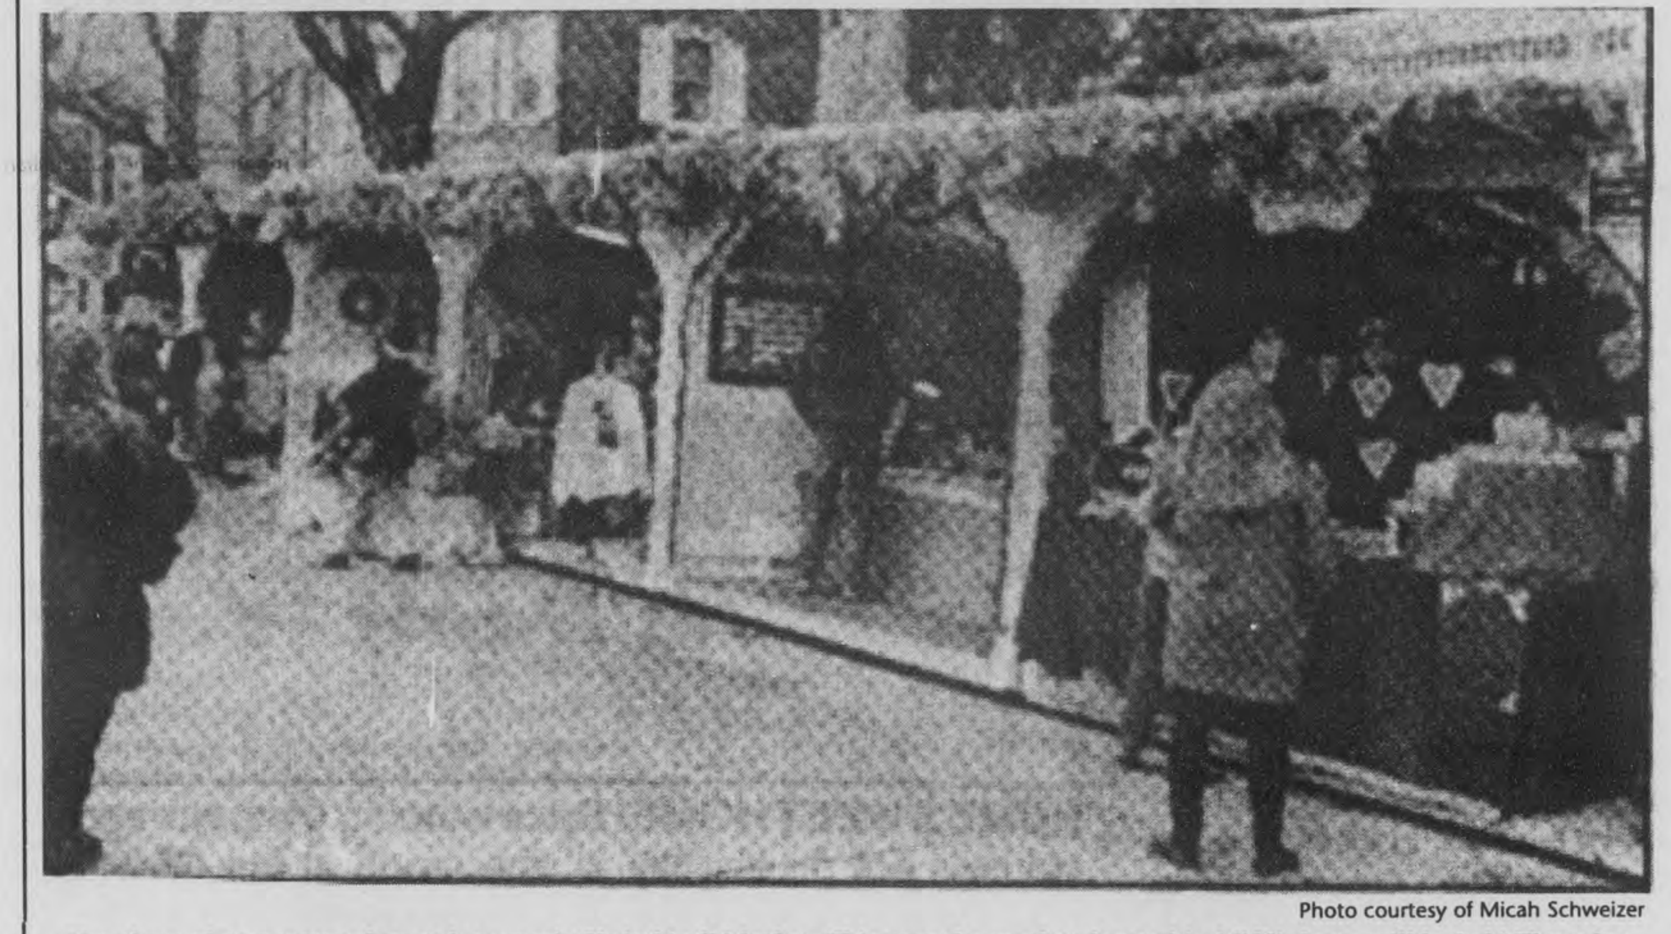

Photo courtesy of Micah Schweizer

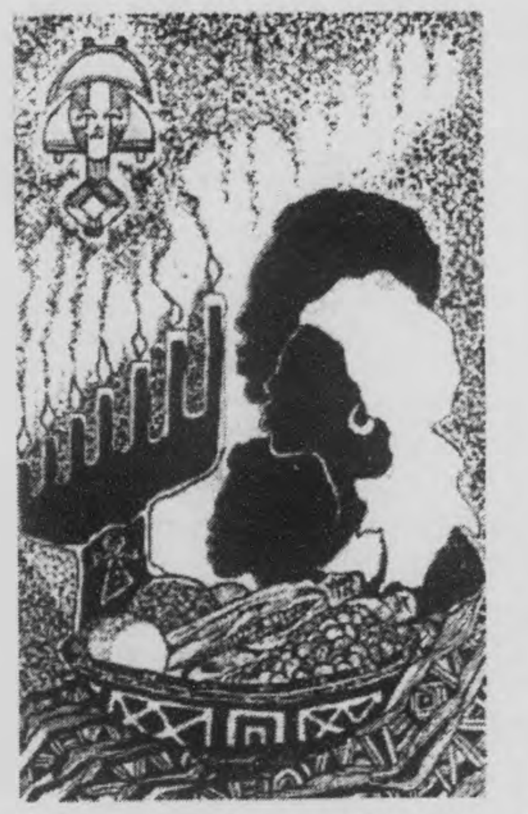
The above photos were taken at last year's Christkindl Market. This year the market, located in Mifflinburg, will be held Thursday through Saturday. Groups such as the University's own Silhouettes and Two Past Midnight will be performing.

KWANZAA 1996



Though the traditional celebration doesn't start until Dec. 26, the student organization Brother and Sisters Empowered (B.A.S.E.) is currently sponsoring a Kwanzaa celebration on campus. It started on Sunday, Dec. 1 and will continue through Saturday, Dec. 7.

Facts about Kwanzaa

—Kwanzaa is a seven-day African-American festival that takes place once a year. Each day is a celebration of a certain principle. The seven principles are called the **Nguzo Saba**:

Day 1: **Umoja** (unity)
Day 2: **Kujichagulia** (self-determination)
Day 3: **Ujima** (working together)
Day 4: **Ujamaa** (supporting each other)
Day 5: **Nia** (purpose)
Day 6: **Kuumba** (creativity)
Day 7: **Imani** (faith)

—Kwanzaa was created in 1966 by Dr. Maulana Karenga, a notable Civil Rights Leader.

—The word Kwanzaa means "first fruits" in the African language of Swahili. Dr. Karenga chose Swahili words to epresent Kwanzaa so that African Americans would remember that they are decendants of the land of Africa, and not just a specific country.

—To celebrate Kwanzaa, family and friends gather in the evenings to light candles in honor of the Nguzo Saba of the day. They then share their thoughts pertaining to the principle.

—The candlabra used in the celebration is called a **kinara**. There are seven candles called **mishumaa saba**. Three red candles are placed on the right, which stand for the blood of the African people. Three green candles, signifying the hope of new life, are placed on the left. A single black candle sits in the center of the kinara, symbolizing the face of the African people.

—On the sixth evening, the day of Kuumba, there is a great feast called **Karamu**. People tell folktales, exchange gifts, sing songs, and relate stories of the lives of famous African Americans.

Season of giving has arrived

By Corrie Drummond

Bucknellian Staff Writer

By now Thanksgiving break seems to be a far gone event, just a memory. The stresses of life at the University hover over our heads as we struggle to finish the work that *should* have been done all semester.

Thanksgiving heralds the beginning of 'the holiday season,' reminding us of approaching celebrations: Kwanzaa, Hanukkah, and Christmas.

The holidays bring to mind pictures of family gatherings, not to mention the blessing of sleep that comes with winter break. It is also a time to remember those who are in need. Although there are always many opportunities to pitch in on campus through BISON Volunteers, Christmas time brings with it a variety of seasonal programs through which each student can participate.

The Giving Tree is one of the most popular of these programs. Of course, we have all seen the highly ornate Christmas tree that sits underneath the stairs on the ground floor of the Langone Center. On it sit hundreds of 'snowflakes': the Christmas wishes of local children and elderly who cannot afford to fill them themselves.

Wishes vary from Barbie dolls to winter boots to reading material. Many people get together with someone else or with their hall in order to participate.

When the gift is bought, it should be wrapped and taken to Room 207 in the Langone Center. Cash donations are also accepted. If you have any questions, you may contact Tracy Griffin at 524-5125 or Susie Shindler at 522-0231.

You will be given a multitude of opportunities to help others these next few weeks in the way of food, clothing, and toy drives. Considering our own good fortune should prompt us to be concerned about the needs we witness all around us. Although Thanksgiving has come and gone, we truly do have many blessings.

Jonah Half—The Bucknellian

The Giving Tree sits in the Langone Center lobby.

ARTS & ENTERTAINMENT

Dance Company graces the stage performing to celebrate the Sesquicentennial

DAVID CARPENTER
Bucknellian Staff Writer

Dancers Jennifer Gordon '98 and Kristy Kuhn '00 rehearse "Now in this Hour," a piece in honor of the Sesquicentennial celebration

Bringing together choreographers from across the country, a new lighting system with almost two hundred new lights, and a special piece in honor of Bucknell's Sesquicentennial celebration, the Bucknell Dance Company graces the University Theatre's stage, in Coleman Hall, with their fall dance performance on Friday and Saturday, December 6 and 7 at 8:00 p.m.

This year the Dance Company has incorporated important events happening on campus into their performance this weekend. One of them is the focus semester on the Hispanic World. Two choreographers were brought in to direct dance pieces that reflected that area of study. Funded by the Bucknell Association for the Arts, guest performers Allyson Green and Marlon Barrios Solano were here on campus earlier this semester to help instruct students. Danna Frangione, Director of Dance Technique and Theory, was instrumental in bringing these talented people to campus. "They were only here for a week." Ms. Frangione remarked. "They went to all the classes and taught in their specialties and during that time, they set a piece for this performance." The focus semester, according to Frangione, gives the school access to primary artists working in the world today.

Green, originally from El Paso Texas, received a BFA from Washington University in New York. Her choreography has been presented in many countries outside of the U.S. Marlon Solano is psychologist from Venezuela who also teaches dance workshops in New York.

Also working with the Dance Company this semester is choreographer and dancer Karen Shiel. She is replacing the regular faculty member, Er-Dong Hu, who is on leave this semester. "Karen was chosen from a national search." Frangione said "She brings with her specialty in pointe work ballet, modern pointe work and techo." Shiel received her B.S. in Ballet Performance from the University of California at Irvine and has danced professionally for the Ballet Theatre of Boston.

The second important aspect of the performance is that the Bucknell Dance Company is celebrating in this performance is a special piece that has been commissioned for the Sesquicentennial celebration. With the help of the Department of Theatre and Dance, Bucknell Student Government, The Bucknell Association of the Arts and the Sesquicentennial Committee, a famous Alumni of Bucknell, Danny Buraczeski '70 was chosen to choreograph a piece with music from another famous Alum, Robert Lowery.

Lowery was the valedictorian of the class of 1854, when the school was still called the University of Lewisburg. Lowery gained his fame as a hymn writer. He copyrighted nearly 500 hundred hymns including the well known song, Shall We Gather at the River. Now with the arrangement of some of Lowery's hymns by William Boswell, a faculty member here at the University, Buraczeski challenges his dancers to look their best.

> *"We all work together as a collective as facilitators. We create an environment that makes everybody feel free to contribute."*
> *—Danna Frangione*
> *Director of Dance Technique and Theory*

Dancing is not the entire event at this performance. Set to the tune of a song by Tori Amos, The Department of Theatre and Dance is taking the opportunity to show off the new lights and lighting system that has just been added this year. The light show is designed by Ted Ozimek who is this year's Assistant Technical Director for the theatre. "The new lights are more efficient," Ozimek said. "They are brighter using less power which is important because we can use more because we use less power." The light hang for this show is 263 lights. This the most that ever has been hung in the University Theatre. "We are doing it to demonstrate the level of professionalism that we can now achieve in the department," Ozimek says.

According to Frangione, "Dance Company here at Bucknell is unique. In most colleges there are usually two companies. The faculty and students here have combined them. We each have our own function." This gives the University's company a special way of producing its performances. "We all work together as a collective as facilitators. We create an environment that makes everybody feel free to contribute." Frangione adds that when she first came to Bucknell in 1987, the Dance Company already existed, and things were similar to how they run today, "The company was student run. Auditions and rehearsals still are the same as they ran 10 years ago. Students officers still choose which students are admitted to the company, and student choreographers decide who gets into the pieces. The faculty does not have a vote. My role was to develop the good things that were already here." Frangione was hired and became a member of the Dance Company like any other student, but with a few special qualities. "What a teacher got them was access and facilities. The students need a teacher to start a curriculum and be able to get money from the school to expand. The talent and the drive was already here." This choreographer and dancer does not stay exclusively at the University. She works here while school is in session; in the summer, she travels to Asia where she works with a performing arts high school.

With a safer, newer lighting system, three pieces that have been choreographed by visiting artists will demonstrate the strength and talent that's characteristic in the Dance Company.

Mandy Walker '99, Kristy Kuhn '00 (back), Kristin Dite '97 (front), and Carla Christy '98 perform "Structural Paralysis."

The performance this weekend promises a mix of student, faculty, alumnus and professionally directed pieces along with an amazing light show.

The Dance Company performance will start at 8 p.m. on Friday and Saturday, December 6 and 7 in Coleman Hall Theater. Tickets are $5.

Movie Reviews

BY CHRIS NICHOLS
BUCKNELLIAN STAFF COLUMNIST

Star Trek: First Contact ****
Starring Patrick Stewart, Brent Spiner, James Cromwell, Michael Dorn, Alice Krige and Jonathan Frakes
Directed by Jonathan Frakes

In this latest installment of the Star Trek movies (# 8 for those of you who have lost count) the most frightening enemy the cast of the Star Trek: The Next Generation has had to face is once again making its way toward Earth. Building on, but not dependent on episodes from the TV series, *ST: First Contact* is not only interesting to old fans of the show but also the 'fair weather fan' who's been interested in the series without endless dedication. Likewise, if you've never made it to a Star Trek film, now might be a good time to start. The script is effective in delivering a good story with lots of interesting sub-plots. What remains so interesting about Star Trek is that it's not simply a "science fiction" story but also, a film. In order to be successful, it must look at humans and human nature. In *ST: FC* humans are faced with the possibility of losing all that it means to be human to the Borg, an intergalactic locust, that uses each new species it encounters as a resource for new technology and natural resource. The Borg overpowers its prey technologically and using the bodies of its victims for new 'soldiers.' The actors perform excellently in their roles that they had a couple of seasons to perfect. I found the plotline that was taking place on earth to be less interesting than the one up in space aboard the new sleek Enterprise. I was a little disappointed to see the Prime Directive so quickly abandoned, I mean really, it's one thing when Kirk does it in pursuit of a woman (See *ST IV: The Voyage Home*), but they could have tried a little harder in this movie. It's good to see though that without the characters of the old movies, quality Star Trek can continue on the big screen.

Mars Attacks! **** (in Theaters on December 13th)
Starring Jack Nicholson (x2), Annette Bening, Martin Short, Piers Brosnan, Tom Jones
Directed by Tim Burton

Let's face it, a movie based on a card series (Topps "Mars Attacks!" cards I think were out in the 60s, definitely re-released a couple of years ago) is arguably as silly as basing a movie on a song, or even a "gasp!" a video game. But if anyone can pull it off, Tim Burton is the man. (Didn't he managed to convert a comic into a mildly successful film, wasn't it called Batman or something?). Anyway, this is a darn good movie. With some really interesting effects combining real people with cartoonish Computer Generated Characters (the aliens) courtesy of Industrial Light and Magic, the movie works well as a comedy. Still this movie sort of defies explanation. It seems sci-fi like, but its really much more of a comedy. We've seen many movies with aliens invading, but this one definitely gives it a different twist. Almost like going back and watching one of those cheesy horror movies (see *The Blob* (1958)), this movie functions as a comedy. The aliens attack and the audience laughs. But the goal is still to get rid of them. Hands down this movie features one of the most original and hilarious solutions to alien invasion that I've ever seen. By then end of the movie, you'll definitely feel entertained if not enlightened on the most important question at hand: "Is there intelligent life on Earth."

Local Color: Christkindl Market celebrates Christmas in the old German way

BY MICAH SCHWEIZER
Bucknellian Staff Columnist

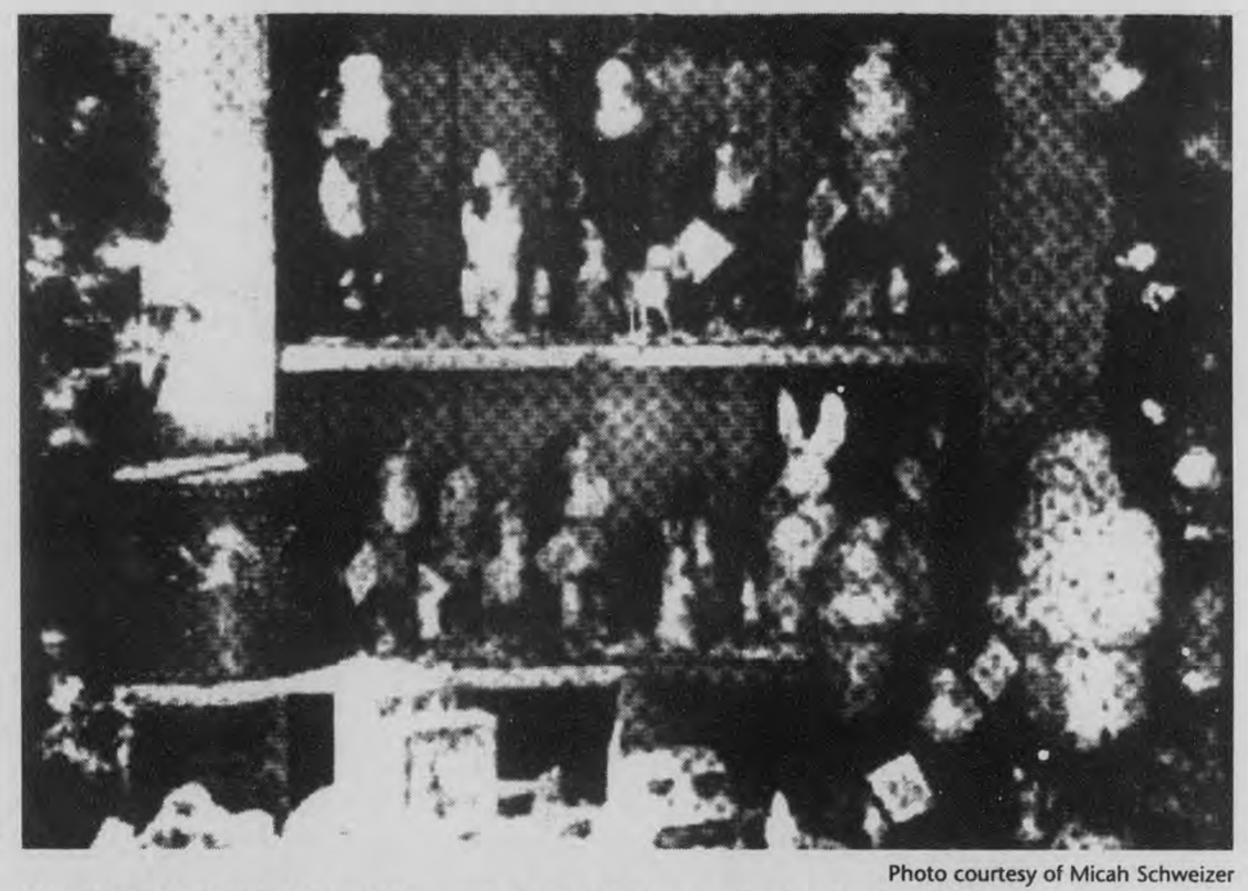

Photo courtesy of Micah Schweizer

For a chance to escape the end of semester crunch and to experience the German heritage of this area, consider a visit to Mifflinburg's Christkindl Market.

Dating back to over six centuries ago, the first holiday market was held in Munich, Germany. Mifflinburg's own Christkindl Market, modeled after the world-famous Christmas market in Nürnberg, Germany, offers a wide variety of German influenced food and crafts.

Entertainment has been expanded for this eighth annual market, with acts varying from juggling to brass ensembles to chamber music to the University's own Silhouettes and Two Past Midnight.

The specially constructed Christmas village, home to the outdoor crafts, sights, and food, is located on the 400 block of Market Street between 4th and 5th Streets, one block south of Route 45. Some notable sights in this miniature village are life-size German nutcrackers and a 30-foot-tall Christmas pyramid which presents a rotating Christmas scene powered by a candle driven fan.

In years gone by I remember having also seen Christmas stable scenes complete with live animals. Unfortunately, some of the animals don't get into the theatrical spirit and end up taxing the actors herding abilities, but it does serve to bring a smile to onlookers' faces.

This year, festivities won't be limited only to the out of doors, but will also take place in nearby churches, giving visitors a chance to get out of the cold and enjoy some music or a meal.

The Christkindl Market will be held Thursday, Dec. 5 through Saturday, Dec. 7 at the following times: Thursday 5 p.m. to 9 p.m., Friday from 1 p.m. to 9 p.m., and Saturday from 10 a.m. to 7:30 p.m. These three days are packed with entertainment, guaranteeing a visitor to a show of one kind or another, while crafts, food, and cold air are available at all times.

Photo courtesy of Micah Schweizer

The above photos were taken at last year's Christkindl Market. This year the market, located in Mifflinburg, will be held Thursday through Saturday. Groups such as the University's own Silhouettes and Two Past Midnight will be performing.

KWANZAA 1996

Though the traditional celebration doesn't start until Dec. 26, the student organization Brother and Sisters Empowered (B.A.S.E.) is currently sponsoring a Kwanzaa celebration on campus. It started on Sunday, Dec. 1 and will continue through Saturday, Dec. 7.

Facts about Kwanzaa

—Kwanzaa is a seven-day African-American festival that takes place once a year. Each day is a celebration of a certain principle. The seven principles are called the **Nguzo Saba**:

Day 1: **Umoja** (unity)
Day 2: **Kujichagulia** (self-determination)
Day 3: **Ujima** (working together)
Day 4: **Ujamaa** (supporting each other)
Day 5: **Nia** (purpose)
Day 6: **Kuumba** (creativity)
Day 7: **Imani** (faith)

—Kwanzaa was created in 1966 by Dr. Maulana Karenga, a notable Civil Rights Leader.

—The word Kwanzaa means "first fruits" in the African language of Swahili. Dr. Karenga chose Swahili words to epresent Kwanzaa so that African Americans would remember that they are decendants of the land of Africa, and not just a specific country.

—To celebrate Kwanzaa, family and friends gather in the evenings to light candles in honor of the Nguzo Saba of the day. They then share their thoughts pertaining to the principle.

—The candlabra used in the celebration is called a **kinara**. There are seven candles called **mishumaa saba**. Three red candles are placed on the right, which stand for the blood of the African people. Three green candles, signifying the hope of new life, are placed on the left. A single black candle sits in the center of the kinara, symbolizing the face of the African people.

—On the sixth evening, the day of Kuumba, there is a great feast called **Karamu**. People tell folktales, exchange gifts, sing songs, and relate stories of the lives of famous African Americans.

Season of giving has arrived

BY CORRIE DRUMMOND
Bucknellian Staff Writer

Jonah Half—The Bucknellian
The Giving Tree sits in the Langone Center lobby.

By now Thanksgiving break seems to be a far gone event, just a memory. The stresses of life at the University hover over our heads as we struggle to finish the work that *should* have been done all semester.

Thanksgiving heralds the beginning of 'the holiday season,' reminding us of approaching celebrations: Kwanzaa, Hanukkah, and Christmas.

The holidays bring to mind pictures of family gatherings, not to mention the blessing of sleep that comes with winter break. It is also a time to remember those who are in need. Although there are always many opportunities to pitch in on campus through BISON Volunteers, Christmas time brings with it a variety of seasonal programs through which each student can participate.

The Giving Tree is one of the most popular of these programs. Of course, we have all seen the highly ornate Christmas tree that sits underneath the stairs on the ground floor of the Langone Center. On it sit hundreds of 'snowflakes': the Christmas wishes of local children and elderly who cannot afford to fill them themselves.

Wishes vary from Barbie dolls to winter boots to reading material. Many people get together with someone else or with their hall in order to participate.

When the gift is bought, it should be wrapped and taken to Room 207 in the Langone Center. Cash donations are also accepted. If you have any questions, you may contact Tracy Griffin at 524-5125 or Susie Shindler at 522-0231.

You will be given a multitude of opportunities to help others these next few weeks in the way of food, clothing, and toy drives. Considering our own good fortune should prompt us to be concerned about the needs we witness all around us. Although Thanksgiving has come and gone, we truly do have many blessings.

BUCKNELL UNIVERSITY
SPORTS THURSDAY

Player of the Week: Jim Fox '97, Football

Fox threw for 273 yards and four touchdowns in Bucknell's 28-27 overtime win over Colgate.

Bison take title

Bucknell tops Colgate 28-27 in overtime behind Jim Fox's four touchdown passes

BY BRETT TOMLINSON
Bucknellian Staff Writer

Football is a game shaped by repetition, momentum and hard fought drives. Rarely does an entire football season come down to a single play which determines success or failure, but for Bucknell, that is exactly how the 1996 season was scripted.

In overtime against Colgate in the season finale, the Bison led 28-27 as Red Raider freshman quarterback Ryan Vena lined up under center for the two point conversion which would determine the Patriot League Championship.

Bucknell had taken a 14-0 lead by playing a nearly mistake-free first quarter, but Colgate stormed back, tying the game at half-time and taking a 21-14 lead in the third stanza. Quarterback Jim Fox '97 engineered a courageous 99-yard drive in the fourth quarter without the help of the injured Rich Lemon '97 to tie the game and force the overtime period.

Fox came up big again in overtime, hitting Ron Rockett '99 for a 24-yard pickup on a key third down and 15 play, to set up a three-yard touchdown toss to Cal Wilcox '98. But now Fox could only wait and pray for a big stop as the Bison defense tried to preserve Bucknell's title hopes. "We were kneeling on the sideline," Fox said. "I had my head down."

At the goal line, the field general of the defense, linebacker Brandon Little '97, gathered his troops together for one last stand. Little had been through the drill before. Last year against Colgate, he intercepted a pass in overtime to seal the Bison victory. But the stakes were higher now, with a winning season and a league title on the line.

"We knew it in the huddle that this was going to make or break us, and you could just see that it was going to make us," Little said.

When the ball was snapped, Fox finally raised his head just in time to see Little swat Vena's pass attempt out of the air in the end zone to guarantee Bucknell's first-ever share of the Patriot League crown, and the Christy Mathewson Memorial Stadium crowd erupted, storming the field.

As Fox led his chorus of teammates in a round of "Ray Bucknell," one of Bucknell's foes was making the win over Colgate even sweeter for the Bison. About 100 miles away in Easton, Pa., Lehigh was staging a remarkable comeback, scoring 23 unanswered points to defeat Lafayette 23-19. The Lehigh lead held, knocking the Leopards out of title contention and making Bucknell the lone champions of the Patriot League.

Bucknell Head Coach Tom Gadd was ecstatic about the win, highlighting its significance for the future of Bucknell football. "This is a big win for our program," Gadd said. "I couldn't be happier." In addition to winning the league, Bucknell put together consecutive winning seasons for the first time since 1965.

For Gadd, the players make everything happen for the program. "You see these kids day in, day out, and you know what kind of sacrifices they make to play this game," Gadd said. "I'm just so happy for those kids. I'll get to coach again, but those seniors won't get to play again."

Gadd was pleased with his team's poise, highlighting Fox's career-day of four touchdown passes and 273 yards in the air despite several dropped passes. "I thought it was a real courageous

Delfs leads women to 3-2 start

BY ADAM PARRIS
Bucknellian Staff Writer

Following her fifth season as head coach of the women's basketball team at Bucknell, in which she won the honor of Patriot League Coach of the year, Juliene Simpson heads a squad that seems young from the outset. However, the young squad was part of last year's record setting team.

In the 1995-96 season, the Bison tied the most wins in a season at Bucknell, with an 18-9 overall record. To add to that, the Bison went 10-2 in the Patriot League to win the regular season championship.

The winning season was the first at Bucknell since the distant 1987-88 season. In the process of conquering their opponents and the school records, the team maintained an undefeated home record of 12-0.

Shannon McGowan '97 and Chiara Sockel '97 will be the co-captains this season, being the only returning starters on a team that lost many of its key players.

McGowan, a frontrunner for setting the school's all time leading rebound record, will try to improve on her stellar All-Patriot League second team performance last year. Sockel, 10th in all-time assists and third in all-time three point field goals at Bucknell, will look for continued success as well.

McGowan and Sockel are backed by this year's other starters Kim Delfs '99, Jess Mathieson '97, and Leslie Blue '99.

Delfs was named to the Patriot League's All-Rookie Team last season and hopes to step it up this year. Mathieson, a two-sport athlete who runs track in the off season, and Leslie Blue, who saw some time as a freshman, will also add to a potent starting team.

With McGowan sidelined by a preseason knee injury, Kristen Lloyd '97 had to fill in her spot during the season opener against Marist. The Bison extended their home winning streak to 13 games as they defeated Marist 75-69.

Mathieson was all over the court, scoring 21 hard fought points and adding 10 rebounds. Delfs added 17 points and seven rebounds, and Sockel dished out eight assists along with 12 points in the win.

According to Sockel, the team effort given against Marist will have to continue for the Bison to match last year's success.

"I think we will do just as well, as long as we work together as a team," she said. Sockel added that the development of the young players will be crucial as the season goes along. McGowan agreed and hinted that a lot of that development depends on "control."

In the next game against Robert Morris, Delfs displayed that kind of development as she lead all scorers with 18 points and pulled down 10 rebounds, in addition to sparking the team with a six point run in the second half.

The Bison had led at halftime by a relatively comfortable six point lead; however, after building their lead to 10, Robert Morris outscored the Bison 16-4 over a five minute period to take a one-point lead.

In the closing 12 minutes, Delfs started her six point run which was complemented by Jen Winhofer '00, who tallied eight points at the end of the game to lead Bucknell to a 73-57 victory.

The victory boosted Bucknell's home court winning streak to 14.

However, the streak would not reach 15, as the Bison fell in their next game to a tough Rider squad, 59-57.

Despite the 14 point performance by Delfs in the first half, Rider was able to gain the upper hand with a 35-29 halftime lead. Delfs added another 12 points in the second half, but Rider would continue to build a 14 point lead in the second half as the

See WOMEN, page 17

Forward Kim Delfs '99 is leading the Bison in scoring (16.8 ppg), rebounds (7.4 rpg), and free throw percentage (77%).

Flash in the Pan

On the Warpath: In the battle of no. 1 and no. 2 the Florida St. Seminoles defeated the Florida Gators 24-21 to take over the top spot in the nation and land themselves in the Sugar Bowl, with a win assuring Bobby Bowden's team of its second national championship in four years. The Seminoles led throughout, boosted by Warrick Dunn's 186-yard rushing performance, as well as a dominating pass rush that sacked Heisman candidate Danny Wuerffel six times and intercepted him three times. Despite the constant harassment, Wuerffel still managed to throw for over 300 yards and three touchdowns. Also, with the victory over Florida, and earlier Miami, Florida St. earns bragging rights and recruiting advantages for the state of Florida.

Broncos Clinch: The Denver Broncos clinched the western division crown this weekend by defeating the Seattle Seahawks 34-7. In addition, with losses this week by the Bills and the Steelers, the Broncos have sown up home-field advantage for the playoffs.

Additional NFL: The NFC playoff race heated up this weekend, as a victory by the Cowboys over the Redskins move the two teams, along with the Philadelphia Eagles, into a three-way tie for first place in the division at 8-5. The Eagles have already split games with both teams, while the Redskins and the Cowboys meet again for the last game of the season.

Also, the San Francisco 49ers meet the Carolina Panthers this weekend, with the winner gaining a leg up on the NFC western division crown, while a New England Patriot win and a Buffalo Bills loss ties those two teams at the top of the AFC East with three games to go.

Irregular Heartbeat Sidelines Hakeem: For the second time in two weeks, Houston Rockets star Hakeem Olajuwon checked into the hospital with an irregular heartbeat. Doctors say that his condition is not a major concern, but "the Dream" has already missed a number of games and is presently waiting for clearance to play. To correct the problem, which is not considered life-threatening, the star center is being placed a drug called Lanoxin.

France Takes Davis Cup: In a surprise upset, France defeated Sweden 3-2 to take tennis' Davis Cup, its first cup since 1991. In the deciding match, France's Arneud Boestch fought off triple match point to defeat a cramping Tomas Enqvist 10-8 in the fifth and deciding set.

Lett-Down: In a long-rumored move by the NFL, Cowboys defensive tackle was suspended one year for violation of the League's drug policy. Lett had failed a similar test a year ago, resulting in a four-game suspension. If Lett ever fails another test, he will receive a lifetime ban from the NFL.

College Football Top 10

Don't get snowed by ski retailers

By Chris Runnels and Brian Mazzei
Bucknellian Staff Writers

Snow What
A semi-weekly column for the winter sports enthusiast.

As the ski season approaches, you might get the itch to purchase some new equipment. We will focus on the basic equipment: skis, boots, poles, bindings and general clothing. We will not touch on specific clothing and style because we have never been accused of having any style, and it is too personal for us to tell anybody what to wear.

When going to make your equipment purchases it is important to go to a knowledgeable dealer. A good sales rep will put you in the correct equipment to satisfy your skiing style and ability. Our suggestion is to go to a small shop. These dealers are more knowledgeable and more personal. They seem to assume more responsibility for the equipment they sell.

Be sure to stay away from the large retailers with birds or barns in their names. These places are created to move equipment and that is it. Many of the retailers at these places have minimal knowledge and could care less about you as an individual. They concentrate on commission and will sell you anything you want.

The selling of equipment is hard, known from personal experience, because the customer wants the fastest, toughest, coolest equipment, and many times if you suit the customer with what they think they want they will end up plastered to a tree or even worse, another skier. Our advice is to go in with an open mind and if you do not know much, bring someone along who knows something about equipment to make sure the retailer stays true to you as the consumer.

Skis

Skis are an ever evolving art. The choice of skis is very personal. Be sure to honestly tell the retailer of your ability level because it is all he or she has to go by when selling you your skis. If you are not honest it could result in serious injury. Skis are either stiff or flexible. The stiffer the ski the more performance and activity you are going to get from the ski.

A more advanced skier would be inclined to get a stiffer ski. If you have no clue what we just said, stay with a more flexible ski. Skis are also designed specifically for racing or recreation.

A word of advice: Some skis claim to be racing skis but are all mountain skis. A good rep will steer you clear of pure racing skis unless you ask for them specifically. If you are a pure racer at a high level you might want to consider talking to a company of a ski you like. If you seem like a good investment they might give you a discount on race stock skis. Race stocks are not available to the public because of their performance capabilities. This is only recommended for racers who ski FIS races or Nor-Am races. There is so much involved in each ski such as tortionaly, rigidity, side-cut, tail stiffness, cracked edges, sintered bases and much more. Be sure that the retailer explains everything to you. This is a time consuming process, but it is necessary in order to enjoy skiing to its fullest potential.

Boots

Boots are the most important part of your equipment. If your feet are not happy you will not ski happy. That is a sin. Do not buy the best looking or the most popular boot, but the boot that is the most comfortable. I know people who have permanently deformed feet because they stuck with a boot that did not fit them.

Once you buy the boot be aware that the liner will pack out. This means that the liner of the boot will form to your foot and loose its factory conformity. This is good. If you still have hot spots (irritated areas) on your feet, go to a boot specialist. A relatively new profession, boot specialists can work to make your boots as comfortable as a pair of sneakers.

If a boot doctor does not work, trade the boot in. You will have to absorb a monetary loss but it is worth it rather than having life-long foot problems.

Bindings are fickle contraptions of springs and screws. Your dealer will most likely have a preference to a brand. This is okay because most major brands make a binding for all levels of skiers. It takes an advanced skier to recognize the difference between bindings.

Remember that bindings have also evolved, so do not buy a dinosaur because your dealer likes it. Make sure that the models are up to date and you should be fine.

Poles

Poles are the most insignificant piece of equipment. Highly neglected, poles felt that they too needed to change. Most poles are now a graphite/carbon composite that is flexible. This is the way to go. Metal and aluminum poles are becoming antiquated.

The new composite poles are a God-send to those of us who were regularly down in the basement with a blow torch trying to straighten bent aluminum poles who fell victim to the perilous world of chair lifts, ramps, gates, and trees.

FOOTBALL

From Page 15

effort on his part," said Gadd. "He had to be a little bit frustrated, but he just hung in there and kept making plays."

While the ending was perfectly scripted for Bucknell, the third quarter was not, as a hip flexor injury sidelined Lemon in his final game as a Bison. Still, Lemon was enthusiastic, doing all he could to motivate his teammates on the sidelines. "It hurt a little bit [to be on the sidelines], only because I wanted to contribute," Lemon said. "I did what I could, trying to keep the other guys pumped up."

While Lemon cheered, his backup Chris Peer '98 came up big for the Bison, gaining 53 yards on 14 carries and keeping the Bucknell offense on the move. "Our young guys really came through for us," Lemon proudly commented after the game.

In the end, Lemon was just happy to finally have a Patriot League title to go along with his plethora of records. "I feel like a little kid... It's just amazing," said Lemon. "You watch all those NFL and NBA players lying on the ground and crying and everything, and now I know what it feels like."

Little emphatically agreed. " It's the best feeling in the world. We work together and we worked so hard ... It's a great feeling to end your football career like this."

Jonah Half—The Bucknellian
Chiara Sockel '97 drives to the basket in the 75-69 win over Marist.

WOMEN

From Page 15

score escalated to 55-41 with 5:15 left in the game.

Sockel said, "If we see we are down by 14, we won't accept losing. We still believe we can win." The Bison did still believe they could win, and they showed it, closing the 14-point gap to a two-point gap with 34 seconds left.

Over Thanksgiving break, the Bison traveled to Nebraska, where they went 1-1. They had a character building loss against Nebraska, who is a probable candidate for the top 25 teams in the country and a confident win against a stunned Cal-Poly team.

Cal-Poly felt the sting of the Bison anger coming off the loss from Nebraska, as Bucknell shot Cal-Poly's lights out with 37 percent from the field, 33 percent from the three point line, and 70 percent from the foul line to continue their free throw success this season.

"It was a good experience," Sockel said.

Gaining the necessary experience, the women's squad faces a long and rocky road this season. McGowan described the Patriot League as "very scrappy." She added that "on any given day, any team can step up and beat another." Still, Sockel and McGowan think that Navy and Holy Cross represent their toughest competitors. They will play both teams, like all the others in the Patriot League, once at home and once away.

However, as in any other sport, rivals can be a thorn in one's side. That thorn is Colgate. The Bison defeated Colgate both times in the regular season last year, but suffered an unfortunate loss to them in the semifinals of the playoffs. The loss has provided extra motivation, even to those who aren't playing right now.

"I will beat Colgate, if I can play," McGowan said.

The Bison faced Maryland Eastern Shore last evening and came up winners with a score of 71-62. The team will head to Brown for a tournament with Marshall, Texas A&M, and Brown, on Saturday.

McGowan warmed up with the team against Maryland Eastern Shore, and she hopes to play for a few minutes at Brown.

As for the Patriot League, "I want to tear into it." Sockel said.

Lemon leaves with records, memories and a title

By Brett Tomlinson
Bucknellian Staff Writer

A single season rushing total of 798 yards would be a career year for many college running backs. For Rich Lemon '97, it was a disappointment. But the tragedy of an off year does not cut very deep for Lemon, thanks in part to Bucknell's first-ever Patriot League Championship.

After four years of unprecedented rushing dominance at Bucknell, Lemon contends that the league title was the only thing that ever mattered. "That was my number one goal," Lemon said after Bucknell's season-ending win over Colgate. "The records are fine and dandy, but if I would have left here without a ring, they wouldn't have meant a thing for me."

Lemon continued to display class during and after his final Bucknell game. During the game, Lemon was knocked out of the action with a hip flexor injury, but he maintained a positive attitude, walking out to the huddle during timeouts to keep his backup motivated.

After the game, in the midst of the post-game pandemonium, Lemon still found time to sign autographs for local youngsters on the field.

Lemon appreciates the attention he's gotten from the Lewisburg community, especially from the young fans. "It feels great," he said. "I love kids, I love signing autographs, and I love the attention. I'm just sorry that it's all going to come to an end today. But there are other guys. The guys behind me are great."

Always the team player, Lemon was already talking about the future as he celebrated the league championship. "Hopefully, this will be a string of winning seasons and Patriot League titles," Lemon said.

Lemon will certainly be remembered by Bison fans in years to come. Here's a brief look at how Lemon will be remembered in the record books:

- 4742 rushing yards (Bucknell record, second in Patriot League history, fifth in Div. I-AA)
- 5960 all-purpose yards (Bucknell record, Patriot League record, second in Div. I-AA)
- 28 100-yard rushing games (One shy of Div. I-AA record)
- 37 touchdowns (Bucknell record [tie])
- 229 yards rushing vs. Fordham, 11/16/96 (Bucknell record)
- 1496 yards rushing in 1994 (Bucknell record)
- 17 consecutive 100-yard rushing games (Bucknell record)
- 3 200-yard rushing games (Bucknell record)
- Co-Patriot League Player of the Year, 1994
- Three-time First Team All-Patriot League running back

Don't get snowed by ski retailers

By Chris Runnels and Brian Mazzei
Bucknellian Staff Writers

Snow What
A semi-weekly column for the winter sports enthusiast.

As the ski season approaches, you might get the itch to purchase some new equipment. We will focus on the basic equipment: skis, boots, poles, bindings and general clothing. We will not touch on specific clothing and style because we have never been accused of having any style, and it is too personal for us to tell anybody what to wear.

When going to make your equipment purchases it is important to go to a knowledgeable dealer. A good sales rep will put you in the correct equipment to satisfy your skiing style and ability. Our suggestion is to go to a small shop. These dealers are more knowledgeable and more personal. They seem to assume more responsibility for the equipment they sell.

Be sure to stay away from the large retailers with birds or barns in their names. These places are created to move equipment and that is it. Many of the retailers at these places have minimal knowledge and could care less about you as an individual. They concentrate on commission and will sell you anything you want.

The selling of equipment is hard, known from personal experience, because the customer wants the fastest, toughest, coolest equipment, and many times if you suit the customer with what they think they want they will end up plastered to a tree or even worse, another skier. Our advice is to go in with an open mind and if you do not know much, bring someone along who knows something about equipment to make sure the retailer stays true to you as the consumer.

Skis

Skis are an ever evolving art. The choice of skis is very personal. Be sure to honestly tell the retailer of your ability level because it is all he or she has to go by when selling you your skis. If you are not honest it could result in serious injury. Skis are either stiff or flexible. The stiffer the ski the more performance and activity you are going to get from the ski.

A more advanced skier would be inclined to get a stiffer ski. If you have no clue what we just said, stay with a more flexible ski. Skis are also designed specifically for racing or recreation.

A word of advice: Some skis claim to be racing skis but are all mountain skis. A good rep will steer you clear of pure racing skis unless you ask for them specifically. If you are a pure racer at a high level you might want to consider talking to a company of a ski you like. If you seem like a good investment they might give you a discount on race stock skis. Race stocks are not available to the public because of their performance capabilities. This is only recommended for racers who ski FIS races or Nor-Am races. There is so much involved in each ski such as tortionaly, rigidity, sidecut, tail stiffness, cracked edges, sintered bases and much more. Be sure that the retailer explains everything to you. This is a time consuming process, but it is necessary in order to enjoy skiing to its fullest potential.

Boots

Boots are the most important part of your equipment. If your feet are not happy you will not ski happy. That is a sin. Do not buy the best looking or the most popular boot, but the boot that is the most comfortable. I know people who have permanently deformed feet because they stuck with a boot that did not fit them.

Once you buy the boot be aware that the liner will pack out. This means that the liner of the boot will form to your foot and loose its factory conformity. This is good. If you still have hot spots (irritated areas) on your feet, go to a boot specialist. A relatively new profession, boot specialists can work to make your boots as comfortable as a pair of sneakers.

If a boot doctor does not work, trade the boot in. You will have to absorb a monetary loss but it is worth it rather than having life-long foot problems.

Bindings are fickle contraptions of springs and screws. Your dealer will most likely have a preference to a brand. This is okay because most major brands make a binding for all levels of skiers. It takes an advanced skier to recognize the difference between bindings.

Remember that bindings have also evolved, so do not buy a dinosaur because your dealer likes it. Make sure that the models are up to date and you should be fine.

Poles

Poles are the most insignificant piece of equipment. Highly neglected, poles felt that they too needed to change. Most poles are now a graphite/carbon composite that is flexible. This is the way to go. Metal and aluminum poles are becoming antiquated.

The new composite poles are a God-send to those of us who were regularly down in the basement with a blow torch trying to straighten bent aluminum poles who fell victim to the perilous world of chair lifts, ramps, gates, and trees.

Jonah Half—The Bucknellian
Chiara Sockel '97 drives to the basket in the 75-69 win over Marist.

WOMEN

From Page 15

score escalated to 55-41 with 5:15 left in the game.

Sockel said, "If we see we are down by 14, we won't accept losing. We still believe we can win." The Bison did still believe they could win, and they showed it, closing the 14-point gap to a two-point gap with 34 seconds left.

Over Thanksgiving break, the Bison traveled to Nebraska, where they went 1-1. They had a character building loss against Nebraska, who is a probable candidate for the top 25 teams in the country and a confident win against a stunned Cal-Poly team.

Cal-Poly felt the sting of the Bison anger coming off the loss from Nebraska, as Bucknell shot Cal-Poly's lights out with 37 percent from the field, 33 percent from the three point line, and 70 percent from the foul line to continue their free throw success this season.

"It was a good experience," Sockel said.

Gaining the necessary experience, the women's squad faces a long and rocky road this season. McGowan described the Patriot League as "very scrappy." She added that "on any given day, any team can step up and beat another." Still, Sockel and McGowan think that Navy and Holy Cross represent their toughest competitors. They will play both teams, like all the others in the Patriot League, once at home and once away.

However, as in any other sport, rivals can be a thorn in one's side. That thorn is Colgate. The Bison defeated Colgate both times in the regular season last year, but suffered an unfortunate loss to them in the semifinals of the playoffs. The loss has provided extra motivation, even to those who aren't playing right now.

"I will beat Colgate, if I can play," McGowan said.

The Bison faced Maryland Eastern Shore last evening and came up winners with a score of 71-62. The team will head to Brown for a tournament with Marshall, Texas A&M, and Brown, on Saturday.

McGowan warmed up with the team against Maryland Eastern Shore, and she hopes to play for a few minutes at Brown.

As for the Patriot League, "I want to tear into it." Sockel said.

FOOTBALL

From Page 15

effort on his part," said Gadd. "He had to be a little bit frustrated, but he just hung in there and kept making plays."

While the ending was perfectly scripted for Bucknell, the third quarter was not, as a hip flexor injury sidelined Lemon in his final game as a Bison. Still, Lemon was enthusiastic, doing all he could to motivate his teammates on the sidelines. "It hurt a little bit [to be on the sidelines], only because I wanted to contribute," Lemon said. "I did what I could, trying to keep the other guys pumped up."

While Lemon cheered, his backup Chris Peer '98 came up big for the Bison, gaining 53 yards on 14 carries and keeping the Bucknell offense on the move. "Our young guys really came through for us," Lemon proudly commented after the game.

In the end, Lemon was just happy to finally have a Patriot League title to go along with his plethora of records. "I feel like a little kid... It's just amazing," said Lemon. "You watch all those NFL and NBA players lying on the ground and crying and everything, and now I know what it feels like."

Little emphatically agreed. " It's the best feeling in the world. We work together and we worked so hard ... It's a great feeling to end your football career like this."

Lemon leaves with records, memories and a title

By Brett Tomlinson
Bucknellian Staff Writer

A single season rushing total of 798 yards would be a career year for many college running backs. For Rich Lemon '97, it was a disappointment. But the tragedy of an off year does not cut very deep for Lemon, thanks in part to Bucknell's first-ever Patriot League Championship.

After four years of unprecedented rushing dominance at Bucknell, Lemon contends that the league title was the only thing that ever mattered. "That was my number one goal," Lemon said after Bucknell's season-ending win over Colgate. "The records are fine and dandy, but if I would have left here without a ring, they wouldn't have meant a thing for me."

Lemon continued to display class during and after his final Bucknell game. During the game, Lemon was knocked out of the action with a hip flexor injury, but he maintained a positive attitude, walking out to the huddle during timeouts to keep his backup motivated.

After the game, in the midst of the post-game pandemonium, Lemon still found time to sign autographs for local youngsters on the field.

Lemon appreciates the attention he's gotten from the Lewisburg community, especially from the young fans. "It feels great," he said. "I love kids, I love signing autographs, and I love the attention. I'm just sorry that it's all going to come to an end today. But there are other guys. The guys behind me are great."

Always the team player, Lemon was already talking about the future as he celebrated the league championship. "Hopefully, this will be a string of winning seasons and Patriot League titles," Lemon said.

Lemon will certainly be remembered by Bison fans in years to come. Here's a brief look at how Lemon will be remembered in the record books:

- 4742 rushing yards (Bucknell record, second in Patriot League history, fifth in Div. I-AA)
- 5960 all-purpose yards (Bucknell record, Patriot League record, second in Div. I-AA)
- 28 100-yard rushing games (One shy of Div. I-AA record)
- 37 touchdowns (Bucknell record [tie])
- 229 yards rushing vs. Fordham, 11/16/96 (Bucknell record)
- 1496 yards rushing in 1994 (Bucknell record)
- 17 consecutive 100-yard rushing games (Bucknell record)
- 3 200-yard rushing games (Bucknell record)
- Co-Patriot League Player of the Year, 1994
- Three-time First Team All-Patriot League running back

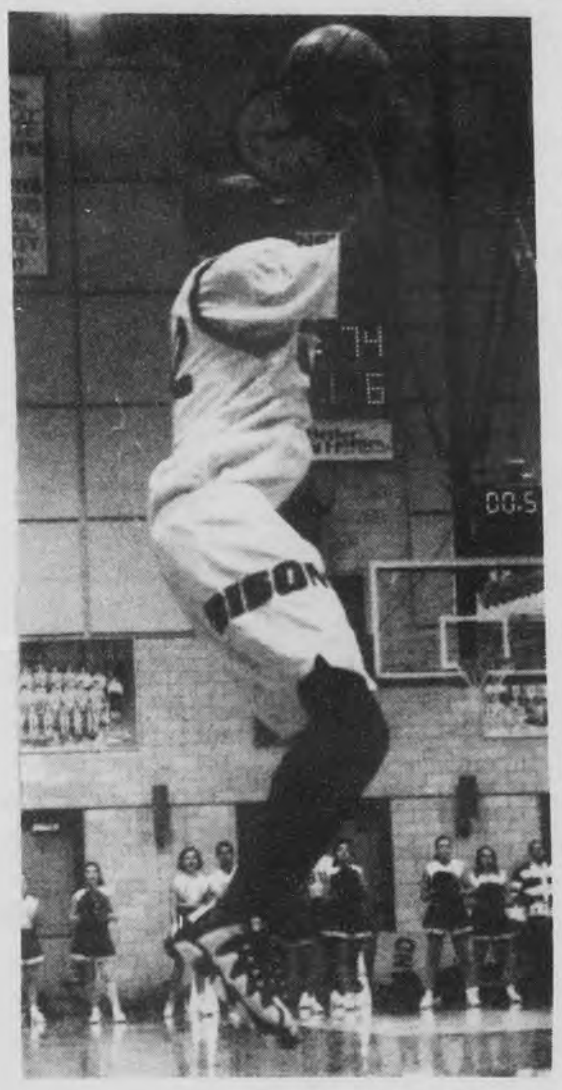
Bison men shoot down Air Force

Bucknell splits two games on trip west, tops Delaware to improve to 3-2



Jonah Half—The Bucknellian

The Bison have jumped out to a 3-2 record behind the shooting of Gordon Mboya '97...

BY CHRIS ELLIS

Bucknellian Staff Writer

The Bucknell men's basketball team opened its season realizing that a breakneck non-conference schedule awaited it. Facing four tough scholarship schools in their first four contests, the Bison posted a respectable 2-2 mark.

The Bison opened the season by defeating Robert Morris and later won a Thanksgiving Day affair at Air Force.

"To come out of those games with a split definitely makes me happy," Head Coach Pat Flannery said. "We were a little disappointed because we had a shot to win in the games we lost, but we weren't disappointed by our play."

The win over Robert Morris was especially gratifying for Flannery and his team. The Bison were without a returning starter and played only four upperclassmen, but were still able to rally from a two-point halftime deficit to defeat the Colonials.

The season's first game started out very sloppy for both teams. After ten minutes, Bucknell had committed six turnovers, Robert Morris eight, and the teams had combined to score only 16 points. The Bison continued their lethargic play until Robert Morris swelled their lead to four two minutes into the second half. After that, though, Bucknell went on an 18-3 run and never looked back. J.R. Holden '96 led all Bucknell scorers with 15 points.

"We had a tough time containing him," Robert Morris coach Jim Boone said. "He's very quick off the dribble and a very deceptive player. Teams will be having trouble with him all year long."

Aside from the non-conference win, however, Bucknell took away several positives from the first game of the season. After a shaky first half, Bucknell's freshmen lost their opening game jitters and went on to play significant roles in the victory. Playing strongest was center Dan Bowen '00, who started, played 19 minutes, and grabbed six rebounds.

"We started out a little tight and that cost us in the first half," Bowen said. "In the second half, we picked it up defensively, loosened up a bit, and that turned it around."

After a two-point home loss to Niagara evened the team's record, Bucknell embarked on a four-day, two-game trip to Colorado to face two Western Athletic Conference opponents. The Bison went 1-1 there as well, earning a 62-58 win against Air Force before bowing 83-70 to Colorado State.

"Every game is still a learning experience for us," Flannery said. "We fell behind early in both of those games, but we never backed down from anyone."

Bucknell made second-half comeback in each of those games as well. The Bison trailed 33-27 to Air Force at halftime, but recovered in the second half to post the four-point win. Holden again led Bucknell, scoring a team high 17 points and adding five steals.

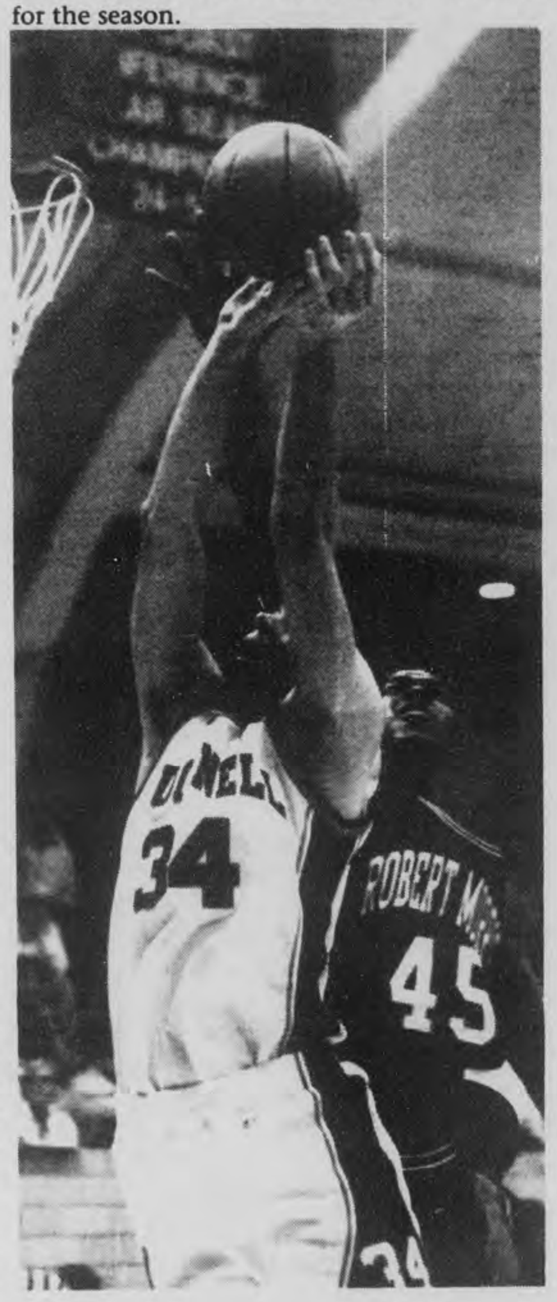
Colorado State took advantage of Bucknell's inexperience and jumped out to a quick 14-5 lead in Saturday's game. Colorado State enjoyed double-digit leads for most of the second half as well, but Bucknell closed the game to five points with just under three minutes remaining. The Bison ran out of gas as the game ended, though, as Colorado State pulled away and made the final margin of victory thirteen points.

"We dug ourselves a whole again, and its very tough to come back against a quality team," Flannery said. "We made a nice comeback, but just couldn't get over the hump."

The 2-2 start is certainly encouraging for the Bison, but the team knows that the schedule does not get any easier. After games against Delaware and St. Francis (Pa.) this week, Bucknell's holiday schedule includes three teams (Princeton, Penn State and New Mexico) who earned births into the NCAA tournament this year. New Mexico is currently ranked no. 12 in the nation. Of their 14 non-conference matchups, Bucknell only plays three non-scholarship teams.

"November and December drive me nuts," Flannery said. "We have to be prepared to an extreme, because there's always another team coming at us. There's no time to lighten up."

In Wednesday's late night action, the Bison men knocked off a perennially tough Delaware squad 81-54 to raise their record to 3-2 for the season.



Jonah Half—The Bucknellian

...and the powerful inside game of players such as Tom Welch '97 (#34).

Searching for a football playoff

Commentary

Brett Tomlinson

Brett Tomlinson
Sports Co-Editor

Whoever came up with the idea of the College Football Bowl Alliance obviously knew a few things about making money, but they were not exactly the most thorough planners when it came to logistics. For the second time in three years, the Bowl Alliance has been foiled by "the Granddaddy of 'em all" (as Keith Jackson would say)—the Rose Bowl. There are two undefeated teams in Division I, and they won't be facing each other in January to decide the national championship. Plans to bring the Rose Bowl into the alliance in the future are already taken care of, but even if the alliance works out its problems with the national championship, there are still some problems with the system.

First of all, the Bowl Alliance is confusing. Sure, it's not quite as confusing as the NFL tie breaker system, but nevertheless, it's not as simple as it could be. With guarantees for conference champions and ratings for at-large teams, nothing seems to make much sense. The national championship is still decided, in large part, by sportswriters and pollsters, not players on the field.

The biggest unresolved issue for the bowl alliance is how the national championship would be set up if there were no undefeated teams or more than two undefeated teams. An eight-team playoff system would resolve this problem and crown the champion on the field, but no one seems to be listening to that argument anymore, now that the bowl alliance is forking over up to $4 million to participating teams.

If the bowl season ends this year with no undefeated teams left, though, the alliance folks just might wake up and smell a playoff system. It is not a far fetched scenario: Ohio State and Nebraska both have realistic chances at knocking off Arizona State and Florida State, respectively, which would mean up to nine teams could finish the year with only one loss. Yes, nine. To make matters worse, two time defending-champ Nebraska would be one of those nine, and after the recent love affair the pollsters have had with the weak-scheduling Cornhuskers, they would be the front-runners for the title. But Arizona State, which would also be among the one-loss wonders, beat Nebraska handily early in the season. It would be hard to justify picking the Huskers above the Sun Devils.

Transitively, of course, Ohio State beats out Nebraska by virtue of its Rose Bowl win over Arizona State. Michigan beat Ohio State, and with only three losses, the Wolverines would be sure to stake a claim to the title. That would bring Northwestern and Penn State into the mix, because they both beat Michigan and finished with better records.

Once the two-loss teams start making their cases to the pollsters, all hell will break loose. Tennessee will be looking for at least half of the title to have something to give Peyton Manning before he leaves for the pros. And then, of course, Memphis wants a share. They beat the Vols fair and square. If you start dishing out pieces to every team that beat Memphis, then you've really got a mess. Sooner or later, you end up with 110 co-champs (Temple gets nothing, no matter what).

Perhaps I got a little dramatic with that explanation, but you get the point. If Florida State and Arizona State both lose, there will be poll-anarchy, which I think would probably be a good thing. It may be the only thing that will break up the bowl alliance and finally get plans for a real national championship off the ground. So if you believe in a national championship, you know who to cheer for in the Rose and Sugar Bowls.

All-American Crew has Silver lining

David Silver '97 joins Sarah Bloom '97 and two '96 graduates on top rowing squad

BY E.J. CRAWFORD

Bucknellian Staff Writer

Athlete Profile

As an incoming freshman, All-American rower David Silver '97 described himself as "pretty average academically" and "not really sure athletically, other than I knew I wanted to continue being on a team."

Four years later, Silver has blossomed into a 3.7 student with a job already lined up, and now a second team All-America status is being bestowed on him by the United States Rowing Association. All this in addition to being named most valuable coxswain by last year's team, and being the President of Bucknell Crew for this year.

However, Silver was not bred for rowing success, and, as he admitted, "had never really rowed before my freshman year."

Silver's crew career began much like that of many of Bucknell's rowers in the Smith quad. Silver talked to the crew members at the information table, and decided to go to the interest meeting. He liked what he heard, and decided to give it a shot.

He rowed on the second boat for the fall of his freshman year before being promoted to first boat that following spring. He rowed on the first boat successfully through the end of his sophomore year, when former coach Jimmy King talked him into moving to coxswain, the position he has now well adapted to. "Having been a there [a rower] before, I know what the guys are going through, and that's been a big help."

But never in Silver's wildest dreams did he think his move to coxswain would be so successful, much less land him on the crew All-American team, an award given "in recognition for academics and athletic excellence amongst your peers."

When asked about his response to being named All-American, he replied, "I was floored; to be named with such great rowers and great brains is amazing."

"This [award] is really a culmination of everything that has happened both athletically and academically," he added.

Outside of crew, Silver is an accounting major and he recently landed a job with the Coopers and Lybrand Accounting Firm.

And as for on-campus activities, the Rockville, MD resident is a member of the Bucknell orchestra and has played the violin for well over 15 years.

In fact, Silver sees being a coxswain and a musician as very similar. "Being a coxswain meshes together my musical and athletic background" in that a coxswain acts "like a conductor in getting things together and organized," he said.

So now, as Silver closes in on the end of his Bucknell career, he can look back on it as a Dean's list student, an accomplished musician and an All-American. Not bad for an "average student."

Fast Fact:
Bucknell Crew had more All-Americans (4) than any other university in the country in 1996.

Court converts to crew training space

Juli Titherington—The Bucknellian

Several members of the women's crew team practice in what used to be racquetball court number 6. The court was converted into a year-round training facility this past November.

THE BUCKNELLIAN

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

Forecast for graduation tent party comes up dry

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Seniors are fired-up about yesterday's announcement that Tent Party is "dry" this year.

Traditionally, the University has provided alcohol at the Tent Party, a much anticipated celebration the night before graduation for the seniors, their friends and family.

President William D. Adams sent an open letter to the Class of 1997 yesterday explaining his reasoning for changing the language of the University's alcohol policy. The alterations in the wording of the policy "preclude the University from serving alcohol at these kinds of events," Adams stated in the open letter.

Adams said in his letter, "I have come to the conclusion that we should not serve alcoholic beverages at University-sponsored events and hosted events designed primarily for students or where very large numbers of students may be present."

Consequently, events such as homecoming weekend's tailgating party and Tent Party will be dry. Adams said there will not be a Bring Your Own Beverage policy at either function.

Adams acknowledged that alternatives such as a B.Y.O.B. policy or heightened security were considered. However, "They just don't have the capacity to insure that underage drinking will not occur," he said.

Adams said that a B.Y.O.B. policy would be even worse, than the University supplying the alcohol.

For instance, there would be a lot of people bringing alcohol into the party in various ways and in uncontrollable quantities.

He said that B.Y.O.B. is "not a viable alternative."

Adams said, "I hope it's not construed as a punishment."

"I regard it as a measure of prudence on the University's party," he said.

"It will be a good party, I hope," Adams said. "I think that it is still conceivable and probable that people will have a good time," he said.

Nonetheless, some seniors have strong feelings about Adam's decision.

"I am fairly disgruntled about it. Seniors on the whole are of age to drink and if this is a party for the seniors who are legally able to drink, I see no reason why it should be dry," said Sarah Nellson '97. "Much of the campus is gone by graduation, lessening the chance of underage drinking. It's the people that are allowed to drink that are being affected," Nellson added.

"Tent party is a celebration for the seniors, the great majority of whom are of legal age to consume alcohol. This plan mandating alcohol-free functions primarily addresses underage consumption. Therefore, 21 year olds should not be penalized for the irresponsibility of underage drinkers," said Allison Marek '97.

"More security could be used to target underage drinking, but revoking the privileges of the graduates and long-standing traditions is not the answer to the problem," added Nichole Blaschak '97.

Sarah Kukanskis '97 said, "I think that it's unfair because they let everyone in the past and I don't see why they have to change it for the seniors this year. And, I honestly don't think that if they do it this way that anyone will go. At this time, it's a celebration, we are graduating and are responsible adults and we should be able to have a good time."

Rob Tarulli '97 said, "I am not surprised," while Derek Walker '97 stated, "I think it's probably a good idea considering what happened at the Gala. It is just a shame that a few people have to ruin the fun for all."

"I feel that it's a problem of the school and at every school, so why take it out on the senior class? It's meant for the seniors and their friends and families and everyone is responsible enough. And I don't think that anyone will go if it is dry," said Thomas Brown '97.

Holy Cross basketball players will be given scholarships

Holy Cross wins

League decides to permit athletic scholarships

BY E.J. CRAWFORD
Bucknellian Staff Writer

As expected, Holy Cross was granted the right to give athletic scholarships for basketball in a vote held during the December meeting of the Presidents of the Patriot League institutions.

Holy Cross threatened to leave the league if the scholarships were not granted, and most among the Patriot League were fearful that such a move would destroy the League, leaving Bucknell, Lafayette, Lehigh and Colgate with few other options.

This sentiment was reiterated by President William D. Adams, also the chair of the League's Council of Presidents, in an interview

See HOLY CROSS, page 11

President Adams' "Open Letter to the Class of 1997" can be viewed in Opinions, on page 4.

Multiple Fires in Swartz Hall remain under investigation

BY BETH MARTIN
Bucknellian Staff Writer

Police suspect arson in a series of fires which occurred in Swartz Residence Hall early Sunday morning. No injuries were reported in part due to the quick reaction to of several students.

Two Public Safety officers promptly responded to the fire alarm activation at 4:32 a.m. The three fires activating the alarm had already been extinguished.

Fires were located on the bulletin boards on both the second and third floor halls in Swartz's "B" wing, and at the door of the Residence Director's apartment.

Later Public Safety found remnants of another fire in the "C" wing's lower level lounge area.

Although the fires are believed to have been set deliberately, nobody has been implicated for the crime.

Victor Arcelus 'GR, RD of Swartz, indicated that the fires were not necessarily initiated by Swartz residents, although all of the building doors are locked from 11 p.m. until 8 a.m.

"Unfortunately, there was access to the building by a first floor window that was broken earlier in the weekend, and people leaving doors propped open," Arcelus said.

The Public Safety Department and East Buffalo Township Police Department are actively investigating the person(s) responsible for setting the fires, and plan to prosecute the perpetrator criminally, with possible charges of institutional vandalism and/or arson.

Vincent DeCerchio, director of Public Safety, said that authorities are making "every attempt to apprehend the individual responsible" for the fires, calling it "an immature act committed by a person with a flagrant disregard for the welfare of others."

The fire caused relatively little physical damage, due to the prompt employment of fire extinguishers, concrete walls and ceilings, and fire-retarding carpets in Swartz. DeCerchio said that in Swartz it would be "almost impossible for a fire to rampantly flourish."

Dennis Hawley, director of the Physical Plant, said that although

See FIRE, page 3

This is one of two bulletin boards in Swartz that caught fire in the wee hours of Sunday morning. In addition to these fires, there was also a fire in the "C" wing lounge and on the RD's door.

Bucknell Harvest reaps extra food for local shelters

BY REBECCA KLINGLER
Bucknellian Staff Writer

Local shelters may soon reap the benefits of a Bucknell Harvest, thanks to one student's persistence in planning a drive that will transport the extra food produced by Dining Services to these organizations.

After a successful holiday drive at the end of last semester, Matt Eng '97 is now trying to work out the little details that will allow this project to become a regular reality.

Joyce Pisnanont '97, who graduated in December, originally came up with the idea of Bucknell Harvest.

"We all noticed that the caf and Dining Services threw out a lot," Eng said. "A lot of organizations and shelters could use that food."

See HARVEST, page 2.

Tuition Exchange explained

BY BETH MARTIN
Bucknellian Staff Writer

Bucknell is part of the Tuition Exchange Organization, involving over three hundred American universities. This program allows most members of the Bucknell faculty and staff to send their children to other schools in the program for less money than each school's regular tuition. In return, children of the faculty and staff at the other participating universities may attend Bucknell at a reduced rate.

While the University does not need to match the same amount of students school for school, the total amount of Bucknell faculty's children applying to the tuition exchange program at other universities must be equal to the amount entering Bucknell through the tuition exchange program.

Since the University receives many more Tuition Exchange

See EXCHANGE, page 2

Russell Means, cofounder of the American Indian Movement, will give a speech entitled "Where White Men Fear to Tread," on Tuesday at 7:30 p.m. in the Vaughn Literature Auditorium. The speech is open to the public and is free of charge.

Forecast for graduation tent party comes up dry

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Seniors are fired-up about yesterday's announcement that Tent Party is "dry" this year.

Traditionally, the University has provided alcohol at the Tent Party, a much anticipated celebration the night before graduation for the seniors, their friends and family.

President William D. Adams sent an open letter to the Class of 1997 yesterday explaining his reasoning for changing the language of the University's alcohol policy. The alterations in the wording of the policy "preclude the University from serving alcohol at these kinds of events," Adams stated in the open letter.

Adams said in his letter, "I have come to the conclusion that we should not serve alcoholic beverages at University-sponsored events and hosted events designed primarily for students or where very large numbers of students may be present."

Consequently, events such as homecoming weekend's tailgating party and Tent Party will be dry. Adams said there will not be a Bring Your Own Beverage policy at either function.

Adams acknowledged that alternatives such as a B.Y.O.B. policy or heightened security were considered. However, "They just don't have the capacity to insure that underage drinking will not occur," he said.

Adams said that a B.Y.O.B. policy would be even worse, than the University supplying the alcohol.

For instance, there would be a lot of people bringing alcohol into the party in various ways and in uncontrollable quantities.

He said that B.Y.O.B. is "not a viable alternative."

Adams said, "I hope it's not construed as a punishment."

"I regard it as a measure of prudence on the University's party," he said.

"It will be a good party, I hope," Adams said. "I think that it is still conceivable and probable that people will have a good time," he said.

Nonetheless, some seniors have strong feelings about Adam's decision.

"I am fairly disgruntled about it. Seniors on the whole are of age to drink and if this is a party for the seniors who are legally able to drink, I see no reason why it should be dry," said Sarah Nellson '97. "Much of the campus is gone by graduation, lessening the chance of underage drinking. It's the people that are allowed to drink that are being affected," Nellson added.

"Tent party is a celebration for the seniors, the great majority of whom are of legal age to consume alcohol. This plan mandating alcohol-free functions primarily addresses underage consumption. Therefore, 21 year olds should not be penalized for the irresponsibility of underage drinkers," said Allison Marek '97.

"More security could be used to target underage drinking, but revoking the privileges of the graduates and long-standing traditions is not the answer to the problem," added Nichole Blaschak '97.

Sarah Kukanskis '97 said, "I think that it's unfair because they let everyone in the past and I don't see why they have to change it for the seniors this year. And, I honestly don't think that if they do it this way that anyone will go. At this time, it's a celebration, we are graduating and are responsible adults and we should be able to have a good time."

Rob Tarulli '97 said, "I am not surprised," while Derek Walker '97 stated, "I think it's probably a good idea considering what happened at the Gala. It is just a shame that a few people have to ruin the fun for all."

"I feel that it's a problem of the school and at every school, so why take it out on the senior class? It's meant for the seniors and their friends and families and everyone is responsible enough. And I don't think that anyone will go if it is dry," said Thomas Brown '97.

Holy Cross basketball players will be given scholarships

Holy Cross wins

League decides to permit athletic scholarships

BY E.J. CRAWFORD
Bucknellian Staff Writer

As expected, Holy Cross was granted the right to give athletic scholarships for basketball in a vote held during the December meeting of the Presidents of the Patriot League institutions.

Holy Cross threatened to leave the league if the scholarships were not granted, and most among the Patriot League were fearful that such a move would destroy the League, leaving Bucknell, Lafayette, Lehigh and Colgate with few other options.

This sentiment was reiterated by President William D. Adams, also the chair of the League's Council of Presidents, in an interview

Multiple Fires in Swartz Hall remain under investigation

BY BETH MARTIN
Bucknellian Staff Writer

Police suspect arson in a series of fires which occurred in Swartz Residence Hall early Sunday morning. No injuries were reported in part due to the quick reaction to of several students.

Two Public Safety officers promptly responded to the fire alarm activation at 4:32 a.m. The three fires activating the alarm had already been extinguished.

Fires were located on the bulletin boards on both the second and third floor halls in Swartz's "B" wing, and at the door of the Residence Director's apartment.

Later Public Safety found remnants of another fire in the "C" wing's lower level lounge area.

Although the fires are believed to have been set deliberately, nobody has been implicated for the crime.

Victor Arcelus 'GR, RD of Swartz, indicated that the fires were not necessarily initiated by Swartz residents, although all of the building doors are locked from 11 p.m. until 8 a.m.

"Unfortunately, there was access to the building by a first floor window that was broken earlier in the weekend, and people leaving doors propped open," Arcelus said.

Adams honors thirty faculty and staff at the annual President's Service Recognition Breakfast

BY ERIC BLOEM

Bucknellian Staff Writer

The University recently honored 30 faculty and staff members at the annual President's Service Recognition Breakfast. Each of the people honored has devoted 20, 25, or 30 years of service to the University.

Among the thirty people honored were James Heath, professor of classics and William Zimmerman Jr., labor supervisor.

Heath came to the University in 1966 after teaching at Rice University. He stated that he had a desire to return to the north and Bucknell was the offer that he had at that time.

Over the 30 years that Heath has been at the University, he has seen many things change. One thing that Heath maintains has stayed the same is the students' work ethic.

Ben Buckley—The Bucknellian
Professor James Heath, Professor of Classics

"I get the sense that people are working just as hard but not in the same way," Heath said. Students are "working more along the lines of a script as opposed to making inferences themselves."

Heath first came to the University in the 1960s during the Vietnam War. At that time there was a fair amount of interest among students in questioning policy through activism.

The campus has changed since the 1960s. Heath states that students today are "not so much conservative;" rather, they are simply less interested in politics and current issues.

During Heath's time at the University, he has seen the classics department evolve from near disintegration to a strong area of study.

Before he came to the University, there was a question of whether or not his predecessor's position would be filled. Again in 1975 and 1976, there was a move to disband the classics program.

Heath stated that "the number of students entering into the humanities in past years has given the impression that [this field of study] is picking up." Heath attributed much of the change to Bucknell's institution of the Scholar's Program.

Heath quickly retorted "Yes," when asked whether after 30 years of teaching Bucknell students, he still found it exciting. His plans for the future are to remain in the area and continue to "haunt the library" even after his retirement.

Another member of the University community recently honored with 30 years of service was William Zimmerman Jr., labor and grounds supervisor. Zimmerman supervises all of the work that goes into keeping the University's campus looking nice and running efficiently. Most recently the issue of snow removal has topped his list of things to do.

Zimmerman said, "I came to Bucknell right out of high school as a laborer." Over the past 30 years, he has been promoted a number of times. In 1978 he took over the duties of grounds foreman and since then has become supervisor.

Zimmerman has also seen Bucknell's campus change, but he has a different perspective than Heath. The most dramatic changes on campus for Zimmerman have been the "opening of the Langone Center and the Weis Center. He stated that each of these building "has alleviated a lot of time consumption. Before the Langone Center existed, there were three cafeterias which had to be maintained," one in Cooley Hall, Larison Hall, and Swartz Hall.

One of Zimmerman's greatest accomplishments at the University has been "better equipment to do the job." More important for him has been the chance to be continually around students.

He stated, "I kind of enjoy being around students...it keeps you young." Zimmerman also expressed happiness to have worked with so many people over such a long period of time.

At the age of 48, Zimmerman is looking forward to retirement, although he maintains that it will not occur for quite a while.

Other individuals honored for their 30 years of work at the University were Allan Grundstrom, professor of French and chair of modern language department; Jai Kim, chair and professor of civil engineering; David Pearson, associate professor of biology; Larry Younkin, professor of civil engineering; Sue Casselberry, manager of University Relations Services and Ervin Paul, physical plant.

Ben Buckley—The Bucknellian
William Zimmerman Jr., Labor Supervisor

Faculty members honored for 25 years of service were Lois Huffines, professor of German and linguistics, LaVonne Poteet, associate professor of Latin American studies and Tom Travis, professor of political science.

Staff members with 25 years of service were Sandra Bowman, physical plant; Beth Engleman, office of associate vice president for finance; Nancy Leisenring, physical plant; Ron Lose, physical plant; and Nancy Stover, music department.

Faculty members Louise Knight, associate professor of management and Judith Schaut, associate professor of education were honored with 20 years of service.

Staff members who were honored for 20 years of service were Wanda Bingaman, physical plant; John Brown, physical plant; Jim DeDay, physical plant; Dianne Guffey, computer and communication services; Brenda Hering, physical plant; Lucy Kerstetter, physical plant; Helen Mathias, geology department; Janet Neidig, physical plant; Thelma Nichols, physical plant; Lona Sholly, Bertrand library; Marcy Siegler, instructional media services and Tom Yocca, power house.

Each honoree received a pin "as a symbol of the University's appreciation for their years of service" said President William D. Adams.

HARVEST

from page 1

Dining Services produces food based on projections, said Tim Tenon, general manager. When the number of customers has been over-projected for one reason or another, the extra food often goes to waste.

"Some of those items, we try to use up the next meal periods," he said. "Sometimes that's not possible... So instead of throwing that food away, these items would be frozen, dated... and then periodically those items would be delivered to the organizations chosen for Bucknell Harvest."

Along with Bill Gruver, professor of management and faculty adviser for Bucknell Harvest, Eng has been busy recruiting drivers.

"Drivers are what we need," he said. He walked through the cafeteria and set up a table in the Langone Center to interest possible drivers.

Drivers must have a University license in order to participate, since University vehicles will be used.

To make sure that Bucknell Harvest will continue after he graduates in May, Eng is not looking to take any leadership role after the program becomes established.

"I don't want a leadership position," Eng explained. "This is something for the campus to do."

Instead, he is working closely with the Bucknell Student Government to form a committee to run the program.

"What we're asking for BSG to do is to set up committees of organizations on campus who do want to help out. The committee will run with this program," he said.

He said the feedback from Tracy Gray, president of BSG, has been "pretty positive. He's willing to do something with this."

However, there are still questions that need to be overcome.

Tenon said that some legal issues still need to be addressed, such as what type of food items can be delivered, how often the food will be delivered, as well as the wording of the official document for this project.

Both Eng and Tenon said that this project was attempted a couple years ago by when another student, but it was prevented because of certain laws that have since been changed.

Eng hopes to have all the details worked out by the end of this semester, so the committee can begin to organize bimonthly drives. The number of drives will hopefully increase as support grows, Eng said.

Susquehanna Valley Women in Transition, Haven Ministries and the Lewisburg Community Center have all indicated that they are interested in receiving Dining Service's extra food.

The food that will be given are bread products, concentrated juice, and nonperishables. Nothing that has been cooked will be donated.

Dining Services has worked with Haven Ministries in the past, organizing food and monetary donations around the holidays. Bucknell Harvest will be a year-long project.

PUBLIC SAFETY LOG

January 22, 1997

INFORMATION — A Bucknell student reported to Public Safety that 10 pills were found missing from his prescription drug container. The medication may have been removed at home or at the University. The investigation is continuing.

INFORMATION ASSIST LOCAL POLICE — Public Safety assisted the East Buffalo Township Police Department in locating the operator of a vehicle which was abandoned after sliding into a culvert across from the entrance to Bucknell West.

January 23, 1997

INFORMATION— Public Safety responded to the Finance Office in Marts Hall for the report of an individual who gave false information to remove a report from that department.

INFORMATION — Public safety Officers responded to Taylor Hall for the report of an individual attempting to purchase text books. The buyer was located, advised of University policy, and escorted from the property.

January 24, 1997

ASSIST LOCAL POLICE — Public Safety Officers were called to Vedder Circle for a vehicle reported by East Buffalo Township Police to have been involved in a disorderly conduct incident at Perkin's Restaurant in Lewisburg. The vehicle was issued University parking citations for illegal parking. The operator was later located and referred to East Buffalo Township Police Department.

VANDALISM — Public Safety responded to Swartz Hall for a broken window pane in the door of D wing. A search of the area met with negative results in finding the possible suspect. The window was repaired.

January 25, 1997

INFORMATION — Public Safety received a report that a barking dog ran toward a University student while he was walking near Sigma Chi Fraternity. The student was not injured.

VANDALISM — Public Safety responded to the women's restroom on the first floor of the Langone Center where a dispensing machine had been damaged. The investigation is continuing.

January 26, 1997

MINOR VEHICLE ACCIDENT — A student reported to Public Safety that her car was struck in the rear while stopped for pedestrians on Dent Drive. The other vehicle was operated by another student. The collision caused minor damage to both vehicles.

ALLEGED MARIJUANA USE — Public Safety reported to Smith Hall on the report of the odor of marijuana. The occupant of the room admitted to having smoked marijuana and showed Public Safety what appeared to be marijuana leaves. Lewisburg Police Department will file charges.

INSTITUTIONAL VANDALISM — Public Safety responded to Swartz Hall B Wing for a fire alarm activation. Papers were burned on two bulletin boards and the Residence Director's room door. One fire burned out and the other two were extinguished by students using University extinguishers. The investigation is continuing. East Buffalo Township Police Department was notified.

VANDALISM — Public Safety found a broken pane of glass in a window in Vaughn Literature Library while unlocking the room for a meeting. The investigation is continuing.

Public Safety recovered a jacket and wallet outside Vaughn Literature building. The owner of the articles reported that the coat was missing from Delta Upsilon Fraternity. Some money was taken from the wallet. The investigation is continuing.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

EXCHANGE

from page 1

applicants than it exports to other universities, the program is very competitive for students applying to the University.

The university has offered between eight and fifteen exchange awards each year. Ninety-six students applied for the 1996-7 school year, and so far 127 have applied for the 1997-8 school year (applications are due on March 20 and decisions will be announced in early April). During 1996-7, Bucknell sent only sixteen of its faculty's and staff's children to other schools involved in the tuition exchange program.

Bucknell tuition exchange scholarships for the current school year total $14,800; regular Bucknell tuition is $20,230

All University tuition exchange candidates, including enrolled upperclassmen and first year students, are considered by admissions and personnel services. A priority list is established from the eligible tuition exchange candidates. For students currently enrolled at Bucknell, the priority list is created in regard to each student's academic performance and extracurricular contribution. For first year applicants, secondary achievement and potential for contribution are considered.

Some universities involved in the Tuition Exchange Organization include Franklin and Marshall College, Drew University, Connecticut College, Seton Hall University, and the University of Richmond.

Family investigator thinks JonBenet Ramsey's killer worked with Ramsey's company

NEW YORK — JonBenet Ramsey's killer knew that $118,000 was in her father's retirement account, suggesting that a disgruntled former employee of John Ramsey killed his daughter, a family investigator said.

"This person has a very unique, intimate knowledge about his financial workings," said John Douglas, a former FBI agent hired by the Ramsey family for his experience in preparing criminal profiles. "Therefore the person would have to be somehow related to his employment."

Douglas, in an interview broadcast Tuesday on "Dateline NBC," said he spent several hours with the Ramseys and visited their three-story mansion in Boulder, Colorado, where the 6- year-old's father found her dead Dec. 26.

A three-page ransom note found by JonBenet's mother, Patricia Ramsey, demanded $118,000, the amount of the bonus Ramsey received last year from Access Graphics, the billion-dollar computer company he founded.

FAA releases more data on air safety via Internet

WASHINGTON — The Federal Aviation Administration is set to release to the general public more detailed airline safety information, according to the United States senator, Ron Wyden (D-Oregon) who requested they make more information readily available.

While the agency will not attempt to rank airlines according to their safety, it will release data about individual carriers, information that has been widely sought following recent accidents. Among the information available will be facts about near mid-air collisions, and fines levied against airlines for safety infractions.

The information will be made available via the World Wide Web on the Internet Safety Page, Wyden said.

Disclosures that FAA inspectors had been investigating safety problems at ValuJet before that airline's deadly crash last May caused a clamor for the FAA to report on the safety of various carriers.

Holiday Inn drops transsexual ad that premiered at the Super Bowl due to "offensive" nature

ATLANTA (AP) — Holiday Inn's TV ad featuring a transsexual was pulled quickly after its Super Bowl premiere because some people found it offensive.

The ad, aimed at dramatizing the company's $1 billion renovation program, showed a woman drawing admiring glances at a class reunion. She turns out to be a male alumnus who had a sex-change operation.

The company said it aired the ad because consumer sampling prior to its broadcast showed many people liked it. The commercial ran in the second half of the Super Bowl telecast.

World News

Zaire accuses Uganda of invasion

KINSHASA, Zaire — Zaire said yesterday that several thousand Ugandan troops had invaded its territory, but Uganda immediately dismissed the accusation as laughable.

A military high command statement said about 2,000 Ugandan troops had left the Zairian town of Fizi — about 350 kms (200 miles) southwest of the Ugandan border — and were heading in the direction of Kalemie in mineral-producing Shaba province.

"It is absolute falsehood. It is in fact laughable that we would be so stupid as to openly send troops into Zaire. Even the geographical locations mentioned do not make sense," Hope Kivengere, spokeswoman for President Yoweri Museveni, told Reuters by telephone from Kampala.

"The Zairian statement lacks credibility. We have not sent any troops at all to Zaire," Kivengere added.

Pakistani court upholds Bhutto's dismissal

ISLAMABAD, Pakistan — Pakistan's Supreme Court has cleared the way for new national elections, ruling yesterday that President Farooq Leghari was legally justified when he dismissed Prime Minister Benazir Bhutto on Nov. 5.

"There is enough material to establish corruption, nepotism and misrule," said Chief Justice Sajjad Ali Shah at the close of the hearing that began Jan. 13 on Bhutto's petition to have her dismissal reversed.

Six of the seven judges ruled that Leghari's attorneys had shown ample evidence of violating the constitution, ridiculing and harassing judges, and tapping the phones of judges, civil servants and political opponents.

Bhutto has denied the charges and accused Leghari of dismissing her government to consolidate his own power. Bhutto called the ruling "unfair," but said she "didn't expect any justice" and was therefore not surprised by the verdict.

Witnesses said police and Bhutto supporters clashed outside the court immediately following the verdict, but there was no word on arrests or injuries. Hundreds of riot police surrounded the courthouse, preventing people from storming the building.

Chechen president to negotiate with Moscow

GROZNY, Russia — Chechnya's president-elect says he is ready to negotiate with Moscow over the republic's political status — but he also declared that Chechnya already has won its freedom.

The first official results released yesterday confirmed that Aslan Maskhadov won an overwhelming mandate from Chechen voters, collecting nearly 65 percent of the vote with most ballots counted.

Maskhadov took a non-confrontational but tough stance toward Russia, cautioning that he will compromise only "within reasonable limits."

"There is only one thing I can tell Russia: We do not want Russia to have the right to kill our people with such impunity," Maskhadov said in an interview published yesterday in the weekly newspaper Argumenty i Fakti.

Some Grozny residents went further, demanding that Russia pay compensation for the war, which reduced the southern republic to ruins.

Welcome back from all of us at *The Bucknellian*.

FIRE

from page 1

the exact cost of the fire's damage has not yet been determined, "it can be classified as minor damage."

Apparently the fires in the lounge and the RD's door expended themselves. The fires within the halls, however, were extinguished by students. Megan McCarthy '99, Resident Assistant of 3B, extinguished the fire in her hall after being awakened by the fire alarm.

Philip Huggins '99 and Todd Zeranski '99, roommates in 2B hall, used a fire extinguisher to exterminate the fire in their hall. Zeranski was brushing his teeth when the fire alarm was activated. As he exited the men's room, Zeranski witnessed "the blazing bulletin board with flames from the floor to the ceiling and burning pieces of paper on the floor."

Zeranski said, "I panicked a little. I wasn't really scared, just shocked- it was like a surreal experience. It was the last thing I expected to see, since we have about five or six false fire alarms a week on this hall."

Zeranski summoned Huggins (whom at first refused to believe the actuality of the fire) and the two "sprayed the fire for about ten seconds until it was out."

Huggins and Zeranski proceeded to exit the building, and were soon joined by other members of "B" wing. The residents were detained in Swartz main lounge for approximately 45 minutes until Public Safety had surveyed the damage and cleared out some of the smoke.

Responding to his new status, Zeranski said, "I don't really consider myself to be some sort of hero. I would hope anybody would do the same thing. I don't think I deserve any special treatment or anything. Looking back on it, I'm just glad that the worst thing that happened was some burnt paper and boards. It could have been a lot worse."

The Office of Housing and Residential Life is offering a $400 reward for help in identifying the person(s) responsible for setting the fires. Anyone with relevant information should contact the Office of Public Safety or the Office of Housing and Residential Life. All callers may choose to remain anonymous.

Senior survey delayed, to be taken in the spring

BY ARGUN ULGEN

Bucknellian Staff Writer

When the class of 1997 registered for classes this semester, they may have noticed that they were not asked to take the senior survey typically given at that time.

The University Psychological Services has postponed its annual senior survey until April, because seniors have stated in past years that the second semester of their senior year is an important time in their lives.

Many significant experiences that students encounter at the University occur during their last semester as undergraduates.

Postponing the senior survey to April will allow the seniors' last semester in their analysis of the surveys.

In addition, since more time has been provided, Psychological Services hopes to create more insightful questions to ask seniors in April.

The purpose of the senior survey is to aid Psychological Services in understanding student's feelings towards the University.

Data comparisons and longitudinal data analysis help foster an understanding of student opinions on such subjects as academics and campus life.

All seniors are encouraged to take the senior survey, as it plays a vital role in the University's understanding of the effects it has on the student body.

Adams honors thirty faculty and staff at the annual President's Service Recognition Breakfast

BY ERIC BLOEM

Bucknellian Staff Writer

The University recently honored 30 faculty and staff members at the annual President's Service Recognition Breakfast. Each of the people honored has devoted 20, 25, or 30 years of service to the University.

Among the thirty people honored were James Heath, professor of classics and William Zimmerman Jr., labor supervisor.

Heath came to the University in 1966 after teaching at Rice University. He stated that he had a desire to return to the north and Bucknell was the offer that he had at that time.

Over the 30 years that Heath has been at the University, he has seen many things change. One thing that Heath maintains has stayed the same is the students' work ethic.

Ben Buckley—The Bucknellian
Professor James Heath, Professor of Classics

"I get the sense that people are working just as hard but not in the same way," Heath said. Students are "working more along the lines of a script as opposed to making inferences themselves."

Heath first came to the University in the 1960s during the Vietnam War. At that time there was a fair amount of interest among students in questioning policy through activism.

The campus has changed since the 1960s. Heath states that students today are "not so much conservative;" rather, they are simply less interested in politics and current issues.

During Heath's time at the University, he has seen the classics department evolve from near disintegration to a strong area of study.

Before he came to the University, there was a question of whether or not his predecessor's position would be filled. Again in 1975 and 1976, there was a move to disband the classics program.

Heath stated that "the number of students entering into the humanities in past years has given the impression that [this field of study] is picking up." Heath attributed much of the change to Bucknell's institution of the Scholar's Program.

Heath quickly retorted "Yes," when asked whether after 30 years of teaching Bucknell students, he still found it exciting. His plans for the future are to remain in the area and continue to "haunt the library" even after his retirement.

Another member of the University community recently honored with 30 years of service was William Zimmerman Jr., labor and grounds supervisor. Zimmerman supervises all of the work that goes into keeping the University's campus looking nice and running efficiently. Most recently the issue of snow removal has topped his list of things to do.

Zimmerman said, "I came to Bucknell right out of high school as a laborer." Over the past 30 years, he has been promoted a number of times. In 1978 he took over the duties of grounds foreman and since then has become supervisor.

Zimmerman has also seen Bucknell's campus change, but he has a different perspective than Heath. The most dramatic changes on campus for Zimmerman have been the "opening of the Langone Center and the Weis Center. He stated that each of these building "has alleviated a lot of time consumption. Before the Langone Center existed, there were three cafeterias which had to be maintained," one in Cooley Hall, Larison Hall, and Swartz Hall.

One of Zimmerman's greatest accomplishments at the University has been "better equipment to do the job." More important for him has been the chance to be continually around students.

He stated, "I kind of enjoy being around students...it keeps you young." Zimmerman also expressed happiness to have worked with so many people over such a long period of time.

At the age of 48, Zimmerman is looking forward to retirement, although he maintains that it will not occur for quite a while.

Other individuals honored for their 30 years of work at the University were Allan Grundstrom, professor of French and chair of modern language department; Jai Kim, chair and professor of civil engineering; David Pearson, associate professor of biology; Larry Younkin, professor of civil engineering; Sue Casselberry, manager of University Relations Services and Ervin Paul, physical plant.

Ben Buckley—The Bucknellian
William Zimmerman Jr., Labor Supervisor

Faculty members honored for 25 years of service were Lois Huffines, professor of German and linguistics, LaVonne Poteet, associate professor of Latin American studies and Tom Travis, professor of political science.

Staff members with 25 years of service were Sandra Bowman, physical plant; Beth Engleman, office of associate vice president for finance; Nancy Leisenring, physical plant; Ron Lose, physical plant; and Nancy Stover, music department.

Faculty members Louise Knight, associate professor of management and Judith Schaut, associate professor of education were honored with 20 years of service.

Staff members who were honored for 20 years of service were Wanda Bingaman, physical plant; John Brown, physical plant; Jim DeDay, physical plant; Dianne Guffey, computer and communication services; Brenda Hering, physical plant; Lucy Kerstetter, physical plant; Helen Mathias, geology department; Janet Neidig, physical plant; Thelma Nichols, physical plant; Lona Sholly, Bertrand library; Marcy Siegler, instructional media services and Tom Yocca, power house.

Each honoree received a pin "as a symbol of the University's appreciation for their years of service" said President William D. Adams.

HARVEST

from page 1

Dining Services produces food based on projections, said Tim Tenon, general manager. When the number of customers has been over-projected for one reason or another, the extra food often goes to waste.

"Some of those items, we try to use up the next meal periods," he said. "Sometimes that's not possible... So instead of throwing that food away, these items would be frozen, dated... and then periodically those items would be delivered to the organizations chosen for Bucknell Harvest."

Along with Bill Gruver, professor of management and faculty adviser for Bucknell Harvest, Eng has been busy recruiting drivers.

"Drivers are what we need," he said. He walked through the cafeteria and set up a table in the Langone Center to interest possible drivers.

Drivers must have a University license in order to participate, since University vehicles will be used.

To make sure that Bucknell Harvest will continue after he graduates in May, Eng is not looking to take any leadership role after the program becomes established.

"I don't want a leadership position," Eng explained. "This is something for the campus to do."

Instead, he is working closely with the Bucknell Student Government to form a committee to run the program.

"What we're asking for BSG to do is to set up committees of organizations on campus who do want to help out. The committee will run with this program," he said.

He said the feedback from Tracy Gray, president of BSG, has been "pretty positive. He's willing to do something with this."

However, there are still questions that need to be overcome.

Tenon said that some legal issues still need to be addressed, such as what type of food items can be delivered, how often the food will be delivered, as well as the wording of the official document for this project.

Both Eng and Tenon said that this project was attempted a couple years ago by when another student, but it was prevented because of certain laws that have since been changed.

Eng hopes to have all the details worked out by the end of this semester, so the committee can begin to organize bimonthly drives. The number of drives will hopefully increase as support grows, Eng said.

Susquehanna Valley Women in Transition, Haven Ministries and the Lewisburg Community Center have all indicated that they are interested in receiving Dining Service's extra food.

The food that will be given are bread products, concentrated juice, and nonperishables. Nothing that has been cooked will be donated.

Dining Services has worked with Haven Ministries in the past, organizing food and monetary donations around the holidays. Bucknell Harvest will be a year-long project.

PUBLIC SAFETY LOG

January 22, 1997

INFORMATION — A Bucknell student reported to Public Safety that 10 pills were found missing from his prescription drug container. The medication may have been removed at home or at the University. The investigation is continuing.

INFORMATION ASSIST LOCAL POLICE — Public Safety assisted the East Buffalo Township Police Department in locating the operator of a vehicle which was abandoned after sliding into a culvert across from the entrance to Bucknell West.

January 23, 1997

INFORMATION— Public Safety responded to the Finance Office in Marts Hall for the report of an individual who gave false information to remove a report from that department.

INFORMATION — Public safety Officers responded to Taylor Hall for the report of an individual attempting to purchase text books. The buyer was located, advised of University policy, and escorted from the property.

January 24, 1997

ASSIST LOCAL POLICE — Public Safety Officers were called to Vedder Circle for a vehicle reported by East Buffalo Township Police to have been involved in a disorderly conduct incident at Perkin's Restaurant in Lewisburg. The vehicle was issued University parking citations for illegal parking. The operator was later located and referred to East Buffalo Township Police Department.

VANDALISM — Public Safety responded to Swartz Hall for a broken window pane in the door of D wing. A search of the area met with negative results in finding the possible suspect. The window was repaired.

January 25, 1997

INFORMATION — Public Safety received a report that a barking dog ran toward a University student while he was walking near Sigma Chi Fraternity. The student was not injured.

VANDALISM — Public Safety responded to the women's restroom on the first floor of the Langone Center where a dispensing machine had been damaged. The investigation is continuing.

January 26, 1997

MINOR VEHICLE ACCIDENT — A student reported to Public Safety that her car was struck in the rear while stopped for pedestrians on Dent Drive. The other vehicle was operated by another student. The collision caused minor damage to both vehicles.

ALLEGED MARIJUANA USE — Public Safety reported to Smith Hall on the report of the odor of marijuana. The occupant of the room admitted to having smoked marijuana and showed Public Safety what appeared to be marijuana leaves. Lewisburg Police Department will file charges.

INSTITUTIONAL VANDALISM — Public Safety responded to Swartz Hall B Wing for a fire alarm activation. Papers were burned on two bulletin boards and the Residence Director's room door. One fire burned out and the other two were extinguished by students using University extinguishers. The investigation is continuing. East Buffalo Township Police Department was notified.

VANDALISM — Public Safety found a broken pane of glass in a window in Vaughn Literature Library while unlocking the room for a meeting. The investigation is continuing.

Public Safety recovered a jacket and wallet outside Vaughn Literature building. The owner of the articles reported that the coat was missing from Delta Upsilon Fraternity. Some money was taken from the wallet. The investigation is continuing.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

EXCHANGE

from page 1

applicants than it exports to other universities, the program is very competitive for students applying to the University.

The university has offered between eight and fifteen exchange awards each year. Ninety-six students applied for the 1996-7 school year, and so far 127 have applied for the 1997-8 school year (applications are due on March 20 and decisions will be announced in early April). During 1996-7, Bucknell sent only sixteen of its faculty's and staff's children to other schools involved in the tuition exchange program.

Bucknell tuition exchange scholarships for the current school year total $14,800; regular Bucknell tuition is $20,230

All University tuition exchange candidates, including enrolled upperclassmen and first year students, are considered by admissions and personnel services. A priority list is established from the eligible tuition exchange candidates. For students currently enrolled at Bucknell, the priority list is created in regard to each student's academic performance and extracurricular contribution. For first year applicants, secondary achievement and potential for contribution are considered.

Some universities involved in the Tuition Exchange Organization include Franklin and Marshall College, Drew University, Connecticut College, Seton Hall University, and the University of Richmond.

Family investigator thinks JonBenet Ramsey's killer worked with Ramsey's company

NEW YORK — JonBenet Ramsey's killer knew that $118,000 was in her father's retirement account, suggesting that a disgruntled former employee of John Ramsey killed his daughter, a family investigator said.

"This person has a very unique, intimate knowledge about his financial workings," said John Douglas, a former FBI agent hired by the Ramsey family for his experience in preparing criminal profiles. "Therefore the person would have to be somehow related to his employment."

Douglas, in an interview broadcast Tuesday on "Dateline NBC," said he spent several hours with the Ramseys and visited their three-story mansion in Boulder, Colorado, where the 6- year-old's father found her dead Dec. 26.

A three-page ransom note found by JonBenet's mother, Patricia Ramsey, demanded $118,000, the amount of the bonus Ramsey received last year from Access Graphics, the billion-dollar computer company he founded.

FAA releases more data on air safety via Internet

WASHINGTON — The Federal Aviation Administration is set to release to the general public more detailed airline safety information, according to the United States senator, Ron Wyden (D-Oregon) who requested they make more information readily available.

While the agency will not attempt to rank airlines according to their safety, it will release data about individual carriers, information that has been widely sought following recent accidents. Among the information available will be facts about near mid-air collisions, and fines levied against airlines for safety infractions.

The information will be made available via the World Wide Web on the Internet Safety Page, Wyden said.

Disclosures that FAA inspectors had been investigating safety problems at ValuJet before that airline's deadly crash last May caused a clamor for the FAA to report on the safety of various carriers.

Holiday Inn drops transsexual ad that premiered at the Super Bowl due to "offensive" nature

ATLANTA (AP) — Holiday Inn's TV ad featuring a transsexual was pulled quickly after its Super Bowl premiere because some people found it offensive.

The ad, aimed at dramatizing the company's $1 billion renovation program, showed a woman drawing admiring glances at a class reunion. She turns out to be a male alumnus who had a sex-change operation.

The company said it aired the ad because consumer sampling prior to its broadcast showed many people liked it. The commercial ran in the second half of the Super Bowl telecast.

World News

Zaire accuses Uganda of invasion

KINSHASA, Zaire — Zaire said yesterday that several thousand Ugandan troops had invaded its territory, but Uganda immediately dismissed the accusation as laughable.

A military high command statement said about 2,000 Ugandan troops had left the Zairian town of Fizi — about 350 kms (200 miles) southwest of the Ugandan border — and were heading in the direction of Kalemie in mineral-producing Shaba province.

"It is absolute falsehood. It is in fact laughable that we would be so stupid as to openly send troops into Zaire. Even the geographical locations mentioned do not make sense," Hope Kivengere, spokeswoman for President Yoweri Museveni, told Reuters by telephone from Kampala.

"The Zairian statement lacks credibility. We have not sent any troops at all to Zaire," Kivengere added.

Pakistani court upholds Bhutto's dismissal

ISLAMABAD, Pakistan — Pakistan's Supreme Court has cleared the way for new national elections, ruling yesterday that President Farooq Leghari was legally justified when he dismissed Prime Minister Benazir Bhutto on Nov. 5.

"There is enough material to establish corruption, nepotism and misrule," said Chief Justice Sajjad Ali Shah at the close of the hearing that began Jan. 13 on Bhutto's petition to have her dismissal reversed.

Six of the seven judges ruled that Leghari's attorneys had shown ample evidence of violating the constitution, ridiculing and harassing judges, and tapping the phones of judges, civil servants and political opponents.

Bhutto has denied the charges and accused Leghari of dismissing her government to consolidate his own power. Bhutto called the ruling "unfair," but said she "didn't expect any justice" and was therefore not surprised by the verdict.

Witnesses said police and Bhutto supporters clashed outside the court immediately following the verdict, but there was no word on arrests or injuries. Hundreds of riot police surrounded the courthouse, preventing people from storming the building.

Chechen president to negotiate with Moscow

GROZNY, Russia — Chechnya's president-elect says he is ready to negotiate with Moscow over the republic's political status — but he also declared that Chechnya already has won its freedom.

The first official results released yesterday confirmed that Aslan Maskhadov won an overwhelming mandate from Chechen voters, collecting nearly 65 percent of the vote with most ballots counted.

Maskhadov took a non-confrontational but tough stance toward Russia, cautioning that he will compromise only "within reasonable limits."

"There is only one thing I can tell Russia: We do not want Russia to have the right to kill our people with such impunity," Maskhadov said in an interview published yesterday in the weekly newspaper Argumenty i Fakti.

Some Grozny residents went further, demanding that Russia pay compensation for the war, which reduced the southern republic to ruins.

Welcome back from all of us at *The Bucknellian*.

FIRE

from page 1

the exact cost of the fire's damage has not yet been determined, "it can be classified as minor damage."

Apparently the fires in the lounge and the RD's door expended themselves. The fires within the halls, however, were extinguished by students. Megan McCarthy '99, Resident Assistant of 3B, extinguished the fire in her hall after being awakened by the fire alarm.

Philip Huggins '99 and Todd Zeranski '99, roommates in 2B hall, used a fire extinguisher to exterminate the fire in their hall. Zeranski was brushing his teeth when the fire alarm was activated. As he exited the men's room, Zeranski witnessed "the blazing bulletin board with flames from the floor to the ceiling and burning pieces of paper on the floor."

Zeranski said, "I panicked a little. I wasn't really scared, just shocked- it was like a surreal experience. It was the last thing I expected to see, since we have about five or six false fire alarms a week on this hall."

Zeranski summoned Huggins (whom at first refused to believe the actuality of the fire) and the two "sprayed the fire for about ten seconds until it was out."

Huggins and Zeranski proceeded to exit the building, and were soon joined by other members of "B" wing. The residents were detained in Swartz main lounge for approximately 45 minutes until Public Safety had surveyed the damage and cleared out some of the smoke.

Responding to his new status, Zeranski said, "I don't really consider myself to be some sort of hero. I would hope anybody would do the same thing. I don't think I deserve any special treatment or anything. Looking back on it, I'm just glad that the worst thing that happened was some burnt paper and boards. It could have been a lot worse."

The Office of Housing and Residential Life is offering a $400 reward for help in identifying the person(s) responsible for setting the fires. Anyone with relevant information should contact the Office of Public Safety or the Office of Housing and Residential Life. All callers may choose to remain anonymous.

Cara Mickelsen—The Bucknellian
Philip Huggins '99 and Todd Zeranski '99

Senior survey delayed, to be taken in the spring

BY ARGUN ULGEN

Bucknellian Staff Writer

When the class of 1997 registered for classes this semester, they may have noticed that they were not asked to take the senior survey typically given at that time.

The University Psychological Services has postponed its annual senior survey until April, because seniors have stated in past years that the second semester of their senior year is an important time in their lives.

Many significant experiences that students encounter at the University occur during their last semester as undergraduates.

Postponing the senior survey to April will allow the seniors' last semester in their analysis of the surveys.

In addition, since more time has been provided, Psychological Services hopes to create more insightful questions to ask seniors in April.

The purpose of the senior survey is to aid Psychological Services in understanding student's feelings towards the University.

Data comparisons and longitudinal data analysis help foster an understanding of student opinions on such subjects as academics and campus life.

All seniors are encouraged to take the senior survey, as it plays a vital role in the University's understanding of the effects it has on the student body.

New alcohol policy dries up tradition

The word's out and it's official. There will be no alcohol served at this year's Tent Party on Commencement Weekend. Congratulations class of 1997! You're about to get started in the real world, but you're being deprived of the decision of whether or not you consume wine or beer at the tent party. Because this year, it's going to be dry.

For many years, graduation weekend has included a tent party on the Friday night before commencement exercises. Graduates and their families and friends were invited to participate in an evening of dancing and fellowship with the option of partaking of wine and beer. This year there will be no alcoholic beverages.

In his letter to the seniors, President Adams said that the reasons behind the decision are to ensure the well-being of the students and to avoid legal trouble. To be brutally honest, we all know that alcohol abuse is a problem on our campus, touching both those under the age of 21 and those of legal age. Though we don't need to accept this decision or believe that it is the correct decision, we need to acknowledge that we need to move in a direction of responsible drinking.

Legal issues probably play a stronger role in this decision than anyone wants to admit. That's what it's all about. The University is so scared of becoming involved in a legal suit that it is doing away with tradition on campus.

Let's face it. Anything can bring a liability charge in this day and age. Why is the University succumbing to the pressures that modern America is applying? The University needs to reevaluate its agenda in condemning alcoholic beverages at this event and others like it, such as the Homecoming tailgate. Is the outside chance of a shadow of a problem worth disrupting a tradition that is eagerly anticipated and remembered by students, alumni and parents?

As adults, we, our family and our friends should be able to partake of celebaratory beverages—alcoholic or otherwise. And the University needs to remember that although legal issues are important, there is something to be said for tradition and giving a situation the benefit of the doubt for being problem-free.

Is forbidding alcohol consumption at these student-oriented events the best solution? If it has been a problem that those underage were acquiring wrist bands through older friends, why not move to a procedure such as a night club in which everyone entering the premises must show identification. Individuals under 21 could be identified by a hand stamp or the like. This would keep the alcohol out of the hands of underage students, instead of declaring the entire event alcohol-free.

Unfortunately, the decision seems final. Our hope is that it was really based upon the well-being of the students and not the potential of legal battles.

LETTERS

President Adams announces new no-alcohol policy for graduation tent party

AN OPEN LETTER TO THE CLASS OF 1997:

I take the unusual step of writing you this open letter in order to share with you a significant concern and to explain a decision I have made as a result of that concern.

In my nearly two years as Bucknell's president, I have been positively impressed by many things. This is a place of numerous and special strengths, including a wonderfully talented student body, of which you are now in many ways the symbolic leaders and representatives.

Of course, I have also observed a very few things during the past two years that cause me concern. One of those is the abuse of alcohol on the campus. Bucknell is no different from other very good schools in this respect, and all of us recognize that the abuse of alcohol is a national, not just a local problem. But these facts should not cause us to be any less concerned about our own circumstances.

My interest in this matter was aroused last spring following the Gala celebration of Bucknell's sesquicentennial. The Gala was in almost every way a fine occasion. But the evening was changed for me, for the worse, upon learning the next day that three students were taken to the hospital that night for severe cases of alcohol intoxication. All of the students were underage, and two of the three were wearing wristbands designed to ensure that only persons of legal age were served alcohol. This system of identification is the same system used at the Commencement tent party and the tailgate at Homecoming.

That experience caused me to reflect upon the University's occasional practice of serving alcohol at *open* events designed primarily for students, or where very large numbers of students are present. Such events— hosted and funded solely by the institution —are not numerous. But I realized upon reflection, and in light of the alarming cases I have just mentioned and other incidents, that they may pose a health risk to some students and a significant legal liability to the University. As I think all of you know, state and federal laws very clearly insist that the providers of alcohol be held responsible for illegal consumption and any harmful consequences such consumption might have.

So I began to talk with people about my concern, beginning with members of the Office of the Dean of Students, and other student affairs personnel. I then reached out to other groups with full or partial student representation, including the Committee on Complementary Activities and the Commencement Committee. I spoke at length with the Executive Committee of the Bucknell Student Government and with the senior class officers. In all of these meetings, I tried to explain my concerns and to listen carefully to the responses they evoked.

One of the things I learned through these conversations is that students, especially seniors, are strongly attached to those few, primarily student events—the tent party at Commencement and the tailgate at Homecoming—where the University is the host of the event or the primary provider of alcohol, or both. I understand the attachment, and I am sure I would share it if I were a student. But another thing I have learned is that it is virtually impossible to ensure that illegal and sometimes abusive drinking on a rather significant scale does not occur at such events. I appreciated the candor of students when questioned about this. The answers I received did not lessen my concern; indeed, they increased it. I have also learned that underage residents from Lewisburg have been served alcohol at these events.

I have spent a great deal of time since the end of the fall semester thinking about this matter. Reluctantly but surely, I have come to the conclusion that we should not serve alcoholic beverages at University-sponsored and hosted events designed primarily for students or where very large numbers of students may be present. The risks of illegal consumption and of some terribly unfortunate accident, and the ensuing legal exposure of the University, are simply too great. I have therefore decided to alter the language of Bucknell's alcohol policy in such a way as to preclude the University from serving alcohol at these kinds of events. Other aspects of the alcohol policy, including those governing student organizations, will remain unchanged.

This change will mean that the tent party at your Commencement will be an alcohol-free event for the first time in many years. I cannot and do not expect that all or even many of you will agree with this decision. I do hope that most of you will try to understand my reasons for making it, in which no way suggest a lack of confidence or trust in you as individuals or as a group. I also hope that you will ultimately conclude, with me, that the presence of alcoholic beverages at the tent party should not be a necessary condition for enjoying an occasion as auspicious and happy as Commencement.

I have assured the senior class officers that the resources used in previous years to purchase alcohol for the tent party will be kept in the budget and used to make this moment of celebration a special one. You will be hearing more about this as Commencement planning goes forward.

Let me close by saying that I would welcome the opportunity to have direct discussions about this decision, in venues that you might suggest. I hope you will write to me with your thoughts, or share them through email (wadams@bucknell).

Thank you for taking the time to read this letter and for your understanding.

WILLIAM D. ADAMS
PRESIDENT
JANUARY 29, 1997

Poem expresses reality and fear for parent

TO THE EDITOR:

This heartbreaking poem that I came upon epitomizes the reality and the fear that we parents and young ladies and men have within us every day of our lives, whether we are conscious of it or not.

Read and discuss it, so that you all will be aware and take care of each other.

Each one of you is every parent's child, just as all of us are your parents. We are one, we can all relate.

Please share it with everyone you know. Do it for all of us.

Death Of An Innocent

I went to a party, Mom, I remember what you said.
You told me not to drink, Mom, so I drank soda instead.
I really felt proud inside, Mom, the way you said I would.
I didn't drink and drive, Mom, I know you are always right.
Now the party is finally ending, Mom, and everyone is driving out of sight.

As I got into my car, Mom, I knew I'd get home in one piece.
Because of the way you raised me, so responsible and sweet.
I started to drive away, Mom, but as I pulled out into the road, the
other car didn't see me, Mom, and hit me like a load.
As I lay there on the pavement, Mom, I heard the policeman say, the
other guy is drunk, Mom, and I'm the one who will pay.
I'm lying here dying, Mom, I wish you'd get here soon.

How could this happen to me, Mom? My life just burst like a balloon.
There is blood all around me, Mom, and most of it is mine.
I hear the medic say, Mom, I'll die in a short time.
I just wanted to tell you, Mom, I swear I didn't drink.
It was the others, Mom. The others didn't think.
He was probably at the same party as I.
The only difference is, he drank and I will die.

Why do people drink, Mom? It can ruin your entire life.
I'm feeling sharp pains now. Pains just like a knife.
The guy who hit me is walking, Mom, and I don't think it's fair.
I'm lying here dying and all he can do is stare.

Tell my brother not to cry, Mom. Tell Daddy to be brave.
And when I go to heaven, Mom, put "Daddy's Girl" on my grave.
Someone should have told him, Mom, not to drink and drive.
If only they had told him, Mom, I would still be alive.

My breath is getting shorter, Mom. I'm becoming very scared.
Please don't cry for me, Mom. When I needed you, you were always there.
I have one last question, Mom, before I say goodbye.
I didn't drink and drive, so why am I the one to die?

OPINIONS

U.S. Supreme Court oversteps judicial bounds

BY BRIAN J. WALSH

In recent weeks both Democrats and Republicans have been criticized for accepting campaign donations from labor unions and big business, respectively. While the legality of these contributions has been a primary area of concern in some instances, an invariable question that has been raised deals with the perceived legislative favoritism and access that might be granted to organizations who make them.

Even before the most recent campaign charges had been voiced, many Americans had come to believe that their voices were being lost on the ears of well-funded legislators, and as recent elections have shown, it is obvious that the American citizenry is sick of the "politics as usual" mentality that has unfortunately permeated many of those inside the Beltway. It is stunning, then, that in light of the many proposed reforms that are supported by the majority of citizens, the greatest systemic threat to our democracy continues to be ignored in the area of political debate.

The continued rise of judicial activism in this country is undermining the values and principles upon which this country was founded by stripping states and elected officials of their constitutional right to legislate. The famed historian Alexis de Toqueville once stated that it was inevitable that every political issue in America would at some point become a judicial issue. While it is true that properly done, judicial review is an integral tool for the proper implementation of a political philosophy, if such review is conducted in an improper manner, as has been the case in the past half-century, it becomes in itself, a political act.

The sad irony is that the branch of government charged with upholding the Constitution has chosen to ignore the Tenth Amendment, which states clearly that "the powers not delegated to the United States by the Constitution...are reserved to the States respectively, or to the people." The amendment considered by many founders to be the most important has since been replaced with the unspoken amendment of "we know what's best for you."

For those who might choose to dismiss such seemingly preposterous accusations, it would serve them well to examine the words of a past Chief Justice, Charles Evans Hughes, who stated that "We are under a Constitution, but the Constitution is what the judges say it is." Guided by this mentality, the Supreme Court has unleashed a wide range of opinions that have suspended whole sections of state constitutions, imposed detailed mandates, ordered action by officials at all levels of government, and remarkably enough, have even mandated taxes on various municipalities who turned them down at the ballot box.

Beginning with their 1954 decision, *Brown vs. Board of Education*, the Supreme Court has taken upon itself the title of an unelected "super legislature" whose power and decisions have since gone unchecked. Contrary to what many critics might say, the inclusion of this decision is in no way a support of segregation. Rather, its significance lies in the date from which the Supreme Court departed radically from the established interpretations of rights guaranteed by the Constitution, and began to rule with vague assumptions of the "spirit of the Constitution," the purpose of which was to find a vehicle to promote and implement their particular political ideologies. From this point forward, it has become the status quo that all previously accepted "rights" and current pieces of legislation can now be subjected to judicial review and reversed regardless of their support by the citizenry. To be sure, we must always keep in mind the words of Madison, who warned of the "tyranny of the majority;" however, as it is the case that a simple 5-4 vote by the Supreme Court becomes the law of the land, should not we as citizens be wary of this "majority" as well?

Currently, the makeup of the Supreme Court finds itself at a dangerous precipice with the moderate holding a slim 5-4 margin. Unfortunately, with the reelection of Bill Clinton, who nominated two of the most liberal justices in history, the retirement of a justice in the next four years could quite possibly plunge the Court into a bastion of social policies that would far exceed any of its past actions.

The disregard for which Clinton—nominees Ginsberg and Breyer hold for the opinion of the American people is frightening. Both justices were recently part of a 5-4 majority in which the Court struck down state-imposed term limits on members of the U.S. Congress. As a result, the term-limit laws of 22 states, 21 of which had been adopted by the voters directly in initiatives or referenda, were declared invalid. Unfortunately, this has been just one of many cases in which the will of the people has been thwarted by an unelected "super legislature." Unless the 105th Congress takes some action to limit this unlimited power, it won't really matter who has access to our legislators because they will not be the branch that forms legislation anymore.

Marijuana for medicinal purposes justifiable

BY ALLISON PRICE
Bucknellian Staff Columnist

A friend of mine lost her mother to leukemia at the age of six. Many memories, both glorious and painful are blurry, she tells me. She did remember, in the midst of the ongoing controversy concerning the use of marijuana for medical purposes, that she was once told that her father baked marijuana brownies for her mother as she was in the throes of the fierce chemotherapy. Bittersweetly, she remembers her father explaining he did not bake them correctly and the brownies tasted wretched. Recently, she asked her father how he got the controlled substance. He was rather embarrassed by her question and said he had gotten it through a friend. Ironically, for the college student with money to burn, pot is an easy score on most college campuses and for most there are no moral qualms or embarrassment in the act of acquiring it. In between these two opposite extremes are the frightening statistics of how many junior high school students in the United States reportedly acquire and use marijuana yearly.

> ***On the whole, Americans do believe in the use of marijuana for medical purposes.***

I am certain that as they formulated their response to the recent passage of Proposition 215 in California that would have allowed for the medical use of marijuana in that state, the Clinton Administration looked out across this country and saw those extremes, and in the end opted for the most myopic, misguided and simplistic response possible. The administration has brought out the big guns, promising to prosecute the use of controlled substances for all purposes to the extent of withdrawing the licenses of doctors who prescribe them to their patients. I honestly believe that in the hearts of most Americans, including President Clinton, who lost his mother to cancer, they see all the reasons in the world to allow patients such as those suffering from cancer, glaucoma and AIDS to use marijuana in a controlled manner. However, the tremendous fear embodied in the statistics accompanies that long, hard look at real drug use across the nation.

For all the well-intentioned efforts on the part of the American medical establishment, schools, government and interest groups of all kinds, we cannot offer a coherent vision of why people should not smoke pot. Prevention efforts are so reliant of the shallow legal angle that reforming laws to allow the medical use of marijuana threatens their entire strategy. Meanwhile, there is no wonder that the strategy is failing.

The adolescents we scare to death with the law get to college where we all know you do not necessarily get caught, and the decision not to use pot must come from more abstract reasoning. It is not as easy as just saying no, and real friends *do* do drugs. Marijuana does not pose the same health risks as other drugs, such as immediate addiction, and easy overdose. The same kids once again do not make the same universal connections why using pot is wrong, as the failure to form a coherent vision as to why not to use pot also represents a failure to unite Americans in one moral vision. Recreational pot users do not see themselves as being party to random drug deaths in the inner city, even though they contribute to the industry. Laws only work as far as Americans believe in them.

On the whole, Americans do believe in the use of marijuana for medical purposes. The Clinton Administration's resistance to the reform detracts from all the good government intervention can do in the lives of people. Medical marijuana can be regulated and treated as medication —therefore no more bad or even dangerous brownies for well-intentioned people watching those they love die of cancer. If marijuana is prescribed, people seeking it for medical use are considerably less likely to be exploited in their search for a usually illegal substance. These folks are not criminals. So very little progress has been made in the treatment of AIDS that those who suffer from it and other diseases are entitled to any help they can get. In the end, these logical arguments are overshadowed by a failure to truly understand and redefine the real problem of drug abuse in the U.S. This goes beyond the letter of law alone.

Political sensationalism undermines the image of the Chief Executive

BY NORA DANIELS
Bucknellian Staff Columnist

I wonder sometimes why anyone would actually want to be president and pursue such a desire. Sure, to be President of the United States is a powerful position, and one from which one can positively affect not just Americans but citizens of every country in the world. To me, though, the negatives subtract from the status and responsibilities of the Chief Executive.

William Jefferson Clinton has just begun his second four-year term as President, and he clearly knows, from experience, that he will be criticized and accused in regard to his actions: past, present and future.

The press has attacked Clinton's public, private, and political lives over the past four years. Remember the negative way some Americans reacted when Bill and Hillary decided that their daughter, Chelsea, should attend private school? And what about the criticism the Clintons faced due to Hillary's role in everything from health care reform to women's rights? Whitewater—need I say more? Paula Jones, too—the list could go on and on, but the point is obvious already.

We, as the American public, don't know if these allegations and criticisms are deserved or even as important as some seem to believe. Many of these and other stories and claims about William Jefferson Clinton will never truly be proved or disproved; some have faded into oblivion, and others remain as question marks on Clinton's presidency. Despite this uncertainty, however, the public has chosen Bill Clinton as the leader of this country until the year 2000. That same public, however, will continue to criticize and complain about his life and actions. But, what would have happened if Dole had been elected on November 7? Would we be worrying about his age and possible health problems due to his age? Probably. We won't know if he would have been a better or worse choice, and that is the nature of life and politics. It is possible, as well, that another man could have been elected, namely Newt Gingrich.

Speculatively, at least, the American public would be complaining and criticizing—not about Watergate, Paula Jones and Hillary—but about the misuse of government funds, the fracturing of support by his own party, his somewhat questionable marriage specifics and even his lesbian relative.

So what it comes down to is this: Clinton has stuck his neck out for the next four years in order to lead America. The people have chosen him despite his character flaws, and he has chosen to continue to embrace the challenge of leadership. Sure, he's not perfect, and some of his actions deserve investigation, but to tear apart every aspect of everything he does is not going to help. Nothing in life is perfect—no person, including the president, is perfect either and nothing will change that fact. Basically, our lives will be the same if Bill, Newt or Bob were elected on November 7th—even though the three seem like such different men.

EDITORIAL

New alcohol policy dries up tradition

The word's out and it's official. There will be no alcohol served at this year's Tent Party on Commencement Weekend. Congratulations class of 1997! You're about to get started in the real world, but you're being deprived of the decision of whether or not you consume wine or beer at the tent party. Because this year, it's going to be dry.

For many years, graduation weekend has included a tent party on the Friday night before commencement exercises. Graduates and their families and friends were invited to participate in an evening of dancing and fellowship with the option of partaking of wine and beer. This year there will be no alcoholic beverages.

In his letter to the seniors, President Adams said that the reasons behind the decision are to ensure the well-being of the students and to avoid legal trouble. To be brutally honest, we all know that alcohol abuse is a problem on our campus, touching both those under the age of 21 and those of legal age. Though we don't need to accept this decision or believe that it is the correct decision, we need to acknowledge that we need to move in a direction of responsible drinking.

Legal issues probably play a stronger role in this decision than anyone wants to admit. That's what it's all about. The University is so scared of becoming involved in a legal suit that it is doing away with tradition on campus.

Let's face it. Anything can bring a liability charge in this day and age. Why is the University succumbing to the pressures that modern America is applying? The University needs to reevaluate its agenda in condemning alcoholic beverages at this event and others like it, such as the Homecoming tailgate. Is the outside chance of a shadow of a problem worth disrupting a tradition that is eagerly anticipated and remembered by students, alumni and parents?

As adults, we, our family and our friends should be able to partake of celebaratory beverages—alcoholic or otherwise. And the University needs to remember that although legal issues are important, there is something to be said for tradition and giving a situation the benefit of the doubt for being problem-free.

Is forbidding alcohol consumption at these student-oriented events the best solution? If it has been a problem that those underage were acquiring wrist bands through older friends, why not move to a procedure such as a night club in which everyone entering the premises must show identification. Individuals under 21 could be identified by a hand stamp or the like. This would keep the alcohol out of the hands of underage students, instead of declaring the entire event alcohol-free.

Unfortunately, the decision seems final. Our hope is that it was really based upon the well-being of the students and not the potential of legal battles.

LETTERS

President Adams announces new no-alcohol policy for graduation tent party

AN OPEN LETTER TO THE CLASS OF 1997:

I take the unusual step of writing you this open letter in order to share with you a significant concern and to explain a decision I have made as a result of that concern.

In my nearly two years as Bucknell's president, I have been positively impressed by many things. This is a place of numerous and special strengths, including a wonderfully talented student body, of which you are now in many ways the symbolic leaders and representatives.

Of course, I have also observed a very few things during the past two years that cause me concern. One of those is the abuse of alcohol on the campus. Bucknell is no different from other very good schools in this respect, and all of us recognize that the abuse of alcohol is a national, not just a local problem. But these facts should not cause us to be any less concerned about our own circumstances.

My interest in this matter was aroused last spring following the Gala celebration of Bucknell's sesquicentennial. The Gala was in almost every way a fine occasion. But the evening was changed for me, for the worse, upon learning the next day that three students were taken to the hospital that night for severe cases of alcohol intoxication. All of the students were underage, and two of the three were wearing wristbands designed to ensure that only persons of legal age were served alcohol. This system of identification is the same system used at the Commencement tent party and the tailgate at Homecoming.

That experience caused me to reflect upon the University's occasional practice of serving alcohol at *open* events designed primarily for students, or where very large numbers of students are present. Such events— hosted and funded solely by the institution —are not numerous. But I realized upon reflection, and in light of the alarming cases I have just mentioned and other incidents, that they may pose a health risk to some students and a significant legal liability to the University. As I think all of you know, state and federal laws very clearly insist that the providers of alcohol be held responsible for illegal consumption and any harmful consequences such consumption might have.

So I began to talk with people about my concern, beginning with members of the Office of the Dean of Students, and other student affairs personnel. I then reached out to other groups with full or partial student representation, including the Committee on Complementary Activities and the Commencement Committee. I spoke at length with the Executive Committee of the Bucknell Student Government and with the senior class officers. In all of these meetings, I tried to explain my concerns and to listen carefully to the responses they evoked.

One of the things I learned through these conversations is that students, especially seniors, are strongly attached to those few, primarily student events—the tent party at Commencement and the tailgate at Homecoming—where the University is the host of the event or the primary provider of alcohol, or both. I understand the attachment, and I am sure I would share it if I were a student. But another thing I have learned is that it is virtually impossible to ensure that illegal and sometimes abusive drinking on a rather significant scale does not occur at such events. I appreciated the candor of students when questioned about this. The answers I received did not lessen my concern; indeed, they increased it. I have also learned that underage residents from Lewisburg have been served alcohol at these events.

I have spent a great deal of time since the end of the fall semester thinking about this matter. Reluctantly but surely, I have come to the conclusion that we should not serve alcoholic beverages at University-sponsored and hosted events designed primarily for students or where very large numbers of students may be present. The risks of illegal consumption and of some terribly unfortunate accident, and the ensuing legal exposure of the University, are simply too great. I have therefore decided to alter the language of Bucknell's alcohol policy in such a way as to preclude the University from serving alcohol at these kinds of events. Other aspects of the alcohol policy, including those governing student organizations, will remain unchanged.

This change will mean that the tent party at your Commencement will be an alcohol-free event for the first time in many years. I cannot and do not expect that all or even many of you will agree with this decision. I do hope that most of you will try to understand my reasons for making it, in which no way suggest a lack of confidence or trust in you as individuals or as a group. I also hope that you will ultimately conclude, with me, that the presence of alcoholic beverages at the tent party should not be a necessary condition for enjoying an occasion as auspicious and happy as Commencement.

I have assured the senior class officers that the resources used in previous years to purchase alcohol for the tent party will be kept in the budget and used to make this moment of celebration a special one. You will be hearing more about this as Commencement planning goes forward.

Let me close by saying that I would welcome the opportunity to have direct discussions about this decision, in venues that you might suggest. I hope you will write to me with your thoughts, or share them through email (wadams@bucknell).

Thank you for taking the time to read this letter and for your understanding.

WILLIAM D. ADAMS
PRESIDENT
JANUARY 29, 1997

Poem expresses reality and fear for parent

TO THE EDITOR:

This heartbreaking poem that I came upon epitomizes the reality and the fear that we parents and young ladies and men have within us every day of our lives, whether we are conscious of it or not.

Read and discuss it, so that you all will be aware and take care of each other.

Each one of you is every parent's child, just as all of us are your parents. We are one, we can all relate.

Please share it with everyone you know. Do it for all of us.

Death Of An Innocent

I went to a party, Mom, I remember what you said.
You told me not to drink, Mom, so I drank soda instead.
I really felt proud inside, Mom, the way you said I would.
I didn't drink and drive, Mom, I know you are always right.
Now the party is finally ending, Mom, and everyone is driving out of sight.

As I got into my car, Mom, I knew I'd get home in one piece.
Because of the way you raised me, so responsible and sweet.
I started to drive away, Mom, but as I pulled out into the road, the
other car didn't see me, Mom, and hit me like a load.
As I lay there on the pavement, Mom, I heard the policeman say, the
other guy is drunk, Mom, and I'm the one who will pay.
I'm lying here dying, Mom, I wish you'd get here soon.

How could this happen to me, Mom? My life just burst like a balloon.
There is blood all around me, Mom, and most of it is mine.
I hear the medic say, Mom, I'll die in a short time.
I just wanted to tell you, Mom, I swear I didn't drink.
It was the others, Mom. The others didn't think.
He was probably at the same party as I.
The only difference is, he drank and I will die.

Why do people drink, Mom? It can ruin your entire life.
I'm feeling sharp pains now. Pains just like a knife.
The guy who hit me is walking, Mom, and I don't think it's fair.
I'm lying here dying and all he can do is stare.

Tell my brother not to cry, Mom. Tell Daddy to be brave.
And when I go to heaven, Mom, put "Daddy's Girl" on my grave.
Someone should have told him, Mom, not to drink and drive.
If only they had told him, Mom, I would still be alive.

My breath is getting shorter, Mom. I'm becoming very scared.
Please don't cry for me, Mom. When I needed you, you were always there.
I have one last question, Mom, before I say goodbye.
I didn't drink and drive, so why am I the one to die?

U.S. Supreme Court oversteps judicial bounds

BY BRIAN J. WALSH

In recent weeks both Democrats and Republicans have been criticized for accepting campaign donations from labor unions and big business, respectively. While the legality of these contributions has been a primary area of concern in some instances, an invariable question that has been raised deals with the perceived legislative favoritism and access that might be granted to organizations who make them.

Even before the most recent campaign charges had been voiced, many Americans had come to believe that their voices were being lost on the ears of well-funded legislators, and as recent elections have shown, it is obvious that the American citizenry is sick of the "politics as usual" mentality that has unfortunately permeated many of those inside the Beltway. It is stunning, then, that in light of the many proposed reforms that are supported by the majority of citizens, the greatest systemic threat to our democracy continues to be ignored in the area of political debate.

The continued rise of judicial activism in this country is undermining the values and principles upon which this country was founded by stripping states and elected officials of their constitutional right to legislate. The famed historian Alexis de Toqueville once stated that it was inevitable that every political issue in America would at some point become a judicial issue. While it is true that properly done, judicial review is an integral tool for the proper implementation of a political philosophy, if such review is conducted in an improper manner, as has been the case in the past half-century, it becomes in itself, a political act.

The sad irony is that the branch of government charged with upholding the Constitution has chosen to ignore the Tenth Amendment, which states clearly that "the powers not delegated to the United States by the Constitution...are reserved to the States respectively, or to the people." The amendment considered by many founders to be the most important has since been replaced with the unspoken amendment of "we know what's best for you."

For those who might choose to dismiss such seemingly preposterous accusations, it would serve them well to examine the words of a past Chief Justice, Charles Evans Hughes, who stated that "We are under a Constitution, but the Constitution is what the judges say it is." Guided by this mentality, the Supreme Court has unleashed a wide range of opinions that have suspended whole sections of state constitutions, imposed detailed mandates, ordered action by officials at all levels of government, and remarkably enough, have even mandated taxes on various municipalities who turned them down at the ballot box.

Beginning with their 1954 decision, *Brown vs. Board of Education*, the Supreme Court has taken upon itself the title of an unelected "super legislature" whose power and decisions have since gone unchecked. Contrary to what many critics might say, the inclusion of this decision is in no way a support of segregation. Rather, its significance lies in the date from which the Supreme Court departed radically from the established interpretations of rights guaranteed by the Constitution, and began to rule with vague assumptions of the "spirit of the Constitution," the purpose of which was to find a vehicle to promote and implement their particular political ideologies. From this point forward, it has become the status quo that all previously accepted "rights" and current pieces of legislation can now be subjected to judicial review and reversed regardless of their support by the citizenry. To be sure, we must always keep in mind the words of Madison, who warned of the "tyranny of the majority;" however, as it is the case that a simple 5-4 vote by the Supreme Court becomes the law of the land, should not we as citizens be wary of this "majority" as well?

Currently, the makeup of the Supreme Court finds itself at a dangerous precipice with the moderate holding a slim 5-4 margin. Unfortunately, with the reelection of Bill Clinton, who nominated two of the most liberal justices in history, the retirement of a justice in the next four years could quite possibly plunge the Court into a bastion of social policies that would far exceed any of its past actions.

The disregard for which Clinton—nominees Ginsberg and Breyer hold for the opinion of the American people is frightening. Both justices were recently part of a 5-4 majority in which the Court struck down state-imposed term limits on members of the U.S. Congress. As a result, the term-limit laws of 22 states, 21 of which had been adopted by the voters directly in initiatives or referenda, were declared invalid. Unfortunately, this has been just one of many cases in which the will of the people has been thwarted by an unelected "super legislature." Unless the 105th Congress takes some action to limit this unlimited power, it won't really matter who has access to our legislators because they will not be the branch that forms legislation anymore.

Marijuana for medicinal purposes justifiable

BY ALLISON PRICE
Bucknellian Staff Columnist

A friend of mine lost her mother to leukemia at the age of six. Many memories, both glorious and painful are blurry, she tells me. She did remember, in the midst of the ongoing controversy concerning the use of marijuana for medical purposes, that she was once told that her father baked marijuana brownies for her mother as she was in the throes of the fierce chemotherapy. Bittersweetly, she remembers her father explaining he did not bake them correctly and the brownies tasted wretched. Recently, she asked her father how he got the controlled substance. He was rather embarrassed by her question and said he had gotten it through a friend. Ironically, for the college student with money to burn, pot is an easy score on most college campuses and for most there are no moral qualms or embarrassment in the act of acquiring it. In between these two opposite extremes are the frightening statistics of how many junior high school students in the United States reportedly acquire and use marijuana yearly.

On the whole, Americans do believe in the use of marijuana for medical purposes.

I am certain that as they formulated their response to the recent passage of Proposition 215 in California that would have allowed for the medical use of marijuana in that state, the Clinton Administration looked out across this country and saw those extremes, and in the end opted for the most myopic, misguided and simplistic response possible. The administration has brought out the big guns, promising to prosecute the use of controlled substances for all purposes to the extent of withdrawing the licenses of doctors who prescribe them to their patients. I honestly believe that in the hearts of most Americans, including President Clinton, who lost his mother to cancer, they see all the reasons in the world to allow patients such as those suffering from cancer, glaucoma and AIDS to use marijuana in a controlled manner. However, the tremendous fear embodied in the statistics accompanies that long, hard look at real drug use across the nation.

For all the well-intentioned efforts on the part of the American medical establishment, schools, government and interest groups of all kinds, we cannot offer a coherent vision of why people should not smoke pot. Prevention efforts are so reliant of the shallow legal angle that reforming laws to allow the medical use of marijuana threatens their entire strategy. Meanwhile, there is no wonder that the strategy is failing.

The adolescents we scare to death with the law get to college where we all know you do not necessarily get caught, and the decision not to use pot must come from more abstract reasoning. It is not as easy as just saying no, and real friends *do* do drugs. Marijuana does not pose the same health risks as other drugs, such as immediate addiction, and easy overdose. The same kids once again do not make the same universal connections why using pot is wrong, as the failure to form a coherent vision as to why not to use pot also represents a failure to unite Americans in one moral vision. Recreational pot users do not see themselves as being party to random drug deaths in the inner city, even though they contribute to the industry. Laws only work as far as Americans believe in them.

On the whole, Americans do believe in the use of marijuana for medical purposes. The Clinton Administration's resistance to the reform detracts from all the good government intervention can do in the lives of people. Medical marijuana can be regulated and treated as medication —therefore no more bad or even dangerous brownies for well-intentioned people watching those they love die of cancer. If marijuana is prescribed, people seeking it for medical use are considerably less likely to be exploited in their search for a usually illegal substance. These folks are not criminals. So very little progress has been made in the treatment of AIDS that those who suffer from it and other diseases are entitled to any help they can get. In the end, these logical arguments are overshadowed by a failure to truly understand and redefine the real problem of drug abuse in the U.S. This goes beyond the letter of law alone.

Political sensationalism undermines the image of the Chief Executive

BY NORA DANIELS
Bucknellian Staff Columnist

I wonder sometimes why anyone would actually want to be president and pursue such a desire. Sure, to be President of the United States is a powerful position, and one from which one can positively affect not just Americans but citizens of every country in the world. To me, though, the negatives subtract from the status and responsibilities of the Chief Executive.

William Jefferson Clinton has just begun his second four-year term as President, and he clearly knows, from experience, that he will be criticized and accused in regard to his actions: past, present and future.

The press has attacked Clinton's public, private, and political lives over the past four years. Remember the negative way some Americans reacted when Bill and Hillary decided that their daughter, Chelsea, should attend private school? And what about the criticism the Clintons faced due to Hillary's role in everything from health care reform to women's rights? Whitewater—need I say more? Paula Jones, too—the list could go on and on, but the point is obvious already.

We, as the American public, don't know if these allegations and criticisms are deserved or even as important as some seem to believe. Many of these and other stories and claims about William Jefferson Clinton will never truly be proved or disproved; some have faded into oblivion, and others remain as question marks on Clinton's presidency. Despite this uncertainty, however, the public has chosen Bill Clinton as the leader of this country until the year 2000. That same public, however, will continue to criticize and complain about his life and actions. But, what would have happened if Dole had been elected on November 7? Would we be worrying about his age and possible health problems due to his age? Probably. We won't know if he would have been a better or worse choice, and that is the nature of life and politics. It is possible, as well, that another man could have been elected, namely Newt Gingrich.

Speculatively, at least, the American public would be complaining and criticizing—not about Watergate, Paula Jones and Hillary—but about the misuse of government funds, the fracturing of support by his own party, his somewhat questionable marriage specifics and even his lesbian relative.

So what it comes down to is this: Clinton has stuck his neck out for the next four years in order to lead America. The people have chosen him despite his character flaws, and he has chosen to continue to embrace the challenge of leadership. Sure, he's not perfect, and some of his actions deserve investigation, but to tear apart every aspect of everything he does is not going to help. Nothing in life is perfect—no person, including the president, is perfect either and nothing will change that fact. Basically, our lives will be the same if Bill, Newt or Bob were elected on November 7th—even though the three seem like such different men.

Native American festival lends culture and history

This dinner brings a variety of performances, exhibits and events for all to enjoy

BY ERIN MCCALLISTER
Bucknellian Staff Writer

There are approximately two million indigenous people living in the United States and Canada. How much do you know about the 900 recognized groups? If your answer is "not much," you need not feel guilty, yet. You haven't missed the opportunity. In honor of this semester's focus on Native Americans, there will be a Native American Festival, which includes a dinner of Native American foods.

Jane Baker, organizer of the festival, said the dinner is an event that the campus does not often have the benefit of experiencing. The dinner will be buffet-style, including Native American dishes from across the U.S. To vegetarians' delight, many of the recipes revolve around vegetables. Some fish and a meat dish will be provided as well. For dessert, there will be a variety of pies.

Open to the entire university and surrounding communities, the dinner attracts students, faculty, staff, community members and even a returning group of employees from the penitentiary. After seeing the success of last semester's Latin American dinner, Baker expects about 225 participants.

The choice of this spring's focus semester fell to a planning group of 20 to 30 individuals headed by Thomas Greaves, professor of anthropology . With a "cybergroup" of faculty and staff, various members contributed ideas and organization.

As one of eight to ten cultural/geographic parts in a rotation, Native Americans have not been a focus since the early '90s. As numerous departments and campus organizations turn their attention to this group, the expansive exposure educates all who notice it. It recurs in classrooms, lecture halls, on stage, on screen and even on the playing field.

According to Jim Rice, assistant vice president for academic affairs, the focus semester is "designed to compliment what goes on in the classroom. It brings resources, people and different voices together."

Why is there such an interest in Native Americans these days? As Greaves explains, they are asserting themselves politically, and for the first time in 500 years, they are being effective. By developing casinos on reservations, winning court cases, stopping archeological digs, reclaiming different articles from museums and co-managing fish resources on the coast, they attempt to overcome their struggle to achieve political autonomy as well as economic and human rights.

"The idea of the semester is to augment cultural diversity of academic environments, to turn the attention of the campus to [that diversity] and to make students aware of that dimension. We think this coming semester will allow us to do so intensely," Greaves said. After more than a year of work, the planning committee has organized a variety of cultural, educational and athletic events. These events, Greaves said, "Provide an impetus, a vehicle, by which the whole Bucknell community can look closely at this sector of American citizenry — their cultural contributions, history, future, etc."

Included in the agenda are speakers, art exhibits, films, music and dance performances, a men's lacrosse game and poetry readings. A complete list and description of events can be found on the Native American homepage, which is located in the events section of the University's homepage.

One of the 29 upcoming events is a lecture by Russell Means, a well-known contemporary Native American leader who co-founded the American Indian Movement (AIM). As an actor, Means has appeared in feature films such as *Pocahontas, Natural Born Killers* and *The Last of the Mohicans*. Means will speak at 7:30 p.m. Tuesday in Vaughan Literature Auditorium.

> *Professor of Anthropology*

Dance Encounter will display a Native American dance group and an African American dance group, involving the dancers and audience alike. This will be held on Sunday, April 6 in Davis Gym.

R. Carlos Nakai, a renowned Native American flutist, will perform a free concert at 8 p.m. on Tuesday, April 1 in the Weis Center. These are just a few of the semester's options.

For additional entertainment and learning opportunities, one can check the homepage and campus advertisements. To sample the Native American culture through the taste buds, one can attend the dinner festival at 6 p.m. next Friday in Larison Dining Hall. Tickets are $10, and students can use meal credit plus an additional $6.50. Those interested should call Baker at 523-3655 for reservations, but all pay at the door.

Movie Reviews: Critic wraps up success and failures of winter movies

BY CHRIS NICHOLS
Bucknellian Columnist

Shine *****

This Australian film is by far the best movie I've seen this season. It's one of the "good type" movies that just doesn't get made often enough in the States anymore. Geoffrey Rush and Noah Taylor do an amazing job of portraying the life of pianist David Helfgott. I wish they would/could both win Oscars.

The People Vs. Larry Flynt *****

The controversial topic of pornography is overshadowed in this film by a topic even more important: the 1st Amendment and freedom of speech. People who think they won't like this movie are probably the ones that could stand to learn the most from it. Harrelson beautifully transcends from an actor to the point in which you forget he's acting. This is truly the most enjoyable type of performance to watch.

Jerry Maguire ****

Very good wholesome story about a man that rethinks his life, decides to do something about it and most honorably sets out to do it. Romantic, cute, funny, and thoughtful.

The Evening Star ****

This movie for whatever reason was terribly underrated this season. Perhaps, it's a sad statement on what American audiences don't want to see. One has to wonder if *Terms* would succeed in the '90s movie marketplace if this well worked sequel did not. There is one weak plot element that leaves the audience a little disturbed (at least me and my group), but other than that the acting, screenplay and directing are all stellar (pun intended).

Evita ****

Very entertaining. Coming from someone who's very familiar with the original soundtrack, I was pleased with the performances of both of the stars. The scenes and costumes were beautifully done (if the Oscars fail to recognize everything else, they should give credit here).

Beavis and Butthead Do America ***

If I was rating this in comparison to other comedies, I would probably give this 5 stars. It's got all the great elements of a good plot: a quest to be accomplished by its heroes, hilarious and realistic characters, and a great script (the opening credits are to die for also). If you like dumb comedies, this is for you.

Scream ***

A clever homage to horror movies of the '80s, this film succeeds in going where many haven't in the past couple of years. It's so simple in its idea, yet still remains entertaining. It's clearly just brain candy but there are some really well-developed parts. As usual, it's two hours spent trying to figure out who the killer is and I would guess that you might be surprised... If you see it, keep your eyes peeled for an absolutely hilarious hat tip to *Nightmare on Elm Street*.

One Fine Day ***

Entertaining. Some have complained that this movie is indicative of our society's decline of the family but I would argue that's a silly interpretation. Not all couples can stay together and those that separate should be just as entitled to fall in love as any others. I think this movie suffered at the hands of too many other big pictures this holiday season. It was still a good film however.

The Crucible ***

Arthur Miller might not have been too upset at the sight of this remake. This is a real surprise in light of a lot of liberties taken by directors in the '90s. Ryder and Day-Lewis do an excellent job. It's a serious movie, however and a long sitting which might account for lack of interest.

My Fellow Americans ***

Cute.

Ghosts of Mississippi **

For some reason this movie seemed to miss the mark, for it was entertaining but not captivating. I think some of that comes from the feeling that it is retelling the story that audiences saw recently in *A Time to Kill* (although, I will agree there are some fundamental plot differences). The character portrayed by Baldwin was too similar to *A Time To Kill's* lawyer in the South and what they had to overcome.

Daylight **

Exactly what I expected: nothing much. Full of stupid plot holes and outrageous sequences; Stallone continues to prove that his greatest work was his first: *Rocky*.

Michael *

I give this movie 1 star for the sole reason that it was based on a cute idea. Unfortunately that's about 1/20th of a good movie. It baffles me why most reviewers liked this film in spite of it's poor script, silly basis for a story (working for a tabloid?) and a lack of interesting characters. For such an excellent collection of actors, *Michael* was a real disappointment.

Space Jam N.A.

This is the first movie I can remember walking out of. How this ridiculous marketing ploy made it to the big screen is beyond me.

University professor to give piano recital

Music professor Barry Hannigan will display his talent performing various pieces

BY DAVID CARPENTER
Bucknellian Staff Writer

This Friday at the Weis Center for the Performing Arts, music professor Barry Hannigan will serenade the audience with a solo piano recital.

Hannigan, a professor of music, specializes in piano. He has been at the University for the past 19 years. "My one and only career," Hannigan professes.

"I did my undergrad at Colorado College, where I almost became a Math major, but turned instead to music full-time my sophomore year," he said.

He began to play the piano at the age of ten, a late start compared to many professionals who typically begin at ages of three or four. When he entered graduate school at the University of Colorado, his main intent was to study musical composition. "But eventually I decided to major in piano, " he said.

In today's world of severe competition among young musicians, all compete to get into the best schools. This competition was even more difficult for Hannigan to overcome, considering he was not a conservatory music major.

"It's hard to practice and compete enough to beat the conservatory students. It's extraordinary that a Bachelor of Arts student can overcome a conservatory major," says Hannigan who then went on to earn his doctorate from the prestigious Eastman School of Music.

Hannigan claims that he is not alone in his ability to earn a well rounded education and go into the musical field.

"The same thing has been done here at Bucknell." He went on to say that the University students who are not armed with the intensive conservatory music training that students at other schools are getting are succeeding and overcoming the competition.

Friday's performance will feature the works of William Duckworth, Jospeh Haydn, Oliver Messaen, Toru Takemitsu, Alex Lubret and Sergei Rachmaninov and will start at 8 p.m. in the Weis Center.

Cara Mickelsen—The Bucknellian

Barry Hannigan, professor of music, practices a selection of compositions for his performance.

ARTS & ENTERTAINMENT

The images of Native American reality are framed in new Center Gallery exhibit

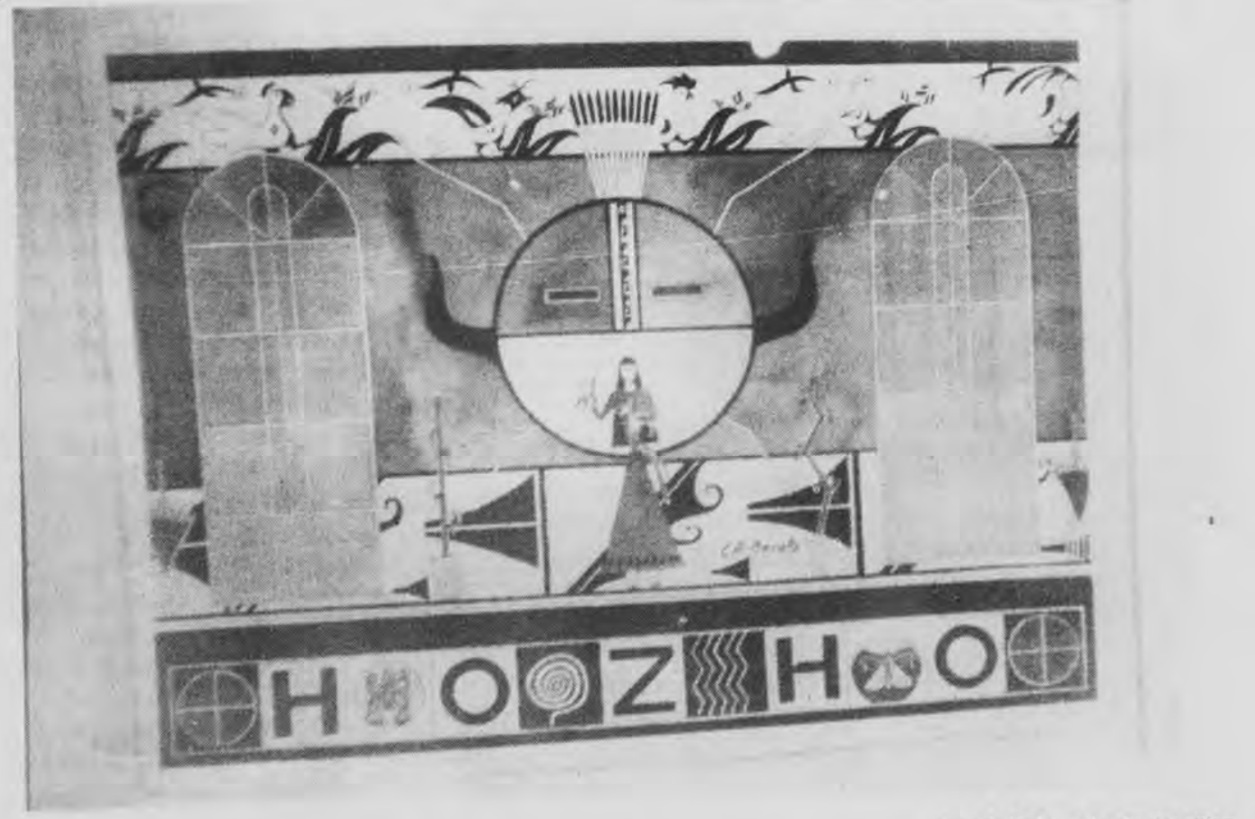
New focus semester hosts Native American artists and their traditional and modern artwork representing their communities

BY ANNE PUTNAM
Bucknellian Staff Writer

Native Americans today classify their art in different ways. Authenticity is found in artists that produce their works on the reservation, yet, the new exhibition at the University "aims to encompass artists who are part of Native American organizations and those who are not."

Native Americans are the focus of this semester. Consequently, the Center Gallery is hosting "New Art from Native America," a full exhibition of 12 Native artists in a never before seen collection. Cynthia Peltier, the assistant director of the Center Gallery coordinated the exhibit and is thrilled that the University is the only one to display this collection.

What is the specialty of the exhibit at the University? The Native American artists depicted on the walls of the Center Gallery are very well known in the Native community for their work. Almost all have worked in painting, although several works highlight mixed media including sculpture. The selections were chosen after artists responded to interest letters from the Center Gallery, although not all submissions are included.



Jonah Half —The Bucknellian

"Song of Turquoise- Girl" by Curtis R. Benally is a representation of Native American culture expressed through painting. The artist has included the importance of song within the piece in an effort to relay its vitality in tradition and within Native society itself. It is on display in the Center Gallery.

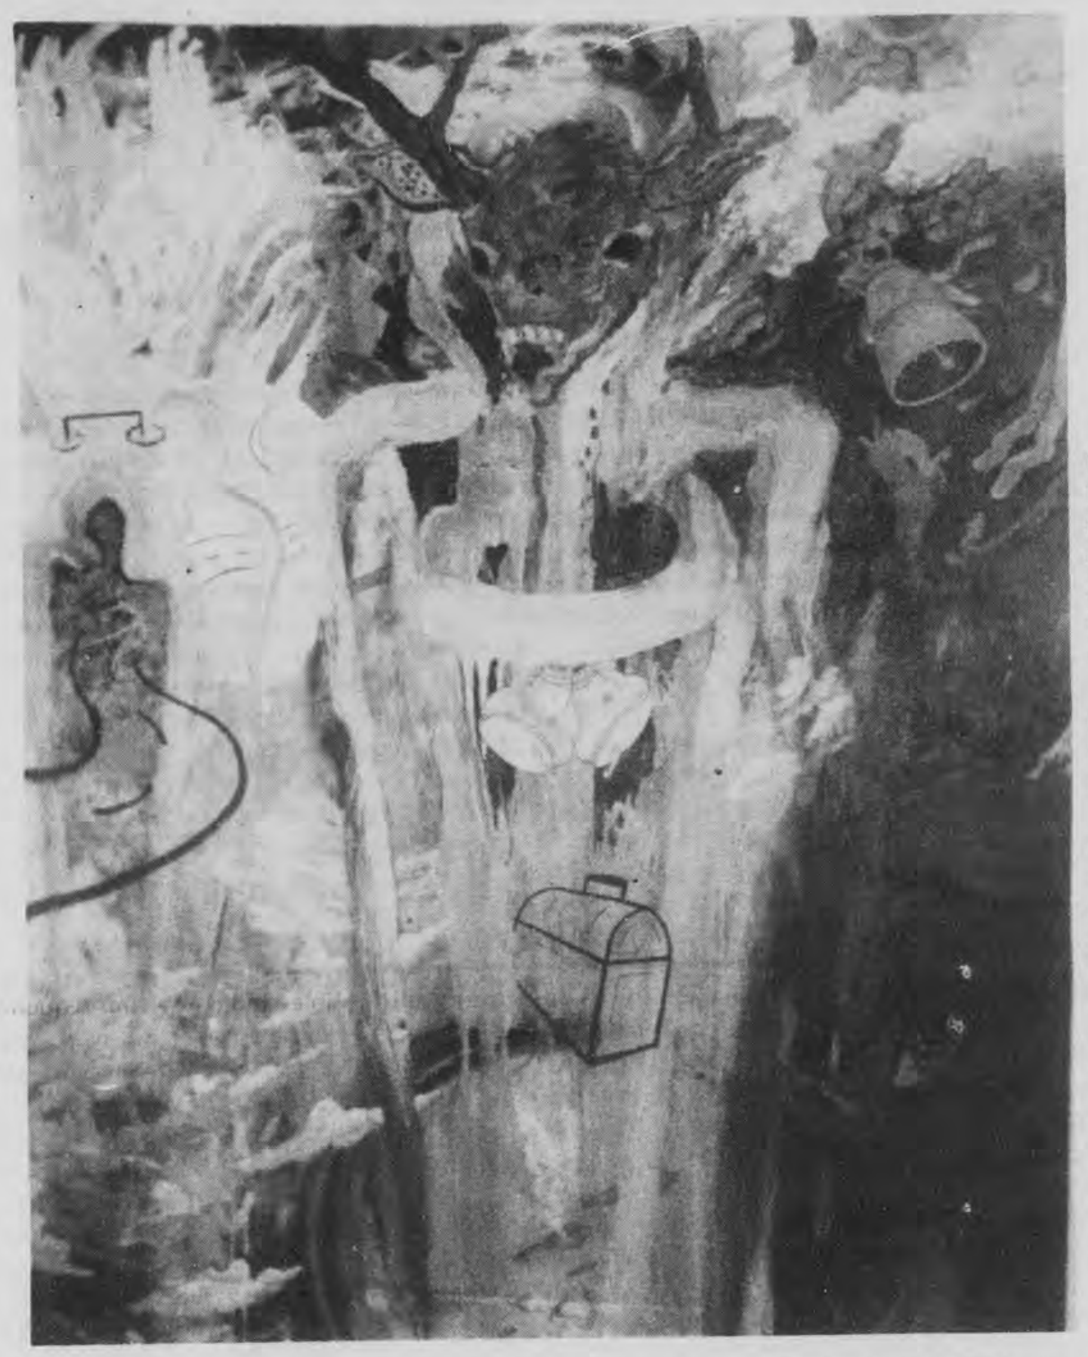
As for the pieces themselves, you need not have an artist's eye to discern the main themes underlying each person's work. Highlights include the incorporation of Native traditions with modern day images for most pieces, depicted as a decline in the long-standing identities of before. The gallery pamphlet specifies "acculturation has begun to endanger social structures necessary for survival as a coherent cultural group." So the artists are representing themselves in an effort to reclaim their identity; "most artists... share a concern for the spiritual bankruptcy of an increasingly industrial materialist society," according to the pamphlet.

At the entrance of the gallery, a well known Native American artist has one of his pieces on display. Niemand Amalgamated is a White Mountain Apache/Seneca whose black and white paintings are large representations of "corporate globalization that threatens the annihilation of resources and way of life of indigenous groups."

Another eye-catching piece on display, "Genuine Indian Collection," 1996, was created by Phil Young, a Cherokee, who has contributed a mixed media installation. His table shows photographs of the integration between the modern society and the traditional aspects of Native American life. Several vanity items are also on display that require handling for full appreciation. Young will be present to answer questions about his work at the opening reception on Saturday from 4 p.m. to 6 p.m.

Another talented artist who visited the University campus on Tuesday, has many works displayed on the walls of the gallery. Joanna Osburn-Bigfeather, Western Cherokee/ Mescolero Apache, gave a talk, "Mining our Histories," in conjunction with the exhibit and semester focus. Her three pieces of the Manhole Cover Series display something different from the other artists. She has incorporated more ceramic sculpture and mixed media to show "the oppression and literal burying of Native culture under urban layers through the implied weight of the manhole cover casts that dwarfs personal menti and ancestral photographs."

All of these items and many others may be seen in the Center Gallery of the Elaine Langone Center from now until February 23. The gallery hours are Monday to Friday, 11 a.m. to 5 p.m. and 1 p.m. till 4 p.m. on weekends. The exhibition is sponsored jointly by a grant from the Pennsylvania Council on the Arts and the Association for the Arts of Bucknell University.



Beetna Kim—The Bucknellian

This untitled piece by Norman Akers is an oil on canvas, depicting a buffalo skull, an important symbol of his culture as well as a common element within Native American art.

Native American festival lends culture and history

This dinner brings a variety of performances, exhibits and events for all to enjoy

BY ERIN MCCALLISTER
Bucknellian Staff Writer

There are approximately two million indigenous people living in the United States and Canada. How much do you know about the 900 recognized groups? If your answer is "not much," you need not feel guilty, yet. You haven't missed the opportunity. In honor of this semester's focus on Native Americans, there will be a Native American Festival, which includes a dinner of Native American foods.

Jane Baker, organizer of the festival, said the dinner is an event that the campus does not often have the benefit of experiencing. The dinner will be buffet-style, including Native American dishes from across the U.S. To vegetarians' delight, many of the recipes revolve around vegetables. Some fish and a meat dish will be provided as well. For dessert, there will be a variety of pies.

Open to the entire university and surrounding communities, the dinner attracts students, faculty, staff, community members and even a returning group of employees from the penitentiary. After seeing the success of last semester's Latin American dinner, Baker expects about 225 participants.

The choice of this spring's focus semester fell to a planning group of 20 to 30 individuals headed by Thomas Greaves, professor of anthropology . With a "cybergroup" of faculty and staff, various members contributed ideas and organization.

As one of eight to ten cultural/geographic parts in a rotation, Native Americans have not been a focus since the early '90s. As numerous departments and campus organizations turn their attention to this group, the expansive exposure educates all who notice it. It recurs in classrooms, lecture halls, on stage, on screen and even on the playing field.

According to Jim Rice, assistant vice president for academic affairs, the focus semester is "designed to compliment what goes on in the classroom. It brings resources, people and different voices together."

Why is there such an interest in Native Americans these days? As Greaves explains, they are asserting themselves politically, and for the first time in 500 years, they are being effective. By developing casinos on reservations, winning court cases, stopping archeological digs, reclaiming different articles from museums and co-managing fish resources on the coast, they attempt to overcome their struggle to achieve political autonomy as well as economic and human rights.

"The idea of the semester is to augment cultural diversity of academic environments, to turn the attention of the campus to [that diversity] and to make students aware of that dimension. We think this coming semester will allow us to do so intensely," Greaves said. After more than a year of work, the planning committee has organized a variety of cultural, educational and athletic events. These events, Greaves said, "Provide an impetus, a vehicle, by which the whole Bucknell community can look closely at this sector of American citizenry — their cultural contributions, history, future, etc."

Included in the agenda are speakers, art exhibits, films, music and dance performances, a men's lacrosse game and poetry readings. A complete list and description of events can be found on the Native American homepage, which is located in the events section of the University's homepage.

One of the 29 upcoming events is a lecture by Russell Means, a well-known contemporary Native American leader who co-founded the American Indian Movement (AIM). As an actor, Means has appeared in feature films such as *Pocahontas, Natural Born Killers* and *The Last of the Mohicans*. Means will speak at 7:30 p.m. Tuesday in Vaughan Literature Auditorium.

Dance Encounter will display a Native American dance group and an African American dance group, involving the dancers and audience alike. This will be held on Sunday, April 6 in Davis Gym.

R. Carlos Nakai, a renowned Native American flutist, will perform a free concert at 8 p.m. on Tuesday, April 1 in the Weis Center. These are just a few of the semester's options.

For additional entertainment and learning opportunities, one can check the homepage and campus advertisements. To sample the Native American culture through the taste buds, one can attend the dinner festival at 6 p.m. next Friday in Larison Dining Hall. Tickets are $10, and students can use meal credit plus an additional $6.50. Those interested should call Baker at 523-3655 for reservations, but all pay at the door.

> ***"The idea of the semester is to augment cultural diversity of academic environments, to turn the attention of the campus to [that diversity] and to make students aware of that dimension."***

Movie Reviews: Critic wraps up success and failures of winter movies

BY CHRIS NICHOLS
Bucknellian Columnist

Shine *****
This Australian film is by far the best movie I've seen this season. It's one of the "good type" movies that just doesn't get made often enough in the States anymore. Geoffrey Rush and Noah Taylor do an amazing job of portraying the life of pianist David Helfgott. I wish they would/could both win Oscars.

The People Vs. Larry Flynt *****
The controversial topic of pornography is overshadowed in this film by a topic even more important: the 1st Amendment and freedom of speech. People who think they won't like this movie are probably the ones that could stand to learn the most from it. Harrelson beautifully transcends from an actor to the point in which you forget he's acting. This is truly the most enjoyable type of performance to watch.

Jerry Maguire ****
Very good wholesome story about a man that rethinks his life, decides to do something about it and most honorably sets out to do it. Romantic, cute, funny, and thoughtful.

The Evening Star ****
This movie for whatever reason was terribly underrated this season. Perhaps, it's a sad statement on what American audiences don't want to see. One has to wonder if *Terms* would succeed in the '90s movie marketplace if this well worked sequel did not. There is one weak plot element that leaves the audience a little disturbed (at least me and my group), but other than that the acting, screenplay and directing are all stellar (pun intended).

Evita ****
Very entertaining. Coming from someone who's very familiar with the original soundtrack, I was pleased with the performances of both of the stars. The scenes and costumes were beautifully done (if the Oscars fail to recognize everything else, they should give credit here).

Beavis and Butthead Do America ***
If I was rating this in comparison to other comedies, I would probably give this 5 stars. It's got all the great elements of a good plot: a quest to be accomplished by its heroes, hilarious and realistic characters, and a great script (the opening credits are to die for also). If you like dumb comedies, this is for you.

Scream ***
A clever homage to horror movies of the '80s, this film succeeds in going where many haven't in the past couple of years. It's so simple in its idea, yet still remains entertaining. It's clearly just brain candy but there are some really well-developed parts. As usual, it's two hours spent trying to figure out who the killer is and I would guess that you might be surprised... If you see it, keep your eyes peeled for an absolutely hilarious hat tip to *Nightmare on Elm Street*.

One Fine Day ***
Entertaining. Some have complained that this movie is indicative of our society's decline of the family but I would argue that's a silly interpretation. Not all couples can stay together and those that separate should be just as entitled to fall in love as any others. I think this movie suffered at the hands of too many other big pictures this holiday season. It was still a good film however.

The Crucible ***
Arthur Miller might not have been too upset at the sight of this remake. This is a real surprise in light of a lot of liberties taken by directors in the '90s. Ryder and Day-Lewis do an excellent job. It's a serious movie, however and a long sitting which might account for lack of interest.

My Fellow Americans ***
Cute.

Ghosts of Mississippi **
For some reason this movie seemed to miss the mark, for it was entertaining but not captivating. I think some of that comes from the feeling that it is retelling the story that audiences saw recently in *A Time to Kill* (although, I will agree there are some fundamental plot differences). The character portrayed by Baldwin was too similar to *A Time To Kill's* lawyer in the South and what they had to overcome.

Daylight **
Exactly what I expected: nothing much. Full of stupid plot holes and outrageous sequences; Stallone continues to prove that his greatest work was his first: *Rocky*.

Michael *
I give this movie 1 star for the sole reason that it was based on a cute idea. Unfortunately that's about 1/20th of a good movie. It baffles me why most reviewers liked this film in spite of it's poor script, silly basis for a story (working for a tabloid?) and a lack of interesting characters. For such an excellent collection of actors, *Michael* was a real disappointment.

Space Jam N.A.
This is the first movie I can remember walking out of. How this ridiculous marketing ploy made it to the big screen is beyond me.

University professor to give piano recital

Music professor Barry Hannigan will display his talent performing various pieces

BY DAVID CARPENTER
Bucknellian Staff Writer

This Friday at the Weis Center for the Performing Arts, music professor Barry Hannigan will serenade the audience with a solo piano recital.

Hannigan, a professor of music, specializes in piano. He has been at the University for the past 19 years. "My one and only career," Hannigan professes.

"I did my undergrad at Colorado College, where I almost became a Math major, but turned instead to music full-time my sophomore year," he said.

He began to play the piano at the age of ten, a late start compared to many professionals who typically begin at ages of three or four. When he entered graduate school at the University of Colorado, his main intent was to study musical composition. "But eventually I decided to major in piano, " he said.

In today's world of severe competition among young musicians, all compete to get into the best schools. This competition was even more difficult for Hannigan to overcome, considering he was not a conservatory music major.

"It's hard to practice and compete enough to beat the conservatory students. It's extraordinary that a Bachelor of Arts student can overcome a conservatory major," says Hannigan who then went on to earn his doctorate from the prestigious Eastman School of Music.

Hannigan claims that he is not alone in his ability to earn a well rounded education and go into the musical field.

"The same thing has been done here at Bucknell." He went on to say that the University students who are not armed with the intensive conservatory music training that students at other schools are getting are succeeding and overcoming the competition.

Friday's performance will feature the works of William Duckworth, Jospeh Haydn, Oliver Messaen, Toru Takemitsu, Alex Lubret and Sergei Rachmaninov and will start at 8 p.m. in the Weis Center.

Cara Mickelsen—The Bucknellian

Barry Hannigan, professor of music, practices a selection of compositions for his performance.

ARTS & ENTERTAINMENT

The images of Native American reality are framed in new Center Gallery exhibit

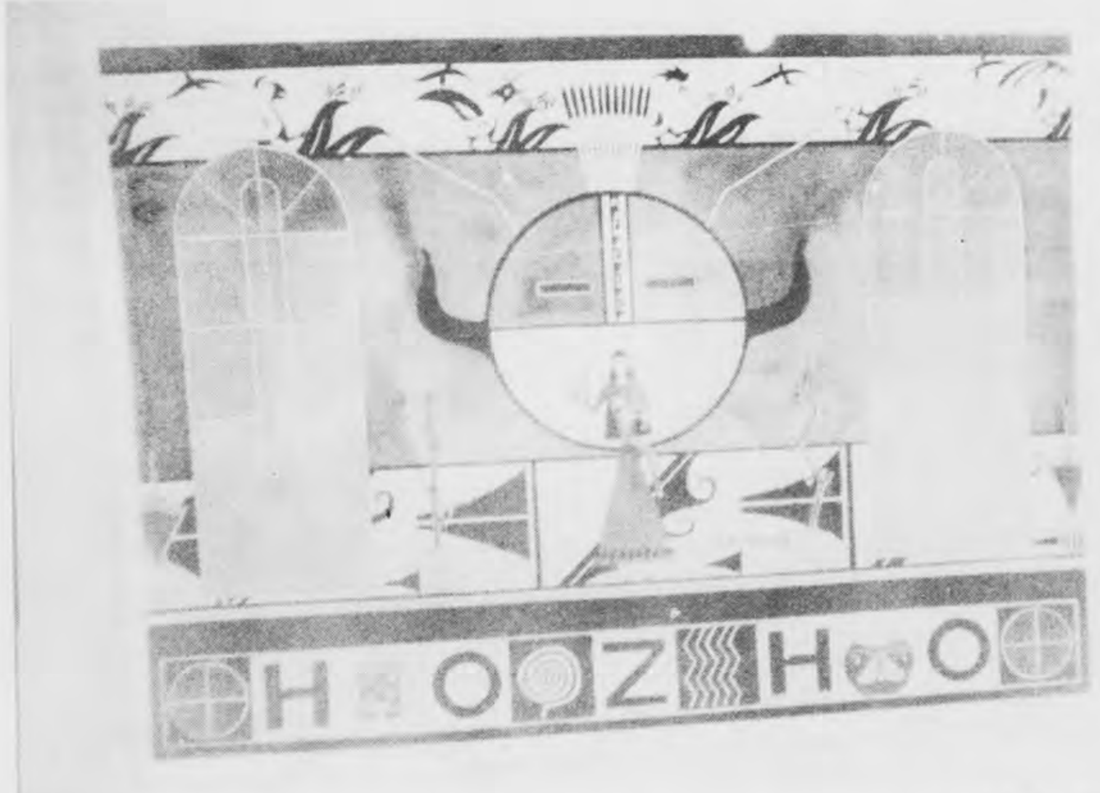
New focus semester hosts Native American artists and their traditional and modern artwork representing their communities

BY ANNE PUTNAM
Bucknellian Staff Writer

Native Americans today classify their art in different ways. Authenticity is found in artists that produce their works on the reservation, yet, the new exhibition at the University "aims to encompass artists who are part of Native American organizations and those who are not."

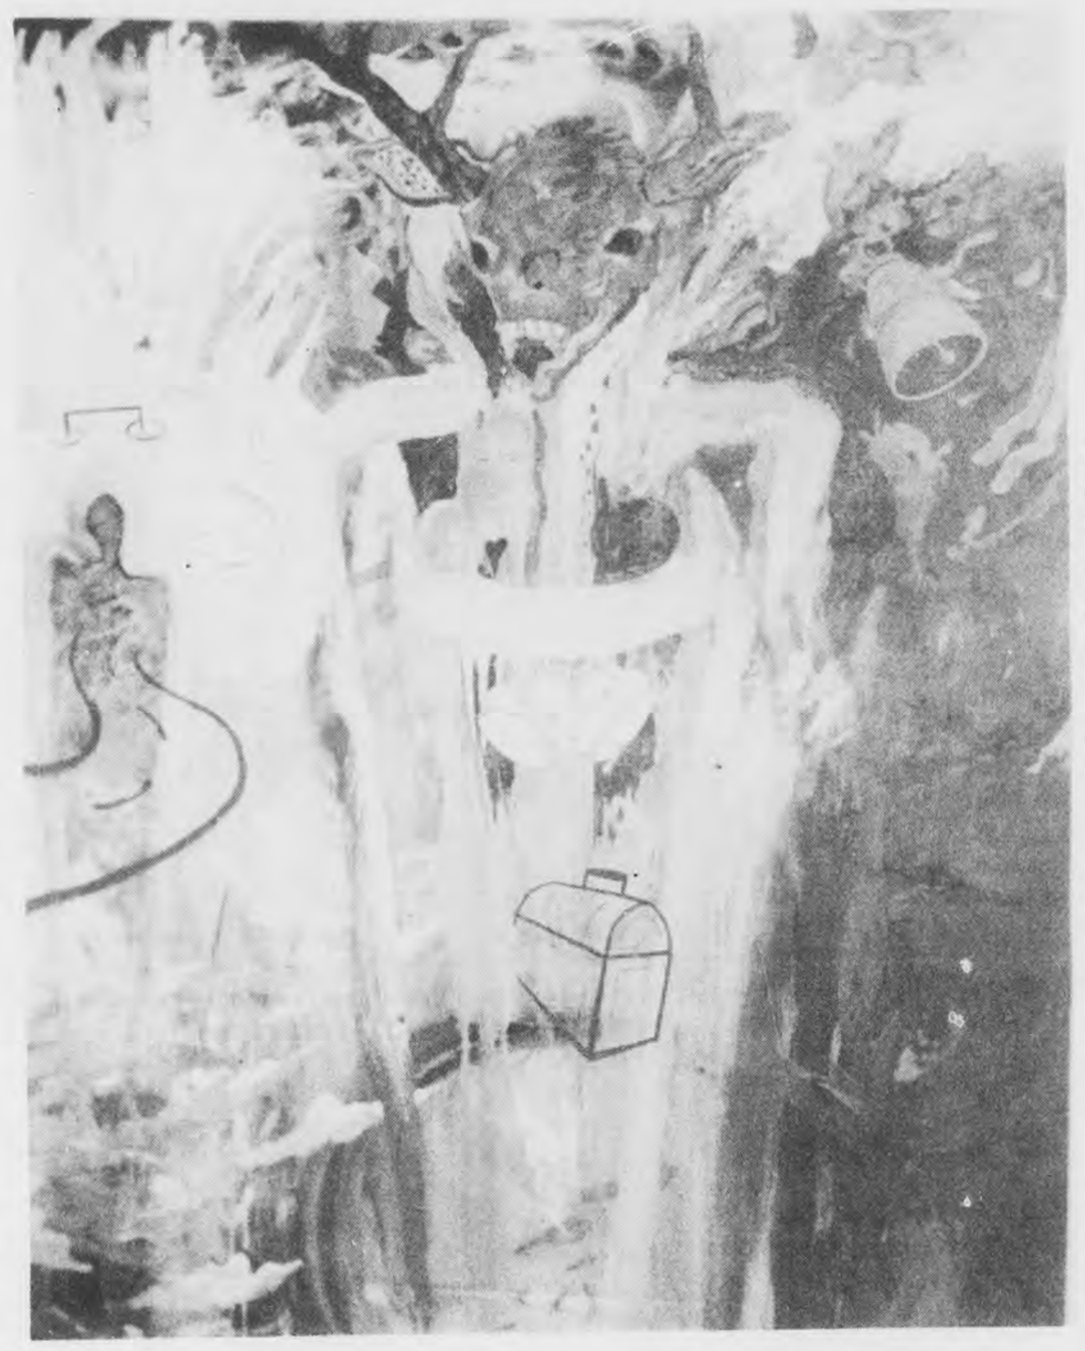
Native Americans are the focus of this semester. Consequently, the Center Gallery is hosting "New Art from Native America," a full exhibition of 12 Native artists in a never before seen collection. Cynthia Peltier, the assistant director of the Center Gallery coordinated the exhibit and is thrilled that the University is the only one to display this collection.

What is the specialty of the exhibit at the University? The Native American artists depicted on the walls of the Center Gallery are very well known in the Native community for their work. Almost all have worked in painting, although several works highlight mixed media including sculpture. The selections were chosen after artists responded to interest letters from the Center Gallery, although not all submissions are included.



Jonah Half —The Bucknellian

"Song of Turquoise- Girl" by Curtis R. Benally is a representation of Native American culture expressed through painting. The artist has included the importance of song within the piece in an effort to relay its vitality in tradition and within Native society itself. It is on display in the Center Gallery.



Beetna Kim—The Bucknellian

This untitled piece by Norman Akers is an oil on canvas, depicting a buffalo skull, an important symbol of his culture as well as a common element within Native American art.

As for the pieces themselves, you need not have an artist's eye to discern the main themes underlying each person's work. Highlights include the incorporation of Native traditions with modern day images for most pieces, depicted as a decline in the long-standing identities of before. The gallery pamphlet specifies "acculturation has begun to endanger social structures necessary for survival as a coherent cultural group." So the artists are representing themselves in an effort to reclaim their identity; "most artists... share a concern for the spiritual bankruptcy of an increasingly industrial materialist society," according to the pamphlet.

At the entrance of the gallery, a well known Native American artist has one of his pieces on display. Niemand Amalgamated is a White Mountain Apache/Seneca whose black and white paintings are large representations of "corporate globalization that threatens the annihilation of resources and way of life of indigenous groups."

Another eye-catching piece on display, "Genuine Indian Collection," 1996, was created by Phil Young, a Cherokee, who has contributed a mixed media installation. His table shows photographs of the integration between the modern society and the traditional aspects of Native American life. Several vanity items are also on display that require handling for full appreciation. Young will be present to answer questions about his work at the opening reception on Saturday from 4 p.m. to 6 p.m.

Another talented artist who visited the University campus on Tuesday, has many works displayed on the walls of the gallery. Joanna Osburn-Bigfeather, Western Cherokee/ Mescolero Apache, gave a talk, "Mining our Histories," in conjunction with the exhibit and semester focus. Her three pieces of the Manhole Cover Series display something different from the other artists. She has incorporated more ceramic sculpture and mixed media to show "the oppression and literal burying of Native culture under urban layers through the implied weight of the manhole cover casts that dwarfs personal menenti and ancestral photographs."

All of these items and many others may be seen in the Center Gallery of the Elaine Langone Center from now until February 23. The gallery hours are Monday to Friday, 11 a.m. to 5 p.m. and 1 p.m. till 4 p.m. on weekends. The exhibition is sponsored jointly by a grant from the Pennsylvania Council on the Arts and the Association for the Arts of Bucknell University.

Cooking with Katie

Winter Pesto

In order to integrate trends of the palate and seasonal availability, an adaptation of a traditional favorite is envisioned. In this case, it is the fleeting and bare presence of fresh basil that inspires a pesto created from alternative ingredients. This delectable herb is supplemented with parsley and mint leaves, while the expense of pignoli nuts is well mirrored by toasted walnuts. Other key players are extra virgin olive oil, which imparts its finesse via intense flavor and depth, and freshly grated parmesan cheese, where substitution of the canned variety will steal from the pesto its genuinely organic definition.

Ingredients:

- 1 to 1 1/2 cups of the following, in any combination, stems trimmed, and washed:
    - fresh parsley
    - fresh mint leaves
    - fresh basil
- 1/3 cup finely grated parmesan cheese
- 2/3 cup walnuts, toasted and cooled
- garlic cloves, peeled and quartered
- freshly cracked pepper
- pinch of coarse salt
- extra virgin olive oil

1. In a food processor, combine herbs, parmesan, walnuts and garlic, chopping until moderately coarse.

2. Add olive oil to the desired consistency, probably that of a hearty marinara, although this will depend on how you intend to use it.

3. Season the pesto to taste, with salt and pepper.

An intriguing way to serve Winter Pesto includes shrimp, fresh tomatoes and fettucini. The shrimp are sauteed in butter, just until they blush (approximately 30 seconds each side), before the tomatoes (sliced into half moons, a quarter inch thick) are tossed in. Shake the pan to loosen and allow all ingredients to heat evenly, and add about one half cup of pesto. The pasta should be precooked, (boil in plenty of salted water, drain, and douse with cold water... splash with enough olive oil to prevent sticking) and can be carefully incorporated at this point. Continue cooking for another minute, and serve with a sprinkling of parmesan, and crusty bread. This combination requires the pesto to be quite loose, entailing a generous amount of oil in step 2... an alternative would be to use less oil and to bake a loaf of bread, spread liberally with the pesto.

ARE YOU UN-MOTIVATED.....ALREADY??

Tips and hints to get you energized and working in the new semester

By Ted Burnes

Bucknellian Staff Writer

So, the second semester has officially begun. Thoughts of Santa and a month of relaxation are a distant reverie, and the work is already rearing its ugly head. Many people are not really excited to be here.

Lack of motivation at the beginning of the second semester is not uncommon. In fact, recent studies show that out of 1,000 students, 566 (almost two-thirds) said they felt stressed out and unmotivated to be back at school after the holiday break. Well, have no fear! Read on and learn how to start the semester on the right foot:

Deal with the Baggage First! Many students come back to school with stress and personal problems from the holiday break. "Many students are suffering from anxiety," says Eric Affsprung, a psychologist at Psychological Services. "Most students are dealing with a lot of guilt over their parents' expectations. They want to make the grades that their parents want them to. Other students have 'either/or thinking'; they want to be perfect, or else they must be stupid. They face so much guilt if they don't do perfectly that they almost trap themselves into procrastination."

Other problems that students bring back include the death of a family member, the ending of a personal relationship or depression about the past semester's grades. Affsprung says that the best thing to do is talk openly with your parents, an older sibling or a friend. Help your parents to realize that maybe last semester was not the best you could have done, but now you're doing the best you can. Being open is the best solution.

Is your Course Load a Nightmare? Once back at school, many students face the problem of picking out their courses for the semester. It often can be a nightmare for those with so many different options and requirements to think about. Many students overload themselves with courses and are already starting to buckle under the pressure at this early stage. "I'm taking courses for my major now because I have most of my requirements out of the way," said Mary Ann Cielesz '99. "I think that you should try and take [Disciplinary Breadth] requirements earlier in your career; that way if you want to minor in it, you have the time." By taking a heavy course load, you run the risk of doing mediocre in all those courses later in the semester.

"One thing I ask students when they come in here is if they are making the right decisions about their schedule," said Rosaria Gabriele, the Assistant Director at Psychological Services. "Many students don't realize that they need to change their course load." And indeed, changing a course now is a good idea if you feel the need is strong enough. Most classes can be taken in the summer, and maybe you can replace that requirement with a class that is more of an interest than a requirement. Just don't go to the extreme; you are going to have to take those classes sooner or later. Many people have advised me to get my requirements out of the way; other first-year students and sophomores should think about that too...

Jonah Half—The Bucknellian

Eric Affsprung, psychologist, and Rosaria Gabriele, assistant director of Psychological Services, offer assistance to students dealing with a lack of motivation at the start of the new semester.

Get to the Stress Before it Gets to You! Many students don't realize that they can detect or deal with stress before it starts. Stress can be a positive or a negative influence, and usually can wear us out both physically and emotionally. As a negative influence, stress can result in feelings of distrust, rejection, anger and depression, which can turn into health problems such as headaches, upset stomach, rashes, insomnia, ulcers and high blood pressure. It is important to deal with stress and manage it better. For starters, don't be afraid to notice your stress. Determine what events cause stress in your life, and figure out how your body responds to stress.

"Sometimes, all a student needs to do is to take better care of him or herself," Affsprung said. "If a student spends all his time drinking alcohol and smoking pot, they'll have less energy for what they're really here for. This allows them to struggle with their academics on a routine basis." If you notice any of the above symptoms, you may be facing a stress period. One of the best ways to deal with stress is exercise. Take a walk, swim some laps or pound out that aggression on the treadmill at the gym. Exercise will not only help the stress to disappear, but will help you focus and sleep better. Three square meals a day and plenty of sleep are also good ways to have a stress-free environment.

Time Management & Procrastination: the two go hand in hand! Many students come back to school and find that they are already starting to procrastinate on their studies. Procrastination often goes hand in hand with time management and a student's personal schedule. With swim practice, student government, and your part-time job, of course you don't feel like studying when you get home! Avoiding work usually is due to a lack of relevance; if something is not relevant to us personally, it is difficult to get motivated even to begin. Even though practice is more important than that paper that's due Monday, the paper is the reason you are here in the first place. Focusing on your academics will often help you to focus and do better in other aspects of your life.

What's the best way to make your schedule work for you? Sarah Glanville '97 is a biology major who is in a sorority and is president of the Ski Team. "I get all of my work done because I make a schedule; I make blocks of time to study in between my classes and activities." First, develop an overview of everything you want to accomplish this semester. Anticipate deadlines and foreseeable crises (midterms, finals' week, due dates of papers, etc.). Then, sit down and write down your complete weekly schedule: class, work, choir, practice, exercising, eating, etc. Do you see blocks of time where you can head to the library or hole up and study in your room? If you don't, maybe you need to think about quitting an activity or taking fewer hours at work. Use this time to your advantage. If this time is spent procrastinating and hanging out with your friends, find a quiet place to study.

"Many students come to me with time management problems," Affsprung said. "I use the problem solving approach. A student should brainstorm; where is the best area to study for him/her personally? The library?" The library's many floors and study carols guarantee quiet when studying. Other students use vacant classrooms, a vacant common area in their residence hall, etc. Using these helpful hints will help make your schedule a lot brighter and your life a lot less hectic.

Motivate yourself! So, you have the schedule, the perfect course load, and you did great last semester. Still having trouble trying to get that work done? Maybe you just want to motivate yourself to get out of bed everyday? No problem! Simple motivation can be tricky, but there are certain places to go. "A lot of people come down here to get help with motivational problems," Rosaria said. "I teach students to catch themselves in the present moment. Often, students can focus more clearly if they forget about the past. I also teach them breathing techniques to help them concentrate." Slow, deep breathing will slow your heart to a normal rate and help you concentrate better on your work.

"I set small goals for myself when I need motivation," says Cielesz. "Usually I begin to get unmotivated around the middle of the semester. I get my work done knowing that vacation is just around the corner." There are web-sites that can help you motivate yourself too. At www.paradasia.com/mpp/adult.htm (a sub-site of www.paradasia.com), professional psychologists give hints and suggestions to motivate even the laziest of students and adults. Be sure to check them out.

Becoming motivated is not the easiest, and all of us don't feel like doing work at one time or another. However, it is important to feel confident about your work and to do it in the best stress-free, uncluttered state of mind. Good luck this semester... now, go study.

FDA approves new weight loss pill, Redux

By Heather Schweiger

The fitness hysteria that grips society every new year is in full swing. Along with the numerous over the counter weight loss medications tempting buyers, a new prescription drug has entered the diet arsenal.

Dexfenfluramine is an anti-obesity drug that belongs to a recent category of non-addictive weight loss drugs.

Known by its brand name Redux, dexfenfluramine works as an appetite suppressant while simultaneously producing a feeling of satiety.

The actual mechanism of how Redux produces such effects is unknown. The theory is that it works by acting on certain chemicals in the brain.

Prozac and similar drugs have been used as weight loss tactics in the past because they affect the same brain chemicals. However, limited success of such drugs has boosted Redux to the top of the series of drugs promising dietary results.

Redux has been noted to cause milder side effects than other weight loss drugs. However, tests with lab animals have shown that damage to brain cells can result.

The FDA's approval of Redux was strongly opposed by some scientists because human studies with dexfenfluramine have lasted for only one year. It is very important for all potential Redux users to recognize that the long term safety and effectiveness of this new diet pill are unknown.

While not as recent as Redux, another creation in weight loss therapy resulted from the combination of two drugs, fenfluramine and phentermine. These drugs have been used individually since the 1960s.

Originally fenfluramine and phentermine were used to treat obsessive-compulsive disorders and experimentally to treat cocaine addiction. The coupling of these two drugs has resulted in "fen-phen" for weight loss purposes.

REDUX
REDUX

Not only is long-term use questionable with weight loss drugs, but dangerous. The FDA has never tested fenfluramine and phentermine together.

Side effects when taking fenfluramine include drowsiness, diarrhea, dry mouth and the risk of pulmonary hypertension.

More intense side effects are experienced with phentermine, such as insomnia, irritability, hyperactivity and changes in personality. Phentermine acts similarly to an amphetamine, such as speed, affecting the central nervous system, metabolism and brain chemicals.

Both diet aids, Redux and "fen-phen," are intended for obese individuals who are 20 to 30 percent over their ideal weight.

Weight loss drugs should be used under close supervision and require dieting and exercising in addition to taking the drugs. Losing weight is more than dropping the pounds; it requires a change of lifestyle.

"Weight drives people to do unreasonable things. [Weight] is a major issue on campus," said Jan Baylor of Health Services. Baylor counsels students on nutrition issues and weight problems.

With all the pressure to be thin in today's society, many have been and continue to reach for medications for quick weight loss. This mentality is gaining more and more momentum.. "People take a pill for a lot of things," said Baylor, such as headaches, depression, indigestion, energy and weight loss.

Over-the-counter and new prescription drugs are the quick and easy alternative to temporary weight loss. However, the real answer lies in a healthy diet and exercise.

Caught in the Web: Cool music sites

By Curran Filer

Bucknellian Staff Columnist

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. A lot of it is stupid but not all of it. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category 764.0IM23THE98MAN : Music sites

Rusted Root-Living in a World of Ecstacy
`http://www.rustedroot.com`

This is the official (I think) website of those funky Pennsylvania folk-rockers, Rusted Root. It's got the usual tour dates and merchandise as well as some RealAudio soundclips. It even has song lyrics which is good because I can't understand a thing they say.

Dave Matthews Band
`http://redlt.com/dmbandnew`

In keeping with the popular Bucknell band homepages I thought I'd include the Dave Matthews Band homepage. It also has the necessary tour dates and merchandise but don't forget to check out the archive section. It has video and audio clips (You'll need Shockwave). There are even setlists for the bootleggers out there.

An Official Home Page of Grateful Dead
`http://grateful.dead.net`

There are about as many Grateful Dead websites as there are Dead fans but this is the official site. It also has merchandise (music is a business after all) but for real fans there is a Dick's Picks link, and a Further Festival link, as well as a bunch of other stuff. Check out some of the band members' personal pages via the Band Members link.

The Official Phish Web Site Home Page
`http://www.phish.com`

First of all I'm not implying anything by putting this one right after the Dead's site. Phish is their own band so all you Phish-lovers (I was once a big Phish fan!) don't get mad. It's got a band history in their own words, as well as the Merchandise and Tour Dates section. Not a whole lot of other stuff, so maybe you'll want to check out fan pages. Just search for "phish" at Yahoo.

MTV Online
`http://www.mtv.com`

The first time I tried this site I went to the Javascript version and it sucked. But the "decaf" version as they call it was kinda neat. I don't think it's as good as the actual t.v. version but they try to liven things up by sending you to a random area in the website when you first load it. Don't worry though, you can get to any part of the site if you want.

CMJ Online
`http://www.cmjmusic.com`

This is the College Music Journal website. They are a so-called "New Music Magazine." They have Picks of the Day (with audio clips) which are cool independent or new bands. They also have feature stories and interviews. If you like reading about the music scene check it out.

Earwig
`http://www.electricvillage.com/earwig`

Earwig is also an on line music magazine but with more bite than CMJ. They have cool features and news with plenty of other interesting links. Check out the "Peep Show" link to see live camera shots of neat stuff. There are quizzes, games, polls, and even classifieds. Be sure to read about the winner of their tattoo contest.

How to Survive as an Independent Band
`http://technet.gtcc.cc.nc.us/pages/students/parkerj`

I'm sorry the site has such a long URL but it may be worth it to some people. This site is for all those bands that pop up on the college campuses across this great land. It's an easy to use guide to making it with an independent band. The guy who created it was in an independent band and learned all these tips first hand. Check it out and you might learn something.

The Wierdest Bandnames
`http://204.254.248.7/~chelle/bandname.html`

Hopefully the trouble I had with this site's server is temporary. This strange little website is a huge list of the dumbest, weirdest, and coolest band names in the country. There are a few with the same kind of content, but this one is the best.

Science & Technology Calender

Thurs., Feb. 16	Math Talk at noon in LC 302 Professor Rose St. John of the mathematics department will speak on "Cellular Automata as a Context for Self-Replicating, Evolving Critters."

Brain Teaser

Lunch at the TL Club

Every member of the TL Club is either a truther, who always tells the truth when asked a question, or a liar, who always answers with a lie. When I visited the club for the first time, I found its members, all men, seated around a large circular table, having lunch. There was no way to distinguish truthers from liars by their appearance, and so I asked each man in turn which he was. This proved unenlightening. Each man naturally assured me he was a truther. I tried again, this time asking each man whether his neighbor on the left was a truther or a liar. To my surprise each told me the man on his left was a liar.

Later in the day, back home and typing up my notes on the luncheon, I discovered I had forgotten to record the number of men at the table. I telephoned the club's president. He told me the number was 37. After hanging up I realized that I could not be sure of this figure because I did not know whether the president was a truther or liar. I then telephoned the club's secretary.

"No, no," the secretary said. "Our president, unfortunately, is an unmitigated liar. There were actually 40 men at the table."

Which man, if either, should I believe? Suddenly I saw a simple way to resolve the matter. Can the reader, on the basis of the information given here, determine how many men were seated at the table?

The problem is derived from a suggestion by Werner Joho, a physicist in Zurich. Solution is posted on this page.

Solution to Brain Teaser

If each man at the circular table is either a truther or a liar, and each says that the man on his left is a liar, there must be an even number at the table, arranged so that truthers and liars alternate. (No arrangement of an odd number of truthers and liars is possible without at least one man describing the man on his left as a truther.) Consequently the club's president lied when he said the number was 37. Since the secretary called the president a liar, he must have been a truther. Therefore he spoke truthfully when he gave the number as 40.

Next Week: Future expansion of Patriot League?

Men's basketball takes on Colgate and Adonal Foyle

BUCKNELL UNIVERSITY

SPORTS THURSDAY

Player of the Week: J.R. Holden '98 scored a career high 30 points in a critical league win 69-55, versus the Naval Academy

Bucknell men sink Midshipmen 69-55

J.R. Holden '98 lights up Navy for career-high 30 points; Bison fall to Army In Wed. game

BY CHRIS ELLIS
Bucknellian Staff Writer

For Bucknell guard J.R. Holden, it was a night to remember.

For Navy coach Don Devoe, it was a night best left forgotten.

But for the Bucknell men's basketball team, last week's 69-55 win over Navy was just another game— another victory for a team poised to present itself as one of the Patriot League favorites.

The Bison held the favored Midshipmen without a field goal for a stretch of ten minutes spanning the first and second halves, and Holden scored a career high 30 points as the Bison improved their league record to 3-1. A 68-60 victory over Holy Cross later in the week upped that mark to 4-1, tying Bucknell with Colgate for first place in the league.

"They kept us out of our offense, made us rush our shots, and forced us to do things we wouldn't normally do," Devoe said after the game. "In short, they made us look like we never played basketball before."

The game started sloppily for both teams. Out of sync and out of rhythm, the teams had combined to score just 14 points midway through the first half. At the ten minute mark, the teams had combined for more fouls (10) than field goals (eight). At the half, the score was 26-21 and the game seemed to be getting away from both teams.

"We both needed timeouts near the end of the first half," Bucknell coach Pat Flannery said. "The game was extremely physical and everyone was battling for every loose ball. That's why it appeared ragged."

The Bison seized control of the game to start the second half, though. Forward Tom Welch '97, pulled by Flannery late in the first, began the second half on fire, sandwiching a blocked shot between two field goals in the first two minutes, propelling the Bison to a 9-0 run to open up the five-point game.

Navy's Ryan Lookabil connected on a 3-pointer 7:30 into the second half, but by that time, Bucknell held a commanding 39-26 lead, and the game was all but over.

After Bucknell opened up leads

Jonah Half—The Bucknellian

Tom Welch '97 scored the first four points of a pivotal 9-0 run to start the second half against Navy.

See NAVY, p.12

HOLY CROSS

from page 1

with the *Chronicle of Higher Education*, in which he said that the Presidents "came collectively through reluctantly, very reluctantly, to a position that would keep the league together in spite of our custom of need-based financial aid across the board."

He continued, adding that "our first concern is to preserve a strong and stable league."

Under the new scholarship rule, all teams that wish to will receive the maximum number of scholarships available—13 for men and 15 for the women's basketball teams.

Currently Holy Cross is the only school to say that it intends to give scholarships (West Point and Annapolis are free and paid for by the government), and it is unclear if Lehigh, which presently gives scholarships for the non-Patriot League sport of wrestling, will follow.

However, Bucknell, Lafayette and Colgate have said that they will continue under the present system of merit-based need.

In a recent article in *The Daily Item*, Bucknell athletic director Rick Hartzell clearly stated, "We like the way we do things at Bucknell... [and] think we can continue to be competitive in the Patriot League."

Colgate president Neil Grabois, again in an article from *The Chronicle of Higher Education*, agreed, and went even further saying "I happen to feel that this institution (Colgate), which has never had aid—in no sport, not for academics, not for clarinetists, not for student leaders, nobody—that we should stay where we are."

Despite the call for scholarships in basketball, Holy Cross has not, as of yet, requested scholarships in any other areas, and has shown no sign that it hopes to pursue scholarships in other Patriot League sports.

According to President Adams' statement in the aforementioned *Chronicle*, he is "quite confident...that there was no inclination on the part of anyone in this room to extend this any further."

Group forms to support women hoopsters

BY BRETT TOMLINSON
Bucknellian Staff Writer

When Annie Randall first saw the crowds at Bucknell's women's basketball games, the first-year music professor was shocked. Coming from California, Randall was used to watching basketball at Stanford, where both the Cardinal men and women routinely packed the bleachers with fans, but at Bucknell, the women's crowds only begin to fill the stands when people arrive early for the men's games.

Rather than simply shrugging off the lack of fan support for a team she thought deserved more respect, Randall has set out to change things—creating a new organization of faculty and staff called the Friends of Bucknell Women's Basketball.

"Knowing that they're so good and also so smart, I thought that a lot of faculty are interested so we might as well just organize this and hopefully drum up some student support as well," Randall said.

As it turns out, Randall did not have to look far to find faculty members to back her effort. With an average GPA of 3.42 this fall, the women's basketball team caught the eye of several professors in the classroom, setting a new record for athletic teams at the University.

In addition to their scholastic efforts, the Bison women are the defending Patriot League regular season champions and were the only team in Division I to go undefeated at home last year.

At the group's inaugural meeting on Tuesday, Head Coach Juliene Simpson and team leaders Chiara Sockel '97 and Jessica Mathieson '98 addressed approximately 15 faculty members on hand, expressing their appreciation and talking about what it means to be part of Bucknell women's basketball.

The meeting included the screening of an 18 minute highlight video from last season, with interesting coverage of the squad's innovative preseason training, which includes dance classes for agility and team building exercises on the ropes course at Bloomsburg University.

The only dismal detail of the highlight film were the empty seats in the background of game films, regardless of the venue. But Randall is convinced that the Friends of Bucknell Women's Basketball can change that problem, at least at home games.

"If we keep telling people the truth of the matter, that the women are really good, they've got a very good team, I think people will realize that this is a fun thing to go to and start putting it on their calendars," she said.

Simpson, who has already made efforts to attract communi-

Beetna Kim—The Bucknellian

Annie Randall, assistant professor of music, has created a group to support Leslie Blue '99 and the rest of the women's basketball team.

See BOOSTERS, page 12

Flash in the Pan

The Pack is Back!: The Green Bay Packers secured their first Super Bowl title since the esteemed Vince Lombardi, for whom the Super Bowl trophy is aptly named after, roamed the sidelines in the mid '60s by defeating the New England Patriots 35-21 on Sunday. In the game the Packers jumped out to an early lead, but trailed 14-10 after the first quarter. This was the only Patriot lead of the game as the Packers jumped out to a 27-14 lead behind NFL MVP Brett Favre's two passing touchdowns and one rushing touchdown. However, the Patriots rebounded to bring the game within six points on a Curtis Martin touchdown run. This set the stage for Desmond Howard, who returned the ensuing kickoff 99 yards for a touchdown that put the game away and earned Howard the Super Bowl MVP. Howard became the first-ever special teams player named MVP after setting records for most punt return yardage in a Super Bowl, as well as longest kickoff return for a touchdown in a Super Bowl. Pro Bowl defensive end Reggie White also collected an NFL record three sacks for the Packers, who won their third Super Bowl.

Big Accomplishments Down Under: In the 1997 Australian Open Pete Sampras moved closer to history, and Martina Hingis made history by taking home the singles titles. The victory was Sampras' second Australian title and pushed his total to nine grand slam titles, trailing only Roy Emerson (12), Bjorn Borg and Rod Laver (11), and Bill Tilden (10). After a difficult tournament played under extremely hot conditions, Sampras took the title in straight sets over the Spanish youngster Carlos Moya, who had knocked out both of last year's finalists, Boris Becker and Michael Chang, to reach the final. Hingis took the title over unseeded and previous champion Mary Pierce to become the youngest player in this century to win a grand slam. The women's field was decimated by upsets as Hingis was the only one of the top 11 seeds to reach the semifinals. The victory also pushed the 16 year-old Hingis above Monica Seles and into number two in the world.

Ex-Coaches Coming Back: Two former coaches are now former commentators, as ex-Eagle coach Dick Vermeil and ex-Bear coach Mike Ditka have left the world of football commentary to take over the head jobs for the St. Louis Rams and the New Orleans Saints, respectively. Vermeil took the Eagles to their only Super Bowl in 1980, and has been out of coaching since the 1982. Ditka, who became famous for his tantrums and temper, as well as his tough defenses while coach of the Bears, has been out of coaching since the 1992 season.

NBA All-Stars Named: The All-Star rosters came out yesterday with Michael Jordan and Charles Barkley leading the voting for the East and West, respectively. Notable admissions from the teams were Chris Webber of the Washington Bullets and Reggie Miller of the Pacers being left off in favor of Christian Laettner of the Hawks and Terrell Brandon of the Cavaliers. In the West, the leading assist-man in the NBA, Mark Jackson, was left off the team as was Chris Gatling, the Mavericks explosive sixth man.

Next Week: Future expansion of Patriot League?
Men's basketball takes on Colgate and Adonal Foyle

BUCKNELL UNIVERSITY
SPORTS THURSDAY

Player of the Week: J.R. Holden '98 scored a career high 30 points in a critical league win 69-55, versus the Naval Academy

Bucknell men sink Midshipmen 69-55

J.R. Holden '98 lights up Navy for career-high 30 points; Bison fall to Army In Wed. game

By Chris Ellis
Bucknellian Staff Writer

Jonah Half—The Bucknellian

Tom Welch '97 scored the first four points of a pivotal 9-0 run to start the second half against Navy.

For Bucknell guard J.R. Holden, it was a night to remember.

For Navy coach Don Devoe, it was a night best left forgotten.

But for the Bucknell men's basketball team, last week's 69-55 win over Navy was just another game— another victory for a team poised to present itself as one of the Patriot League favorites.

The Bison held the favored Midshipmen without a field goal for a stretch of ten minutes spanning the first and second halves, and Holden scored a career high 30 points as the Bison improved their league record to 3-1. A 68-60 victory over Holy Cross later in the week upped that mark to 4-1, tying Bucknell with Colgate for first place in the league.

"They kept us out of our offense, made us rush our shots, and forced us to do things we wouldn't normally do," Devoe said after the game. "In short, they made us look like we never played basketball before."

The game started sloppily for both teams. Out of sync and out of rhythm, the teams had combined to score just 14 points midway through the first half. At the ten minute mark, the teams had combined for more fouls (10) than field goals (eight). At the half, the score was 26-21 and the game seemed to be getting away from both teams.

"We both needed timeouts near the end of the first half," Bucknell coach Pat Flannery said. "The game was extremely physical and everyone was battling for every loose ball. That's why it appeared ragged."

The Bison seized control of the game to start the second half, though. Forward Tom Welch '97, pulled by Flannery late in the first, began the second half on fire, sandwiching a blocked shot between two field goals in the first two minutes, propelling the Bison to a 9-0 run to open up the five-point game.

Navy's Ryan Lookabil connected on a 3-pointer 7:30 into the second half, but by that time, Bucknell held a commanding 39-26 lead, and the game was all but over.

After Bucknell opened up leads

See NAVY, p.12

HOLY CROSS

from page 1

with the *Chronicle of Higher Education*, in which he said that the Presidents "came collectively through reluctantly, very reluctantly, to a position that would keep the league together in spite of our custom of need-based financial aid across the board."

He continued, adding that "our first concern is to preserve a strong and stable league."

Under the new scholarship rule, all teams that wish to will receive the maximum number of scholarships available—13 for men and 15 for the women's basketball teams.

Currently Holy Cross is the only school to say that it intends to give scholarships (West Point and Annapolis are free and paid for by the government), and it is unclear if Lehigh, which presently gives scholarships for the non-Patriot League sport of wrestling, will follow.

However, Bucknell, Lafayette and Colgate have said that they will continue under the present system of merit-based need.

In a recent article in *The Daily Item*, Bucknell athletic director Rick Hartzell clearly stated, "We like the way we do things at Bucknell... [and] think we can continue to be competitive in the Patriot League."

Colgate president Neil Grabois, again in an article from *The Chronicle of Higher Education*, agreed, and went even further saying "I happen to feel that this institution (Colgate), which has never had aid—in no sport, not for academics, not for clarinetists, not for student leaders, nobody—that we should stay where we are."

Despite the call for scholarships in basketball, Holy Cross has not, as of yet, requested scholarships in any other areas, and has shown no sign that it hopes to pursue scholarships in other Patriot League sports.

According to President Adams' statement in the aforementioned *Chronicle*, he is "quite confident...that there was no inclination on the part of anyone in this room to extend this any further."

Group forms to support women hoopsters

By Brett Tomlinson
Bucknellian Staff Writer

Beetna Kim—The Bucknellian

Annie Randall, assistant professor of music, has created a group to support Leslie Blue '99 and the rest of the women's basketball team.

When Annie Randall first saw the crowds at Bucknell's women's basketball games, the first-year music professor was shocked. Coming from California, Randall was used to watching basketball at Stanford, where both the Cardinal men and women routinely packed the bleachers with fans, but at Bucknell, the women's crowds only begin to fill the stands when people arrive early for the men's games.

Rather than simply shrugging off the lack of fan support for a team she thought deserved more respect, Randall has set out to change things—creating a new organization of faculty and staff called the Friends of Bucknell Women's Basketball.

"Knowing that they're so good and also so smart, I thought that a lot of faculty are interested so we might as well just organize this and hopefully drum up some student support as well," Randall said.

As it turns out, Randall did not have to look far to find faculty members to back her effort. With an average GPA of 3.42 this fall, the women's basketball team caught the eye of several professors in the classroom, setting a new record for athletic teams at the University.

In addition to their scholastic efforts, the Bison women are the defending Patriot League regular season champions and were the only team in Division I to go undefeated at home last year.

At the group's inaugural meeting on Tuesday, Head Coach Juliene Simpson and team leaders Chiara Sockel '97 and Jessica Mathieson '98 addressed approximately 15 faculty members on hand, expressing their appreciation and talking about what it means to be part of Bucknell women's basketball.

The meeting included the screening of an 18 minute highlight video from last season, with interesting coverage of the squad's innovative preseason training, which includes dance classes for agility and team building exercises on the ropes course at Bloomsburg University.

The only dismal detail of the highlight film were the empty seats in the background of game films, regardless of the venue. But Randall is convinced that the Friends of Bucknell Women's Basketball can change that problem, at least at home games.

"If we keep telling people the truth of the matter, that the women are really good, they've got a very good team, I think people will realize that this is a fun thing to go to and start putting it on their calendars," she said.

Simpson, who has already made efforts to attract communi-

Flash in the Pan

The Pack is Back!: The Green Bay Packers secured their first Super Bowl title since the esteemed Vince Lombardi, for whom the Super Bowl trophy is aptly named after, roamed the sidelines in the mid '60s by defeating the New England Patriots 35-21 on Sunday. In the game the Packers jumped out to an early lead, but trailed 14-10 after the first quarter. This was the only Patriot lead of the game as the Packers jumped out to a 27-14 lead behind NFL MVP Brett Favre's two passing touchdowns and one rushing touchdown. However, the Patriots rebounded to bring the game within six points on a Curtis Martin touchdown run. This set the stage for Desmond Howard, who returned the ensuing kickoff 99 yards for a touchdown that put the game away and earned Howard the Super Bowl MVP. Howard became the first-ever special teams player named MVP after setting records for most punt return yardage in a Super Bowl, as well as longest kickoff return for a touchdown in a Super Bowl. Pro Bowl defensive end Reggie White also collected an NFL record three sacks for the Packers, who won their third Super Bowl.

Big Accomplishments Down Under: In the 1997 Australian Open Pete Sampras moved closer to history, and Martina Hingis made history by taking home the singles titles. The victory was Sampras' second Australian title and pushed his total to nine grand slam titles, trailing only Roy Emerson (12), Bjorn Borg and Rod Laver (11), and Bill Tilden (10). After a difficult tournament played under extremely hot conditions, Sampras took the title in straight sets over the Spanish youngster Carlos Moya, who had knocked out both of last year's finalists, Boris Becker and Michael Chang, to reach the final. Hingis took the title over unseeded and previous champion Mary Pierce to become the youngest player in this century to win a grand slam. The women's field was decimated by upsets as Hingis was the only one of the top 11 seeds to reach the semifinals. The victory also pushed the 16 year-old Hingis above Monica Seles and into number two in the world.

Ex-Coaches Coming Back: Two former coaches are now former commentators, as ex-Eagle coach Dick Vermeil and ex-Bear coach Mike Ditka have left the world of football commentary to take over the head jobs for the St. Louis Rams and the New Orleans Saints, respectively. Vermeil took the Eagles to their only Super Bowl in 1980, and has been out of coaching since the 1982. Ditka, who became famous for his tantrums and temper, as well as his tough defenses while coach of the Bears, has been out of coaching since the 1992 season.

NBA All-Stars Named: The All-Star rosters came out yesterday with Michael Jordan and Charles Barkley leading the voting for the East and West, respectively. Notable admissions from the teams were Chris Webber of the Washington Bullets and Reggie Miller of the Pacers being left off in favor of Christian Laettner of the Hawks and Terrell Brandon of the Cavaliers. In the West, the leading assist-man in the NBA, Mark Jackson, was left off the team as was Chris Gatling, the Mavericks explosive sixth man.

College Basketball Top 10

Swimming defeats Colgate, men win against Delaware

BY ERICA FRIEDLANDER
Bucknellian Staff Writer

The Bucknell men's swim team capped off an undefeated week with a victory against league rival Colgate, while the women split their week's matchups.

Cheers rang out at the Freas-Rooke Pool at Davis Gym last Tuesday as fans watched Bucknell's men's swimming team defeat Delaware, 139-98.

Tri-captain Ethan Buckley '97 was victorious in two individual events and also assisted the 400-yard medley relay team in its win. Buckley posted a time of 1:45.47 in the 200-yard freestyle and 4:48.85 in the 500-yard freestyle. The 400 medley relay was won by Buckley, Turkoglu '98, Woodworth '98 and Hill '00 who took first place with a time of 3:36.73. The time was more than five seconds faster than the second place team from Delaware.

The Bison men came on strong against the Blue Hens, taking firsts in several other events, including sophomore Alex Johnson's two firsts in the 50 and 100-yard freestyle where he posted times of 21.89 and 47.97 respectively.

Scott Woodworth took first in the 200-yard backstroke with a time of 1:57.25 while Justin Ganz '98 won the 200-yard individual medley relay (2:00.72). Mike Malloure '98 took first place in three meter diving with a score of 245.325 which beat out the Delaware opposition by more than eight points.

In women's action, the Bison lost a tough meet to Delaware despite a number of first place wins. The Blue Hens scored 147.5 points over Bucknell's 94.5. Co-captain Jen Myers '98 took two firsts for the Bison in the 200-yard individual medley with a time of 2:14.20 and in the 200-yard backstroke where she posted a time of 2:07.28. Other individual winners for Bucknell included freshman Kate Wood's first in the 200-yard butterfly and Nicole Brandemarti's '00 wins in both the 50 and 100-yard freestyle where she swam times of 25.72 and 55.71 respectively.

Saturday afternoon, the Bison men and women traveled to Hamilton, NY, where they swam and dove against Colgate. Bucknell's men's team easily defeated Colgate 141-100 and the women won a close meet, 127-116.

The Bison men were once again led by Buckley, who won the 50 and the 100-yard freestyle events with times of 21.64 and 47.05. Buckley also swam a leg of the 400-yard freestyle relay which placed first with a time of 3:12.65. The win was assisted by other medley team members Hill, Lannes '98 and Fitzpatrick '00. Individual wins from Bucknell included Johnson's swim in the 200-yard freestyle (1:46.69) and 500-yard freestyle (4:56.67), Scott Woodworth's 2:02.4 in the 200-yard individual medley, and sophomore Greg Brash's win in the 200-yard backstroke (2:02.04).

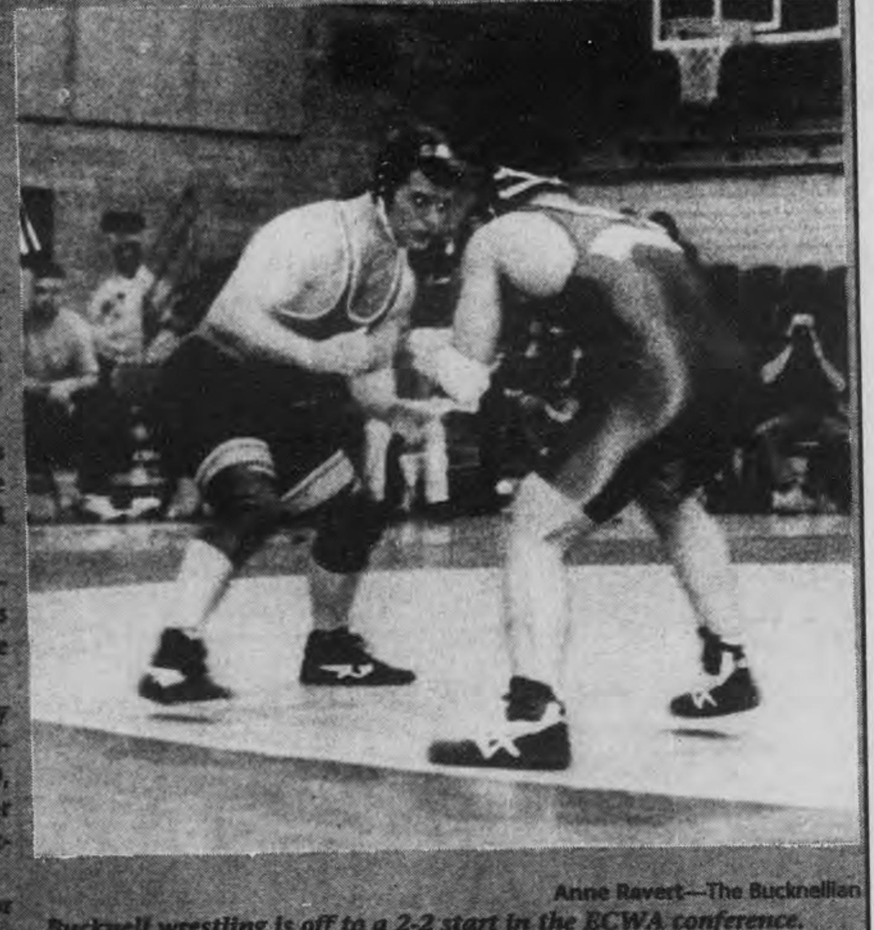
Kate Wood helped the Bison to victory with her wins in the 200-yard fly (2:12.57) and 1000 (10:40.88) and 500-yard (5:14.95) freestyle. Jen Myers also took a first in the 200-yard backstroke (2:10.10) and assisted the 400-yard medley relay team in their win. The relay team posted a time of 4:14.99.

Coach Lynn Kachmerik said, "Bucknell easily defeated Colgate. We were simply stronger all around. Because of this I was able to move people to events that they would not normally swim to see how their times were. They swam great times in all of the events."

The win against Colgate brings the men's record to 7-2 while the women are 8-2. Bucknell will host Lehigh University on Saturday, Feb. 1. The meet will begin with diving at 11:00 a.m.

Bison grapplers fall to Drexel

BY E.J. CRAWFORD
Bucknellian Staff Writer



Anne Ravert—The Bucknellian

Bucknell wrestling is off to a 2-2 start in the ECWA conference. The squad is 4-2 overall after a loss to Drexel.

Last year Bucknell wrestling suffered through a season of disappointment and close losses, and most critics did not expect much from this year's squad. However, the Bison grapplers carried a 4-1 record into this past week's match against Eastern Conference (ECWA) power Drexel.

However, despite Bucknell's fast start this season, they were unable to hold off an experienced Drexel squad, falling 21-13.

The win improves Drexel to 4-2 in the conference, and drops the Bison back to .500 in the ECWA with a 2-2 record.

Although the team fell, many of the wrestlers put forth excellent results, as Todd Boerner '99, Solomon Webb '00, Brian Pitzer '99, and Jeff Fisher '98 all collected victories.

Pitzes's victory came by major decision while the rest all won by regular decision.

The outlook for the Bison looks bright for the rest of the season, as none of the victors are seniors, and Bucknell retains last year's top performers—Jeff Fazio '98 and Mike Garcia '98.

Fazio, who, despite a loss to Drexel, is 12-5 this season and is 33-15 for his career. Garcia was undefeated in dual meet action last year and advanced to the NCAA tournament with a victory in the ECWA tournament. He did not wrestle against Drexel but is 11-3 this season.

BOOSTERS

from page 13

ty support by running youth basketball clinics, is working with Randall to provide additional entertainment for the fans at games.

At this Saturday's game against Colgate, there will be a faculty game at half-time, and the players' mothers will battle in their annual shoot-out before the Feb. 8 game against Lafayette.

Ironically, this recent surge of support for the women's team comes just before National Girls and Women in Sports Day (Feb. 6). Janice Butler of the Women's Resource Center was on hand at the meeting to show her support for the new booster club and promote upcoming events for the celebration of women in sports.

Renowned author and former Stanford basketball star Mariah Burton Nelson will present a slide show on Images of Women Athletes in the Media on Feb. 11 as part of Bucknell's celebration of women in athletics.

NAVY

from page 11

Jonah Half—The Bucknellian

J.R. Holden '98 scored 30 points to lead the Bison over Navy—the 30 points were a career high

of as many as 15 points, Navy made a pair of mini-runs late in the half, five times carving Bucknell's lead into single figures, but every run was countered by an impressive effort from J.R. Holden. Holden made nine of 12 free throws down the stretch to ice the victory.

"He's extremely quick, and takes advantage of all his opportunities," Devoe said. "In my opinion, J.R. Holden is the best guard in this league."

A layup with just :33 remaining gave Holden his 30th point and career high, besting by one point his Dec. 10th outburst at Princeton.

"As the game went on, and I began to feel like I had the hot hand," Holden said. "Every time they made it close, I just tried to get a little more assertive with the basketball."

Holden's scoring output against the Midshipmen will surely draw the attention of Colgate and Western Maryland, whom the Bison face this week. Holden scored 20 points against the Colgate Red Raiders in their last meeting, a five-point Colgate win on Jan. 8, and is sure to play a key role again. That role, however, may not include scoring.

"J.R. had a big shooting night (against Navy), but I've seen games where he's had five or six points and played just as well," Flannery said. "If defenses try to key on his scoring, he's the kind of player who can make all kinds of other things happen."

Gordon Mboya '97 added 15 points for the Bison, who will next host Colgate this Saturday at 3:15 p.m.

In Wed. night action, Bucknell fell to Army in an upset, 83-71.

Athlete Profile—Valter Karavanic

A long way from home

Karavanic '00, from Croatia brings European style to America

BY E.J. CRAWFORD
Bucknellian Staff Writer

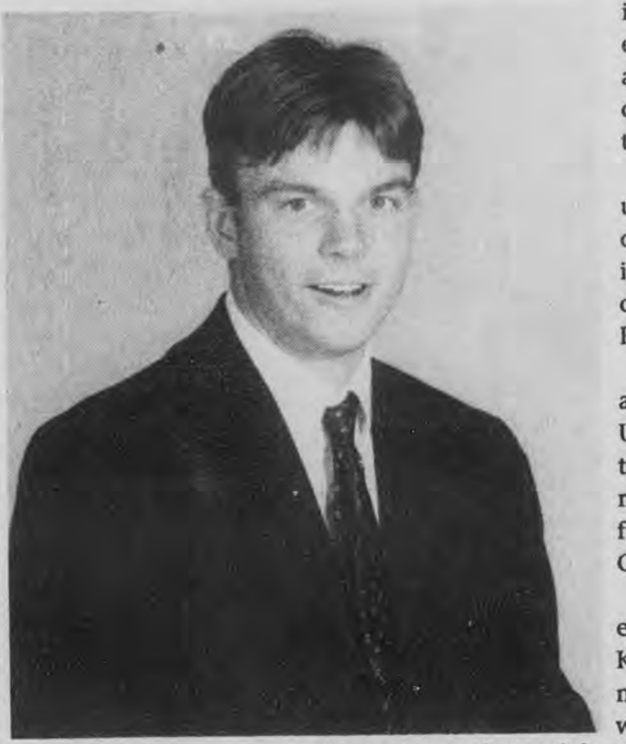

photo courtesy of sports info.

Valter Karavanic is averaging five points and three rebounds for the Bison this season.

For many freshman, leaving friends and family can be a difficult thing to do. And they're only going four hours away from home. Freshman basketball player Valter Karavanic has adapted rather nicely since leaving his friends and family in Croatia for American basketball, and most importantly, a U.S. college education.

Said Karavanic, "It was always my dream to come to the United States and go to college and to play basketball."

Karavanic left Croatia to come to America for his junior year of high school, where he studied and played basketball at St. Benedict's, a small parochial prep-school outside of Newark, New Jersey, and completed his high school there. While playing for St. Benedict's, Karavanic and his team went to Maryland to play in a tournament, where Head Coach Pat Flannery first spotted the 6'7" Croatian.

"At first I thought we'd have trouble recruiting him, but we stayed with him until he finally agreed on a visit," remembers Flannery.

The sweet-shooting Karavanic fell in love with Bucknell's scenic campus, a far cry from the urban Newark neighborhood, and the students and faculty of the University, who, said the electrical engineering major, "were very friendly... a very homey atmosphere."

A few weeks later Karavanic became a Bison.

Despite his relative newness to the American style of basketball, which is much rougher and more defensive-oriented than in Europe, Karavanic seems to be adjusting well. "He's becoming more physical and a better defender," said Flannery adding that "we've thrown a lot at him, and it's amazing the amount of things he's been able to handle."

One thing that the freshman has had no trouble with is his shooting and ball movement. "[The] European style is more outside and outside shots," Karavanic remarked.

Adds Coach Flannery, "He shoots and passes the ball well, [and] has a great knowledge of spacing and ball movement. He's very versatile."

Off the court Karavanic has adapted equally as well, easily making friends in his new culture, in addition to mustering a 3.6 GPA in his first semester of electrical engineering—all after only living in the country for less than three years.

"He's a fun kid, a popular kid with everybody on the team... it's amazing what he's done both on and off the court," Flannery said.

The toughest thing about coming to the United States has been the small forward's separation from friends and family, who still live in Croatia.

Phone calls are "very expensive," and thus Karavanic communicates mostly through letters with family and friends. Living in the U.S. also means that Karavanic only sees his parents over the summer and during the long winter break.

"It can be tough, but this is my dream," stated Karavanic.

When asked about his heritage and background in the war-torn country, Karavanic explained that "my family does not live in a dangerous area, and were never in any trouble."

Moreover, the mature youngster holds no animosity against Serbia despite the conflict, stating that he has "lots of friends in Serbia."

Off the court Karavanic enjoys watching movies and sports of all kinds.

"More than anything I just like to hang out with my friends, not really doing much, just kind of hanging out," said the Croatian.

He's sounding pretty American already.

Track and field whips field at Delaware Invitational

ERIC KEBER
Bucknellian Staff Writer

Last Friday the Bucknell men's and women's indoor track and field teams traveled to the University of Delaware to compete in the Delaware Invitational, where the Bucknell men and women won all but four events. In addition, a school record was set by captain and thrower Lisa Allen '97. Allen broke the school record for the 20-pound weight throw with a toss of 53' 1/4".

The men's score of 118 easily beat the University of Delaware which came in second with 27. Georgetown University and West Chester University tallied 24 and 14 points to round out the field.

The women's score of 158 was more than enough to beat their opponents; Delaware (40), Georgetown (36), the University of Pennsylvania (18), and West Chester (18).

Head Coach Art Gulden commented that the win was definitely a team effort but certain individuals did stand out.

The 400-meter runners performed well, as did the 4x400 and 4x800 relay teams. Both Mike Ditzel '98 and Bryan Schiding '00 won two events. Ditzel won the 200-meter dash with a time of 23.59 and also the 400-meter finishing in 51.83. Schiding won the long jump and also the triple jump.

On the women's side, Tunde Daniels '00, Kim McGrath '00, and Julie Sweitzer '99 each won two events. Daniels won the 200 and 400 with times of 26.45 and 58.94 respectively. McGrath finished the 55-meter dash in 7.60 seconds and then won the triple jump. Sweitzer won the 800-meter run in 2:22.66 and also the mile in 5:09.26.

"We have a bunch of young freshmen who have been doing extremely well," Gulden noted.

The Delaware meet was "good preparation for the future," continued Gulden, who looks at all meets as progressing toward a final goal. The goal is the Patriot League Championship which takes place in two weeks. The tournament was won by Army last year and they are the top team this year. Gulden hopes that sprinters Mike Pistella '97, who is also a captain, and I. B. Brown '97 will continue to run well. He also expects captain and sprinter Kate Dei Cas '97, hurdler and sprinter Tina Hall '97, and Allen to keep providing points for the team in their upcoming meets.

At this time the team is preparing for its meet at Cornell. The women's only loss last year was to Cornell and it is a pivotal matchup this year. "It's important to beat Cornell. We've never beaten the women's team and they're very good," Gulden said.

HOCKEY

from page 14

and recorded 62 shots on goal in the win.

Bucknell went on to rout Widener in its next two games, defeating the Pioneers 14-0 at home and 9-3 in Philadelphia. The only blemish on Bucknell's record was a 5-5 tie at Loyola last week. Playing in Baltimore the night after playing a late game in Philadelphia, the Bison sputtered in the early going trailing 2-0, 3-1, and 5-3.

A power-play goal midway through the third period closed the gap, and Mastroianni and Hidy connected on another power-play tally with five minutes remaining to even the score.

The Bison have a pair of games this weekend that are crucial in determining seeding in the Mason-Dixon league playoffs. Loyola (3-0-1), tied with Bucknell for first place in the league's Northern Division, will visit the Bison Saturday and Shippensburg will come to Bucknell Sunday.

The winner of Saturday's game will be the odds-on favorite to win the Northern Divison regular-season title.

"This weekend is very important to us," Hidy said. "If we can win these two games, we'll have the inside track to the division championship."

All Bucknell home games are played at the Youth and Community Center in Sunbury. This Saturday's game begins sat 4:30 p.m. and Sunday's will be at 9:30 p.m.

Swimming defeats Colgate, men win against Delaware

By Erica Friedlander
Bucknellian Staff Writer

The Bucknell men's swim team capped off an undefeated week with a victory against league rival Colgate, while the women split their week's matchups.

Cheers rang out at the Freas-Rooke Pool at Davis Gym last Tuesday as fans watched Bucknell's men's swimming team defeat Delaware, 139-98.

Tri-captain Ethan Buckley '97 was victorious in two individual events and also assisted the 400-yard medley relay team in its win. Buckley posted a time of 1:45.47 in the 200-yard freestyle and 4:48.85 in the 500-yard freestyle. The 400 medley relay was won by Buckley, Turkoglu '98, Woodworth '98 and Hill '00 who took first place with a time of 3:36.73. The time was more than five seconds faster than the second place team from Delaware.

The Bison men came on strong against the Blue Hens, taking firsts in several other events, including sophomore Alex Johnson's two firsts in the 50 and 100-yard freestyle where he posted times of 21.89 and 47.97 respectively.

Scott Woodworth took first in the 200-yard backstroke with a time of 1:57.25 while Justin Ganz '98 won the 200-yard individual medley relay (2:00.72). Mike Malloure '98 took first place in three meter diving with a score of 245.325 which beat out the Delaware opposition by more than eight points.

In women's action, the Bison lost a tough meet to Delaware despite a number of first place wins. The Blue Hens scored 147.5 points over Bucknell's 94.5. Co-captain Jen Myers '98 took two firsts for the Bison in the 200-yard individual medley with a time of 2:14.20 and in the 200-yard backstroke where she posted a time of 2:07.28. Other individual winners for Bucknell included freshman Kate Wood's first in the 200-yard butterfly and Nicole Brandemarti's '00 wins in both the 50 and 100-yard freestyle where she swam times of 25.72 and 55.71 respectively.

Saturday afternoon, the Bison men and women traveled to Hamilton, NY, where they swam and dove against Colgate. Bucknell's men's team easily defeated Colgate 141-100 and the women won a close meet, 127-116.

The Bison men were once again led by Buckley, who won the 50 and the 100-yard freestyle events with times of 21.64 and 47.05. Buckley also swam a leg of the 400-yard freestyle relay which placed first with a time of 3:12.65. The win was assisted by other medley team members Hill, Lannes '98 and Fitzpatrick '00. Individual wins from Bucknell included Johnson's swim in the 200-yard freestyle (1:46.69) and 500-yard freestyle (4:56.67), Scott Woodworth's 2:02.4 in the 200-yard individual medley, and sophomore Greg Brash's win in the 200-yard backstroke (2:02.04).

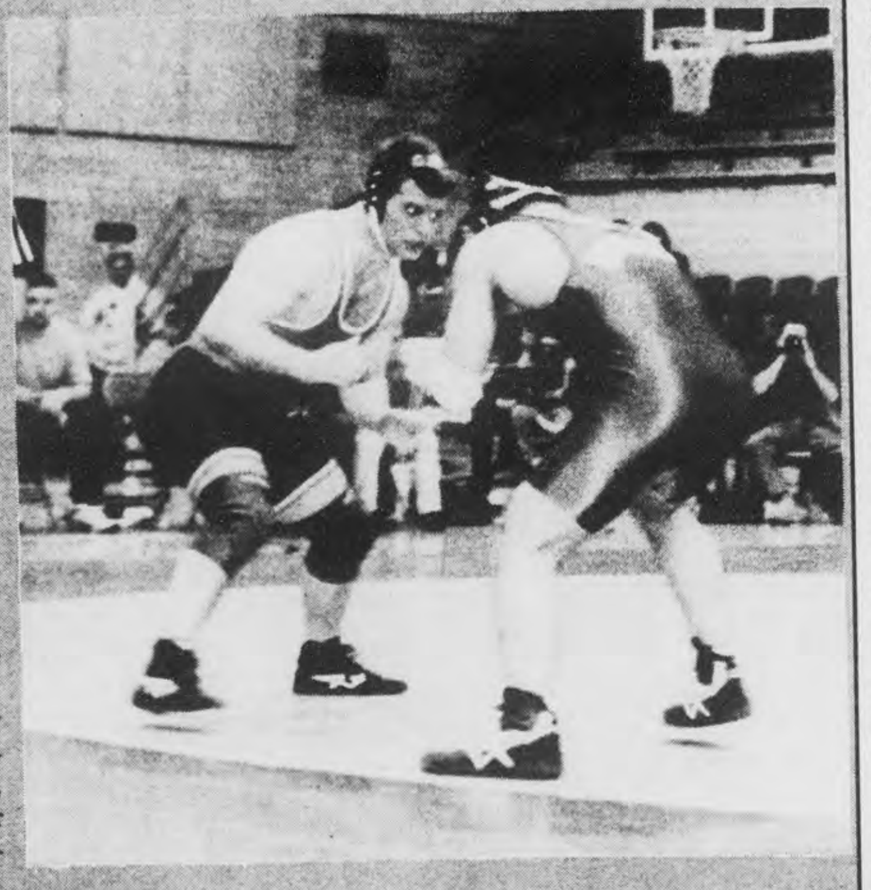
Kate Wood helped the Bison to victory with her wins in the 200-yard fly (2:12.57) and 1000 (10:40.88) and 500-yard (5:14.95) freestyle. Jen Myers also took a first in the 200-yard backstroke (2:10.10) and assisted the 400-yard medley relay team in their win. The relay team posted a time of 4:14.99.

Coach Lynn Kachmerik said, "Bucknell easily defeated Colgate. We were simply stronger all around. Because of this I was able to move people to events that they would not normally swim to see how their times were. They swam great times in all of the events."

The win against Colgate brings the men's record to 7-2 while the women are 8-2. Bucknell will host Lehigh University on Saturday, Feb. 1. The meet will begin with diving at 11:00 a.m.

Bison grapplers fall to Drexel

By E.J. Crawford
Bucknellian Staff Writer



Anne Ravert—The Bucknellian

Bucknell wrestling is off to a 2-2 start in the ECWA conference. The squad is 4-2 overall after a loss to Drexel.

Last year Bucknell wrestling suffered through a season of disappointment and close losses, and most critics did not expect much from this year's squad. However, the Bison grapplers carried a 4-1 record into this past week's match against Eastern Conference (ECWA) power Drexel.

However, despite Bucknell's fast start this season, they were unable to hold off an experienced Drexel squad, falling 21-13.

The win improves Drexel to 4-2 in the conference, and drops the Bison back to .500 in the ECWA with a 2-2 record.

Although the team fell, many of the wrestlers put forth excellent results, as Todd Boerner '99, Solomon Webb '00, Brian Pitzer '99, and Jeff Fisher '98 all collected victories.

Pitzer's victory came by major decision while the rest all won by regular decision.

The outlook for the Bison looks bright for the rest of the season, as none of the victors are seniors, and Bucknell retains last year's top performers—Jeff Fazio '98 and Mike Garcia '98.

Fazio, who, despite a loss to Drexel, is 12-5 this season and is 33-15 for his career. Garcia was undefeated in dual meet action last year and advanced to the NCAA tournament with a victory in the ECWA tournament. He did not wrestle against Drexel but is 11-3 this season.

BOOSTERS

from page 13

ty support by running youth basketball clinics, is working with Randall to provide additional entertainment for the fans at games.

At this Saturday's game against Colgate, there will be a faculty game at half-time, and the players' mothers will battle in their annual shoot-out before the Feb. 8 game against Lafayette.

Ironically, this recent surge of support for the women's team comes just before National Girls and Women in Sports Day (Feb. 6). Janice Butler of the Women's Resource Center was on hand at the meeting to show her support for the new booster club and promote upcoming events for the celebration of women in sports.

Renowned author and former Stanford basketball star Mariah Burton Nelson will present a slide show on Images of Women Athletes in the Media on Feb. 11 as part of Bucknell's celebration of women in athletics.

NAVY

from page 11

Jonah Half—The Bucknellian

J.R. Holden '98 scored 30 points to lead the Bison over Navy—the 30 points were a career high

of as many as 15 points, Navy made a pair of mini-runs late in the half, five times carving Bucknell's lead into single figures, but every run was countered by an impressive effort from J.R. Holden. Holden made nine of 12 free throws down the stretch to ice the victory.

"He's extremely quick, and takes advantage of all his opportunities," Devoe said. "In my opinion, J.R. Holden is the best guard in this league."

A layup with just :33 remaining gave Holden his 30th point and career high, besting by one point his Dec. 10th outburst at Princeton.

"As the game went on, and I began to feel like I had the hot hand," Holden said. "Every time they made it close, I just tried to get a little more assertive with the basketball."

Holden's scoring output against the Midshipmen will surely draw the attention of Colgate and Western Maryland, whom the Bison face this week. Holden scored 20 points against the Colgate Red Raiders in their last meeting, a five-point Colgate win on Jan. 8, and is sure to play a key role again. That role, however, may not include scoring.

"J.R. had a big shooting night (against Navy), but I've seen games where he's had five or six points and played just as well," Flannery said. "If defenses try to key on his scoring, he's the kind of player who can make all kinds of other things happen."

Gordon Mboya '97 added 15 points for the Bison, who will next host Colgate this Saturday at 3:15 p.m.

In Wed. night action, Bucknell fell to Army in an upset, 83-71.

Athlete Profile—Valter Karavanic

A long way from home

Karavanic '00, from Croatia brings European style to America

By E.J. Crawford
Bucknellian Staff Writer

photo courtesy of sports info.

Valter Karavanic is averaging five points and three rebounds for the Bison this season.

For many freshman, leaving friends and family can be a difficult thing to do. And they're only going four hours away from home. Freshman basketball player Valter Karavanic has adapted rather nicely since leaving his friends and family in Croatia for American basketball, and most importantly, a U.S. college education.

Said Karavanic, "It was always my dream to come to the United States and go to college and to play basketball."

Karavanic left Croatia to come to America for his junior year of high school, where he studied and played basketball at St. Benedict's, a small parochial prep-school outside of Newark, New Jersey, and completed his high school there. While playing for St. Benedict's, Karavanic and his team went to Maryland to play in a tournament, where Head Coach Pat Flannery first spotted the 6'7" Croatian.

"At first I thought we'd have trouble recruiting him, but we stayed with him until he finally agreed on a visit," remembers Flannery.

The sweet-shooting Karavanic fell in love with Bucknell's scenic campus, a far cry from the urban Newark neighborhood, and the students and faculty of the University, who, said the electrical engineering major, "were very friendly... a very homey atmosphere."

A few weeks later Karavanic became a Bison.

Despite his relative newness to the American style of basketball, which is much rougher and more defensive-oriented than in Europe, Karavanic seems to be adjusting well. "He's becoming more physical and a better defender," said Flannery adding that "we've thrown a lot at him, and it's amazing the amount of things he's been able to handle."

One thing that the freshman has had no trouble with is his shooting and ball movement. "[The] European style is more outside and outside shots," Karavanic remarked.

Adds Coach Flannery, "He shoots and passes the ball well, [and] has a great knowledge of spacing and ball movement. He's very versatile."

Off the court Karavanic has adapted equally as well, easily making friends in his new culture, in addition to mustering a 3.6 GPA in his first semester of electrical engineering—all after only living in the country for less than three years.

"He's a fun kid, a popular kid with everybody on the team... it's amazing what he's done both on and off the court," Flannery said.

The toughest thing about coming to the United States has been the small forward's separation from friends and family, who still live in Croatia.

Phone calls are "very expensive," and thus Karavanic communicates mostly through letters with family and friends. Living in the U.S. also means that Karavanic only sees his parents over the summer and during the long winter break.

"It can be tough, but this is my dream," stated Karavanic.

When asked about his heritage and background in the war-torn country, Karavanic explained that "my family does not live in a dangerous area, and were never in any trouble."

Moreover, the mature youngster holds no animosity against Serbia despite the conflict, stating that he has "lots of friends in Serbia."

Off the court Karavanic enjoys watching movies and sports of all kinds.

"More than anything I just like to hang out with my friends, not really doing much, just kind of hanging out," said the Croatian.

He's sounding pretty American already.

Track and field whips field at Delaware Invitational

Eric Keber
Bucknellian Staff Writer

Last Friday the Bucknell men's and women's indoor track and field teams traveled to the University of Delaware to compete in the Delaware Invitational, where the Bucknell men and women won all but four events. In addition, a school record was set by captain and thrower Lisa Allen '97. Allen broke the school record for the 20-pound weight throw with a toss of 53' 1/4".

The men's score of 118 easily beat the University of Delaware which came in second with 27. Georgetown University and West Chester University tallied 24 and 14 points to round out the field.

The women's score of 158 was more than enough to beat their opponents; Delaware (40), Georgetown (36), the University of Pennsylvania (18), and West Chester (18).

Head Coach Art Gulden commented that the win was definitely a team effort but certain individuals did stand out.

The 400-meter runners performed well, as did the 4x400 and 4x800 relay teams. Both Mike Ditzel '98 and Bryan Schiding '00 won two events. Ditzel won the 200-meter dash with a time of 23.59 and also the 400-meter finishing in 51.83. Schiding won the long jump and also the triple jump.

On the women's side, Tunde Daniels '00, Kim McGrath '00, and Julie Sweitzer '99 each won two events. Daniels won the 200 and 400 with times of 26.45 and 58.94 respectively. McGrath finished the 55-meter dash in 7.60 seconds and then won the triple jump. Sweitzer won the 800-meter run in 2:22.66 and also the mile in 5:09.26.

"We have a bunch of young freshmen who have been doing extremely well," Gulden noted.

The Delaware meet was "good preparation for the future," continued Gulden, who looks at all meets as progressing toward a final goal. The goal is the Patriot League Championship which takes place in two weeks. The tournament was won by Army last year and they are the top team this year. Gulden hopes that sprinters Mike Pistella '97, who is also a captain, and I. B. Brown '97 will continue to run well. He also expects captain and sprinter Kate Dei Cas '97, hurdler and sprinter Tina Hall '97, and Allen to keep providing points for the team in their upcoming meets.

At this time the team is preparing for its meet at Cornell. The women's only loss last year was to Cornell and it is a pivotal matchup this year. "It's important to beat Cornell. We've never beaten the women's team and they're very good," Gulden said.

HOCKEY

from page 14

and recorded 62 shots on goal in the win.

Bucknell went on to rout Widener in its next two games, defeating the Pioneers 14-0 at home and 9-3 in Philadelphia. The only blemish on Bucknell's record was a 5-5 tie at Loyola last week. Playing in Baltimore the night after playing a late game in Philadelphia, the Bison sputtered in the early going trailing 2-0, 3-1, and 5-3.

A power-play goal midway through the third period closed the gap, and Mastroianni and Hidy connected on another power-play tally with five minutes remaining to even the score.

The Bison have a pair of games this weekend that are crucial in determining seeding in the Mason-Dixon league playoffs. Loyola (3-0-1), tied with Bucknell for first place in the league's Northern Division, will visit the Bison Saturday and Shippensburg will come to Bucknell Sunday.

The winner of Saturday's game will be the odds-on favorite to win the Northern Divison regular-season title.

"This weekend is very important to us," Hidy said. "If we can win these two games, we'll have the inside track to the division championship."

Right at home in a land of cheese

Revenge is sweet, but vindication is sweeter. This is what three critical members of the Green Bay Packers learned on Sunday, as Brett Favre, Desmond Howard, and Reggie White gave cheeseheads everywhere reason to celebrate when they trampled the Patriots.

Each came to Green Bay, as well as this season, with something to prove. Favre came to the frozen tundra (a saying I must admit that I will not miss hearing during this offseason) as an unproven hothead with a bad reputation. But under the tutelage of now 49er coach Steve Mariucci, in addition to Favre's own hard work, he turned himself into the NFL's premier quarterback. People can argue that one all day, but name the only other Super Bowl winner and back-to-back MVP—that's right, Joe Montana (not bad company for a 27-year-old). In addition, Favre took his wild side and riverboat gambler image and turned it into a fire that united the team. As even Reggie White said, "Brett is the leader of this team."

Commentary

E.J. Crawford

E.J. Crawford
Sports Co-Editor

There are plenty of quarterbacks in the NFL that could throw a football on a line, but few have the ability to take a team on their back and convince them they could win. Johnny Unitas had that ability, so did Joe Namath and Joe Montana, and so does Brett Favre.

But the true vindication of the Brett Favre story is his return from an offseason addiction to painkillers. The media hounded Favre all season, always referring to him as "Brett Favre, fresh off a stint in rehabilitation," never "Brett Favre, the Packers starting quarterback." They also questioned whether Favre would come back with the same intensity of last season. Favre never wavered. He started the season on an incredible tear, and despite the losses of key receivers, put up numbers that make most quarterbacks drool. And with the exception of a hiccup against "America's nightmare," the Dallas Cowboys (by the way, I cannot express the joy I felt to see the upstart Panthers knock Jerry Jones, Michael Irvin and Co. out of the playoffs and back down to Earth—also, regardless of whether Irvin and Williams are innocent or not, they are still nothing but fraudulent con-men and an embarrassment to football and all athletics), Favre displayed all the toughness and skills necessary to hoist the Lombardi Trophy.

For Desmond Howard, it has been five long years since he clutched the Heisman Trophy and was a first-round selection of the Washington Redskins. He has bounced around the NFL, wilting under the pressure and expectations that come with college football preeminence, never being able to fulfill his, or the media's goals. So Howard travelled out to cheese country for a shot at redemption as a returner with the Packers. Nine months later he holds Super Bowl records for both punt and kickoff returns, and singlehandedly swung the momentum away from the 49ers and Patriots at key moments in huge games. (This brings me to this season's most perplexing question: How could those knuckleheads in the NFL leave Howard off the Pro Bowl team; you cannot possibly convince me that Michael Bates—of the Panthers in case you didn't know, not that you should—is a better return man or is more valuable than Howard.)

Now given, Howard was drafted to be a franchise receiver, not a special teams player, but Howard has taken the opportunity given to him and turned it into a Super Bowl MVP. And don't try to tell the Packers that he's just a returner; to them, he's an indispensable part of the first Packer championship in 30 years.

As for Reggie White, he was accused of greed when he left the Eagles to become the highest-paid defensive player in football, but years later he is the member of a championship team, the only thing he had not accomplished in sports. White, known as the "minister of defense," came to Green Bay because of the community and Brett Favre; he is the most important reason the Pack is back, in that he lured many black players (see Eugene Robinson, Andre Rison, and Sean Jones) to a town many black athletes saw as not minority-friendly. In turn, White developed a special relationship with the community, and has done more than his fair share of community work.

But White faced many questions about his own level of play this season (of course, those were the same idiots who said that Jordan would never be the same after retirement). White answered those, and all other critics Sunday, as he busted past All-Pro Bruce Armstrong to gobble up Drew Bledsoe for three sacks, and state his case, along with Bruce Smith and few others, as the greatest defensive lineman in the history of football.

Emily Dickinson once write that "Success is counted sweetest / By those who ne'er succeed," and trust me, Brett Favre, Desmond Howard, and Reggie White, find it very sweet to bring the Vince Lombardi Trophy back to where it belongs—home.

Bucknell women's hoopsters fall prey to injuries, Holy Cross

By Jeff Campagna
Bucknellian Staff Writer

At this time last year, the Bucknell women's basket ball team was on their way to their first Patriot League regular season championship. As of Tuesday, Bucknell had fallen behind the furious pace set by Holy Cross and Navy, and was tied for fourth in the conference at 2-3 (7-10 overall).

Injuries and illness have taken their toll on this year's squad, hampering Bucknell's performance. The team has missed senior center Shannon McGowan's strong presence in the middle, as well as the veteran leadership of the co-captain. The team's scoring and rebounding leader from last year is out for the season after knee surgery.

Players, including forwards Kim Delfs '99 and Jessica Mathieson '98, have stepped up their efforts under the boards in order to help compensate for McGowan's absence.

As to the adversity faced by the Bison, Mathieson said that "We've made a lot of adjustments throughout the season, particularly with our freshmen. They've gotten a lot of playing time, which is unusual for a Division I school, but they've stepped up and taken on the different roles that have needed to be filled."

Forward Kim Delfs '99 has exhibited her toughness, continuing to play with a broken finger, and ended up leading the team in scoring and rebounding against first-place Holy Cross this past Saturday.

Despite Delfs' heroic efforts, the streaking Crusaders made Bucknell their seventh victim in a row, handing the Bison a 77-60 defeat.

The Bison were unable to overcome Holy Cross' smothering defense in the first half, and was held to just 19 points.

The Bison scoring attack came alive in the second half, as they more than doubled their point total. However, the Crusaders' 14-point halftime lead proved to be too much to overcome.

Senior guard Chiara Sockel turned in a fine all-around performance, scoring 15 points while grabbing five rebounds and five steals, in addition to dishing out a team-high three assists.

With the victory, Holy Cross remained undefeated in league play at 5-0.

The defeat was the third in a row for Bucknell, whose previous 52-42 loss to Navy snapped their 8-game home winning streak, the longest in Patriot League history.

As tournament time roles around, Bucknell looks to overcome the obstacles it has faced as of late and get back in gear. With big match-ups against league-rivals Colgate, Lehigh and Lafayette looming in early February, the Bison have an opportunity to get back in the title hunt.

"I feel confident that team chemistry and team unity are starting to jell. It's taken awhile to adjust to the loss of Shannon [McGowan], and we must continue to stress defense and rebounding," said Coach Juliene Simpson. At 2-3 [in the league], every game is important."

Jess Mathieson '98 is one of several players who have stepped up their efforts since the injury to center Shannon McGowan '97.

Club Sport Report: Hockey and Chess

Bucknell Ice Hockey opens undefeated

By Chris Ellis
Bucknellian Staff Writer

Through its first four regular-season games, the Bucknell ice hockey team's defense had allowed an average of 3.75 goals a game. While giving up just under four goals a game is a statistic that indicates solid defensive play, it is hardly a number that reeks of championship quality.

But when that same team is scoring upwards of 11 goals per game, minor defensive lapses can be ignored. Led by the most powerful scoring line in the Mason-Dixon league and a stellar group of freshman, the Bison have rocketed to a 3-0-1 record and a tie for first place in the league's Northern Division.

"We've jumped out to our really fast start by getting production from everyone on our roster," team captain Eric Hidy '97, the team's only senior, said. "We feel confident no matter who we play."

Hidy, along with Eric Mastroianni '98 and Jim Taubner '98, has formed a line that has been almost unstoppable in its first four games. The three forwards have combined to record 21 goals and 50 points, and at least one member had a hat trick in each of the first three games. Hidy leads all scorers with 10 goals and 18 points.

"Our line works really well together and makes a lot of things happen on the ice," Hidy said.

In addition to the top line, though, a number of freshman have made an immediate impact on Bucknell's success. Forwards Trip Sanders, Alex Dixon, and Jason Werring all have scored for Bucknell, and defenseman Ramsey Wilcox anchors a core of blueliners that may be Bucknell's best ever.

"Our freshmen have stepped in and done an excellent job for us," Hidy said. "We have depth on our team that we've never had before."

The work of goaltenders Bill Gubing '98 and Chris Ellis '00 has been obscured by the powerful Bison offense, but both have done their part to preserve the undefeated start. Ellis stopped 24 shots in a 14-0 shutout of Widener, and Gubing turned aside 34 in tying undefeated Loyola (Md.), 5-5.

The Bison began the season at defending champion Dickinson, but the Devils were no match for Bucknell in the season opener. The Bison took advantage of Mastroianni's six-point night to rout the Devils, 17-7. The Bison scored nine goals in the second period

Chess checkmates opponents at Pan-American tourney

By John Dolores
Bucknellian Staff Correspondent

The Bucknell Chess Club is stacked with potential, but there was one obstacle they had to overcome in order to win at the Pan-American Chess Championships—out of the four players at the tournament, only one had prior tournament experience.

Bucknell started slowly in their first round against the University of Montreal. Bob Dyson '99, Claude Banta '98 and Forrest Lysinger '00 fell to Montreal's superior talent, while only team captain John Dolores '98 managed a draw.

Bucknell then faced Canisius in the second round, where they again fell despite an improvement in play.

Bucknell began to click in their third round matchup as Dyson, Banta and Lysinger all collected victories.

But in the fourth round, Bucknell's inexperience came into play in a match against Drexel. Lysinger and Banta, both with winning positions, allowed their opponents to use the rules to their advantage, with the results ending in a draw and a loss, respectively. Drexel then snuck by the Bison as Dolores fell and Dyson was able to force a draw.

In the fifth round, Bucknell steam-rolled Rhode Island College by winning all four games.

With the trophy on the line, Bucknell stepped up to the test against West Virginia. Lysinger and Dyson convincingly won their matches,while Dolores fell. Everything depended on Banta's game, in which the sophomore needed a win or draw for the victory.

After a few stressful moves, Banta secured the trophy by forcing a draw.

Bucknell's victory was a huge upset and was the talk of the tournament.

Right at home in a land of cheese

Revenge is sweet, but vindication is sweeter. This is what three critical members of the Green Bay Packers learned on Sunday, as Brett Favre, Desmond Howard, and Reggie White gave cheeseheads everywhere reason to celebrate when they trampled the Patriots.

Each came to Green Bay, as well as this season, with something to prove. Favre came to the frozen tundra (a saying I must admit that I will not miss hearing during this offseason) as an unproven hothead with a bad reputation. But under the tutelage of now 49er coach Steve Mariucci, in addition to Favre's own hard work, he turned himself into the NFL's premier quarterback. People can argue that one all day, but name the only other Super Bowl winner and back-to-back MVP—that's right, Joe Montana (not bad company for a 27-year-old). In addition, Favre took his wild side and riverboat gambler image and turned it into a fire that united the team. As even Reggie White said, "Brett is the leader of this team."

There are plenty of quarterbacks in the NFL that could throw a football on a line, but few have the ability to take a team on their back and convince them they could win. Johnny Unitas had that ability, so did Joe Namath and Joe Montana, and so does Brett Favre.

Commentary

E.J. Crawford

E.J. Crawford
Sports Co-Editor

But the true vindication of the Brett Favre story is his return from an offseason addiction to painkillers. The media hounded Favre all season, always referring to him as "Brett Favre, fresh off a stint in rehabilitation," never "Brett Favre, the Packers starting quarterback." They also questioned whether Favre would come back with the same intensity of last season. Favre never wavered. He started the season on an incredible tear, and despite the losses of key receivers, put up numbers that make most quarterbacks drool. And with the exception of a hiccup against "America's nightmare," the Dallas Cowboys (by the way, I cannot express the joy I felt to see the upstart Panthers knock Jerry Jones, Michael Irvin and Co. out of the playoffs and back down to Earth—also, regardless of whether Irvin and Williams are innocent or not, they are still nothing but fraudulent con-men and an embarrassment to football and all athletics), Favre displayed all the toughness and skills necessary to hoist the Lombardi Trophy.

For Desmond Howard, it has been five long years since he clutched the Heisman Trophy and was a first-round selection of the Washington Redskins. He has bounced around the NFL, wilting under the pressure and expectations that come with college football preeminence, never being able to fulfill his, or the media's goals. So Howard travelled out to cheese country for a shot at redemption as a returner with the Packers. Nine months later he holds Super Bowl records for both punt and kickoff returns, and single-handedly swung the momentum away from the 49ers and Patriots at key moments in huge games. (This brings me to this season's most perplexing question: How could those knuckleheads in the NFL leave Howard off the Pro Bowl team; you cannot possibly convince me that Michael Bates—of the Panthers in case you didn't know, not that you should—is a better return man or is more valuable than Howard.)

Now given, Howard was drafted to be a franchise receiver, not a special teams player, but Howard has taken the opportunity given to him and turned it into a Super Bowl MVP. And don't try to tell the Packers that he's just a returner; to them, he's an indispensable part of the first Packer championship in 30 years.

Dana's 24-hour access in question

BY KARIN DAVIDSON
Bucknellian Staff Writer

A group of students met today to discuss what measures should be taken to prevent disrespectful acts from occurring in the Dana Engineering building.

The meeting was prompted by custodians in the building who expressed concerns about disrespectful building use, as well as, by the subsequent circulation of rumors about the possibility of the building losing its 24-hour access status.

The custodial staff approached Thomas Rich, dean of the college of engineering, because of the disrespect it sees toward the classrooms. They reported that in the mornings they have encountered chalk broken and thrown all around the room, obscene pictures drawn on the chalkboards, evidence of BB gun target practice on a soda can, food smeared on the desks and tables and furniture rearranged and even moved from one room to another.

Messes such as these are problems for the custodial staff because when they come to work at 5 a.m. they essentially have three hours to clean the offices and classrooms, and no extra time to deal with preventable messes.

The custodial staff said the problems do not occur consistently and are more frequent during exam times and have suggested locking classroom doors while leaving computer labs open.

Trudy Cunningham, associate dean of engineering, said she was approached by Rich to look into this concern because the "custodians are reporting that classrooms are being left in unacceptable conditions."

She said that at this point there is no plan in place to change the building's access policy. Her plan was to meet with student leaders in engineering majors today to discuss possible solutions.

Right now students are gathering data and developing possible solutions. By tomorrow Cunningham hopes to have a workable solution to implement by early next week. Cunningham said the deans have been working on this situation for 10 days and the students for a week.

Mike Hauser '97, president of the American Society of Mechanical Engineers, is part of the student group that met earlier today with Cunningham. Last night when asked to respond to the custodial staff's complaints about the disrespect of the classrooms, Hauser said, "I can see how things like that go on, but I haven't seen it."

Hauser thinks that the solu-

Parking Alert

The Department of Public Safety, the University Parking Committee and the Department of Physical Plant issued the following parking notice:

1. All parking and traffic regulations are in effect on campus 24-hours a day, seven days a week, all year round, *to include* holidays and semester breaks.

2. Parking or driving a vehicle on the grass or on pedestrian walkways is *strictly prohibited*. Students are permitted to park their vehicles on walkways to load or unload their belongings during the first week and the last week of the semester *only* (one hour limit). They must then move their vehicles to an authorized parking lot when their loading/unloading is completed.

3. All visitors to campus must register their vehicles according to the requirements explained in the University parking and traffic brochure, *Your Car on Campus*. All University employees, students and visitors are responsible for reading and following the requirements in this brochure.

4. Students and employees are *not* authorized to park in spaces reserved for visitors, service vehicles, or those with handicapped parking permits.

5. Operating vehicles on the pedestrian walkways behind the Athletic Fieldhouse (between Faculty Court and the tennis courts at the rear of the Fieldhouse) is a safety hazard, damages University property and is *strictly prohibited.* Public Safety will be monitoring vehicle traffic at this location and issuing the appropriate citations to *all* violators who drive on these walkways.

Faculty, staff, students initiate a R.A.D.ical attack on rape

Adams didn't expect this

Widespread backlash concerning Tent Party alcohol policy change takes Bro by surprise

BY BETH MARTIN
Bucknellian Staff Writer

The repercussions of President William D. Adams' decision to prohibit alcohol at Tent Party are strong and coming from all directions.

In response to Adams' announcement of a change in the University's alcohol policy which affects Homecoming Weekend tailgating party and the graduation Tent Party, he has already received more than 15 email messages and several letters from students and alumni concerning this year's dry Tent Party.

Gerald Salterelli '97 is circulating a petition among the senior class for the repeal of Adams' ban on alcohol at Tent Party.

Those signing the petition agree to withdraw their monetary pledge to the senior gift drive and boycott this year's tent party.

Adams said that he is not as concerned with resulting financial losses as he is with the potential for graduates to leave the University with a negative impression.

"I'm much more worried about their feelings towards the University. I just regret that it's poisoning people's feelings about the school. Be angry at me... but look, Bucknell is big. Presidents come and go and decisions come and go. Don't hate Bucknell. It's me. I made this decision," Adams said.

Responding to the possibility that graduates will not attend the party, Adams said "I'll be disappointed if that's the case. We'll be helping with the event in anyway we can. I've guaranteed some additional resources so they can make the party what they want it to be."

Nevertheless, Adams said that he does not plan on reversing his decision. "I have heard no compelling reason to change it," he said. "I'd like to see how it works."

Adams said that the decision to forbid alcohol at events such as

Local farmer fills air with foul smell

BY ARGUN ULGEN
Bucknellian Staff Writer

A pungent odor has been hovering over the campus for the past few weeks. The smell is none other than pig manure.

Ray Espenshade, a farmer in Kelly Township, spread the manure as part of a large scale livestock operation.

Espenshade's operation has raised concerns from neighbors regarding his plans to house 10,000 hogs a year, according to yesterday's *Daily Item*.

The pig manure is stored in large tanks until it is used as fertilizer. The maintenance of a large number of pigs on the farm as well as the large tanks of pig manure are reasons for this horrible odor on campus.

As Ben Marsh, professor of ecology noticed, Espenshade lives south of campus. Therefore, students may expect the worst pig manure odors after storms that have strong winds blowing from the south.

While most Bucknellians may only be concerned with the stench that this pig manure causes on campus, there are other more serious issues that farmers in Kelly Township have noticed.

For instance, the pig manure that Espenshade uses seeps through the water table. Since most water in the Susquehanna Valley is obtained from wells, the large-scale use of pig manure will eventually lead to, as neighbor Betsy Quant stated, "up to 200 years of water pollution" in our area.

See SMELL, page 2

Profs find copyright law inconvenient

BY ERIC BLOEM
Bucknellian Staff Writer

Copyright laws have recently been getting much more attention around campus, as professors are finding it more difficult to put articles on reserve at the library.

Ann deKlerk, chairperson of the University Copyright Committee, stated that "the whole issue of copyrighting and licensing has been heightened."

Many universities, including Bucknell, have attempted to reevaluate their current copyright policy. In January of 1996 Bucknell revised its copyright handbook, but not much has come of it until recently.

DeKlerk stated that another reason for this shift in interest could be due to the "many new questions [that] have arisen, especially with electronic information."

See COPYRIGHT, page 2

Old policy cleans up in-door air

BY SARAH BEALE

Even though the Clean Indoor Air Policy has been in effect since August 1992, some faculty still have strong opinions about it. The trails of cigarette smoke were permanently whisked out the door by the Clean Indoor Air Policy, which banned smoking in some 19 University buildings, including Dana Engineering, Rooke Chemistry and the Langone Center.

However, it is still permissible for professors to smoke in their offices in Coleman Hall and in Vaughn Literature, provided that the room is well ventilated.

The impetus of this policy was not only in compliance with the Pennsylvania Clean Air Act, but also with a desire for a healthier workplace on the part of vocal students, faculty and staff.

Bob Thomas, coordinator of drug and alcohol programs, was a leader in the task force to draw up a policy that would please non-smokers, and provide an "out" clause for faculty smokers in designated buildings.

Violations of the Clean Indoor Air Policy are handled by the supervisor or chairperson in the department of the building, where the reported offense occurred.

According to some professors, complaints are extremely rare. "Coleman is definitely a place where people don't smoke anymore," said Teresa Amott, associate professor of economics and chair of the depart-

THE BUCKNELLIAN

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

Dana's 24-hour access in question

BY KARIN DAVIDSON
Bucknellian Staff Writer

A group of students met today to discuss what measures should be taken to prevent disrespectful acts from occurring in the Dana Engineering building.

The meeting was prompted by custodians in the building who expressed concerns about disrespectful building use, as well as, by the subsequent circulation of rumors about the possibility of the building losing its 24-hour access status.

The custodial staff approached Thomas Rich, dean of the college of engineering, because of the disrespect it sees toward the classrooms. They reported that in the mornings they have encountered chalk broken and thrown all around the room, obscene pictures drawn on the chalkboards, evidence of BB gun target practice on a soda can, food smeared on the desks and tables and furniture rearranged and even moved from one room to another.

Messes such as these are problems for the custodial staff because when they come to work at 5 a.m. they essentially have three hours to clean the offices and classrooms, and no extra time to deal with preventable messes.

The custodial staff said the problems do not occur consistently and are more frequent during exam times and have suggested locking classroom doors while leaving computer labs open.

Trudy Cunningham, associate dean of engineering, said she was approached by Rich to look into this concern because the "custodians are reporting that classrooms are being left in unacceptable conditions."

She said that at this point there is no plan in place to change the building's access policy. Her plan was to meet with student leaders in engineering majors today to discuss possible solutions.

Right now students are gathering data and developing possible solutions. By tomorrow Cunningham hopes to have a workable solution to implement by early next week. Cunningham said the deans have been working on this situation for 10 days and the students for a week.

Mike Hauser '97, president of the American Society of Mechanical Engineers, is part of the student group that met earlier today with Cunningham. Last night when asked to respond to the custodial staff's complaints about the disrespect of the classrooms, Hauser said, "I can see how things like that go on, but I haven't seen it."

Hauser thinks that the solu-

Parking Alert

The Department of Public Safety, the University Parking Committee and the Department of Physical Plant issued the following parking notice:

1. All parking and traffic regulations are in effect on campus 24-hours a day, seven days a week, all year round, *to include* holidays and semester breaks.

2. Parking or driving a vehicle on the grass or on pedestrian walkways is ***strictly prohibited***. Students are permitted to park their vehicles on walkways to load or unload their belongings during the first week and the last week of the semester ***only*** (one hour limit). They must then move their vehicles to an authorized parking lot when their loading/unloading is completed.

3. All visitors to campus must register their vehicles according to the requirements explained in the University parking and traffic brochure, ***Your Car on Campus***. All University employees, students and visitors are responsible for reading and following the requirements in this brochure.

4. Students and employees are ***not*** authorized to park in spaces reserved for visitors, service vehicles, or those with handicapped parking permits.

5. Operating vehicles on the pedestrian walkways behind the Athletic Fieldhouse (between Faculty Court and the tennis courts at the rear of the Fieldhouse) is a safety hazard, damages University property and is ***strictly prohibited.*** Public Safety will be monitoring vehicle traffic at this location and issuing the appropriate citations to ***all*** violators who drive on these walkways.

Faculty, staff, students initiate a R.A.D.ical attack on rape

Six professional staff members made a R.A.D.ical choice over winter break by becoming certified in Rape Aggression Defense.

In response to the increase in the number of sexual assault reports on campus, the newly formed Sexual Assault Action Group (comprised of faculty, staff and students) recommended that the University provide more opportunities for prevention education.

"I believe that the R.A.D. training is very important because it offers women a chance to learn strategies—both mental and physical— for avoiding dangerous situations," said Janice Butler, director of the Women's Resource Center and a key person in organizing the

Adams didn't expect this

Widespread backlash concerning Tent Party alcohol policy change takes Bro by surprise

BY BETH MARTIN
Bucknellian Staff Writer

The repercussions of President William D. Adams' decision to prohibit alcohol at Tent Party are strong and coming from all directions.

In response to Adams' announcement of a change in the University's alcohol policy which affects Homecoming Weekend tailgating party and the graduation Tent Party, he has already received more than 15 email messages and several letters from students and alumni concerning this year's dry Tent Party.

Gerald Salterelli '97 is circulating a petition among the senior class for the repeal of Adams' ban on alcohol at Tent Party.

Those signing the petition agree to withdraw their monetary pledge to the senior gift drive and boycott this year's tent party.

Adams said that he is not as concerned with resulting financial losses as he is with the potential for graduates to leave the University with a negative impression.

"I'm much more worried about their feelings towards the University. I just regret that it's poisoning people's feelings about the school. Be angry at me... but look, Bucknell is big. Presidents come and go and decisions come and go. Don't hate Bucknell. It's me. I made this decision," Adams said.

Responding to the possibility that graduates will not attend the party, Adams said "I'll be disappointed if that's the case. We'll be helping with the event in anyway we can. I've guaranteed some additional resources so they can make the party what they want it to be."

Nevertheless, Adams said that he does not plan on reversing his decision. "I have heard no compelling reason to change it," he said. "I'd like to see how it works."

Adams said that the decision to forbid alcohol at events such as

Local farmer fills air with foul smell

BY ARGUN ULGEN
Bucknellian Staff Writer

A pungent odor has been hovering over the campus for the past few weeks. The smell is none other than pig manure.

Ray Espenshade, a farmer in Kelly Township, spread the manure as part of a large scale livestock operation.

Espenshade's operation has raised concerns from neighbors regarding his plans to house 10,000 hogs a year, according to yesterday's *Daily Item*.

The pig manure is stored in large tanks until it is used as fertilizer. The maintenance of a large number of pigs on the farm as well as the large tanks of pig manure are reasons for this horrible odor on campus.

As Ben Marsh, professor of ecology noticed, Espenshade lives south of campus. Therefore, students may expect the worst pig manure odors after storms that have strong winds blowing from the south.

While most Bucknellians may only be concerned with the stench that this pig manure causes on campus, there are other more serious issues that farmers in Kelly Township have noticed.

For instance, the pig manure that Espenshade uses seeps through the water table. Since most water in the Susquehanna Valley is obtained from wells, the large-scale use of pig manure will eventually lead to, as neighbor Betsy Quant stated, "up to 200 years of water pollution" in our area.

See SMELL, page 2

Old policy cleans up in-door air

BY SARAH BEALE

Even though the Clean Indoor Air Policy has been in effect since August 1992, some faculty still have strong opinions about it. The trails of cigarette smoke were permanently whisked out the door by the Clean Indoor Air Policy, which banned smoking in some 19 University buildings, including Dana Engineering, Rooke Chemistry and the Langone Center.

However, it is still permissible for professors to smoke in their offices in Coleman Hall and in Vaughn Literature, provided that the room is well ventilated.

The impetus of this policy was not only in compliance with the Pennsylvania Clean Air Act, but also with a desire for a healthier workplace on the part of vocal students, faculty and staff.

Bob Thomas, coordinator of drug and alcohol programs, was a leader in the task force to draw up a policy that would please non-smokers, and provide an "out" clause for faculty smokers in designated buildings.

Violations of the Clean Indoor Air Policy are handled by the supervisor or chairperson in the department of the building, where the reported offense occurred.

According to some professors, complaints are extremely rare. "Coleman is definitely a place where people don't smoke anymore," said Teresa Amott, associate professor of economics and chair of the depart-

Profs find copyright law inconvenient

BY ERIC BLOEM
Bucknellian Staff Writer

Copyright laws have recently been getting much more attention around campus, as professors are finding it more difficult to put articles on reserve at the library.

Ann deKlerk, chairperson of the University Copyright Committee, stated that "the whole issue of copyrighting and licensing has been heightened."

Many universities, including Bucknell, have attempted to reevaluate their current copyright policy. In January of 1996 Bucknell revised its copyright handbook, but not much has come of it until recently.

DeKlerk stated that another reason for this shift in interest could be due to the "many new questions [that] have arisen, especially with electronic information."

SMELL from page 1

Another problem that large-scale pig farming can cause is ground water pollution.

Furthermore, the same stench that is bothering University students has been bothering citizens of Kelly Township who live as far as ten to 50 miles away from Espenshade.

Espenshade's practice is not completely legitimate, according to Quant. "Before the farmer was allowed to start his large-scale agricultural operation, he had to attain a series of permits to do so. Local officials were relaxed in requiring extra information about what he was to do with these barns and the attainment of all these permits," Quant stated.

The Kelly Township supervisors met on Tuesday evening and voted by a 2-1 count that Espenshade's permit for two pig barns had been improperly approved, according to the *Daily Item*.

Quant presented a petition at the meeting with approximately 80 signatures of people who were against the approval of the farm permit.

Katherine Leslie Schneider, a worker at the Natural Food and Garden store who attended the meeting, said that "this farmer will now have to go through a more strict legal procedure in order to continue his larger scale operation."

After going through this procedure, it is most likely that Espenshade will have to cut down considerably the number of pigs he stores in his barns. As Quant noted, "any annual operation is allowed to have two equivalency units [equivalency units measure the number of pigs in a given farm.] This farmer has close to 50."

For now, students may have to suffer through this odorous stench for a few more weeks. Yet, Quant said, "as township officials will pay stricter attention to these permits," the horrendous odor at Bucknell University will most likely be cut down considerably.

New head of SBDC named

Cara Mickelsen—The Bucknellian

Charles Knisely, associate professor of mechanical engineering has been named director of the Small Business Development Center at the University. Knisely is succeeding Charles Coder, who has been the director of the SBDC since 1978.

COPYRIGHT from page 1

An especially large part of the copyright policy deals with the issue of reserves. DeKlerk said that "in the past we did not require to see a copy of the copyright clearance" from professors who are putting articles on reserve.

Currently, anything can be put on reserves at the library for one semester without needing copyright approval. If an item is put on reserve for more than one semester then the library needs to gain copyright clearance. For such items, DeKlerk stated that faculty need "greater forward planning" for their courses.

Teresa Amott, associate professor of economics and chair of the department stated, "I appreciate the flexibility of being allowed to use items" for one semester, but "I cannot always foresee if I will need it again." She stated that courses need to "respond to changing intellectual currents."

DeKlerk emphasized that the copyright committee "is trying to make it as easy as possible for the requirements of the law to be met." The University is currently a member of the Copyright Clearance Center which has pressured copyright clearance on many things. The library also obtains copyright clearance and pays for it.

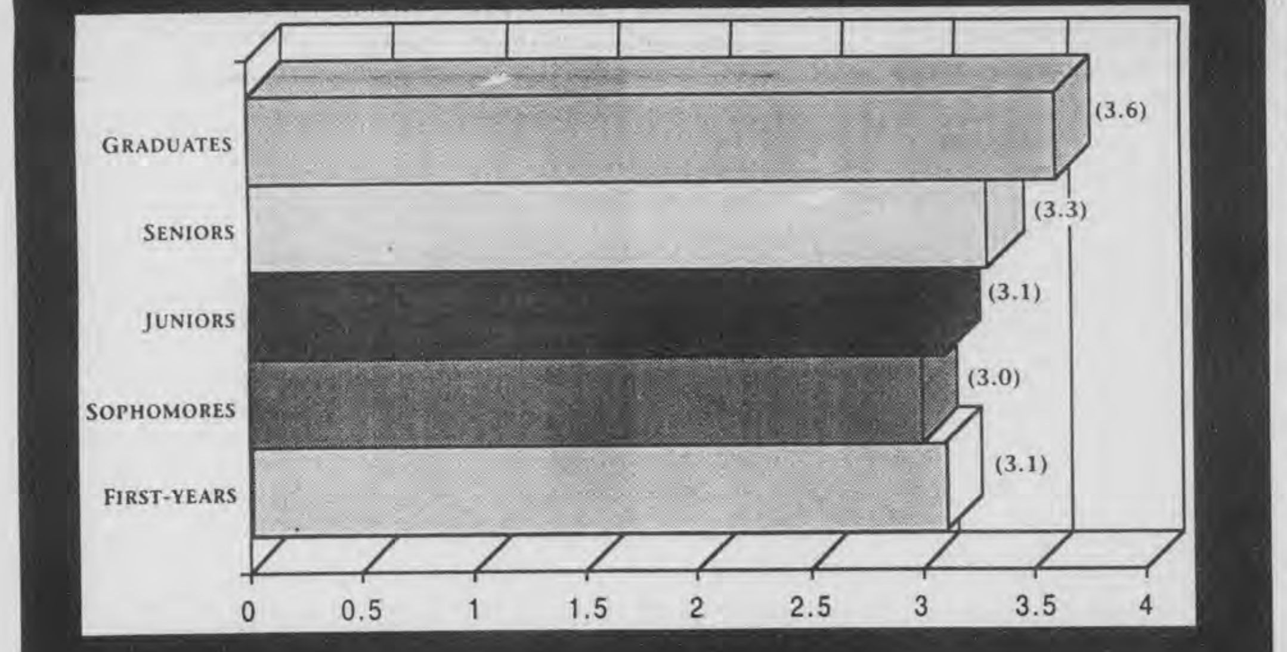
Amott said that the issue of copyright policy is important, but it does not focus on what is really important. She stated that "it is important to attribute a citation" to a person's work so that the author gets the deserved credit. "Copyright is about a commercial transaction of payment for the use of a work."

Amott went on to say that copyright policy "does not serve the broader educational mission of the University by imposing fees for the use of ideas." This, she added "creates barriers of intellectual exchange."

DeKlerk holds similar sentiments to those of Amott. She said that the copyright committee wants "people to take advantage of their fair use. It is really important that citizens of the country guide their freedom of access to information."

A copy of the University's copyright handbook is available in the Bertrand Library.

GPA breakdown by class



The breakdown of GPA according to class reveals that the graduate students at the University fare the best with a 3.6 average, followed by the senior class with a 3.3. The class of 1999 is at the bottom of the group with a 3.0, but only slightly behind both the juniors and the first-year students, who hold a 3.1 overall average.
See page 4 for more information on the breakdown of Grade Point Averages according to Greek/Independent and Male/Female.

Slippery slope for ski team

BY ALLISON THOMAS

The Bucknell Ski Team is facing possible suspension of its Bucknell Student Government funding following alleged violations of the University's alcohol policy.

Joseph Croney '00, member of the ski team, confirmed the allegations that the future of the group's funding is in question.

The incident occurred on Jan. 29 following inspection of two University-owned vans used to transport members of the ski team to and from practice at Tussey Mountain.

According to Croney, beer bottles were found on the floor of one of the vans following the previous night's practice.

When questioned, Sarah Glanville '97, president of the ski team, said that "things are still up in the air" and wished to discuss the issue more fully with the University before further comment.

Tracy Gray '99, president of BSG, Michelle McAllister '99, BSG officer of Appropriations, and Cynthia Opalski, assistant director of intramurals and recreation, were scheduled for a meeting to discuss the consequences of these allegations yesterday.

PUBLIC SAFETY LOG

January 28, 1997

VANDALISM/TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to a fire alarm activation in Phi Kappa Psi Fraternity. Unknown person(s) had activated a pull station for no apparent reason.

January 30, 1997

VANDALISM/ATTEMPTED THEFT - A Public Safety Officer responded to Smith Hall, Computer Lab for an intrusion alarm activation. It was determined that unknown person(s) tampered with a computer. Lewisburg Police were notified and the investigation is continuing.

VANDALISM - A Public Safety Officer responded to Fraternity Road for the report of vandalism to a student's vehicle. Ice was thrown through the rear window. The investigation is continuing.

MEDICAL ASSIST - A Public Safety Officer responded for an unconscious University student in the Langone Center. The student was transported to Evangelical Hospital Emergency Room by ambulance.

INFORMATION/MARIJUANA VIOLATION/UNFOUNDED - A Public Safety Officer responded to Vedder Hall for the report of the odor of marijuana. A plain view search yielded no illegal substance.

February 1, 1997

VANDALISM - A Public Safety Officer received the report of a broken window pane in the main exterior door of Swartz Hall. A carpenter was contacted to repair the window and the investigation is continuing.

UNIVERSITY PROPERTY DAMAGE - A Public Safety Officer responded to Swartz Hall, B-wing for a broken window pane. The window was temporarily patched and a work order submitted for repair.

INFORMATION - A Public Safety Officer responded to Bucknell West for an odor investigation reference to a fan. No mechanical problem was located.

February 2, 1997

SUSPICIOUS ACTIVITY - A Public Safety Officer received a report of two males, identifying themselves as pledges from another university, requesting food items from Theta Chi Fraternity. The males were later identified as BU students involved in prank activity.

VANDALISM/MOTOR VEHICLE - A University student notified a Public Safety Officer that her car window was broken while the vehicle was parked in Trax Lot. The investigation is continuing.

VANDALISM/TECH SERVICE VAN - While on routine patrol a Public Safety Officer observed a broken window in the Tech Services van parked along 7th Street. The investigation is continuing.

VANDALISM - While on routine patrol, a Public Safety Officer observed a University student entering Student Health Services for treatment of a hand injury. The student admitted to breaking a window in Vedder Hall, but denied braking a fire door window in the same building. While the investigation continued, the individual responsible for the second window was identified.

VANDALISM WINDOWS - A University employee reported to a Public Safety Officer that two windows in the annex, rear exit door were broken. The windows were patched and the investigation continues.

VANDALISM - A Public Safety Officer responded to Swartz Hall for the report of broken windows between A/D wings. The windows were repaired and the investigation is continuing.

INFORMATION - A University student reported a series of "hang-up" phone calls and that unknown person(s) entered the Vedder Hall dorm room and spread the occupants clothing on a bed. The investigation is continuing.

February 3, 1997

LARCENY - A University employee reported to a Public Safety Officer that unknown person(s) did push in the front of a vending machine in Vedder Hall. The contents of the machine were removed. The investigation is continuing.

February 4, 1997

MEDICAL - A Public Safety Officer responded to Trax Hall for a student medical emergency. The student was transported to Evangelical Hospital Emergency Room for treatment and later returned to campus.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Simpson case resumes with a bang

SANTA MONICA, California — The O.J. Simpson civil case resumed yesterday with Simpson's attorney Robert Baker angrily accusing plaintiff attorney Daniel Petrocelli of violating a court-imposed gag order.

Baker moved to have the punitive damage claim against Simpson dismissed, saying Petrocelli violated the order by appearing on national television following the verdict.

Judge Hiroshi Fujisaki denied Baker's motion, and Petrocelli agreed to say nothing further until the case is over.

The judge also denied a motion by the defense seeking to exclude the testimony of expert witness Mark Roessler regarding the value of Simpson's name and likeness. Baker argued that such testimony would concern Simpson's future earnings and that only current net worth can be used to determine punitive damages.

Baker said that testimony about future earnings would "attempt to destroy the defendant, which is not the purpose of punitive damages."

Jury deliberates in Crown Heights civil rights case

NEW YORK — Jury deliberations began yesterday in the trial of two African-American men accused of violating the civil rights of a Jewish scholar who was attacked and knifed to death during race riots in Brooklyn.

The federal jury received the case at midday after a three-week trial.

In 1991, a gang of youths in the Crown Heights neighborhood fatally stabbed Australian Yankel Rosenbaum, 29, apparently to avenge the death hours earlier of a 7-year-old black boy, Gavin Cato. He was struck by a car in a motorcade for the leader of an ultra-Orthodox Hasidic Jewish sect.

Lemrick Nelson, 21, was charged in Rosenbaum's death but was acquitted of murder in state court a year later. He and co-defendant Charles Price, 43, were charged in federal court with violating Rosenbaum's civil rights — Price by inciting the crowd to violence and Nelson by stabbing him.

Technically they faced up to life in prison if convicted, but much lesser terms under federal guidelines, officials said.

Labor groups oppose 'comp time' legislation

WASHINGTON — Intent on protecting the standard 40-hour work week, organized labor is again opposing Republican-sponsored legislation to let hourly employees take time off instead of extra pay for working overtime.

"We don't see where in the bill there is a guarantee that you could keep a 40-hour standard and get overtime pay," Karen Nussbaum, director of the AFL-CIO's working women's project, said in an interview Tuesday.

House Republicans want to give hourly employees the option of 1.5 hours of compensatory time off for each hour of overtime—instead of pay.

The Senate would go further, also allowing them to work 80 hours over a two-week period in any combination of hours. Hourly employees with few chances to work overtime also could log more than 40 hours in a week and take the extra hours as time off at a later date.

Congressman demonstrates cell phone snooping

WASHINGTON — All it took was a minute, a two-inch piece of wire and a soldering gun for Rep. Billy Tauzin to convert a legal radio scanner into one that picks up cellular phone calls.

Most experts agree it's illegal to do this, but enforcement is difficult.

Tauzin, a Louisiana Republican who chairs the telecommunications subcommittee of the House Commerce Committee, is considering legislation to toughen laws against altering listening equipment.

Cellular telephone intercepts caught the public eye after a Florida couple using a police scanner taped a conference call among Republican leaders, one on a cell phone, discussing House Speaker Newt Gingrich's ethics case. Parts of the tape were subsequently printed in The New York Times.

Of 10 million legal scanners sold in the United States, it's estimated that a "few hundred thousand" have been modified to pick up cellular frequencies, testified Bob Grove, whose North Carolina company offers such alteration services. New digital cellular technology is supposed to make such eavesdropping more difficult.

World News

German war criminals receiving tax-payer funded government disability benefits

BONN, Germany — Recent media reports that alleged World War II criminals have been receiving taxpayer-funded benefits as disabled soldiers have brought calls for changing the 1950 law that allows for it.

Jewish groups, opposition politicians and others say the situation is especially unfair because many of Hitler's victims are not receiving government compensation.

Germany has paid more than $61 billion to Holocaust survivors living in the West. But those living in the Soviet bloc were not able to apply for German compensation during the Cold War. Compensation for many of them is still being negotiated.

About 1.1 million German war veterans or their families are receiving disability payments under the 1950 law. The law did not exclude any units, including former members of murderous units like the Waffen SS or widows of those soldiers.

South Africa: Biko may have been poisoned

CAPE TOWN, South Africa — South Africa's Truth and Reconciliation Commission is investigating a tip from an unnamed source that black activist Steve Biko, who died in police detention two decades ago, was killed by poison rather than a beating, as had been believed.

South African newspapers reported yesterday that the commission had been told army scientists experimented with a drug that caused the brain to bleed, giving the appearance that the victim received blows to the head.

Last week, the commission announced that five former policemen had applied for amnesty, saying they were responsible for Biko's death in 1977. Biko's death impassioned the anti-apartheid movement.

US Ambassador to France Harriman dies after suffering massive cerebral hemorrhage

PARIS — U.S. Ambassador to France Pamela Harriman died yesterday, two days after suffering a massive cerebral hemorrhage, an aide said. She had been in intensive care at the American Hospital in Neuilly, a Paris suburb, since Monday.

Harriman, who would have turned 77 next month, did not have a history of health problems.

She was appointed to the post in May 1993, and had been planning to leave the ambassadorship by mid-year.

She leaves behind a wealth of people who either admired her charisma or belittled her accomplishments, both in her ambassadorship and in her life.

The United States praised her diplomatic skills in handling disputes over trade, Bosnia, NATO, the Middle East, Africa and CIA spying.

Some of the French, meanwhile, looked upon her as a lightweight, more form than substance, fluent in French but not in international policy; hostess of the most lavish parties the embassy has seen, but unable to comment on U.S. policy in Bosnia.

Israel mourns soldiers killed in air crash

JERUSALEM — A sorrowful nation prepared yesterday to bury 73 Israeli soldiers killed in the crash of two military helicopters in northern Israel.

Israel has not mourned so many dead since its 1982 war in Lebanon. Funerals will be held over the next few days in Israel, and the entire nation is in mourning until this evening.

The soldiers were killed Tuesday when their CH-53 Sikorsky transport helicopters collided in darkness as they were on their way to the Israeli security zone in southern Lebanon. It was the country's worst military aircraft disaster.

Prime Minister Benjamin Netanyahu canceled a meeting with Jordan's King Hussein scheduled to be held yesterday and a meeting with Palestinian leader Yasser Arafat set for today.

He offered condolences to the nation and praised the soldiers who risk their lives in defense of Israel.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

TENT from page 1

Tent Party is not part of a "deeper agenda" to altogether ban alcohol from campus.

He is concerned about alcohol abuse on campus. "I worry about it. Of course I worry about it... but do I have something in particular in mind? No." But he also said, "I didn't imagine [the change in policy] would solve the problem."

The revised alcohol policy is accessible to students through administrative offices. It is not included in its entirety in the Student Handbook because all of it does not pertain to students. Printed below is the revised policy, along with the old version.

When asked about other events at which there would be a student majority, such as a wine and cheese reception where students would be of legal age to drink, he said that he does not want to be the interpreter of the policy, but didn't know who should interpret it.

> *"I worry about [alcohol abuse on campus]. Of course I worry about it... but do I have something in particular in mind? No."*
> *—President Adams*

University faculty expressed various opinions regarding Adams' new policy during Monday's faculty meeting. Adams was present to respond to questions and concerns.

Teresa Amott, associate professor of economics, said that the celebratory drinking of alcohol beverages could move into town, where it might be uncontrolled and cause problems for the community.

Amott also suggested that the administration might talk with class officers and other students about the shaping of guidelines and responsible behaviors to ensure the smooth functioning of a tent party that did include alcoholic beverages.

Adams said that he did speak with senior class officers, Bucknell Student Government, the Committee on Complimentary Affairs, and some administrators. He said he expected criticism about not discussing the issue more widely, but not to this extent.

Robert Beard, professor of modern languages, said that he found it completely natural for a commencement celebration involving faculty, administration, students and parents to include alcoholic beverages, and foresees the possibility of a smaller number of students attending this year.

Gretchen Rheberg, assistant professor of chemistry, is in favor of Adams' decision. She remembers several times when students had to go to the emergency hospital room to be treated for intoxication.

George Kester, professor of management, also expressed support for Adams' decision, comparing the alcohol policy to keeping fire insurance on a home, even though home fires are extremely rare.

Adams acknowledged that he had not surveyed frame of reference schools to ascertain if they had similar alcohol policies, but said he has observed other universities' policies in his personal experience. "I think it's a mixed pattern," he said. He also did not check if these schools have had liability problems from serving alcohol to students. In addition, he is "not aware of any liability issues at Bucknell."

Colgate University, Lehigh University, and Dickinson College, some of Bucknell's frame of reference schools, do not have explicit policies prohibiting alcohol at open university functions attracting a large number of students.

Revised Alcohol Policy

Italicized phrases and sentences constitute additions to the new policy.

The following elements will provide the general framework for alcohol policy and administration at particular types of events:

I. *Non-University Sponsored* Indoor and Outdoor Events at which Underage Persons will be Present.

A. Approval for the presence of alcohol *for service to those of age*, as well as a rental agreement where appropriate, must be obtained from the Dean of Students. Certain exceptions are provided in Section II, below.

B. Consumption of alcoholic beverages will be limited to segregated areas into which only those 21 years of age and older will be permitted.

C. Beverages will be dispensed *within the segregated areas*—by a trained, approved, bartender. And approved bartender cannot be under 21 years of age or a college undergraduate.

D. Security monitors will be hired who will require proof of age of those entering the segregated area.

E. Identification must be checked by approved security monitor or bartenders.

F. Alcoholic beverages will no be removed from the designated areas.

G. Signs will be clearly evident stating the rules pertaining to alcohol consumption.

H. Intoxicated persons must not be served. Those arriving in an intoxicated condition, even if of age, will be denied entrance.

I. Underage students in possession of alcohol, or who are intoxicated, will be cited by university security staff for violations of the university alcohol policy.

II. Exceptions and clarifications

A. University sponsored *limited attendance* events for *invited* Trustees, Alumni, Parents and Faculty, and Functions held in the President's House, *if it is not expected that more than a nominal percentage of those present will be students of any age.*

1. These events do not require use of a rental agreement or segregated area. However, appropriate signs most be posted and a trained, professional, adult bartender—not an undergraduate—must control the dispensing of alcoholic beverages.

2. Wine served with meals must be dispensed *directly to invitees* by an approved bartender.

3. Alcoholic beverages must not be served to any intoxicated person of to anyone underage.

B. Events to which the University Community is Invited

University sponsored events to which the entire community is invited, and those which are designated for or primarily attended by students [of any age], such as tailgates and tent party, must be alcohol free without exception.

Old Alcohol Policy

Italicized phrases and sentences do not exist in new policy , located above.

Components of Alcohol Policy Implementation

The following elements will provide the general framework for alcohol policy and administration at particular types of events:

I. Indoor and Outdoor Events at which Underage Persons will be

SMELL from page 1

Another problem that large-scale pig farming can cause is ground water pollution.

Furthermore, the same stench that is bothering University students has been bothering citizens of Kelly Township who live as far as ten to 50 miles away from Espenshade.

Espenshade's practice is not completely legitimate, according to Quant. "Before the farmer was allowed to start his large-scale agricultural operation, he had to attain a series of permits to do so. Local officials were relaxed in requiring extra information about what he was to do with these barns and the attainment of all these permits," Quant stated.

The Kelly Township supervisors met on Tuesday evening and voted by a 2-1 count that Espenshade's permit for two pig barns had been improperly approved, according to the *Daily Item*.

Quant presented a petition at the meeting with approximately 80 signatures of people who were against the approval of the farm permit.

Katherine Leslie Schneider, a worker at the Natural Food and Garden store who attended the meeting, said that "this farmer will now have to go through a more strict legal procedure in order to continue his larger scale operation."

After going through this procedure, it is most likely that Espenshade will have to cut down considerably the number of pigs he stores in his barns. As Quant noted, "any annual operation is allowed to have two equivalency units [equivalency units measure the number of pigs in a given farm.] This farmer has close to 50."

For now, students may have to suffer through this odorous stench for a few more weeks. Yet, Quant said, "as township officials will pay stricter attention to these permits," the horrendous odor at Bucknell University will most likely be cut down considerably.

New head of SBDC named

Cara Mickelsen—The Bucknellian

Charles Knisely, associate professor of mechanical engineering has been named director of the Small Business Development Center at the University. Knisely is succeeding Charles Coder, who has been the director of the SBDC since 1978.

COPYRIGHT from page 1

An especially large part of the copyright policy deals with the issue of reserves. DeKlerk said that "in the past we did not require to see a copy of the copyright clearance" from professors who are putting articles on reserve.

Currently, anything can be put on reserves at the library for one semester without needing copyright approval. If an item is put on reserve for more than one semester then the library needs to gain copyright clearance. For such items, DeKlerk stated that faculty need "greater forward planning" for their courses.

Teresa Amott, associate professor of economics and chair of the department stated, "I appreciate the flexibility of being allowed to use items" for one semester, but "I cannot always foresee if I will need it again." She stated that courses need to "respond to changing intellectual currents."

DeKlerk emphasized that the copyright committee "is trying to make it as easy as possible for the requirements of the law to be met." The University is currently a member of the Copyright Clearance Center which has pressured copyright clearance on many things. The library also obtains copyright clearance and pays for it.

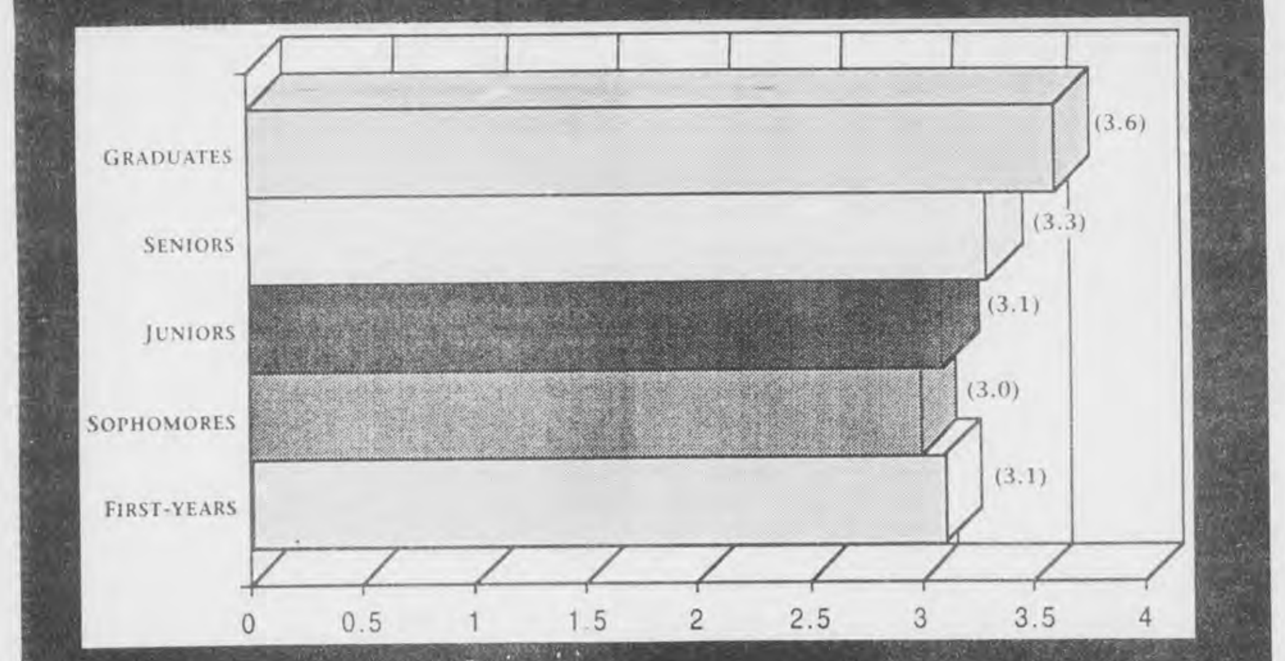
Amott said that the issue of copyright policy is important, but it does not focus on what is really important. She stated that "it is important to attribute a citation" to a person's work so that the author gets the deserved credit. "Copyright is about a commercial transaction of payment for the use of a work."

Amott went on to say that copyright policy "does not serve the broader educational mission of the University by imposing fees for the use of ideas." This, she added "creates barriers of intellectual exchange."

DeKlerk holds similar sentiments to those of Amott. She said that the copyright committee wants "people to take advantage of their fair use. It is really important that citizens of the country guide their freedom of access to information."

A copy of the University's copyright handbook is available in the Bertrand Library.

GPA breakdown by class



The breakdown of GPA according to class reveals that the graduate students at the University fare the best with a 3.6 average, followed by the senior class with a 3.3. The class of 1999 is at the bottom of the group with a 3.0, but only slightly behind both the juniors and the first-year students, who hold a 3.1 overall average.
See page 4 for more information on the breakdown of Grade Point Averages according to Greek/Independent and Male/Female.

Slippery slope for ski team

BY ALLISON THOMAS

The Bucknell Ski Team is facing possible suspension of its Bucknell Student Government funding following alleged violations of the University's alcohol policy.

Joseph Croney '00, member of the ski team, confirmed the allegations that the future of the group's funding is in question.

The incident occurred on Jan. 29 following inspection of two University-owned vans used to transport members of the ski team to and from practice at Tussey Mountain.

According to Croney, beer bottles were found on the floor of one of the vans following the previous night's practice.

When questioned, Sarah Glanville '97, president of the ski team, said that "things are still up in the air" and wished to discuss the issue more fully with the University before further comment.

Tracy Gray '99, president of BSG, Michelle McAllister '99, BSG officer of Appropriations, and Cynthia Opalski, assistant director of intramurals and recreation, were scheduled for a meeting to discuss the consequences of these allegations yesterday.

PUBLIC SAFETY LOG

January 28, 1997

VANDALISM/TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to a fire alarm activation in Phi Kappa Psi Fraternity. Unknown person(s) had activated a pull station for no apparent reason.

January 30, 1997

VANDALISM/ATTEMPTED THEFT - A Public Safety Officer responded to Smith Hall, Computer Lab for an intrusion alarm activation. It was determined that unknown person(s) tampered with a computer. Lewisburg Police were notified and the investigation is continuing.

VANDALISM - A Public Safety Officer responded to Fraternity Road for the report of vandalism to a student's vehicle. Ice was thrown through the rear window. The investigation is continuing.

MEDICAL ASSIST - A Public Safety Officer responded for an unconscious University student in the Langone Center. The student was transported to Evangelical Hospital Emergency Room by ambulance.

INFORMATION/MARIJUANA VIOLATION/UNFOUNDED - A Public Safety Officer responded to Vedder Hall for the report of the odor of marijuana. A plain view search yielded no illegal substance.

February 1, 1997

VANDALISM - A Public Safety Officer received the report of a broken window pane in the main exterior door of Swartz Hall. A carpenter was contacted to repair the window and the investigation is continuing.

UNIVERSITY PROPERTY DAMAGE - A Public Safety Officer responded to Swartz Hall, B-wing for a broken window pane. The window was temporarily patched and a work order submitted for repair.

INFORMATION - A Public Safety Officer responded to Bucknell West for an odor investigation reference to a fan. No mechanical problem was located.

February 2, 1997

SUSPICIOUS ACTIVITY - A Public Safety Officer received a report of two males, identifying themselves as pledges from another university, requesting food items from Theta Chi Fraternity. The males were later identified as BU students involved in prank activity.

VANDALISM/MOTOR VEHICLE - A University student notified a Public Safety Officer that her car window was broken while the vehicle was parked in Trax Lot. The investigation is continuing.

VANDALISM/TECH SERVICE VAN - While on routine patrol a Public Safety Officer observed a broken window in the Tech Services van parked along 7th Street. The investigation is continuing.

VANDALISM - While on routine patrol, a Public Safety Officer observed a University student entering Student Health Services for treatment of a hand injury. The student admitted to breaking a window in Vedder Hall, but denied braking a fire door window in the same building. While the investigation continued, the individual responsible for the second window was identified.

VANDALISM WINDOWS - A University employee reported to a Public Safety Officer that two windows in the annex, rear exit door were broken. The windows were patched and the investigation continues.

VANDALISM - A Public Safety Officer responded to Swartz Hall for the report of broken windows between A/D wings. The windows were repaired and the investigation is continuing.

INFORMATION - A University student reported a series of "hang-up" phone calls and that unknown person(s) entered the Vedder Hall dorm room and spread the occupants clothing on a bed. The investigation is continuing.

February 3, 1997

LARCENY - A University employee reported to a Public Safety Officer that unknown person(s) did push in the front of a vending machine in Vedder Hall. The contents of the machine were removed. The investigation is continuing.

February 4, 1997

MEDICAL - A Public Safety Officer responded to Trax Hall for a student medical emergency. The student was transported to Evangelical Hospital Emergency Room for treatment and later returned to campus.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

National News

Simpson case resumes with a bang

SANTA MONICA, California — The O.J. Simpson civil case resumed yesterday with Simpson's attorney Robert Baker angrily accusing plaintiff attorney Daniel Petrocelli of violating a court-imposed gag order.

Baker moved to have the punitive damage claim against Simpson dismissed, saying Petrocelli violated the order by appearing on national television following the verdict.

Judge Hiroshi Fujisaki denied Baker's motion, and Petrocelli agreed to say nothing further until the case is over.

The judge also denied a motion by the defense seeking to exclude the testimony of expert witness Mark Roessler regarding the value of Simpson's name and likeness. Baker argued that such testimony would concern Simpson's future earnings and that only current net worth can be used to determine punitive damages.

Baker said that testimony about future earnings would "attempt to destroy the defendant, which is not the purpose of punitive damages."

Jury deliberates in Crown Heights civil rights case

NEW YORK — Jury deliberations began yesterday in the trial of two African-American men accused of violating the civil rights of a Jewish scholar who was attacked and knifed to death during race riots in Brooklyn.

The federal jury received the case at midday after a three-week trial.

In 1991, a gang of youths in the Crown Heights neighborhood fatally stabbed Australian Yankel Rosenbaum, 29, apparently to avenge the death hours earlier of a 7-year-old black boy, Gavin Cato. He was struck by a car in a motorcade for the leader of an ultra-Orthodox Hasidic Jewish sect.

Lemrick Nelson, 21, was charged in Rosenbaum's death but was acquitted of murder in state court a year later. He and co-defendant Charles Price, 43, were charged in federal court with violating Rosenbaum's civil rights — Price by inciting the crowd to violence and Nelson by stabbing him.

Technically they faced up to life in prison if convicted, but much lesser terms under federal guidelines, officials said.

Labor groups oppose 'comp time' legislation

WASHINGTON — Intent on protecting the standard 40-hour work week, organized labor is again opposing Republican- sponsored legislation to let hourly employees take time off instead of extra pay for working overtime.

"We don't see where in the bill there is a guarantee that you could keep a 40-hour standard and get overtime pay," Karen Nussbaum, director of the AFL-CIO's working women's project, said in an interview Tuesday.

House Republicans want to give hourly employees the option of 1.5 hours of compensatory time off for each hour of overtime—instead of pay.

The Senate would go further, also allowing them to work 80 hours over a two-week period in any combination of hours. Hourly employees with few chances to work overtime also could log more than 40 hours in a week and take the extra hours as time off at a later date.

Congressman demonstrates cell phone snooping

WASHINGTON — All it took was a minute, a two-inch piece of wire and a soldering gun for Rep. Billy Tauzin to convert a legal radio scanner into one that picks up cellular phone calls.

Most experts agree it's illegal to do this, but enforcement is difficult.

Tauzin, a Louisiana Republican who chairs the telecommunications subcommittee of the House Commerce Committee, is considering legislation to toughen laws against altering listening equipment.

Cellular telephone intercepts caught the public eye after a Florida couple using a police scanner taped a conference call among Republican leaders, one on a cell phone, discussing House Speaker Newt Gingrich's ethics case. Parts of the tape were subsequently printed in The New York Times.

Of 10 million legal scanners sold in the United States, it's estimated that a "few hundred thousand" have been modified to pick up cellular frequencies, testified Bob Grove, whose North Carolina company offers such alteration services. New digital cellular technology is supposed to make such eavesdropping more difficult.

World News

German war criminals receiving tax-payer funded government disability benefits

BONN, Germany — Recent media reports that alleged World War II criminals have been receiving taxpayer-funded benefits as disabled soldiers have brought calls for changing the 1950 law that allows for it.

Jewish groups, opposition politicians and others say the situation is especially unfair because many of Hitler's victims are not receiving government compensation.

Germany has paid more than $61 billion to Holocaust survivors living in the West. But those living in the Soviet bloc were not able to apply for German compensation during the Cold War. Compensation for many of them is still being negotiated.

About 1.1 million German war veterans or their families are receiving disability payments under the 1950 law. The law did not exclude any units, including former members of murderous units like the Waffen SS or widows of those soldiers.

South Africa: Biko may have been poisoned

CAPE TOWN, South Africa — South Africa's Truth and Reconciliation Commission is investigating a tip from an unnamed source that black activist Steve Biko, who died in police detention two decades ago, was killed by poison rather than a beating, as had been believed.

South African newspapers reported yesterday that the commission had been told army scientists experimented with a drug that caused the brain to bleed, giving the appearance that the victim received blows to the head.

Last week, the commission announced that five former policemen had applied for amnesty, saying they were responsible for Biko's death in 1977. Biko's death impassioned the anti-apartheid movement.

US Ambassador to France Harriman dies after suffering massive cerebral hemorrhage

PARIS — U.S. Ambassador to France Pamela Harriman died yesterday, two days after suffering a massive cerebral hemorrhage, an aide said. She had been in intensive care at the American Hospital in Neuilly, a Paris suburb, since Monday.

Harriman, who would have turned 77 next month, did not have a history of health problems.

She was appointed to the post in May 1993, and had been planning to leave the ambassadorship by mid-year.

She leaves behind a wealth of people who either admired her charisma or belittled her accomplishments, both in her ambassadorship and in her life.

The United States praised her diplomatic skills in handling disputes over trade, Bosnia, NATO, the Middle East, Africa and CIA spying.

Some of the French, meanwhile, looked upon her as a lightweight, more form than substance, fluent in French but not in international policy; hostess of the most lavish parties the embassy has seen, but unable to comment on U.S. policy in Bosnia.

Israel mourns soldiers killed in air crash

JERUSALEM — A sorrowful nation prepared yesterday to bury 73 Israeli soldiers killed in the crash of two military helicopters in northern Israel.

Israel has not mourned so many dead since its 1982 war in Lebanon. Funerals will be held over the next few days in Israel, and the entire nation is in mourning until this evening.

The soldiers were killed Tuesday when their CH-53 Sikorsky transport helicopters collided in darkness as they were on their way to the Israeli security zone in southern Lebanon. It was the country's worst military aircraft disaster.

Prime Minister Benjamin Netanyahu canceled a meeting with Jordan's King Hussein scheduled to be held yesterday and a meeting with Palestinian leader Yasser Arafat set for today.

He offered condolences to the nation and praised the soldiers who risk their lives in defense of Israel.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

TENT from page 1

Tent Party is not part of a "deeper agenda" to altogether ban alcohol from campus.

He is concerned about alcohol abuse on campus. "I worry about it. Of course I worry about it... but do I have something in particular in mind? No." But he also said, "I didn't imagine [the change in policy] would solve the problem."

The revised alcohol policy is accessible to students through administrative offices. It is not included in its entirety in the Student Handbook because all of it does not pertain to students. Printed below is the revised policy, along with the old version.

When asked about other events at which there would be a student majority, such as a wine and cheese reception where students would be of legal age to drink, he said that he does not want to be the interpreter of the policy, but didn't know who should interpret it.

University faculty expressed various opinions regarding Adams' new policy during Monday's faculty meeting. Adams was present to respond to questions and concerns.

Teresa Amott, associate professor of economics, said that the celebratory drinking of alcohol beverages could move into town, where it might be uncontrolled and cause problems for the community.

Amott also suggested that the administration might talk with class officers and other students about the shaping of guidelines and responsible behaviors to ensure the smooth functioning of a tent party that did include alcoholic beverages.

Adams said that he did speak with senior class officers, Bucknell Student Government, the Committee on Complimentary Affairs, and some administrators. He said he expected criticism about not discussing the issue more widely, but not to this extent.

Robert Beard, professor of modern languages, said that he found it completely natural for a commencement celebration involving faculty, administration, students and parents to include alcoholic beverages, and foresees the possibility of a smaller number of students attending this year.

Gretchen Rheberg, assistant professor of chemistry, is in favor of Adams' decision. She remembers several times when students had to go to the emergency hospital room to be treated for intoxication.

George Kester, professor of management, also expressed support for Adams' decision, comparing the alcohol policy to keeping fire insurance on a home, even though home fires are extremely rare.

Adams acknowledged that he had not surveyed frame of reference schools to ascertain if they had similar alcohol policies, but said he has observed other universities' policies in his personal experience. "I think it's a mixed pattern," he said. He also did not check if these schools have had liability problems from serving alcohol to students. In addition, he is "not aware of any liability issues at Bucknell."

Colgate University, Lehigh University, and Dickinson College, some of Bucknell's frame of reference schools, do not have explicit policies prohibiting alcohol at open university functions attracting a large number of students.

> *"I worry about [alcohol abuse on campus]. Of course I worry about it... but do I have something in particular in mind? No."*
> *—President Adams*

Revised Alcohol Policy

Italicized phrases and sentences constitute additions to the new policy.

The following elements will provide the general framework for alcohol policy and administration at particular types of events:

I. *Non-University Sponsored* Indoor and Outdoor Events at which Underage Persons will be Present.

A. Approval for the presence of alcohol *for service to those of age,* as well as a rental agreement where appropriate, must be obtained from the Dean of Students. Certain exceptions are provided in Section II, below.

B. Consumption of alcoholic beverages will be limited to segregated areas into which only those 21 years of age and older will be permitted.

C. Beverages will be dispensed *within the segregated areas*—by a trained, approved, bartender. And approved bartender cannot be under 21 years of age or a college undergraduate.

D. Security monitors will be hired who will require proof of age of those entering the segregated area.

E. Identification must be checked by approved security monitor or bartenders.

F. Alcoholic beverages will no be removed from the designated areas.

G. Signs will be clearly evident stating the rules pertaining to alcohol consumption.

H. Intoxicated persons must not be served. Those arriving in an intoxicated condition, even if of age, will be denied entrance.

I. Underage students in possession of alcohol, or who are intoxicated, will be cited by university security staff for violations of the university alcohol policy.

II. Exceptions and clarifications

A. University sponsored *limited attendance* events for *invited* Trustees, Alumni, Parents and Faculty, and Functions held in the President's House, *if it is not expected that more than a nominal percentage of those present will be students of any age.*

1. These events do not require use of a rental agreement or segregated area. However, appropriate signs most be posted and a trained, professional, adult bartender—not an undergraduate—must control the dispensing of alcoholic beverages.

2. Wine served with meals must be dispensed *directly to invitees* by an approved bartender.

3. Alcoholic beverages must not be served to any intoxicated person of or to anyone underage.

B. Events to which the University Community is Invited

University sponsored events to which the entire community is invited, and those which are designated for or primarily attended by students [of any age], such as tailgates and tent party, must be alcohol free without exception.

Old Alcohol Policy

Italicized phrases and sentences do not exist in new policy , located above.

Components of Alcohol Policy Implementation

The following elements will provide the general framework for alcohol policy and administration at particular types of events:

I. Indoor and Outdoor Events at which Underage Persons will be

Here, the "attacker" is suited up for his own protection. This is needed as the training is full contact, and designed to be painful.

training session.

"The R.A.D. program talks about using physical defense as a last resort and using awareness and risk reduction strategies first," Butler said.

Participants in this 12-hour program are taught self-defense mechanisms and practice techniques on people dressed up in shiny, black, padded protective wear, known as the aggressor suit.

Butler believes that this program is a fresh new approach to self- defense and is unique because of the "empowering feeling" one can get from the simulation component.

Besides the actual training the staff members received, the package included 50 student manuals, a padded suit for simulations, three sets of strike pads and targets, and videos for future training sessions offered by certified University staff members on campus.

Because professional staff members at the University are now certified, training sessions can be offered consistently.

Professional staff members who attended the training session and are now certified are Butler, Sueellen Henry, program coordinator for Residential Colleges, Jim Middleton, administrative lieutenant in Public Safety, Susan Lovejoy and Ricky Philips of Public Safety, and James Wiltgen, assistant director of Housing and Residential Life.

R.A.D. was developed in 1989 by Virginia police officer Larry Nadeau. It is different from other self-defense courses and is copyrighted and taught under strict guidelines.

The program is now taught on 500 college campuses in the U.S. and Canada.

There will be four offerings of R.A.D. this semester: two sessions before spring break and two afterwards. One session will be held Monday and Wednesday evenings from 4:30 to 6 p.m. beginning Feb. 10 and running 3 weeks. Another session be held from 6-9 p.m. on Thursday evenings, starting Feb. 13 and running until March 6.

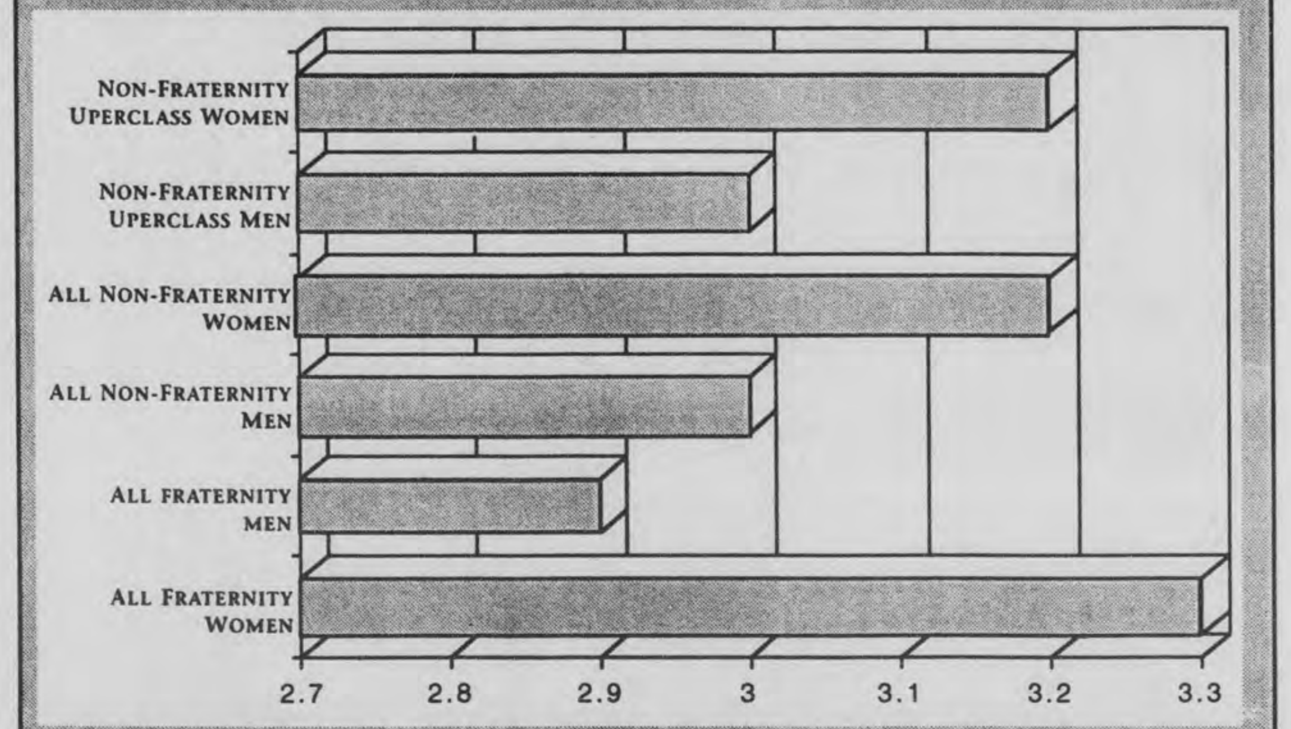
There will be sign ups in the Langone Center mall tomorrow or interested individuals can call Janice Butler in the Women's Resource Center or Sueellen Henry.

The program expenses were covered by the office of the Dean of Students, the President's Office, the Office of Public Safety, the Women's Resource Center, the Residential Colleges, the Residence Hall Association, and Bucknell Student Government.

Photo courtesy of Women's Resource Center

The victim is readied for learning how to reverse the roles on a would-be assailant. Again, pads are used to avoid injury.

Campus GPA breakdown



Here, Fraternity women are shown to be the highest ranking group according to GPA's on Campus. Non-Fraternity women were second, while Fraternity men were lowest in ranking.

DANA from page 1

tion may be to warn people of the implications of their actions and make them aware of the situation. Though he thinks restricting access to the building in a limited fashion may be an answer, he said, "If the building needs to be closed, the engineers will fail and not graduate. The computer labs, especially the SUN labs, need to be accessible."

Currently, Dana Engineering building joins the Macintosh lab in the Bertrand Library, Coleman Hall and Taylor Hall in their 24-hour access status.

AIR from page 1

ment. Amott has never had a complaint brought to her.

However, Thomas reported that occasionally inquiries into incidents are made due to either student or faculty complaints, and that if necessary, "the smoking policy committee could be brought together at any time to review any policy statements."

While the policy is inevitably violated on occasion, "most smokers are quite respectful of others," said Dennis Baumwoll, professor of English and the department chair.

As a smoker, Karl Patten, professor of English, suggested that a referendum concerning the Clean Air Policy be issued to everyone involved in campus life.

"Of course I don't like the policy. It seems like some are making decisions for everybody. But I guess the University can make its own decisions for its buildings," he said.

Write news.
We're awesome

POLICY from page 3

Present.

A. Approval for the presence of alcohol as well as a rental agreement where appropriate, must be obtained from the Dean of Students. Certain exceptions are provided in Section II, below.

B. Consumption of alcoholic beverages will be limited to segregated areas into which only those 21 years of age and older will be permitted.

C. Beverages will be dispensed—by a trained, approved, bartender. And approved bartender cannot be under 21 years of age or a college undergraduate.

D. Security monitors will be hired who will require proof of age of those entering the segregated area.

E. Identification must be checked by approved security monitor or bartenders.

F. Alcoholic beverages will no be removed from the designated areas.

G. Signs will be clearly evident stating the rules pertaining to alcohol consumption.

H. Intoxicated persons must not be served. Those arriving in an intoxicated condition, even if of age, will be denied entrance.

I. Underage students in possession of alcohol, or who are intoxicated, will be cited by university security staff for violations of the university alcohol policy.

II. Exceptions and clarifications

A. University sponsored events for Trustees, Alumni, Parents and Faculty, and Functions held in the President's House.

1. These events do not require use of a rental agreement or segregated area. However, appropriate signs most be posted and a trained, professional, adult bartender—not an undergraduate—must control the dispensing of alcoholic beverages.

2. Wine served with meals must be dispensed by an approved bartender.

3. Alcoholic beverages must not be served to any intoxicated person of to anyone underage.

B. Events to which the University Community is Invited

Indoor functions involving the entire University community, such as building dedications, art exhibition openings, etc., must be alcohol free. Outdoor functions to which the entire population of the University is invited must also be alcohol free.

Explanation: *Experience has shown that it is difficult for security to monitor these events. White there are differing views regarding the desirability of alcohol for certain of these events, those events which do not fall within other organizational categories on this list are too large to permit the use of alcohol safely.*

Cooking with Katie

Leek and Potato Soup

Enrich your soul with the delicate integration of pan-roasted potatoes and three onions with the subtle intensity of a pureed soup. Whether you deem this as a first or a main course, it will impart its character through the illusion it casts. Its pale and creamy facade lends to your imagination the illusion of a soup infused with heavy cream, although the truth is hastily revealed. The personality of the soup stems from the combination of leeks with red and Spanish onion, and derives its body from the liberal use of potatoes. Gently chuckling with flavor, it parallels current desires of a moderate fat intake, judiciously fattened with the vigor of bacon and a mere dash of cream.

- ♣ 1/3 pound *lower sodium* bacon
- ♣ 1 red onion
- ♣ 1 Spanish onion
- ♣ 3 large leeks
- ♣ 2-6 garlic cloves
- ♣ 6 medium red potatoes
- ♣ fresh thyme
- ♣ 1 bay leaf
- ♣ chicken stock or reduced sodium canned broth
- ♣ 1/4 cup heavy cream
- ♣ freshly cracked black pepper

Assemble mise en place (Prepare and set aside ingredients):

1. Cut bacon crosswise into pieces approximately 1/4 inch wide.
2. Peel and chop onions into a medium dice.
3. *Prepare leeks*: Trim off the rough green ends and the base, reserving the white and pale green parts only. Chop into quarter inch rings, and submerge in cold water. Leeks tend to carry a significant amount of dirt, which necessitates a thorough bath. Carefully lift the leeks from the water, allowing any sediment to settle.
4. Peel garlic cloves, and chop finely.
5. Wash and peel the potatoes, chopping into half inch cubes.
6. Tie the herbs into a *bouquet garni*, which is typically a bundle of fresh herbs used to flavor without integration into the final product.

Make soup:

1. In a large (12") sauté pan, cook the bacon over medium heat, allowing it to become moderately crisp without burning. Do not drain the fat.
2. When the bacon becomes crisp, add the onions and sweat them in the rendered fat. They will be nearly translucent when they are adequately soft.
3. Add the leeks, the *bouquet garni* and the potatoes, tossing all ingredients. Cook until the potatoes are easily pierced with a fork.
4. Add the garlic and stir constantly until its aroma is released. Season with freshly cracked pepper.
5. Transfer all to a deeper sauce pan, allowing plenty of space. Increase the heat to medium high and pour in the stock, covering the vegetables. The amount that you use will depend on the consistency that you desire your soup. However, be careful of adding too much, as more may always be added.
6. Simmer, and allow the flavors to develop, maybe 15 minutes. Do not allow the liquid level to drop below that of the vegetables.
7. Remove from heat, extract *bouquet garni*, and allow to cool slightly.

Puree soup:

After the soup has cooled, puree it in small batches, and strain into a reserved saucepan, adding cream and seasoning with pepper.

To serve the soup, reheat, stirring gently. Suggested accompaniments include flatbread crackers or crispy french bread. Soup is an accessory which derives its identity from its ingredients, allowing its consumer to either dress it up or down. It is an inspirational companion to a screeching winter evening and a crackling fireplace, or as the first course of a midnight dinner. The soup may be refrigerated, covered, for a few days.

Professional File: *Marydale Rogan*

Jonah Half—The Bucknellian

Marydale Rogan, the most recent addition to Physical Plant administration, views her job as a challenging opportunity.

By Stephanie Kardohely

Bucknellian Staff Writer

Tucked in the side of a hill adjacent to Tustin Gym is, as draftsman Sam Dunkelberger dubbed it, "the nerve center of the campus," a.k.a. the physical plant office. Originally the powerhouse for the University, this building now houses the offices of Physical Plant administrators including Marydale Rogan.

Rogan is Physical Plant's first assistant director for Administrative Programs. Hired in December 1995 to meet growing needs for personnel training and support, she is the most recent addition to Physical Plant administration.

Rogan comes to the University with a B.S. in Business Administration and an M.S. in Education with a concentration in microcomputers. Prior to coming to the University, Rogan worked for the finance departments of Corning Glass and Dresser-Rand, taught college-level computing courses at universities including Penn State and Susquehanna, and worked as a personnel and marketing officer for a Williamsport bank.

Rogan views the new Assistant Director's position as a challenging opportunity with room for professional growth. "One of the main things they needed this position to do was to develop and manage a trainee safety program." Since joining the staff of Physical Plant, she has instituted a Physical Plant Safety Committee, and edits a monthly newsletter for the staff.

"My job is to make people aware, to make them responsible for their own safety and the safety of others," she said.

One of the strengths Rogan brings to Physical Plant is her computer knowledge. She works in close collaboration with Lorraine Eisenhuth of Computer and Communication Services to ensure the efficiency of computer hardware and software essential to Physical Plant operations.

Rogan's responsibilities also include working with personnel issues on a person-to-person level, an area in which she cites her gender as being an asset. She explained, "we have a lot of women at physical plant. Before I was hired they didn't have a woman at the administrative level that they could talk to."

When Rogan was asked what was most unique about her position at the University she responded, "In many business settings there is a lot of male/female conflict. Here at Bucknell you don't feel that. When I came here and met Dennis Hawley and the other staff members, I just knew this was where I wanted to be."

Rogan On...

Close quarters: With the creation of Rogan's new position, Physical Plant had to create a workspace for her. Rogan now works in a small, windowless cubby. Gesturing around her office she laughs, "We're out of space. They hired me and had no place to put me." Office renovations should soon provide a little more stretch room.

Favorite things: "I love antiques and I love auctions. I love going to auctions and learning the history of an item. I love shopping and I love to read novels."

Time-off: What would Rogan do on her ideal day off? "My husband and I love to travel—we're planning our first trip to Europe this summer. But given one day off I'd go to a state auction. I'd absolutely enjoy it."

Time-out: Commuting daily from Williamsport to Lewisburg gives Rogan some quiet time. "It's a 35 minute drive. I enjoy being in the car; it gives me time to think before I start the day."

Students: As a former computer instructor, Rogan reflects, "I still love teaching. I taught a lot of non-traditional students so you get to meet people with all different lifestyles: young people, retired people and grandparents who want to know as much as their grandchildren know about computers."

Out to lunch: If Rogan could talk with anyone over lunch who would it be? "...Bro Adams," says Rogan. "In a candid conversation I would ask why he chose to come to Bucknell, what he sees as the future of Bucknell and what personal challenges he faces as president."

Contra dance
a rollicking good time

By Micah Schweizer

Bucknellian Staff Columnist

Local Color

While many Friday evenings in Lewisburg offer slim pickings in the entertainment realm, the first Friday of the month is an anomaly in this respect. The Lewisburg Club now offers a rollicking good time in the form of contra dance, a traditional form of folk dancing similar to square dancing, but done in long lines.

A live band provides the music in the form of jigs, reels, waltzes, and hornpipes, while a caller gives instruction on the dance steps. Tomorrow evening, February 7, the band will be Total Hip Replacement (and as its name implies, it's totally hip), a Lewisburg band consisting of hammered dulcimer, guitar, and upright bass.

Having spoken with some of my friends on the subject of contra dancing, I have found that there are some misconceptions which need to be dispelled. First of all, contra dancing does not serve as "hick" Mecca. You will not find Market Street lined with pick-up trucks sporting Tasmanian Devil mudflaps and gun racks in the back window. Contra dance draws a broad range of people and ages, all brought together by the common desire to hear some good music and bust a move on the shiny maple dance floor.

Secondly, you do not need any dancing experience. If you can walk, you are fully equipped to contra dance. Basics are taught at 7:30 p.m., and the real dancing runs from 8 to 11 p.m. Additionally, the caller teaches all the individual dances before they are performed. You do not specifically need a partner, although dancing with a group of friends can be great fun.

There is a break with some refreshments, and the room is air conditioned. Wear comfortable clothes and soft-soled shoes, and you'll be all set to break it down tomorrow night.

The Lewisburg Club is located at 131 Market Street, between Second and Front Streets, across from the Lewisburg Hotel. The evening runs from 7:30 until 11 p.m., and the cost of admission is in the three dollar range. Hopefully I will see you there and maybe even dance with you (although this article should in no way be viewed as a solicitation for dance partners).

Here, the "attacker" is suited up for his own protection. This is needed as the training is full contact, and designed to be painful.

training session.

"The R.A.D. program talks about using physical defense as a last resort and using awareness and risk reduction strategies first," Butler said.

Participants in this 12-hour program are taught self-defense mechanisms and practice techniques on people dressed up in shiny, black, padded protective wear, known as the aggressor suit.

Butler believes that this program is a fresh new approach to self- defense and is unique because of the "empowering feeling" one can get from the simulation component.

Besides the actual training the staff members received, the package included 50 student manuals, a padded suit for simulations, three sets of strike pads and targets, and videos for future training sessions offered by certified University staff members on campus.

Because professional staff members at the University are now certified, training sessions can be offered consistently.

Professional staff members who attended the training session and are now certified are Butler, Sueellen Henry, program coordinator for Residential Colleges, Jim Middleton, administrative lieutenant in Public Safety, Susan Lovejoy and Ricky Philips of Public Safety, and James Wiltgen, assistant director of Housing and Residential Life.

R.A.D. was developed in 1989 by Virginia police officer Larry Nadeau. It is different from other self-defense courses and is copyrighted and taught under strict guidelines.

The program is now taught on 500 college campuses in the U.S. and Canada.

There will be four offerings of R.A.D. this semester: two sessions before spring break and two afterwards. One session will be held Monday and Wednesday evenings from 4:30 to 6 p.m. beginning Feb. 10 and running 3 weeks. Another session be held from 6-9 p.m. on Thursday evenings, starting Feb. 13 and running until March 6.

There will be sign ups in the Langone Center mall tomorrow or interested individuals can call Janice Butler in the Women's Resource Center or Sueellen Henry.

The program expenses were covered by the office of the Dean of Students, the President's Office, the Office of Public Safety, the Women's Resource Center, the Residential Colleges, the Residence Hall Association, and Bucknell Student Government.

ment. Amott has never had a complaint brought to her.

However, Thomas reported that occasionally inquiries into incidents are made due to either student or faculty complaints, and that if necessary, "the smoking policy committee could be brought together at any time to review any policy statements."

While the policy is inevitably violated on occasion, "most smokers are quite respectful of others," said Dennis Baumwoll, professor of English and the department chair.

As a smoker, Karl Patten, professor of English, suggested that a referendum concerning the Clean Air Policy be issued to everyone involved in campus life.

"Of course I don't like the policy. It seems like some are making decisions for everybody. But I guess the University can make its own decisions for its buildings," he said.

Write news.
We're awesome

POLICY

from page 3

Present.

A. Approval for the presence of alcohol as well as a rental agreement where appropriate, must be obtained from the Dean of Students. Certain exceptions are provided in Section II, below.

B. Consumption of alcoholic beverages will be limited to segregated areas into which only those 21 years of age and older will be permitted.

C. Beverages will be dispensed—by a trained, approved, bartender. And approved bartender cannot be under 21 years of age or a college undergraduate.

D. Security monitors will be hired who will require proof of age of those entering the segregated area.

E. Identification must be checked by approved security monitor or bartenders.

F. Alcoholic beverages will no be removed from the designated areas.

G. Signs will be clearly evident stating the rules pertaining to alcohol consumption.

H. Intoxicated persons must not be served. Those arriving in an intoxicated condition, even if of age, will be denied entrance.

I. Underage students in possession of alcohol, or who are intoxicated, will be cited by university security staff for violations of the university alcohol policy.

II. Exceptions and clarifications

A. University sponsored events for Trustees, Alumni, Parents and Faculty, and Functions held in the President's House.

1. These events do not require use of a rental agreement or segregated area. However, appropriate signs most be posted and a trained, professional, adult bartender—not an undergraduate—must control the dispensing of alcoholic beverages.

2. Wine served with meals must be dispensed by an approved bartender.

3. Alcoholic beverages must not be served to any intoxicated person of to anyone underage.

B. Events to which the University Community is Invited

Indoor functions involving the entire University community, such as building dedications, art exhibition openings, etc., must be alcohol free. Outdoor functions to which the entire population of the University is invited must also be alcohol free.

Explanation: *Experience has shown that it is difficult for security to monitor these events. White there are differing views regarding the desirability of alcohol for certain of these events, those events which do not fall within other organizational categories on this list are too large to permit the use of alcohol safely.*

Cooking with Katie

Leek and Potato Soup

Enrich your soul with the delicate integration of pan-roasted potatoes and three onions with the subtle intensity of a pureed soup. Whether you deem this as a first or a main course, it will impart its character through the illusion it casts. Its pale and creamy facade lends to your imagination the illusion of a soup infused with heavy cream, although the truth is hastily revealed. The personality of the soup stems from the combination of leeks with red and Spanish onion, and derives its body from the liberal use of potatoes. Gently chuckling with flavor, it parallels current desires of a moderate fat intake, judiciously fattened with the vigor of bacon and a mere dash of cream.

- ♣ 1/3 pound *lower sodium* bacon
- ♣ 1 red onion
- ♣ 1 Spanish onion
- ♣ 3 large leeks
- ♣ 2-6 garlic cloves
- ♣ 6 medium red potatoes
- ♣ fresh thyme
- ♣ 1 bay leaf
- ♣ chicken stock or reduced sodium canned broth
- ♣ 1/4 cup heavy cream
- ♣ freshly cracked black pepper

Assemble mise en place (Prepare and set aside ingredients):

1. Cut bacon crosswise into pieces approximately 1/4 inch wide.
2. Peel and chop onions into a medium dice.
3. *Prepare leeks*: Trim off the rough green ends and the base, reserving the white and pale green parts only. Chop into quarter inch rings, and submerge in cold water. Leeks tend to carry a significant amount of dirt, which necessitates a thorough bath. Carefully lift the leeks from the water, allowing any sediment to settle.
4. Peel garlic cloves, and chop finely.
5. Wash and peel the potatoes, chopping into half inch cubes.
6. Tie the herbs into a *bouquet garni*, which is typically a bundle of fresh herbs used to flavor without integration into the final product.

Make soup:

1. In a large (12") sauté pan, cook the bacon over medium heat, allowing it to become moderately crisp without burning. Do not drain the fat.
2. When the bacon becomes crisp, add the onions and sweat them in the rendered fat. They will be nearly translucent when they are adequately soft.
3. Add the leeks, the *bouquet garni* and the potatoes, tossing all ingredients. Cook until the potatoes are easily pierced with a fork.
4. Add the garlic and stir constantly until its aroma is released. Season with freshly cracked pepper.
5. Transfer all to a deeper sauce pan, allowing plenty of space. Increase the heat to medium high and pour in the stock, covering the vegetables. The amount that you use will depend on the consistency that you desire your soup. However, be careful of adding too much, as more may always be added.
6. Simmer, and allow the flavors to develop, maybe 15 minutes. Do not allow the liquid level to drop below that of the vegetables.
7. Remove from heat, extract *bouquet garni*, and allow to cool slightly.

Puree soup:

After the soup has cooled, puree it in small batches, and strain into a reserved saucepan, adding cream and seasoning with pepper. *To serve the soup, reheat, stirring gently. Suggested accompaniments include flatbread crackers or crispy french bread. Soup is an accessory which derives its identity from its ingredients, allowing its consumer to either dress it up or down. It is an inspirational companion to a screeching winter evening and a crackling fireplace, or as the first course of a midnight dinner. The soup may be refrigerated, covered, for a few days.*

EDITORIAL

Adams taps inconsistently into alcohol policy

The shock waves are still resounding throughout the campus. President Adams has made it clear that his decision is final. No matter how much students plead, beg or argue, tent party is going to be nonalcoholic.

Anger is acceptable; indeed, even understandable. Threats of revenge are unfortunate, but common. Disgust is prevalent. Most of the campus has entered an unexpected period of mourning for a glorious tradition.

But there's no use crying over a spilled beer. No one can deny that alcohol is a problem on this campus. A dry tent part is just President Adams' clever way of launching an attack on this abuse.

Or is it?

According to the letter that President Adams sent to the class of 1997 last week, the primary reason for this oh-so-subtle change with substantial consequences is his concern with underage drinkers and their ability to obtain alcohol. So, to combat this problem, he's decided to eliminate alcohol entirely from University events primarily designed for students, such as tailgating and tent party.

Let's think about this logic. Where do most students get alcohol on this campus? Certainly not at an annual event, where the majority of drinkers are "buzzed" even before they get to the actual affair. The guilty culprits are the parties that are held every day of the week, all year long.

Tent party is just the first step, right? Wrong. President Adams says he has no hidden agenda to make this a dry campus. House Party will not be affected, even though this weekend is the drinking mecca of the school year. Fraternity parties are safe from the recent dry spell. Of course, President Adams worries about the alcohol abuse at these events. He cares about what happens. But he doesn't plan on doing anything about it, other than declare a new policy affecting two popular events that happen once a year.

When it comes to other University events that involve alcohol and students besides tent part and tailgating, President Adams is a little hazy on the policy. Dine, Wine, and Be Fine strictly prohibits those students who are underage from attending. It's an educational program offered once a year, designed to help seniors learn proper etiquette at job interviews and to familiarize them with some finer points of life. The new policy would seemingly forbid the University to serve alcohol at events designed for students, a description that certainly fits this program.

Yet President Adams could not say if this event, or others like it, would definitely be cancelled. The interpretation of the policy is still up in the air, except for tent part and tailgating. Which hardly seems like a consistent and logical, not to mention fair, policy.

Taking steps to prevent and combat alcohol abuse is an admirable thing to do. Unless the effort is universal and not just targeted at two events that are just the foam in the beer mug, nothing worthy can be accomplished.

OPINIONS

Alcohol is not imperative for tent party

BY DEREK POWELL

Bucknellian Staff Columnist

So, Bro has cut the alcohol from Tent Party. And what a surprise—a public outcry from the class of 1997 ensues. Students are rioting at Skips. Various signs denouncing Adams' presidency are hanging out of windows. And I hear that a really effective boycott is going to paralyze whatever party does happen at the end of graduation.

I suppose that means we won't need any designated drivers.

In theory, the rationale behind President Adams' policy is sound. Remove the debilitating factor from an equation and there will be a reduced chance of error. In this situation, Adams has decided for a leaner, meaner Tent Party; and the absence of alcohol will result in smiling little seniors (and, uh, legal juniors) that will actually remember what they did that day.

Unfortunately, this results in a case of too little, too late. By removing alcohol at the final function of the year—and of many college careers—Adams and the administration should have anticipated such a strong backlash to a heavily revised policy. Remember, students have been training for four years for this event. To be able to drink copious amounts of watered-down beer and boxed wine—and not throw up, pass out, or hook up—takes skill. It takes determination. It takes a lot of practice.

Yet I fully support what Adams is trying to accomplish. The intentions behind banning alcohol at Tent Party are not meant to enrage those attending guests. Understandably, the freedom of choice has been removed, and students who were dying for that tasty Coors Really Light in a plastic cup are naturally dejected. But it's no longer an issue of choice. An argument that could have proven the intelligence and determination of the Class of 1997 has turned into a united and plaintive cry for alcohol. And that is where the problem lies.

If Adams truly wants to make some headway in reducing not only the number of alcohol-related incidents, but also the number of underage drinkers, he should cut directly to the freshman class.

This is where the cycle starts:

From day one many of them have been fed the mentality that the only way to have a good time and party on this campus, or anywhere, is to get extremely blitzed and go through the inebriated motions. So by senior year, drinking in parallel with partying is no longer just an option. It's a way of life. And so when Tent Party comes around and Bro decides to nix the booze, the seniors can't help it. They *need* it.

So in a sense, Tent Party is not about the alcohol. Nor is it about being 21 and being able to stand in line for hours to procure one measly glass of beer. Tent Party is the final chance to show up *already wasted* to display the training and education that they received for the past four years at a prestigious university.

This is going to happen whether or not alcohol is served at Tent Party.

As a cherished art form of many the Bucknell student, pre-partying has become almost as important as the actual event. Frat party? Pre-party. Sorority formal? Do a few shots of Absolut to make "I Will Survive" take on a more literal meaning. How about the Gala? No problem. If the flasks don't fit in the pocket, do it ahead of time so you can practice your own, personal decorations on the heavily mauled fieldhouse floor.

So Tent Party is the last goodbye. The final hurrah. The one last chance to show just how drunk you can really get.

Last chance? I don't think so.

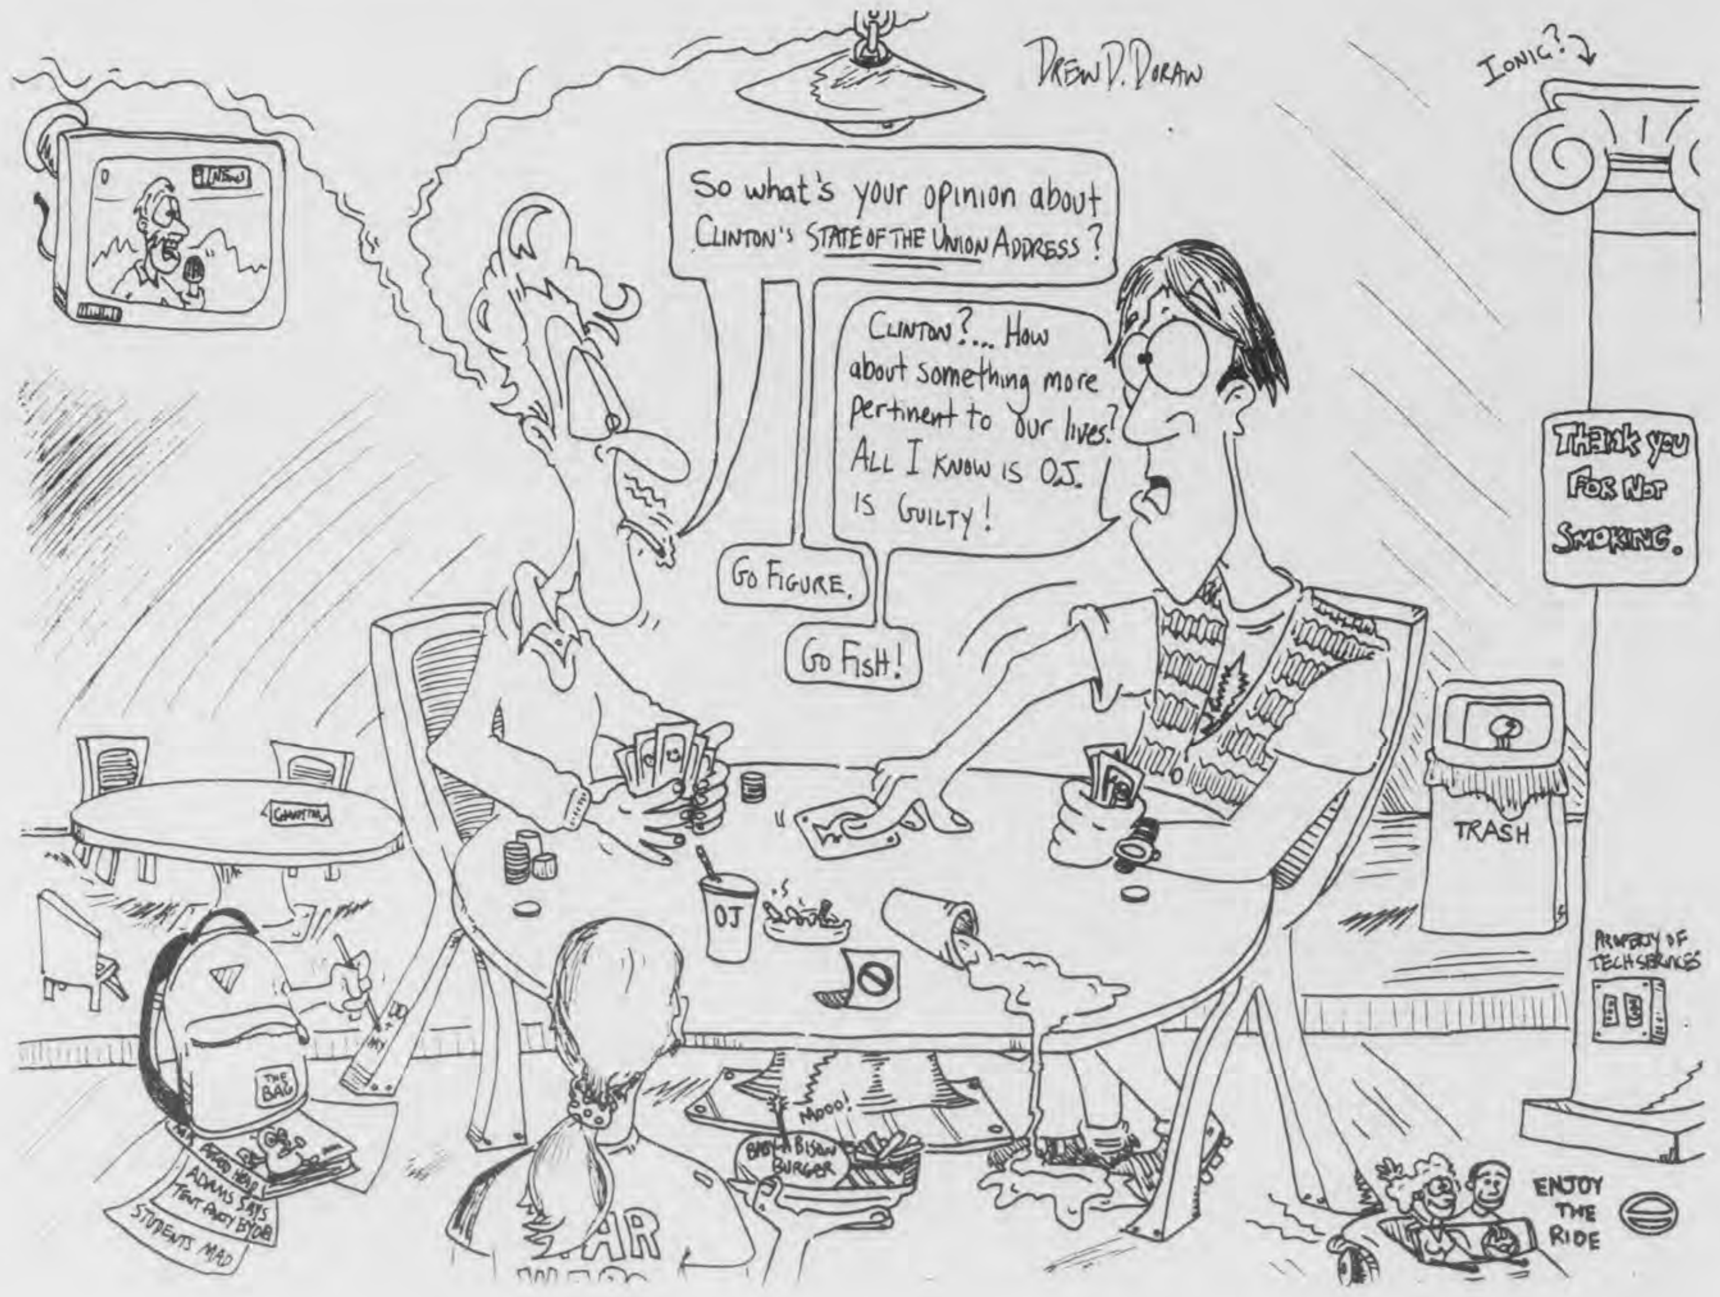
When I ask other seniors about what really is so special about Tent Party, they respond in a chilling, prophetic way that makes me want to immediately place 12 steps in front of them. "Hey—you get trashed. It's fun. It's normal. You see it at office parties every Christmas."

Wow. That's a relief. I didn't think it was that common. The fact is, such drunken behavior is generally tolerated here, and almost viewed as acceptable. Take a look at House Party weekend. The fact is, students view this kind of behavior as normal, and thus continue on such a tradition that leads many down the path of alcoholism. Before too long, we will be that drunken office party.

I admire the courage of a President who makes such a brazen move in the face of long-standing tradition—not to mention long lines for the bar. Look at this decision not as a petty attempt to deny seniors a tradition—but as an effort to redefine a fractured culture. For those of you who disagree with such a decision based on proof, maybe it's time to reconsider your priorities. Perhaps if Adams had been President four years ago, the camaraderie of our class would reflect a true desire to utilize our brains rather than soak them in numbing cocktails. And perhaps we should thank him rather than denounce him.

Grow up, Class of '97. You're 21.

Act like it.



DREW D. DORAN
IONIC?
So what's your opinion about CLINTON'S STATE OF THE UNION ADDRESS?
CLINTON?... How about something more pertinent to our lives? ALL I KNOW IS O.J. IS GUILTY!
GO FIGURE.
GO FISH!
THANK YOU FOR NOT SMOKING.
